INTERNAL RISK FACTORS

- 1. *If we are not able to obtain, renew or maintain the statutory and regulatory permits and approvals required to operate our business it may have a material adverse effect on our business.***

We require certain statutory and regulatory permits and approvals to operate our existing and proposed business. For more information on the status of our material statutory and regulatory permits, please refer to the Chapter titled “Government and Other Key Approvals” beginning on page no. 163 of this Draft Prospectus. We are required to renew certain permits and approvals and obtain new permits if we increase the scope of our business.

In addition to the above, there are certain approvals and licenses which need to be renewed by us due to our change in constitution from Pvt. to Public Limited. While we believe that we will be able to renew or obtain the required permits and approvals as and when required; here can be no assurance that the relevant authorities will issue any or all requisite permits or approvals in the timeframe anticipated by us, or at all. Failure by us to renew, maintain or obtain the required permits or approvals may result in the interruption of our operations or delay or prevent our expansion plans, if any and may have a material adverse effect on our business, financial condition and results of operations.

- 2. *We do not own some of our key properties which are used by us currently.***

We operate from our registered office situated at 910, 9th floor, Trade World, C-wing, Kamala City, Lower Parel (west), Mumbai – 400013 and also a storage facility situated at Shop No 10, Ground Floor, Shatrujay Heights, Near Maxus Mall, Bhayander west, Thane – 401101, which are rented premises. Further, the manufacturing unit of our subsidiary company has also been acquired on lease basis. In case of any discontinuance of rent . lease facility,

we will be required to locate new premises for our office, storage facility and for our subsidiary’s manufacturing unit. We may not be able to find the same in a timely manner or at all. Further, even if we are able to locate a new premise, they may be on terms not favourable to us or not within the parameters of our requirements. Our inability to identify the new premises may adversely affect the operations and financial conditions of our Company.

For details regarding such tenancy / rented properties, please refer to “Our Business – Properties” on page no. 85 of this Draft Prospectus.

3. There are outstanding legal proceedings involving our Company and our Group Companies. Any adverse decision in such proceedings may have a material adverse effect on our business, results of operations and financial condition and goodwill.

Our Company and Group Companies are parties to certain legal proceedings. These legal proceedings are pending at different levels of adjudication before various courts, tribunals and forums.

Mentioned below is the summary of the proceedings pending against our Company and Group Companies as on the date of this Draft Prospectus along with the amount involved, to the extent ascertainable/ quantifiable:

a. Litigations/ Proceedings against our Company:

Sr. No.	Nature of Matter	No. of Matters	Amount (to the extent quantifiable) (₹ in lakhs)
1	Litigation involving Income Tax Liabilities	3	0.27

b. Litigations/ Proceedings against our Group Companies:

Sr. No.	Nature of Matter	No. of Matters	Amount (to the extent quantifiable) (₹ in lakhs)
1	Litigation involving Income Tax Liabilities	5	2.10

Any developments in the proceedings, such as a change in Indian law, or rulings against our Company and our Group Companies by appellate courts or tribunal may constrain us to make provision in our financial statements that could increase our expenses ad current liabilities and the same may result in an adverse material impact on our business, goodwill, results or operation and financial condition. For further details, please refer to the chapter titled “Outstanding Litigations and Material Developments” beginning on page no.160 of this Draft Prospectus.

4. The capacity of the current plant of our subsidiary is not fully utilized, consecutively, if there is also any under-utilization of our proposed expanded capacities, this in turn could affect our ability to fully absorb fixed costs and thus may adversely impact our financial performance.

The capacities of various product types at our subsidiary’s Plant have not been fully utilized over the last three financial years, the details of which are as follows:

Product	Particulars	For the Financial Year	
		2014-15	2015-16
Wafers line (Semi Auto)	Installed Capacity (kg/day)	N. A.	1200
	Utilized Capacity (kg/day)	N. A.	600
	Utilized Capacity (%)	N. A.	50%
Fryums (Manual)	Installed Capacity (kg/day)	N. A.	600
	Utilized Capacity (kg/day)	N. A.	300
	Utilized Capacity (%)	N. A.	50%

Further, we propose to expand these production capacities based on our estimates of market demand and profitability. In the event of non-materialization of our estimates and expected order flow for our products and/or failure of optimum utilization of our capacities, due to factors including adverse economic scenario, change in demand or for any other reason, our capacities may not be fully utilized thereby impairing our ability to fully absorb our fixed cost and may adversely impact our consolidated financial performance.

5. *Inventories and trade receivables form a major part of our current assets and net worth. Failure to manage our inventory and trade receivables could have an adverse effect on our net sales, profitability, cash flow and liquidity.*

We are in the business of trading of edible oil, rice and pulses and also manufacturing of potato chips and fryums (through our subsidiary). Our Company's business is working capital intensive and hence, inventories and trade receivables form a major part of our current assets and net worth. The results of operations of our business are dependent on our ability to effectively manage our inventory (traded goods, raw materials and finished goods) and trade receivables.

To effectively manage our inventory, we must be able to accurately estimate customer demand and supply requirements and purchase new inventory accordingly. However, if our management misjudges expected customer demand, it could cause either a shortage of products or an accumulation of excess inventory. Further, if we fail to sell the inventory we purchase or manufacture, we may be required to write-down our inventory or pay our suppliers without new purchases, or create additional vendor financing, all of which could have an adverse impact on our income and cash flows.

To effectively manage our trade receivables, we must be able to accurately evaluate the credit worthiness of our customers and dealers and ensure that suitable terms and conditions are given to them in order to ensure our continued relationship with them. However, if our management fails to accurately evaluate the credit worthiness of our customers, it may lead to bad debts, delays in recoveries and / or write-offs which could lead to a liquidity crunch, thereby adversely affecting our business and results of operations. A liquidity crunch may also result in increased working capital borrowings and, consequently, higher finance cost which will adversely impact our profitability.

6. *We have entered into certain related party transactions and may continue to do so.*

We have entered into related party transactions with our Promoters, Directors, Promoter Group and Group Companies aggregating to ₹ 1024.85 lakhs for the last financial year ended March 31, 2016. While we believe that all such transactions have been conducted on the arm's length basis, however it is difficult to ascertain whether more favourable terms would have been achieved had such transactions been entered with unrelated parties. Furthermore, it is likely that we will enter into related party transactions in the future. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our financial condition and results of operation. For details of these transactions, please refer to section titled "Annexure XXII - Related Party Transactions" on page no. 149 of this Draft Prospectus.

7. *We do not have any long-term agreement or contract for the supply of our traded goods and raw materials and we are exposed to price and supply fluctuations.*

We currently have well established relations with our suppliers for procuring the traded goods from various companies for different types of oils and agri-commodities. However, these relationships are on an oral basis and no specific agreement / MoU have been entered into between our Company and our suppliers and we typically transact on an invoice basis for each order. These suppliers have accord us with ready supplies based on trust, service and the ready finance provided by us. In the absence of written agreements, our suppliers can withdraw their oral commitments from us at any time. There can be no assurance that there will not be a significant disruption in the supply of these traded goods from current sources, including our agencies, or, in the event of a disruption, that we would be able to locate alternative suppliers of the goods of comparable quality on terms acceptable to us, or at all. Identifying a suitable supplier involves a process that requires us to become satisfied with their quality control, consistency, responsiveness and service, financial stability and other ethical practices.

Further, our subsidiary also does not have any long term contracts for the raw materials required for manufacture of wafers, fryums and namkeens and thus cannot assure that our raw material supply will not face disruption leading to either disruption in our subsidiary's manufacturing activity or a complete stopping of the same. Certain raw materials are agricultural produces and their supply may be regulated by various government / regulatory authority or organised markets. If we are unable to maintain our relationship with our current raw material suppliers it may prove difficult to obtain the same from other players.

Any delay, interruption or increased cost in the supply of our traded goods or raw materials pertaining to our products arising from a lack of long-term contracts could have an adverse effect on our ability to meet customer demand for our products and result in lower revenue from operations both in the short and long term.

8. *Failure on our part to meet consumer expectations could impact our business operations.*

Our business depends on consumer preferences which cannot be predicted with certainty and are subject to rapid change. We feel that if we fail to understand and in turn respond in a timely and appropriate manner to changing consumer demand with quality products, our brand name and brand image may be impaired and in turn result in decline in sales or leave us with substantial amount of unsold inventory. We may not be able to successfully meet changing consumer demands in future. In addition, any new products or brands that we introduce in future may not be successfully received by retailers and consumers. Any failure on our part to successfully meet consumer demand or preference may negatively affect our business, financial condition and results of operations.

9. *Our Company has not entered into any long-term contracts with any of its customers and we typically operate on the basis of orders. Inability to maintain regular order flow would adversely impact our revenues and profitability*

Our Company has had long standing business relationships with certain customers and has been supplying our products to such customers, for several years (including the period of operations under proprietorship concern). However, we have not entered into any specific contracts with these customers and we cater to them on an order-by-order basis. As a result, our customers can terminate their relationships with us without any notice and, without consequence, which could materially and adversely impact our business. Consequently, our revenue may be subject to variability because of fluctuations in demand for our products. Our Company's customers have no obligation to place order with us and may either cancel, reduce or delay orders.

Although we place a strong emphasis on quality, timely delivery of our products and prompt, in the absence of contracts, any sudden change in the buying pattern of buyers could adversely affect the business and the profitability of our Company.

10. *We depend on a limited number of customers for a significant portion of our revenues. The loss of a major customer or significant reduction in production and sales of, or demand for our products from, our major customers may adversely affect our business, financial condition, results of operations and prospects.*

A significant majority of our income from operations is from sales of edible oils and agri-commodities like rice and pulses in the domestic market. We depend on a limited number of customers for a significant portion of our revenues. Revenue from our top 10 customers constituted 82.59% of our income from operations for financial year ended March 2016, respectively. Demand for our traded products is related to various factors such as easy availability of finance, demand of specific edible oil and commodities and the quality of same supplied by us. Further, with the increase in the size of the food industry, various new manufacturers and traders are providing other variants of edible oils and we always run the risk of trading oils that are no longer required in common food industry. This may result in our customers opting for other oil suppliers. Any loss of client base, out of our existing clients, will impact our overall sales, resulting in a sharp decline in our revenues. Further, we face immense competition from other agri-commodity suppliers and processors, organised as well as unorganised, which may result in some of our customers reducing their orders to us. Any reduction in orders from our existing clients may result in a decline in our revenues.

While we are constantly striving to increase our customer base and reduce dependence on any particular customer, there is no assurance that we will be able to broaden our customer base in any future periods or that our business or results of operations will not be adversely affected by a reduction in demand or cessation of our relationship with any of our major customers.

11. *We have availed of certain loans from Banks, pursuant to the Financing Agreements that we have entered into with them. Pursuant to the terms of such agreements, we require consents from the Bankers for a number of corporate actions, including for undertaking this Issue, which have not been obtained as on date. Any failure to obtain such consents may result in a default under the terms of the Financing Agreements.*

Pursuant to the Financing Agreements entered into by us with the Banker(s), we are required to obtain consents from the respective Bankers to undertake certain actions, including this Issue and for completion of the requirements pertaining to this Issue. Though, we have informed both our bankers orally of our intention to undertake this Issue, as on date, we have not obtained consents from our banker(s), and the same is awaited.

While our Company intends to obtain all the necessary consents in relation to this Issue from our banker(s) prior to the filing of the Prospectus with the RoC, undertaking this Issue without obtaining the banker's consents, or in

contravention of any conditions contained in such contents, may constitute a breach of the Financing Agreements. Any default under the Financing Agreements may enable our banker(s) to cancel any outstanding commitments, accelerate the repayment and enforce their security interests. If our obligations under the Financing Agreements are accelerated, our financial condition and operations could materially and adversely be affected.

12. *Our inability to manage growth could disrupt our business and reduce profitability.*

A principal component of our strategy is to continuously grow by expanding the size and geographical scope of our businesses. This growth strategy will place significant demands on our management, financial and other resources. It will require us to continuously develop and improve our operational, financial and internal controls. Continuous expansion increases the challenges involved in financial management, recruitment, training and retaining high quality human resources, preserving our culture, values and entrepreneurial environment, and developing and improving our internal administrative infrastructure. Any inability on our part to manage such growth could disrupt our business prospects, impact our financial condition and adversely affect our results of operations.

13. *If we suffer a large uninsured loss or if we suffer an insured loss that significantly exceeds our insurance coverage, our financial condition and results of operations may be adversely affected.*

Our business, assets and stocks could suffer damage from fire, natural calamities, misappropriation / burglary or other causes, resulting in losses, which may not be fully compensated by insurance. While we believe that we maintain insurance coverage in amounts consistent with industry norms, our insurance policies do not cover all risks and are subject to exclusions and deductibles. There can be no assurance that the terms of our insurance policies will be adequate to cover any damage or loss suffered by us or that such coverage will continue to be available on reasonable terms or will be available in sufficient amounts to cover one or more large claims, or that the insurer will not disclaim coverage as to any future claim.

Further, we are required to renew these insurance policies from time to time and in the event, we fail to renew the insurance policies within the time period prescribed in the respective insurance policies or not obtain at all, we may face significant uninsured losses. If we suffer a large uninsured loss or if any insured loss suffered by us significantly exceeds our insurance coverage, our business, financial condition and results of operations may be adversely affected.

14. *Our entire revenues are derived from sales made in the State of Maharashtra in India. Our growth strategy to expand into new geographic areas poses risks. We may not be able to successfully manage some or all of such risks, which may have a material adverse effect on our revenues, profits and financial condition.*

Our operations have been geographically concentrated in the State of Maharashtra. Our business is therefore significantly dependent on the general economic condition and activity in the State in which we operate along with the Central, State and Local Government policies relating to agri-commodity industry. Although investment in the agri-commodity industry in the areas in which we operate has been encouraged, there can be no assurance that this will continue. We may expand geographically, and may not gain acceptance or be able to take advantage of any expansion opportunities outside our current markets. This may place us at a competitive disadvantage and limit our growth opportunities. We may face additional risks if we undertake operations in other geographic areas in which we do not possess the same level of familiarity as competitors. If we undertake operations in different geographical locations than those currently is; we may be affected by various factors, including but not limited to:

- Adjusting our products to the new geographic area;
- Ascertaining the creditworthiness of the buyer and maintain credit terms with the same;
- Obtaining necessary Government and other approvals in time or at all;
- Failure to realize expected synergies and cost savings;
- Attracting potential customers in a market in which we do not have significant experience; and
- Cost of hiring new employees and absorbing increased costs.

15. *We constantly face a credit risk which may in turn affect our complete buying cycle adversely.*

As a trading Company, our primary competence is the ability to provide various kinds of edible oils and agri-commodities readily available to processors or other wholesalers and retailers and hence exploit the benefits of variety, economies of scale and credit shortage in the food trade. Our requirement of working capital is high mainly due to our ability to outright purchase of manufacturer's stock with full payment, thus relieving the manufacturer of its cost. This stock is then gradually consumed by our customers as per their requirements. In

order to maintain trading relations and manage competition, we provide long / short term credit facilities to our customers. Our Debtors turnover period is an average 60 days while our Creditors turnover period ranges in 25 days leading to a high working capital gap.

Our aforementioned buying cycle is heavily dependent on timely payments being received from our customers. If there is a default in payment from any of our customers or there is any unforeseeable delay in payment, our working capital cycle will be adversely affected. This may lead to our inability to maintain our working capital and thus lack the competitive advantage against various other traders leading to an adverse effect on our business operations and profitability.

- 16. We have availed of certain loans from Banks, pursuant to the Financing Agreements that we have entered into with them. Pursuant to the terms of such agreements, we require consents from the respective Bankers for a number of corporate actions, including for undertaking this Issue, some of which have not been obtained as on date. Any failure to obtain such consents may result in a default under the terms of the Financing Agreements.**

Pursuant to the Financing Agreements entered into by us with the Bankers, we are required to obtain consents from the respective Bankers to undertake certain actions, including this Issue and for completion of the requirements pertaining to this Issue. Though, we have informed our bankers orally of our intention to undertake this Issue, we have not obtained consents from our bankers for undertaking this Issue, and the same is awaited.

While our Company intends to obtain all the necessary consents in relation to this Issue prior to the filing of the Prospectus with the RoC, undertaking this Issue without obtaining the above mentioned consents, or in contravention of any conditions contained in such contents, may constitute a breach of the Financing Agreements. Any default under the Financing Agreements may enable our bankers to cancel any outstanding commitments, accelerate the repayment and enforce their security interests. If our obligations under the Financing Agreements are accelerated, our financial condition and operations could materially and adversely be affected.

- 17. Our Company has reported certain negative cash flows from its operating activity and investing activity, details of which are given below. Sustained negative cash flow could impact our growth and business**

Our Company had reported certain negative cash flows from our operating activities and investing activities in the previous years as per the restated financial statements and the same are summarised as under:

(₹ in lakhs)

Particulars	For the year ended March 31,	
	2016	2015
Cash flow from Operating Activities	(505.87)	(73.29)
Cash flow from Investing Activities	(19.31)	-
Cash flow from Financing Activities	537.72	75.00

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. If our Company is not able to generate sufficient cash flows, it may adversely affect our business and financial operations.

- 18. We may not be successful in implementing our business strategies.**

The success of our business depends substantially on our ability to implement our business strategies effectively or at all. Even though we have successfully executed our business strategies in the past, there is no guarantee that we can implement the same on time and within the estimated budget going forward, or that we will be able to meet the expectations of our targeted customers. Changes in regulations applicable to us may also make it difficult to implement our business strategies. Failure to implement our business strategies would have a material adverse effect on our business and results of operations.

- 19. We sell our products in highly competitive markets and our inability to compete effectively may lead to lower market share or reduced operating margins, and adversely affect our results of operations.**

Maharashtra is our primary market and we face competition in our business from local as well as nationwide suppliers and wholesalers of oil and agri-commodities like rice and pulses. The products that we sell are of a commodity nature, i.e. there are a large number of players trading same or similar products. Thus, competition in these markets is based primarily on demand and price. As a result, to remain competitive in our market, we must

continuously strive to reduce our procurement, transportation and distribution costs, improve our operating efficiencies and secure our materials requirements. If we fail to do so, other suppliers and wholesalers or manufacturers of similar products may be able to sell their products at prices lower than our prices, which would have an adverse effect on our market share and results of operations

Further, we cannot assure you that our current or potential competitors will not offer products comparable or superior to our products. Failure to match our product quality and consistency accordingly might have an adverse effect on our operations and financial results.

20. *We have incurred substantial indebtedness which exposes us to various risks which may have an adverse effect on our business and results of operations*

As of March 31, 2016, we have ₹ 538.82 lakhs (including current maturities but excluding non-fund based) of outstanding debt on our consolidated balance sheet. Our level of indebtedness has important consequences to us, such as:

- increasing our vulnerability to general adverse economic, industry and competitive conditions;
- limiting our flexibility in planning for, or reacting to, changes in our business and the industry;
- affecting our credit rating;
- limiting our ability to borrow more money both now and in the future; and
- increasing our interest expenditure and adversely affecting our profitability, since almost all of our debt bears interest at floating rates.

If any of these risks were to materialise, our business and results of operations may be adversely affected.

21. *Our business is heavily dependent on our suppliers.*

We do not manufacture any of the products that we trade in. As a trader of oils and agri-commodities like rice and pluses, our business is heavily depended on the products exported / manufactured by various traders / manufacturers. We are required to rely heavily on a few suppliers and the quality of products supplied by them. Since we do not manufacture any product ourselves, nor have any substantial marketing or branding requirements for business, we are reliant on our suppliers for all these aspects. Our sales and profitability would be adversely affected in case of any management inabilities or errors on part of our suppliers.

Following are some of the important factors about our business which we do not directly have control over and are dependent on our suppliers:

- Introduction of new products and its variants
- Marketing of these products on a large scale and overall branding in the state of Maharashtra
- Errors or rollbacks in sold products creating negative goodwill and consumer litigations
- Cost competitiveness of these products.

Further, being a trading Company concentrating mainly in the State of Maharashtra, we face the risk of our suppliers' reducing their focus in this state due to competitive pressures and other internal management decisions and hence we may not receive the necessary support from our supplier companies. Any negative development involving our suppliers and their products, could adversely affect our business growth, profitability, results of operations and goodwill and we may not be in a position to alter or avoid such developments.

22. *Orders placed by customers may be delayed, modified, cancelled or not fully paid for by our customers, which may have an adverse effect on our business, financial condition and results of operations.*

We may encounter problems in executing the orders in relation to our traded products, or executing it on a timely basis. Moreover, factors beyond our control or the control of our customers, including delays or failure to obtain necessary permits, authorizations, permissions and other types of difficulties or obstructions, may result in the postponement of the delivery of products or cause its cancellation. Further, since we do not execute long term contracts with our customers, the order could be cancelled or there could be changes in scope and / or scheduled delivery of the products. Accordingly, it is difficult to predict with certainty if, when, and to what extent we may be able to deliver the orders placed. Failure to deliver products on time could lead to customers delaying or refusing to pay the amount, in part or full, which may adversely affect our business.

In addition, even where a delivery proceeds as scheduled, it is possible that the contracting parties may default or otherwise fail to pay amounts owed. While we have not yet experienced any material delay, reduction in scope, cancellation, execution difficulty, delay or default in payment with regard to the orders placed with us, or any material disputes with customers in respect of any of the foregoing, any such adverse event in the future could materially harm our cash flow position and income. Any delay, modification, cancellation of order by our large customers may have material adverse effect on our financial condition and results of operations.

23. *Our Subsidiary's cost of production of potato wafers and other packaged foods is exposed to fluctuations in the prices of raw materials like potato, oil, etc. as well as its availability.*

Our subsidiary company, Naik Foods Pvt. Ltd. is exposed to fluctuations in the prices of various raw materials like potato, oil, etc. as well as its availability, particularly as we typically do not enter into any long term supply agreements with our suppliers and all the above mentioned raw materials are bought by our Company from various suppliers on a order to order basis. For instance, the prices and availability of potatoes are highly dependent on the agricultural produce of the vegetable, its storage and transport. Also, we require a certain breed of the potatoes for better quality wafers and the same is cultivated by a limited number of potato growers. Similarly, edible oil, mainly palm oil, is dependent upon the availability of the palm fruit pulp or kernel. We may be unable to make adequate provisions for the price fluctuations and, consequently, any adverse fluctuations that we have not factored in or provided for may adversely affect the consolidated results of our operations and our consolidated financial conditions.

We also face the risks associated with compensating for or passing on such increase in our cost of production on account of such fluctuations in prices to our customers. Particularly, we face the risk of our competitors being able to sell the products at lower rates than ours due to their economies of scales, if we pass on the increase in the cost of production to our customers through a corresponding increase in the price of our products in order to maintain our historical margins.

24. *Our Subsidiary has a manufacturing plant located in Maharashtra. Any delay in production at, or shutdown of, these facilities may in turn adversely affect our business, financial condition and results of operations.*

Our Subsidiary has a manufacturing facility which is located in Nashik in the State of Maharashtra. These facilities may be subject to operating risks, such as the breakdown or failure of equipment, power supply or processes, performance below expected levels of output, raw material shortage or unsuitability, obsolescence, labour disputes, strikes, lock-outs, non-availability of services of our external contractors, our ability to respond to technological advances and emerging industry and safety standards and practices in the industries we operate and propose to operate on a cost-effective and timely basis, earthquakes and other natural disasters, industrial accidents and the need to comply with the directives of relevant government authorities, and any other factors which may or may not be within our control. The occurrence of any of these risks could significantly affect our operating results. Although we take precautions to minimize the risk of any significant operational problems at our facilities, our business, consolidated financial condition, results of operations and the trading price of our Equity Shares may be adversely affected by any disruption of operations at our facilities, including due to any of the factors mentioned above.

25. *We have recently acquired a subsidiary – Naik Foods Pvt. Ltd. which is engaged in manufacturing of packaged foods. However, we do not have substantial experience of the business activities of our Subsidiary Company.*

Our Company is predominantly a trading Company and has been involved in trading of oils and agri-commodities since its incorporation. To aid us in expanding our scope in the food industry, we have acquired 51% shares in Naik Foods Pvt. Ltd, making it a subsidiary, through which we are currently carrying out manufacturing activities. Our subsidiary is involved in the manufacture of various types of packaged foods like potato wafers, fryums and other namkeens with an installed capacity of 150 kg per hour. However, our subsidiary is managed by persons who were part of its erstwhile management, and we are not yet fully actively involved.

Considering the fact that these activities will be relatively newer to our organization, we cannot assure that we would be able to:

- Adequately analyze key risks and other metrics prior to beginning our manufacturing activity;
- Develop a well trained operations team with relevant systems and processes to handle the unit;
- React effectively to any Government regulation which prohibits manufacture or trade or other such externality which would be having a major impact on cost of production;

Hence, the lack of experience in this new acquired line of business could adversely affect our ability to achieve our sales and key execution targets and hence adversely impact our future consolidated results of operations and financial conditions.

26. *The acquisition of other companies, businesses or technologies in the future could result in operating difficulties, integration issues and other adverse consequences due to our limited past experience in acquiring businesses.*

We have explored inorganic growth opportunities to enter into manufacture of food products thereby increasing our consolidated revenues and expand product presence and we may in the future acquire additional assets, technologies or businesses to complement our operations. For instance, in 2015-16, we acquired 51% control of Naik Foods Private Limited.

To foster our growth, we may consider making additional acquisitions in the future to expand our business. However, we have limited experience in acquiring businesses, and any acquisitions we undertake could limit our ability to integrate an acquired business and may create unforeseen operating difficulties and expenditures, including potentially dilutive issuances of the Equity Shares, incurrence of debt, contingent liabilities or amortization expenses or write-offs of goodwill, difficulties in integrating the operations, technologies, research and development activities, personnel and distribution, marketing and promotion activities of acquired businesses and ineffectiveness or incompatibility of acquired technologies. Our inability to identify suitable acquisition opportunities, entering into agreement with such parties or obtain the necessary financing to make such acquisitions could adversely affect our future growth. Moreover, the costs of identifying and consummating acquisitions may be significant. Also, acquired assets or businesses may not generate the financial results we expect. We may also have to obtain approvals and licenses from the relevant government authorities for the acquisitions and to comply with any applicable laws and regulations, which could result in increased costs and delay. We cannot assure you that we will be able to achieve the strategic objective for such an acquisition. Furthermore, if an acquisition generates insufficient revenues or if we are unable to manage our expanded business operations efficiently, our consolidated results of operations could be materially and adversely affected.

27. *We do not own the “ CKP” trademark, and our ability to use the trademark, name and logo may be impaired.*

We do not hold any trademarks or other forms of intellectual property protection in relation to our “ CKP” brand in our own name. One of our Group Entities, CKP Holding Private Limited (CHPL), had made various applications to the Trade Marks Registry, Mumbai for registration of trademarks (in various classes), including “CKP” (word and logo). Pursuant to a Trademark License Agreement dated September 16, 2016 entered into with CKP Holding Private Limited we have been granted a non-exclusive, non-transferrable license to use the “ CKP” trademark, name or logo in connection with our business in India. Being one of the Group Entities CHPL has allowed our Company the use of said trademark during the period of the Trademark License Agreement without any consideration.

The Trademark License Agreement can be terminated by either of the parties thereto upon 30 days’ prior written notice in accordance with its terms. Furthermore, the Trademark License Agreement can also be terminated by the Licensor in case of breach of any of the terms of the said Trademark License Agreement by our Company. In the event that the Trademark License Agreement is terminated, we may have to discontinue the use of the “ CKP” trademark and logo which may materially and adversely affect our reputation, business, financial condition, results of operation and prospects.

Third parties may infringe our intellectual property, causing damage to our business prospects, reputation and goodwill. Our efforts to protect our intellectual property may not be adequate and any third party claim on any of our unprotected brands may lead to erosion of our business value and our operations could be adversely affected. We may need to litigate in order to determine the validity of such claims and the scope of the proprietary rights of others. Any such litigation could be time-consuming and costly and a favourable outcome cannot be guaranteed. We may not be able to detect any unauthorized use or take appropriate and timely steps to enforce or protect our intellectual property. We cannot assure you that any unauthorized use by third parties of the trademarks will not similarly cause damage to our business prospects, reputation and goodwill.

For further details, see “*Our Business — Intellectual Property*” on page no. 84 of this Draft Prospectus.

28. *We are dependent on our Whole Time Director and Key Management team for success. Any loss of the said Personnel could seriously impair the ability to continue to manage and expand business efficiently.*

Our Company is depending significantly on the expertise, experience and continued efforts of our whole time director, Mr. Anup Karwa and our key managerial personnel. Mr. Anup Karwa has wide experience in trading and import export of various products and if he is unwilling to continue, the same shall hamper our growth prospects. Further if one or more members of our Key Managerial Personnel are unable or unwilling to continue in his/her present position, it may be difficult to find a replacement, and business might thereby be adversely affected. Our industry requires personnel with specific technical knowledge and experience for our trading and our subsidiary's manufacturing business. For e.g. our Promoter and CEO, Mr. Dhritish Kapadia has more than a decade of experience in the oil & agri-commodity trading business under his proprietorship firm. Pursuant to acquiring the said firm, Mr. Dhritish Kapadia plays a significant role in our continued success. If he is unwilling to continue, or decides to work independently, we may not be able to implement our future strategies and growth plans.

Competition for Key Managerial Personnel in our industry is intense and it is possible that our Company may not be able to retain existing Key Managerial Personnel or may fail to attract/ retain new employees at equivalent positions in the future. As such, loss of Key Managerial Personnel could adversely affect our business, results of operations and financial condition. For further details on the key managerial personnel of our Company, please refer to the chapter titled "Our Management" beginning on page no. 93 of this Draft Prospectus.

29. *There are various negative covenants in the agreements entered into by us and our lenders, which could put us at a competitive disadvantage and could have an adverse effect on our business, results of operations and financial condition.*

Our financing agreements contain provisions that restrict our ability to do, among other things, any of the following:

- Change or alter capital structure, unless stipulated by the Bank
- Effect any scheme of amalgamation or reconstitution.
- Implement a new scheme of expansion or take up an allied line of business / manufacture.
- Divert the funds raised to Inter Corporate Deposits, Debentures, Stocks & Shares, Real Estate, etc.
- Declare dividends without paying the due instalments, interests etc. to the Bank and without regularizing the Bank Accounts.
- Enlarge the scope of other manufacturing / trading activities.
- Withdraw moneys brought in by promoters / directors / friends and relatives.
- Invest any fund by way of deposits or loans or in share capital.
- Borrow or obtain credit facilities from any other Bank / Institution..

We must obtain the approval of the lenders under our financing agreements before undertaking these significant corporate actions. We cannot assure you that the lenders will grant the required approvals in a timely manner, or at all. The time required to secure consents may hinder us from taking advantage of a dynamic market environment. In addition to the restrictions listed above, we are required to maintain certain financial ratios under our financing agreements. These financial ratios and the restrictive provisions could limit our flexibility to engage in certain business transactions or activities.

Additionally, our financing agreements are secured by our movable, immovable or intangible assets (whether existing or future), goods and work-in-progress (whether existing or future) and by a personal guarantee of our Promoters. Such financing agreements enable the lenders to cancel any outstanding commitments, accelerate the repayment, exercise cross default provisions and enforce their security interests on the occurrence of events of default such as a breach of financial covenants, failure to obtain the proper consents, failure to perfect security as specified and such other covenants that are not cured. It is possible that we may not have sufficient funds upon such an acceleration of our financial obligations to pay the principal amount and interest in full. Further, if we are forced to issue additional equity to the lenders, your ownership interest in our Company will be diluted. It is also possible that future financing agreements may contain similar or more onerous covenants and may also result in higher interest cost.

If any of these events were to occur, our business, results of operations and financial condition may be adversely affected.

- 30. *Our Promoters play key role in our functioning and we heavily rely on their knowledge and experience in operating our business and therefore, it is critical for our business that our Promoters remain associated with us. Our success also depends upon the services of our key managerial personnel and our ability to attract and retain key managerial personnel and our inability to attract them may affect our operations.***

We benefit from our relationship with our Promoters and our success depends upon the continuing services of our Promoters who have been responsible for the growth of our business and are closely involved in the overall strategy, direction and management of our business. Our Promoters have been actively involved in the day to day operations and management since the incorporation of the Company. Accordingly, our performance is heavily dependent upon the services of our Promoters. If our Promoters are unable or unwilling to continue in their present position, we may not be able to replace them easily or at all. Further, we rely on the continued services and performance of our key executives and senior management for continued success and smooth functioning of the operations of the Company. If we lose the services of any of our key managerial personnel, we may be unable to locate suitable or qualified replacements, and may incur additional expenses to recruit and train new personnel, which could adversely affect our business operations and affect our ability to continue to manage and expand our business. Moreover, we do not maintain key person insurance to insure against the loss of key personnel.

Our Promoters, along with the key managerial personnel, have over the years built relations with manufacturers, wholesalers, customers and other persons who are connected with us. The loss of their services could impair our ability to implement our strategy, and our business, financial condition, results of operations and prospects may be materially and adversely affected.

- 31. *We are dependent on third party transportation providers for the delivery of our traded good and also for raw materials and other products at our subsidiary's manufacturing plant. Accordingly, continuing increases in transportation costs or unavailability of transportation services for our products, as well the extent and reliability of Indian infrastructure may have an adverse effect on our business, financial condition, results of operations and prospects.***

We trade in edible oil, rice and pulses manufactured by various companies and most of the goods are brought to our storage facility in Bhayender, Mumbai and / or delivered to our customers by third party transportation providers. Also, most of our raw material and our finished products are transported to and from our subsidiary's manufacturing unit in Nashik by third party transportation providers. Transportation strikes could have an adverse effect on our receipt of goods, raw materials and our ability to deliver our products to our customers. Non-availability of trucks could also adversely affect our receipt of goods, raw materials and the delivery of our products.

In addition, transportation costs in India have been steadily increasing over the past several years. While usually our supplier arranges direct transportation of the goods to our customer's facility / godown, any increase in transportation costs may affect our future orders, our pricing model and the ability of our suppliers to offer the transportation at affordable rate or at all. Also, we may not always be able to pass on these costs to our customers. Continuing increases in transportation costs or unavailability of transportation services for our products may have an adverse effect on our business, financial condition, results of operations and prospects.

Further, India's physical infrastructure is less developed than that of many developed nations, and problems with its port, rail and road networks, electricity grid, communication systems or any other public facility could disrupt our normal business activity, including our supply of goods, raw materials and the delivery of our products to customers by third-party transportation providers. Any deterioration of India's physical infrastructure would harm the national economy, disrupt the transportation of goods and supplies, and add costs to doing business in India. These problems could interrupt our business operations, which could have a material adverse effect on our results of operations and financial condition.

- 32. *Increased competition may result in decreased demand or lower prices for our edible oils and agri-commodity products which could reduce our profitability.***

We face substantial competition from existing and potential competitors who may seek to trade and / or manufacture the same or similar products as us in the particular area or competitors who are already manufacturing, distributing and selling agri-commodities which we propose to expand into. None of our registrations are granted exclusively to us and our competitors are free to seek registration for products for which we hold registrations. In the event that other players obtain registration for commodities that we have registered for, it may adversely affect our sales and margin in relation to such products.

Additionally, we compete with existing agri-commodity trading companies on the basis of portfolio of our product offerings, product traits, including quality consistency, as well as based on price, reputation, customer service and customer convenience. Some of our competitors may be large companies that have significantly greater resources and access than those available to us. If we are unable to compete effectively, including in terms of pricing or providing quality goods, our market share may decline, which could have a material adverse effect on our results of operations and cash flows.

33. Our Group Entities have incurred losses during the last three financial years.

Some of our Group Companies have incurred losses during the last three financial years, details of which are as under:

Unlisted Companies

(₹ in lakhs)

Name of the Company	March 31, 2015	March 31, 2014	March 31, 2013
Avichal Multitrade Private Limited	1.03	(0.19)	-
Encore Impex Private Limited	1.29	(0.05)	(0.05)
Amore Garments Private Limited	10.86	(0.13)	-
Debtone Corporate Advisors Private Limited	(33.56)	1.92	-
Moneylicious Capital and Advisors Private Limited	(0.96)	(7.81)	1.02
LFS Broking Private Limited	(41.88)	2.56	2.59

34. Our operations may be adversely affected by strikes, work stoppages or increased wage demands by our or our contractors’ workforce or any other industrial unrest or dispute.

While we have not experienced any industrial unrest or dispute at our subsidiary’s Nashik unit in the past, we cannot be certain that we will not suffer any disruption to our operations due to strikes, work stoppages or increased wage demands in the future. Further, if our work force in Nashik, unionizes in the future, collective bargaining efforts by labour unions may divert our management’s attention and result in increased costs. We may be unable to negotiate acceptable collective wage settlement agreements with those workers who have chosen to be represented by unions, which may lead to union-initiated strikes or work stoppages. Any shortage of skilled and experienced workers caused by such industrial unrest or disputes may adversely affect our business, results of operations and financial condition.

Further, under Indian law, we may be held liable for wage payments or benefits and amenities made available to “daily wage” workers. Any requirement to discharge such payment obligations, benefits or amenities or to absorb a significant portion of the “daily wage” workers on our own rolls may adversely affect our business, results of operations and financial condition

35. We are susceptible to product liability claims that may not be covered by insurance and may subject us to substantial expenditure thereby adversely affecting our reputation and if the claim is successful, could require us to pay substantial amounts.

We face the risk of loss resulting from, and the adverse publicity associated with, product liability lawsuits, whether or not such claims are valid. We may also be subject to claims resulting from our subsidiary’s manufacturing defects or negligence in storage, packaging or handling which may lead to the deterioration of the food products. Even unsuccessful product liability claims would likely require us to incur substantial expenses on litigation, divert management’s time, adversely affect our goodwill and impair the marketability of formulations.

We are liable for the quality of the edible oils and agri-commodities for the duration of their shelf life. Disputes over non-conformity of the food articles with prescribed quality standards or specifications including storage and transport specifications are generally referred to independent testing laboratories. If any independent laboratory confirms that the goods do not conform to the prescribed or agreed standards and specifications, we may be required to bear the expenses of replacing and testing such goods, which could adversely affect our business, results of operations, cash flows and financial condition.

Further, we do not have any insurance coverage for product liability and if we are to take the same, it may result in additional expense. From time to time, the food industry has experienced difficulty in obtaining desired product

liability insurance coverage. If any product liability claim not covered by insurance were sustained against us, it could adversely affect our business, financial condition, results of operations and cash flows.

- 36. *In addition to normal remuneration, other benefits and reimbursement of expenses some of our Directors (including our Promoters) and Key Management Personnel are interested in our Company to the extent of their shareholding and dividend entitlement in our Company.***

Some of our Directors (including our Promoters) and Key Management Personnel are interested in our Company to the extent of their shareholding and dividend entitlement in our Company, in addition to normal remuneration or benefits and reimbursement of expenses. We cannot assure you that our Directors or our Key Management Personnel would always exercise their rights as Shareholders to the benefit and best interest of our Company. As a result, our Directors will continue to exercise significant control over our Company, including being able to control the composition of our board of directors and determine decisions requiring simple or special majority voting, and our other Shareholders may be unable to affect the outcome of such voting. Our Directors may take or block actions with respect to our business, which may conflict with our best interests or the interests of other minority Shareholders, such as actions with respect to future capital raising or acquisitions. We cannot assure you that our Directors will always act to resolve any conflicts of interest in our favour, thereby adversely affecting our business and results of operations and prospects.

- 37. *We are required to incur substantial expenditure for our business operations and if we are not able to manage our financial requirements in the future, we may be required to obtain additional financing which may not be on terms commercially acceptable to us.***

We are required to incur substantial expenditure for conducting our business operations primarily in relation to making payments to our suppliers for the bulk quantities of edible oils and agri-commodities like rice and pulses purchased by us for our trading business. Also, substantial expenditure is incurred for obtaining registrations for trading, storing and manufacturing of food products. The actual amount and timing of our future capital requirements may differ from estimated requirements as a result of, amongst other things, unforeseen delays in conducting tests and trials, seeking or grant of registrations, or cost overruns while seeking registrations, changes in business plans due to prevailing economic conditions, unanticipated expenses and regulatory changes. If we are not able to manage our financial requirements from our internal accruals in the future, we may be required to seek additional debt or equity financing. Additional debt financing could increase our interest costs and require us to comply with restrictive covenants in our financing agreements. Additional equity financing could dilute our earnings per Equity Share and your interest in the Company, and could adversely impact the price of our Equity Share.

Our ability to obtain additional financing on favourable terms, if at all, will depend on a number of factors. We cannot assure you that we will be able to raise additional financing on acceptable terms in a timely manner or at all which could adversely impact our planned capital expenditure and our business.

- 38. *We have many group companies where some of our Promoters / Directors are actively involved.***

Our Company is part of a business conglomerate and our Promoters and Directors are also actively involved in various other group companies. Our Promoters may devote substantial time and resources to develop and grow the business of other group companies, which could result in lack of leadership in our Company and lead to negligence of business operations, quality and safety standards, customer and supplier relations and certain regulatory affairs. Though none of our group companies except our subsidiary company, are involved in business similar to us, we cannot guarantee that our promoters will divide their time and energy between our group companies and us. Though our key managerial personnel are well experienced to carry out the business activities, lack of involvement of our Promoters could have an adverse effect on our goodwill and financial performance.

RISK FACTORS RELATED TO EQUITY SHARES

- 39. *Any further issuance of Equity Shares by our Company or sales of Equity Shares by any significant shareholders may adversely affect the trading price of the Equity Shares.***

Any future issuance of Equity Shares by our Company could dilute the investors' shareholding. Any such future issuance of Equity Shares or sales of Equity Shares by any of our significant shareholders may also adversely affect the trading price of the Equity Shares, and could impact our ability to raise capital through an offering of securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares.

40. *There is no existing market for our Equity Shares, and we do not know if one will develop. Our stock price may be highly volatile after the Offer and, as a result, you could lose a significant portion or all of your investment.*

There is no guarantee that our Equity Shares will be listed on the Stock Exchanges in a timely manner or at all and any trading closures at the Stock Exchanges may adversely affect the trading price of our Equity Shares. Prior to the Issue, there has not been a public market for the Equity Shares. Further, we cannot predict the extent to which investor interest will lead to the development of an active trading market on the Stock Exchanges or how liquid that market will become. If an active market does not develop, you may experience difficulty selling the Equity Shares that you purchased. The Issue Price is not indicative of prices that will prevail in the open market following the Issue. Consequently, you may not be able to sell your Equity Shares at prices equal to or greater than the Issue Price. The market price of the Equity Shares on the Stock Exchanges may fluctuate after listing as a result of several factors, including the following:

- Volatility in the Indian and other Global Securities Markets;
- The performance of the Indian and Global Economy;
- Risks relating to our business and industry, including those discussed in this Draft Prospectus;
- Strategic actions by us or our competitors;
- Investor perception of the investment opportunity associated with the Equity Shares and our future performance;
- Adverse media reports about us, our shareholders or Group Companies;
- Future sales of the Equity Shares;
- Variations in our quarterly results of operations;
- Differences between our actual financial and operating results and those expected by investors and analysts;
- Our future expansion plans;
- Perceptions about our future performance or the performance of agri-commodity trading companies generally;
- Performance of our competitors in the agri-commodity / Food industry and the perception in the market about investments in the Food industry;
- Significant developments in the regulation of the Food industry in our key locations;
- Changes in the estimates of our performance or recommendations by financial analysts;
- Significant developments in India's economic liberalisation and deregulation policies; and
- Significant developments in India's fiscal and environmental regulations. There has been significant volatility in the Indian stock markets in the recent past, and our Equity Share

Price could fluctuate significantly as a result of market volatility. A decrease in the market price of the Equity Shares could cause you to lose some or all of your investment.

41. *There are restrictions on daily movements in the price of the Equity Shares, which may adversely affect a shareholder's ability to sell, or the price at which it can sell, the Equity Shares at a particular point in time.*

The price of the Equity Shares will be subject to a daily circuit breaker imposed by all stock exchanges in India which does not allow transactions beyond a certain level of volatility in the price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by the SEBI on Indian stock exchanges. The percentage limit on our circuit breaker is set by the stock exchanges based on the historical volatility in the price and trading volume of the Equity Shares. The stock exchanges do not inform us of the percentage limit of the circuit breaker from time to time, and may change it without our knowledge. This circuit breaker effectively limits upward and downward movements in the price of the Equity Shares. As a result, shareholders' ability to sell the Equity Shares, or the price at which they can sell the Equity Shares, may be adversely affected at a particular point in time.

42. *Our ability to pay dividends in the future may be affected by any material adverse effect on our future earnings, financial condition or cash flows.*

Our ability to pay dividends in future will depend on our earnings, financial condition and capital requirements, and that of our Subsidiary and the dividends they distribute to us. Our business is working capital as well as capital intensive. We further propose to incur capital expenditure in increasing our scope of trading in the agri-commodity by adding various food grains, poultry feeds, etc. We may be unable to pay dividends in the near or medium term, and our future dividend policy will depend on our capital requirements and financing arrangements in respect of our operations, financial condition and results of operations.

EXTERNAL RISK FACTORS**43. *Political, economic and social changes in India could adversely affect our business.***

Our business, and the market price and liquidity of our Company's shares, may be affected by changes in Government policies, including taxation, social, political, economic or other developments in or affecting India could also adversely affect our business. Since 1991, successive governments have pursued policies of economic liberalization and financial sector reforms including significantly relaxing restrictions on the private sector. In addition, any political instability in India may adversely affect the Indian economy and the Indian securities markets in general, which could also affect the trading price of our Equity Shares.

44. *Any changes in the regulatory framework could adversely affect our operations and growth prospects.*

Our Company is subject to various regulations and policies. For details see section titled "Key Industry Regulations and Policies" beginning on page no. 86 of this Draft Prospectus. Our business and prospects could be materially adversely affected by changes in any of these regulations and policies, including the introduction of new laws, policies or regulations or changes in the interpretation or application of existing laws, policies and regulations. There can be no assurance that our Company will succeed in obtaining all requisite regulatory approvals in the future for our operations or that compliance issues will not be raised in respect of our operations, either of which could have a material adverse effect on our business, financial condition and results of operations.

45. *Our business is subject to a significant number of tax regimes and changes in legislation governing the rules implementing them or the regulator enforcing them in any one of those jurisdictions could negatively and adversely affect our results of operations.*

The revenues recorded and income earned is taxed on differing bases, including net income actually earned, net income deemed earned and revenue-based tax withholding. Taxes & other levies imposed by Government of India or other state governments; as well as other financial policies & regulations, may have a material adverse effect on business, financial condition & results of operation.

46. *Natural calamities and force majeure events may have an adverse impact on our business.*

Natural disasters may cause significant interruption to our operations, and damage to the environment that could have a material adverse impact on us. The extent and severity of these natural disasters determines their impact on the Indian economy. Prolonged spells of deficient or abnormal rainfall and other natural calamities could have an adverse impact on the Indian economy, which could adversely affect our business and results of operations.

47. *Hostilities, terrorist attacks, civil unrest and other acts of violence could adversely affect the financial markets and our business.*

Terrorist attacks and other acts of violence or war may adversely affect the Indian markets on which our Equity Shares will trade. These acts may result in a loss of business confidence, make travel and other services more difficult and have other consequences that could have an adverse effect on our business. In addition, any deterioration in international relations, especially between India and its neighbouring countries, may result in investor concern regarding regional stability which could adversely affect the price of our Equity Shares. In addition, India has witnessed local civil disturbances in recent years and it is possible that future civil unrest as well as other adverse social, economic or political events in India could have an adverse impact on our business. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse impact on our business and the market price of our Equity Shares.

48. *Instability in financial markets could materially and adversely affect our results of operations and financial condition.*

The Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, especially in the United States of America or Europe, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors' reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets.

The global financial turmoil, an outcome of the sub-prime mortgage crisis which originated in the United States of America, led to a loss of investor confidence in worldwide financial markets. Indian financial markets have also experienced the contagion effect of the global financial turmoil, evident from the sharp decline in SENSEX, BSE's benchmark index. Any prolonged financial crisis may have an adverse impact on the Indian economy and us, thereby resulting in a material and adverse effect on our business, operations, financial condition, profitability and price of our Equity Shares.

49. Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

50. Conditions in the Indian securities market and stock exchanges may affect the price and liquidity of our Equity Shares.

Indian stock exchanges, which are smaller and more volatile than stock markets in developed economies, have in the past, experienced problems which have affected the prices and liquidity of listed securities of Indian companies. These problems include temporary exchange closures to manage extreme market volatility, broker defaults, settlement delays and strikes by brokers. In addition, the governing bodies of the Indian stock exchanges have from time to time restricted securities from trading, limited price movements and restricted margin requirements. Further, disputes have occurred on occasion between listed companies and the Indian stock exchanges and other regulatory bodies that, in some cases, have had a negative effect on market sentiment. If similar problems occur in the future, the market price and liquidity of the Equity Shares could be adversely affected. Further, a closure of, or trading stoppage on, either of the Stock Exchanges could adversely affect the trading price of our Equity Shares.

51. Third party statistical and financial data in this Draft Prospectus may be incomplete or unreliable.

We have not independently verified any of the data from industry publications and other sources referenced in this Draft Prospectus and therefore cannot assure you that they are complete or reliable. Discussions of matters relating to India, its economies or the industries in which we operate in this Draft Prospectus are subject to the caveat that the statistical and other data upon which such discussions are based may be incomplete or unreliable.

52. Significant differences exist between Indian GAAP and other accounting principles, such as US GAAP and IFRS, which may be material to investors' assessments of our Company's financial condition. Our failure to successfully adopt IFRS may have an adverse effect on the price of our Equity Shares. The proposed adoption of IFRS could result in our financial condition and results of operations appearing materially different than under Indian GAAP.

Our financial statements, including the financial statements provided in this Draft Prospectus, are prepared in accordance with Indian GAAP. We have not attempted to quantify the impact of IFRS or U.S. GAAP on the financial data included in this Draft Prospectus, nor do we provide a reconciliation of our financial statements to those of U.S. GAAP or IFRS. U.S. GAAP and IFRS differ in significant respects from Indian GAAP. For details, see "Presentation of Financial, Industry and Market Data" on page no. 7 of this Draft Prospectus. Accordingly, the degree to which the Indian GAAP financial statements included in this Draft Prospectus will provide meaningful information is entirely dependent on the reader's level of familiarity with Indian accounting practices. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in this Draft Prospectus should accordingly be limited.

India has decided to adopt the "Convergence of its existing standards with IFRS" and not the "International Financial Reporting Standards" ("IFRS"), which was announced by the MCA, through the press note dated January 22, 2010. These "IFRS based / synchronized Accounting Standards" are referred to in India as IND (AS). Public companies in India, including our Company, may be required to prepare annual and interim financial statements under IND (AS). The MCA, through a press release dated February 25, 2011, announced that it will implement the converged accounting standards in a phased manner after various issues, including tax related

issues, are resolved. Further, the Finance Minister, during the Budget speech, 2014, proposed the adoption of IND (AS) by Indian companies from fiscal 2016 on a voluntary basis, and from fiscal 2017 on a mandatory basis. Accordingly, it is not possible to quantify whether our financial results will vary significantly due to the convergence to IND (AS), given that the accounting principles laid down in the IND (AS) are to be applied to transactions and balances carried in books of accounts as on the date of the applicability of the converged standards (i.e., IND (AS)) and for future periods.

Further, we have made no attempt to quantify or identify the impact of the differences between Indian GAAP and IFRS or to quantify the impact of the difference between Indian GAAP and IFRS as applied to its financial statements. There can be no assurance that the adoption of IND-AS will not affect our reported results of operations or financial condition. Any failure to successfully adopt IND-AS may have an adverse effect on the trading price of our Equity Shares.

Moreover, our transition to IFRS reporting may be hampered by increasing competition and increased costs for the relatively small number of IFRS-experienced accounting personnel available as more Indian companies begin to prepare IFRS financial statements. Any of these factors relating to the use of IFRS-converged Indian Accounting Standards may adversely affect our financial condition.

SECTION III: INTRODUCTION

SUMMARY OF OUR INDUSTRY

INDIAN EDIBLE OIL INDUSTRY

Importance of Edible Oils in the Country’s Economy

Oilseeds and edible oils are two of the most sensitive essential commodities. India is one of the largest producer of oilseeds in the world and this sector occupies an important position in the agricultural economy, accounting for production of 27.51 million tons of nine cultivated oil seeds during the year 2014-15 (November-October) as per Final Estimates released by the Ministry of Agriculture on 09.05.2016. India contributes about 6-7% of the world oilseeds production. Export of Edible oils was 38,317.56 tons in the financial year 2014-15 valued at Rs 46,040.37 lakhs.

Types of Oils commonly in use in India

India is fortunate in having a wide range of oilseeds crops grown in its different agro climatic zones. Groundnut, mustard/rapeseed, sesame, safflower, linseed, nigerseed/castor are the major traditionally cultivated oilseeds. Soyabean and sunflower have also assumed importance in recent years. Coconut is most important amongst the plantation crops. Efforts are being made to grow oil palm in Andhra Pradesh, Karnataka, Tamil Nadu and North- Eastern parts of the country in addition to Kerala and Andaman & Nicobar Islands. Among the non-conventional oils, rice bran oil and cottonseed oil are the most important. In addition, oilseeds of tree and forest origin, which grow mostly in tribal inhabited areas, are also a significant source of oils. Figures pertaining to estimated production of major cultivated oilseeds, availability of edible oils from all domestic sources (from Domestic and Import Sources) during the last ten years are as under: -

(In lakh Tons)

Consumption pattern of edible oils in India

India is a vast country and inhabitants of several of its regions have developed specific preference for certain oils largely depending upon the oils available in the region. For example, people in the South and West prefer groundnut oil while those in the East and North use mustard/rapeseed oil. Likewise several pockets in the South have a preference for coconut and sesame oil. Inhabitants of northern plain are basically consumers of fats and therefore prefer Vanaspati, a term used to denote a partially hydrogenated edible oil mixture of oils like soyabean, sunflower, ricebran and cottonseed and oils. Many new oils from oilseeds of tree and forest origin have found their way to the edible pool largely through Vanaspati route. Of late, things have changed. Through modern technological means such as physical refining, bleaching and de-odorization, all oils have been rendered practically colorless, odorless and tasteless and, therefore, have become easily interchangeable in the kitchen. Oils such as soyabean cottonseed, sunflower, ricebran, palm oil and its liquid fraction- Palmolein which were earlier not known have now entered the kitchen.

Major features of edible oil economy

There are two major features, which have significantly contributed to the development of this sector. One was the setting up of the Technology Mission on Oilseeds in 1986 which has been converted into a National Mission on Oilseeds and Oil Palm (NMOOP) in 2014. This gave a thrust to Government's efforts for augmenting the production of

oilseeds. This is evident by the very impressive increase in the production of oilseeds from about 11.3 million tonnes in 1986-87 to 26.68 million tons in 2014-15. Most of the oilseeds are cultivated on marginal land and are dependent on rainfall and other climatic conditions. The other dominant feature which has had significant impact on the present status of edible oilseeds/oil industry has been the program of liberalization under which the Government's economic policy allowing greater freedom to the open market and encourages healthy competition and self regulation rather than protection and control. Controls and regulations have been relaxed resulting in a highly competitive market dominated by both domestic and multinational players.

INDIAN POTATO CHIPS/WAFER INDUSTRY

Potato chips production by the organized sector has increased rapidly after the introduction of the liberalization policy of the government of India during the last decade and presently about 6-7% of the total potato production is being utilized for processing in the country.

The **potato chips and wafers** are popular processed food items that give considerable value addition to potatoes. canteens, army establishments require potato chips in significant quantities. Furthermore, in an increasingly hectic financially well-off society there may be growing demand for appetizers which can be simple to buy, shop and eat, with a great increasing number being consumed ‘on the move’. With this background, the **potato wafers and chips** market seems to hold good growth prospects. According to global snack market analysis, potato chips account for an average of 35% of the total savory snacks market. The main consumers of **potato chips and wafers** are families especially in city and semi-urban areas. Besides, hotels, restaurants, canteens, armed service establishments require potato poker chips in significant quantities.

The Future

The industry is still growing at a rapid pace where French fries are showing the highest growth of nearly 20% followed by potato chips (17%) and potato powder/flakes (15%).

Assuming same growth rates in the near future the estimated quantity of potato tubers’ consumption by Indian processing industry in the organized sector is estimated to be around 1.54 metric tons which will be nearly 4.25% of the national potato production.

INDIAN RICE AND PULSES INDUSTRY

Rice

Rice is grown in many regions across India. For about 65% of the people living in India, rice is a staple food for them. India alone has about 45 Million Hectares of Area, and it produces close to 93 Million Metric Tons of rice from 2001 onwards. Out of the Indian states West Bengal is largest in rice production followed closely by UP and Andhra Pradesh. Punjab, Orissa and Tamil Nadu are the other growing states. Value of rice traded in India is equivalent to Rs. 34,800 crores.

Some facts-

- Out of the total agricultural and crop produce, rice alone accounts for 42% of this. It provides employment to 70% of citizens living in villages.
- Buffer stock available in the country is about 30 Million Tons.

Pulses

India is the largest producer (25% of global production), consumer (27% of world consumption) and importer (14%) of pulses in the world. Pulses account for around 20 per cent of the area under food grains and contribute around 7-10 per cent of the total food grains production in the country. Though pulses are grown in both Kharif and Rabi seasons, Rabi pulses contribute more than 60 per cent of the total production. The area under pulses has increased from 19 million ha. in 1950-51 to 25 million ha. in 2013-14, indicating an increase of 31 per cent whereas the production of pulses during the same period has increased from 8.41 million ha. to 19.27 million ha. an increase of over 100 per cent.

Despite increase in production, India has been the largest importer of pulses since the beginning of the present millennium. The import has increased to more than 20 per cent of the domestic production during 2009-10 and 2012-13. In the remaining years, it has been in the range of 15-20 per cent of the domestic production, except during 2003-04 to 2005-06 where it varied in the range of 11 to 12 per cent of the domestic production.

OUR STRENGTHS

Market Presence

CKP Products Limited (erstwhile Jai Maha Oil Depot Private Limited) is a well established oil trading company as it has acquired the running business of a Proprietary concern. The proprietorship concern has been engaged in the oil trading business ever since 1991, started by the Kapadia family and since then it has developed a considerable market presence in the oil trading business and also among various suppliers and the customers. We believe that this presence in the market for over 3 decades will prove to be beneficial for our continued growth and survival in the competitive market.

Compliance with Quality Standards

The Nasik unit, (owned by our subsidiary Naik Foods Private Limited) is an ISO 9001:2008, 22000:2005(FSMS) & HACCP certified for its scope of activities which include manufacture and supply of potato chips. We believe that such certification would allow us to market our products.

Experienced Senior Management Team

Our senior management team is experienced in the edible oil and food grain industry and in the application of marketing and distribution initiatives in this sector. The Promoter and the senior management team of our Company have significant industry experience and have been instrumental in the consistent growth of our Company's performance. Our Promoter and CEO, Mr. Dhritish Kapadia joined the oil trading business which was started by the Kapadia family in the year 1991 and thus has an experience of over 3 decades in this industry. Also our Promoter, Mr. Prafulla Bhat has wide experience in the trading and import/export of various commodities. We believe that our management team's experience and their understanding of the oil trading business will enable us to continue to take advantage of both current and future market opportunities. It is also expected to help us on addressing and mitigating various risks inherent in our business, including significant competition, reliance on independent agents, and fluctuations in prices.

Scalable Business Model

Our business model is order driven, and comprises of optimum utilization of our resources and thereby enabling us to achieve consequent economies of scale. We believe that this business model has proved successful and scalable for us in the last few financial years. We can scale upward as per the requirement generated by our Company.

The business scale generation is basically due to the development of new markets both international and domestic, by adopting aggressive marketing of the product, adding more products agri-trading industry like other oils, soybeans, food grains, poultry feeds, etc. and also by maintaining the consistent quality of the product.

Supply Chain

Our company procures certain part of its oil trading business through agents to whom the company pays commission. This enables the company to expand its sale and market of operation and reach even small markets and target even the niches. We believe that this will not only increase the target market or area of operation of the company but also improve the corporate image of the organization in the oil trading business.

OUR STRATEGIES

Facilitate Imports

The organization plans to directly import the edible oil instead of procuring it from an importer & hence a backward integration of its kind. Direct import of the edible oil will result in cost efficiency as the company may be able to procure the same at a lower cost, as compared to the price charged by the importers in India. This in turn will increase the profit margin of the company and will also help to structure its sale price accordingly.

Geographical expansion

The organization aims at expanding the reach of its business, which is currently confined to Maharashtra region to other states of the country as well. To start with, the company aims to target the western states of India & then across the length and breadth of the nation. By geographically expanding the company intends to create a PAN India market recognition in the oil trading business to increase its sales, area of operation and profitability in the long run. Further in order to increase our geographical reach and our trading business we propose to establish a subsidiary in Dafza (free zone) in Dubai during the financial year 2016-17.

Branding and Packaging

Currently the company supplies Soybean Oil, Palm Oil, Cotton Oil, Sunflower Oil, Olive Oil, Groundnut Oil, etc to its customers in a container of 10 Tons and above, however the company plans to start its own branding and packaging on the lines of huge MNC's & hence penetrate new markets as well. This will further help to increase/improve the presence of the company in the oil trading business.

Expand our manufacturing scope

Our subsidiary company currently has a manufacturing unit in Nashik which has capabilities for manufacture of potato wafers and fryums. The company plans to give many other FMCG ranges of packaged products like namkeens, banana chips, etc. under one roof. This will not only increase the product offerings, but also enable our subsidiary company to make better use of its resources. Further, variety of products offered to retailers for sale enhances the shelf value of the company, which may lead to higher sales. We also intend to tap various geographical markets which will be possible only once we have a broad product base.

Expanding customer base

Owing to the growing CAGR of the industry & Asia-Pacific being the largest palm oil consumer, the company aims to target more & more clients henceforth displaying an exponential rise in its market share. Expansion of customer base will also help the company to increase its sales, area of operation, profitability and presence in the oil trading business.

OVERVIEW OF THE GLOBAL AND INDIAN ECONOMY

Global Scenario

The world economy stumbled in 2015, amid weak aggregate demand, falling commodity prices and increasing financial market volatility in major economies. The world gross product is projected to grow by a mere 2.4 per cent in 2015, marking a downward revision from the 2.8 per cent forecast in the World Economic Situation and Prospects as of mid-2015.

The world economy is projected to grow by 2.9 per cent in 2016 and 3.2 per cent in 2017, supported by generally less restrictive fiscal and still accommodative monetary stances worldwide. The improvement in global growth is also predicated on easing of downward pressures on commodity prices, which should encourage new investments and lift growth, particularly in commodity dependent economies.

Indian Economy

India has emerged as the fastest growing major economy in the world as per the Central Statistics Organization (CSO) and International Monetary Fund (IMF). According to the Economic Survey 2015-16, the Indian economy will continue to grow more than 7 per cent in 2016-17.

The improvement in India’s economic fundamentals has accelerated in the year 2015 with the combined impact of strong government reforms, RBI’s inflation focus supported by benign global commodity prices.

India was ranked the highest globally in terms of consumer confidence during October-December quarter of 2015, continuing its earlier trend of being ranked the highest during first three quarters of 2015, as per the global consumer confidence index created by Nielsen.

According to IMF World Economic Outlook Update (January 2016), Indian economy is expected to grow at 7-7.75 per cent during FY 2016-17, despite the uncertainties in the global market. The Economic Survey 2015-16 had forecasted that the Indian economy will growing by more than seven per cent for the third successive year 2016-17 and can start growing at eight per cent or more in next two years. Foreign direct investment (FDI) in India have increased by 29 per cent during October 2014-December 2015 period post the launch of Make in India campaign, compared to the 15-month period before the launch.

Numerous foreign companies are setting up their facilities in India on account of various government initiatives like Make in India and Digital India. Mr. Narendra Modi, Prime Minister of India, has launched the Make in India initiative with an aim to boost the manufacturing sector of Indian economy. This initiative is expected to increase the purchasing power of an average Indian consumer, which would further boost demand, and hence spur development, in addition to benefiting investors. Besides, the Government has also come up with Digital India initiative, which focuses on three core components: creation of digital infrastructure, delivering services digitally and to increase the digital literacy. Finance Minister Mr. Arun Jaitley stated that the government is looking at a number of reforms and resolution of pending tax disputes to attract investments.

Edible Oil Industry

Global production and consumption of edible oil

The year 2015 witnessed some volatile movements in vegetable oil prices (Figure 1), with palm oil prices falling to new lows. In December 2015, the FAO Vegetable Oil Price Index inched up 2.9 points (2.1% M-o-M) to 141.1, primarily driven by a spike in soybean oil prices. This reflected uncertainty over Brazil’s soybean crop amid prospects of firming global soybean oil demand.

Overall, the index declined 19% Y-o-Y in 2015 to an average of 147 points, representing a 9-year low.

Around the world, it must be noticed that about 162 million tons of vegetal oils were produced and that about 70% of that production are accounted for four vegetal species:

1. **Soya oil**, about 26% of the world production, in USA, Argentina, Brazil and China. The world production of soybean oil was 62.3 million tons in 2014-15. Today, soybean is the world's leading source of oil as well as by-products and protein-rich seed meal. The highest domestic consumption is in Asia where soybean is a basic food since ancient times. About 21% of soybean oil is produced in the United States, 17% in Brazil, 26% in China, 16% in Argentina, 5% in European Union, and 4% in India. The major usages of soybean oil are for food industry (77%), biofuels (17%), and oleo chemicals (4%).
2. **Palm oil**, about 18% of the world production, in Malaysia, Indonesia and Africa. In 2000/01 the production was 24.3 million tones and in 2014-15 51.9 million tones, I.E. a 113 % increase in 14 years. The annual worldwide production of palm oil is the highest of any edible oil. In 2011, the major usages of palm oil are for food industry (77 %), biofuels (10 %), and oleo chemicals (8 %).
3. **Sunflower oil**, about 13% of the world oil production, in EEC, Russia and Argentina. 15.3 million tons in 2014-15. In 2015, the major usages of sunflower oil are for food industry (96%).
4. **Rapeseed oil**, about 12% of the world oil production, in EEC (26%), China (20.2%), India (11.3%), Canada (9.3%), and Japan (6.6%). 22.1 mt in 2014-15. In 2015, the major usages of rapeseed oil are for food industry (67%), biofuels (27%) and oleo chemicals (3%).

Indian Scenario

Importance of Edible Oils in the Country’s Economy

Oilseeds and edible oils are two of the most sensitive essential commodities. India is one of the largest producer of oilseeds in the world and this sector occupies an important position in the agricultural economy, accounting for production of 27.51 million tons of nine cultivated oil seeds during the year 2014-15 (November-October) as per Final Estimates released by the Ministry of Agriculture on 09.05.2016. India contributes about 6-7% of the world oilseeds production. Export of Edible oils was 38,317.56 tons in the financial year 2014-15 valued at Rs 46,040.37 lakhs.

Types of Oils commonly in use in India

India is fortunate in having a wide range of oilseeds crops grown in its different agro climatic zones. Groundnut, mustard/rapeseed, sesame, safflower, linseed, nigerseed/castor are the major traditionally cultivated oilseeds. Soyabean and sunflower have also assumed importance in recent years. Coconut is most important amongst the plantation crops. Efforts are being made to grow oil palm in Andhra Pradesh, Karnataka, Tamil Nadu and North- Eastern parts of the country in addition to Kerala and Andaman & Nicobar Islands. Among the non-conventional oils, rice bran oil and cottonseed oil are the most important. In addition, oilseeds of tree and forest origin, which grow mostly in tribal inhabited areas, are also a significant source of oils. Figures pertaining to estimated production of major cultivated oilseeds, availability of edible oils from all domestic sources (from Domestic and Import Sources) during the last ten years are as under:

(in lakh Tons)

Consumption pattern of edible oil in India

India is a vast country and inhabitants of several of its regions have developed specific preference for certain oils largely depending upon the oils available in the region. For example, people in the South and West prefer groundnut oil while those in the East and North use mustard/rapeseed oil. Likewise several pockets in the South have a preference for coconut and sesame oil. Inhabitants of northern plain are basically consumers of fats and therefore prefer Vanaspati, a term used to denote a partially hydrogenated edible oil mixture of oils like soyabean, sunflower, ricebran and cottonseed and oils. Many new oils from oilseeds of tree and forest origin have found their way to the edible pool largely through Vanaspati route. Of late, things have changed. Through modern technological means such as physical refining, bleaching and de-odorization, all oils have been rendered practically colorless, odorless and tasteless and, therefore, have become easily interchangeable in the kitchen. Oils such as soyabean cottonseed, sunflower, ricebran, palm oil and its liquid fraction- Palmolein which were earlier not known have now entered the kitchen.

Major Features of Edible Oil Economy

There are two major features, which have significantly contributed to the development of this sector. One was the setting up of the Technology Mission on Oilseeds in 1986 which has been converted into a National Mission on Oilseeds and Oil Palm (NMOOP) in 2014. This gave a thrust to Government's efforts for augmenting the production of oilseeds. This is evident by the very impressive increase in the production of oilseeds from about 11.3 million tonnes in 1986-87 to 26.68 million tons in 2014-15. Most of the oilseeds are cultivated on marginal land and are dependent on rainfall and other climatic conditions. The other dominant feature which has had significant impact on the present status of edible oilseeds/oil industry has been the program of liberalization under which the Government's economic policy allowing greater freedom to the open market and encourages healthy competition and self regulation rather than

protection and control. Controls and regulations have been relaxed resulting in a highly competitive market dominated by both domestic and multinational players.

Potato Chips/ Wafer Industry

Global Scenario

Though potato chips are consumed all over the world, their consumption and penetration levels vary widely across regions. Currently, the United States dominates the global potato chips market followed by Western Europe, Asia-Pacific and Other Europe.

Potato chips are one of the favourite snack foods consumed worldwide. The potato chips market has witnessed a substantial growth over the last several years, turning it into a multibillion-dollar market. Potato chips are prominent in the market due to their affordability and a cheaper price even for the premium products. They are popular among all age groups, but the growing young population (below 15 years) represents a key segment for potato chips.

This population is expected to expand by around 10% during 2016-2050 which will further drive its demand. Another major factor driving the global demand of potato chips is changing lifestyles. A busy lifestyle coupled with long working hours have reduced the tendency of people to have elaborate lunches and meals and at the same time increased their demand for a desk meal and packaged food. Other factors like increasing urbanization, rise in disposable incomes and growth of emerging markets are also expected to propel the demand of this market.

“Global Potato Chips Market worth US\$ 26 Billion”

According to a recently published report by IMARC group titled **“Potato Chips Market – Industry Trends, Manufacturing Process, Plant Setup, Machinery, Raw Materials, Cost and Revenue”** potato chips represent the second largest segment of the global savoury snack food market. The potato chips market has grown at a CAGR of around 4% during 2008-2015 and reached a market value worth US\$ 26 billion.

In emerging markets like Asia-Pacific, Middle-East, Eastern Europe etc., on the other hand, the potato chips market is projected to exhibit healthy growth rates. Numerous companies of varying size make up the potato chips industry. **Globally, PepsiCo** is the largest player in this market. Other major players include **Kraft Foods, Kellogg’s, Diamond, General Mills and Nestle.**

Indian Market Size:

Top snacks maker PepsiCo Foods has started slipping with a slew of smaller and regional brands eating into the market share of its flagship brands Kurkure snacks and Lays potato chips.

Kurkure and Lays, which dominate the Rs 9,400-crore Indian snacks market, have begun losing share to regional players such as Gujarat-based Balaji, Indore's Yellow Diamond and DFM Foods' Crax in addition to some variants of ITC's Bingo snacks, which are matching the multinational on pricing, variants and regionalization.

Industry official quoting Nielsen data said both Kurkure and Lays' market shares slipped 2-3% in the April-September period, while some others like ITC's Bingo, Balaji, Parle and even Yellow Diamond have gained. Nielsen data also shows that PepsiCo Foods' (Frito-Lay India) share in overall western snacks has slipped to 40% last fiscal from 48%.

The salted snacks market in the country has been growing 25% a year, and smaller players have been fuelling category growth as much as bigger ones like PepsiCo, ITC and Haldiram's. And they are attracting the attention of private equity players. Mid last year, Sequoia Capital invested close to \$30 million in Indore-based snack food maker Prakash Snacks, owner of Yellow Diamond chip which sells a range of chips and savoury puffs.

PepsiCo has been selling products at prices ranging from Rs 2 to Rs 55 across categories. Last year, it consolidated its mass-priced snacks under a new entity, Lehar Foods, to take on regional brands such as Balaji, Bikanervala and A-Top Foods.

Reasons for growth in India:

- 1. Changing consumer lifestyles and consumption patterns:** The increasing urbanization, growth in number of double income households, and rising time poverty has resulted in changing consumption patterns, especially in the food category. This has fueled the demand for convenience foods as consumers no longer have either the knowhow or the time to make these products at home. At the same time, the spurt in disposable incomes has resulted in the increased exploration of the various snack brands available in the market, whether traditional or western.
- 2. Growing consumer base:** Snacking is not just about children or youth. Snacking between meals is a habitual occurrence in the day-to-day lives of most Indian consumers. Further, snacks no longer cater to a single consumer segment, but instead have a diverse consumer appeal and are increasingly being consumed across different age groups. Branded snacks are also fast penetrating the semi-urban and rural space which has been traditionally dominated by unbranded or homemade products. As a result, the market has witnessed a high growth trajectory and various new players are foraying into the market while the existing ones are expanding to cash in on its growth potential.
- 3. Greater availability and affordability:** Branded snacks are now easily available across both modern and traditional retail formats, from supermarkets and mom-and-pop stores to small tea stalls, office canteens, paanwalas, etc. Most brands are available in multiple pack sizes including small ones at attractive price points (INR 5, 10, etc.) leading to higher affordability and increased category presence and more product trials.

Market share of major players

The Future

The industry is still growing at a rapid pace where French fries are showing the highest growth of nearly 20% followed by potato chips (17%) and potato powder/flakes (15%).

Assuming same growth rates in the near future the estimated quantity of potato tubers’ consumption by Indian processing industry in the organized sector is estimated to be around 1.54 metric tons which will be nearly 4.25% of the national potato production.

Rice and Pulses Industry

Global Scenario

Rice

Global rice utilization is forecast to expand by 1.5 percent in 2016/17 to 502.9 million tonnes. Growing food intake would account for much of this growth, rising 5.2 million tonnes over the year to 403.9 million tonnes. This level would be sufficient to support a 0.1 kilo advance in world per capita food consumption to 54.3 kilos. Volumes destined to feed and other uses (including seeds, non-food industrial and post-harvest losses) are similarly expected to rise to 18.2 million and 80.9 million tonnes, respectively. Official initiatives to dispose of surplus produce in the Far East, especially Japan, the Republic of Korea and Thailand, would sustain much of the increase in feed and industrial uses foreseen for 2016/17.

With global rice utilization forecast to outpace production for the second consecutive year, world rice inventories at the close of 2016/17 are anticipated to fall 4.0 million tonnes below their opening level to 165.5 million tonnes. This would result in the world stocks-to-use ratio passing from 33.7 percent in 2015/16 to 32.3 percent in 2016/17. Drawdowns are expected to be most pronounced in the major rice exporters, in particular India and Thailand, given sustained efforts to trim government reserves. Out of the five major exporters, only the United States is anticipated to face a build-up, resulting in the groups’ stock-to-disappearance ratio falling to its lowest level since 2007/2008, or 15.5 percent. Among importers, Bangladesh, Indonesia, Japan and Nigeria may also close the season with smaller inventories, but part of these falls would be compensated by accumulations in China (Mainland), Colombia, Cuba, the European Union, the Republic of Korea and the Philippines.

The weak sentiment that dominated the international rice market since late 2014 came to abrupt halt in May 2016, when international rice quotations reacted to prospects of short export availabilities in the major origins. The FAO All Rice Price Index (2002-2004=100) rose by 3 points that month and has hovered around 199-200 points since then.

N.B. - The FAO Rice Price Index is based on 16 rice export quotations. "Quality" is defined by the percentage of broken kernels, with higher (lower) quality referring to rice with less (equal to or more) than 20 percent broken. The Sub-Index for Aromatic Rice follows movements in prices of Basmati and Fragrant rice.

Pulses

Pulses are important food crops due to their high protein and essential amino acid content. The seeds of pulse crops are typically made up of 20-25% protein compared to 6-10% protein content in major cereal crops. Pulses are also rich in dietary fiber and usually have only small amounts of oil. The protein of pulse seeds is high in the amino acids lysine and methionine, making pulses nutritionally complementary to cereals, which are deficient in these two essential amino acids. Pulses are the main source of protein in the diet of vegetarians, and feature prominently in the traditional cuisine of virtually every region of the globe. Moreover, in recent years there has been a change in the consumption of pulses in several developed countries where they are increasingly considered as health foods (Ipsos Reid, 2010; USDA-ERS, 2011).

On an average (unweighted by population) pulses contribute about 3% of total calories consumed in developing countries, ranging from 4% in SSA, 3% in SA and LAC, 2.5% in MENA and less than 1% in CA region. Compared to cereal crops, this is relatively a small percentage from a global perspective. However, in some countries of SSA, pulses provide more than 10% of total calorie consumption per day—such as Niger (19%), Burundi (14%) and Rwanda (13%). Because of their higher protein content, pulses contribute relatively more towards total protein intake than calorie consumption. On an average (again, unweighted) pulse crops contribute 7.5% of total protein intake in developing countries as against 2.5% in developed countries. However, these averages mask the importance of pulse crops as a source of protein in many countries around the world.

Indian Scenario

Rice

Rice is grown in many regions across India. For about 65% of the people living in India, rice is a staple food for them. India alone has about 45 Million Hectares of Area, and it produces close to 93 Million Metric Tons of rice from 2001 onwards. Out of the Indian states West Bengal is largest in rice production followed closely by UP and Andhra Pradesh. Punjab, Orissa and Tamil Nadu are the other growing states. Value of rice traded in India is equivalent to Rs. 34,800 crores.

Some facts-

- Out of the total agricultural and crop produce, rice alone accounts for 42% of this. It provides employment to 70% of citizens living in villages.
- Buffer stock available in the country is about 30 Million Tons.
- Rice of Andhra Pradesh is known as Annapurna, and it is supplied to many other states of India.
- Out of the total area cultivated under cereals, rice makes up 22% of this.

Rice area in India was about 2.5 Million Hectares in 1960. But now it has decreased to app. 2.2 Million Hectares. Surprisingly the production then was 3.5 Million Tonnes and now it has surged ahead to 8.2 Million Tonnes. It is also ranked among the firsts in national productivity.

Pulses

India is the largest producer (25% of global production), consumer (27% of world consumption) and importer (14%) of pulses in the world. Pulses account for around 20 per cent of the area under food grains and contribute around 7-10 per cent of the total food grains production in the country. Though pulses are grown in both Kharif and Rabi seasons, Rabi pulses contribute more than 60 per cent of the total production. The area under pulses has increased from 19 million ha. in 1950-51 to 25 million ha. in 2013-14, indicating an increase of 31 per cent whereas the production of pulses during the same period has increased from 8.41 million ha. to 19.27 million ha. an increase of over 100 per cent.

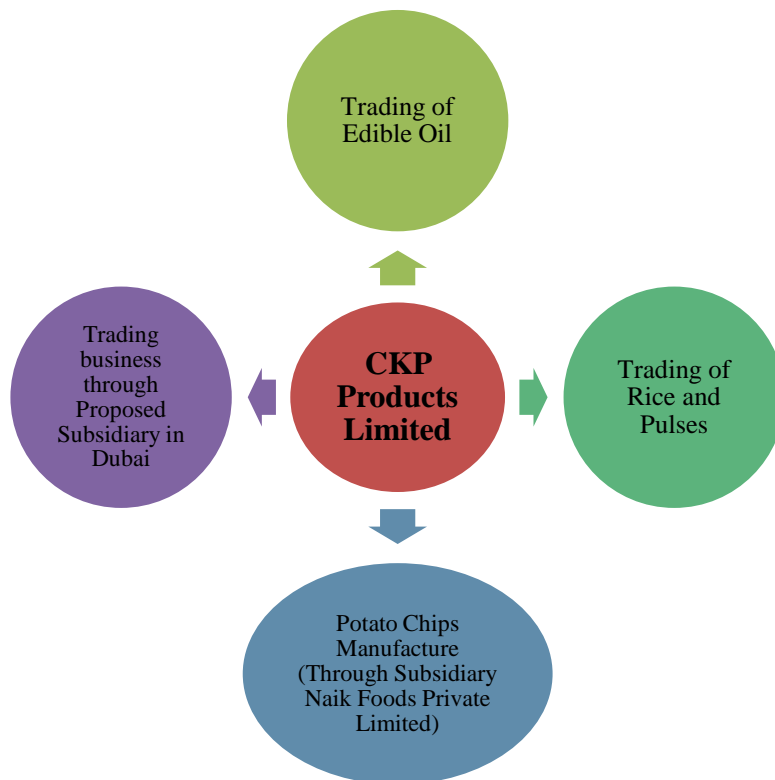

Despite increase in production, India has been the largest importer of pulses since the beginning of the present millennium. The import has increased to more than 20 per cent of the domestic production during 2009-10 and 2012-13. In the remaining years, it has been in the range of 15-20 per cent of the domestic production, except during 2003-04 to 2005-06 where it varied in the range of 11 to 12 per cent of the domestic production.

OUR STRENGTHS

Market Presence

CKP Products Limited (erstwhile Jai Maha Oil Depot Private Limited) is a well established oil trading company as it has acquired the running business of a Proprietary concern. The proprietorship concern has been engaged in the oil trading business ever since 1991, started by the Kapadia family and since then it has developed a considerable market presence in the oil trading business and also among various suppliers and the customers. We believe that this presence in the market for over 3 decades will prove to be beneficial for our continued growth and survival in the competitive market.

Compliance with Quality Standards

The Nasik unit, (owned by our subsidiary Naik Foods Private Limited) is an ISO 9001:2008, 22000:2005(FSMS) & HACCP certified for its scope of activities which include manufacture and supply of potato chips. We believe that such certification would allow us to market our products.

Experienced Senior Management Team

Our senior management team is experienced in the edible oil and food grain industry and in the application of marketing and distribution initiatives in this sector. The Promoters and the senior management team of our Company have significant industry experience and have been instrumental in the consistent growth of our Company's performance. Our Promoter and CEO, Mr. Dhritish Kapadia joined the oil trading business which was started by the Kapadia family in the year 1991 and thus has an experience of over 3 decades in this industry. Also our Promoter, Mr. Prafulla Bhat has wide experience in the trading and import/export of various commodities. We believe that our management team's experience and their understanding of the oil trading business will enable us to continue to take advantage of both current and future market opportunities. It is also expected to help us on addressing and mitigating various risks inherent in our business, including significant competition, reliance on independent agents, and fluctuations in prices.

Scalable Business Model

Our business model is order driven, and comprises of optimum utilization of our resources and thereby enabling us to achieve consequent economies of scale. We believe that this business model has proved successful and scalable for us in the last few financial years. We can scale upward as per the requirement generated by our Company.

The business scale generation is basically due to the development of new markets both international and domestic, by adopting aggressive marketing of the product, adding more products agri-trading industry like other oils, soybeans, food grains, poultry feeds, etc. and also by maintaining the consistent quality of the product.

Supply Chain

Our company procures certain part of its oil trading business through agents to whom the company pays commission. This enables the company to expand its sale and market of operation and reach even small markets and target even the niches. We believe that this will not only increase the target market or area of operation of the company but also improve the corporate image of the organization in the oil trading business.

OUR STRATEGIES

Facilitate Imports

The organization plans to directly import the edible oil instead of procuring it from an importer & hence a backward integration of its kind. Direct import of the edible oil will result in cost efficiency as the company may be able to procure the same at a lower cost, as compared to the price charged by the importers in India. This in turn will increase the profit margin of the company and will also help to structure its sale price accordingly.

Geographical expansion

The organization aims at expanding the reach of its business, which is currently confined to Maharashtra region to other states of the country as well. To start with, the company aims to target the western states of India & then across the length and breadth of the nation. By geographically expanding the company intends to create a PAN India market recognition in the oil trading business to increase its sales, area of operation and profitability in the long run. Further in order to increase our geographical reach and our trading business we propose to establish a subsidiary in Dafza (free zone) in Dubai during the financial year 2016-17.

Branding and Packaging

Currently the company supplies Soybean Oil, Palm Oil, Cotton Oil, Sunflower Oil, Olive Oil, Groundnut Oil, etc to its customers in a container of 10 Tons and above, however the company plans to start its own branding and packaging on the lines of huge MNC's & hence penetrate new markets as well. This will further help to increase/improve the presence of the company in the oil trading business.

Expand our manufacturing scope

Our subsidiary company currently has a manufacturing unit in Nashik which has capabilities for manufacture of potato wafers and fryums. The company plans to give many other FMCG ranges of packaged products like namkeens, banana chips, etc. under one roof. This will not only increase the product offerings, but also enable our subsidiary company to make better use of its resources. Further, variety of products offered to retailers for sale enhances the shelf value of the company, which may lead to higher sales. We also intend to tap various geographical markets which will be possible only once we have a broad product base.

Expanding customer base

Owing to the growing CAGR of the industry & Asia-Pacific being the largest palm oil consumer, the company aims to target more & more clients henceforth displaying an exponential rise in its market share. Expansion of customer base will also help the company to increase its sales, area of operation, profitability and presence in the oil trading business.

Current Business Model

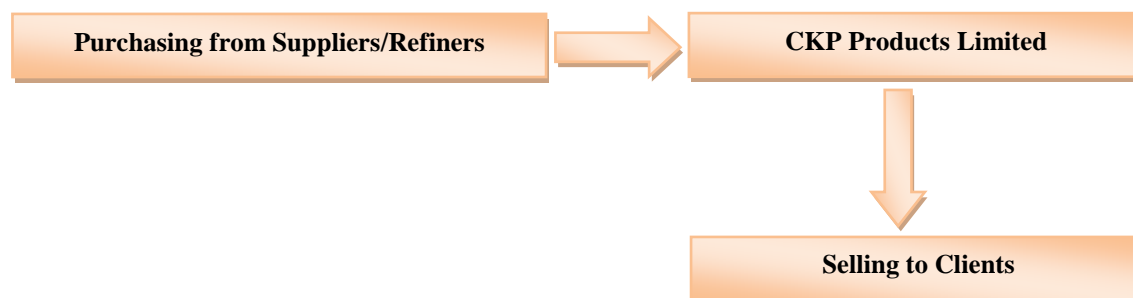

Our company purchases Oil from renowned Companies like M/s Ruchi Worldwide Ltd., M/s Allansons Ltd., M/s Maheshwar Oil Mills, M/s Liberty Oil Mills Limited, etc. by paying the entire amount in full. The Company has established strong relationship with these companies and is also an established player in the market since it has been into the same line of business since 1991 as a proprietorship concern. After procuring oil from these companies as per the specified orders, our company sells it to our clients namely M/s Pranav Agro Industries, M/s Kadeero Enterprises, M/s Gangar Trading Company and many other clients who are manufacturers, retailers, food companies, processors, etc.

Our company also purchases rice and pulses from renowned companies who are established traders dealing in rice and pulses and sells the same to our clients who are mainly wholesalers namely, Amend Multitrade Private Limited, Agrimony Commodity Limited, GSR Marketing Limited and other such clients.

The advantage the clients get by purchasing goods from us is that they get credit period. If these clients procure directly from the renowned companies, they may not get any credit period instead they would have to pay the entire amount in full which may cause financial pressure on them. Also the rate which our company is getting from the suppliers, the same may not be available for the other new customers, since we are a regular customer to these companies, we purchase/ order in bulk quantities as per orders received from our clients and we pay entire amount in full (i.e. enjoy a low credit period).

The oil as well as the agri-commodities namely rice and pulses, is delivered directly to the buyer by our supplier and hence there is no storage required for these products. However, we have a storage unit at Bhayender, Mumbai where oil, rice and pulses are stored for sample purposes and for emergency demands, which is stored in drums of approx. 20 kgs.

Flowchart of Business Model:

Our subsidiary company Naik Foods Private Limited was incorporated in 2014 and is engaged in the business of manufacture of potato wafers, fryums and namkeen. Currently, they are concentrated towards manufacture of potato wafers in 5 different flavours which are sold in packs of ₹ 5 and ₹ 10. The ready packets are sold to various wholesalers and retailers in various cities and rural areas in Maharashtra. Our subsidiary company currently operates only in the Maharashtra region and has prospects of expansion on PAN India basis.

PRODUCT PORTFOLIO

Our company’s products are as follows, the company supplies these in a container of 10 Tons & above in bulk quantities:

- 1. Palm Oil:** 78.27% of our revenue includes revenue from sale of palm oil. 90 percent of palm oil volume in India is used for edible/food-based products and 10 percent is used for non-food based usage. Today palm oil is the cheapest edible oil available in the Indian market.
- 2. Soyabean and Sunflower Oil:** 6.7% and 1.36% of our revenue comprises of revenue from sale of soybean and sunflower oil respectively. Soybean oil is one of the most important edible oil used in India. Soybean oil in its crude form is the second most traded oil in international market after palm oil. Soybean oil is used in cooking and frying foods. Margarine is a product made from soybean oil. Salad dressings and mayonnaises are made with soybean oil. Some foods are packed in soybean oil (tuna sardines, etc.) Baked breads, crackers, cakes, cookies and pies usually have soybean oil in them.

Sunflower oil is considered healthy mainly due its polyunsaturated fat content. Due to its light flavour, sunflower oil doesn't overpower the taste of other ingredients. The presence of Omega-6 and vitamin E act as an anti-oxidant which in turn, helps the body cells in retaining water.

- 3. Pulses and Rice:** 13.67% of our revenue comprises of revenue from sale of pulses and rice. The company does not stock the goods & only trades and thus there is no storage of the same.

Rice is grown in many regions across India. For about 65% of the people living in India, rice is a staple food for them. India alone has about 45 Million Hectares of Area, and it produces close to 93 Million Metric Tons of rice from 2001 onwards. Out of the Indian states West Bengal is largest in rice production followed closely by UP and Andhra Pradesh. Punjab, Orissa and Tamil Nadu are the other growing states. Value of rice traded in India is equivalent to Rs. 34,800 crores.

Pulses are not only a low cost source of protein for majority of Indian consumers; they are also a low cost substitute for vegetables in periods of high prices of vegetables. An improvement in pulses production technology can reduce the cost of production and hence prices, and create scope for further increase in demand for pulse crops by replacing some portion of the disproportionately high level of cereals in the consumption basket for a balanced diet.

Sales Mix

Even though palm oil forms a major portion of the sales of the company, however it aggregates to only 23% of the gross profit of the company. An analysis of the same is as under:

Products	Gross Profit	% Profit
Palm Oil	43,02,655	23.00%
Soyabean Oil	3,07,619	1.64%
Sunflower Oil	15,010	0.08%
Rice and Pulses	1,40,83,222	75.28%

Also, the subsidiary company has the ability to manufacture many other flavours depending on the demand and demographic choices at its existing set-up. MANUFACTURING PROCESS

We carry out manufacturing of various types of potato chips at our subsidiary Naik Foods Pvt Ltd.

The manufacture of potato chips involves a series of multiple step processes under controlled conditions of temperature, pressure and specific classified conditions to manufacture the finished product. The steps involved in the manufacture can be summarized as under:

- 1) Procuring the raw materials namely potato, palm oil and seasoning flavours from the suppliers. Potatoes of different breeds are used for different kinds of wafers.
- 2) The potatoes, after inspection, are washed before their commercial production and the wet potatoes also aid in the peeling process.
- 3) Peeling of the potatoes is done using the peeling machine.
- 4) The peeled potatoes are sliced using the slicing machine. Slicing is done with ridges and without ridges as per requirement on the same machine.
- 5) The sliced potatoes are dried by spinning them in the dryer. This is important so that water is not mixed with oil while frying the sliced potatoes.

- 6) The potatoes are fried in the Fryer. We generally use Palm Oil for frying as it long lasting and it provides uniform frying. The temperature is continuously monitored to prevent over-frying / under-frying of the chips.
- 7) The fried chips are collected in a separate container where the excess oil is drained.
- 8) The fried potato chips are then sprinkled with the required seasoning with a continuous stirring process to spread the flavour evenly. The chips are then cooled and small burnt pieces are manually removed.
- 9) The flavoured chips are sent to the automatic packing machines, where packets of ₹ 5 or ₹ 10 are packed. We source our customised packing materials and our packing machine has a capacity of approximately 22,000 packets per day.
- 10) The packaged chips are dispatched to various wholesalers, retailers, other customers across the state.

The Company's management has recast the financial statements in the form required by Schedule III of the Companies Act, 2013 for the purpose of restated summary statements.

B. Use of Estimates:

The preparation of financial statements requires management to make estimates and assumptions that affect amounts in the financial statements and reported notes thereto. Actual results could differ from these estimates. Differences between the actual result and estimates are recognized in periods in which the results are known/materialized.

The cost of an asset comprises of its purchase price (net of Cenvat / duty credits availed wherever applicable) and any directly attributable cost of bringing the assets to working condition for its intended use. Expenditure on additions, improvements and renewals is capitalized and expenditure for maintenance and repairs is charged to profit and loss account.

J. Contingent Liabilities / Provisions

K. Impairment Of Assets

The company assesses at each balance sheet date whether there is any indication due to external factors that an asset or group of assets comprising a cash generating unit (CGU) may be impaired. If any such indication exists, the company estimates the recoverable amount of the asset. If such recoverable amount of the asset or the recoverable amount of the CGU, to which the asset belongs is less than the carrying amount of the asset or the CGU as the case may be, the carrying amount is reduced to its recoverable amount and the reduction is treated as impairment loss and is recognized in the statement of profit and loss. If at any subsequent balance sheet date, there is an indication that a previously assessed impairment loss no longer exists, the recoverable amount is re assessed and the asset is reflected at recoverable amount subject to a maximum of depreciated historical cost and is accordingly reversed in the statement of profit and loss.

RBI on March 13, 2014 amended the FEMA Regulations and laid down conditions and requirements with respect to investment by FPIs in Indian companies.

In terms of the SEBI FPI Regulations, any qualified foreign investor or FII who holds a valid certificate of registration from SEBI shall be deemed to be an FPI until the expiry of the block of three years for which fees have been paid as per the SEBI FII Regulations. Equity Share capital. Further, in terms of the FEMA Regulations, the total holding by each FPI shall be below 10.00% of the total paid-up Equity Share capital of our Company and the total holdings of all FPIs put together shall not exceed 24.00% of the paid-up Equity Share capital of our Company. The aggregate limit of 24.00% may be increased up to the sectorial cap by way of a resolution passed by the Board of Directors followed by a special resolution passed by the Shareholders of our Company and subject to prior intimation to RBI. In terms of the FEMA Regulations, for calculating the aggregate holding of FPIs in a company, holding of all registered FPIs as well as holding of FIIs (being deemed FPIs) shall be included. The existing individual and aggregate investment limits an FII or sub account in our Company is 10.00% and 24.00% of the total paid-up Equity Share capital of our Company, respectively.

As per the circular issued by SEBI on November 24, 2014, these investment restrictions shall also apply to subscribers of offshore derivative instruments (“ODIs”). Two or more subscribers of ODIs having a common beneficial owner shall be considered together as a single subscriber of the ODI. In the event an investor has investments as a FPI and as a subscriber of ODIs, these investment restrictions shall apply on the aggregate of the FPI and ODI investments held in the underlying company. FPIs are permitted to participate in the Issue subject to compliance with conditions and restrictions which may be specified by the Government from time to time.

Subject to compliance with all applicable Indian laws, rules, regulations, guidelines and approvals in terms of Regulation 22 of the SEBI FPI Regulations, an FPI, other than Category III foreign portfolio and unregulated broad based funds, which are classified as Category II foreign portfolio investor by virtue of their investment manager being appropriately regulated, may issue or otherwise deal in offshore derivative instruments (as defined under the SEBI FPI Regulations as any instrument, by whatever name called, which is issued overseas by an FPI against securities held by it that are listed or proposed to be listed on any recognized stock exchange in India, as its underlying) directly or indirectly, only in the event (i) such offshore derivative instruments are issued only to persons who are regulated by an appropriate regulatory authority; and (ii) such offshore derivative instruments are issued after compliance with know your client norms. For example, if a Bidder/Applicant has Bid for three options in the Bid cum Application Form and such Bidder/Applicant is changing only one of the options in the Revision Form, the Bidder/Applicant must still fill the details of the other two options that are not being revised, in the Revision Form. The members of the Syndicate, the Registered Brokers and the Designated Branches of the SCSBs may not accept incomplete or inaccurate Revision Forms.

- c) In case of revision of Bids by RIIs, Employees and Retail Individual Shareholders, such Bidders/Applicants should ensure that the Bid Amount, subsequent to revision, does not exceed M 200,000. In case the Bid Amount exceeds M 200,000 due to revision of the Bid or for any other reason, the Bid may be considered, subject to eligibility, for allocation under the Non-Institutional Category, not being eligible for Discount (if applicable) and such Bid may be rejected if it is at the Cut-off Price. The Cut-off Price option is given only to the RIIs, Employees and Retail Individual Shareholders indicating their agreement to Bid for and purchase the Equity Shares at the Issue Price as determined at the end of the Book Building Process.

If, however, the RII does not either revise the Bid or make additional payment and the Issue Price is higher than the cap of the Price Band prior to revision, the number of Equity Shares Bid for shall be adjusted downwards for the purpose of allocation, such that no additional payment would be required from the RII and the RII is deemed to have approved such revised Bid at Cut-off Price.

- a) All Bidders/Applicants are required to make payment of the full Bid Amount (less Discount, if applicable) along with the Bid Revision Form. In case of Bidders/Applicants specifying more than one Bid Option in the Bid cum Application Form, the total Bid Amount may be calculated for the highest of three options at net price, i.e. Bid price less discount offered, if any.
- b) Bidder/Applicant may Offer instructions to block the revised amount based on cap of the revised Price Band (adjusted for the Discount (if applicable) in the ASBA Account, to the same Designated Intermediary through whom such Bidder/Applicant had placed the original Bid to enable the relevant SCSB to block the additional Bid Amount, if any.
- c) In case the total amount (i.e., original Bid Amount less discount (if applicable) plus additional payment) exceeds ₹ 200,000, the Bid may be considered for allocation under the Non-Institutional Category in terms of the RHP/Prospectus. If, however, the Bidder/Applicant does not either revise the Bid or make additional payment and the Issue Price is higher than the cap of the Price Band prior to revision, the number of Equity Shares Bid for may be adjusted downwards for the purpose of Allotment, such that additional amount is required blocked and the Bidder/Applicant is deemed to have approved such revised Bid at the Cut-off Price.

5.6 BASIS OF ALLOCATION

- a) The SEBI ICDR Regulations, 2009 specify the allocation or Allotment that may be made to various categories of Bidders/Applicants in an Issue depending on compliance with the eligibility conditions. Certain details pertaining to the percentage of Issue size available for allocation to each category is disclosed overleaf of the Bid cum Application Form and in the RHP/Prospectus. For details in relation to allocation, the Bidder/Applicant may refer to the RHP/Prospectus.
- b) Under-subscription in any category (except QIB Category) is allowed to be met with spillover from any other category or combination of categories at the discretion of the Issuer and in consultation with the BRLMs and the Designated Stock Exchange and in accordance with the SEBI ICDR Regulations, 2009. Unsubscribed portion in QIB Category is not available for subscription to other categories.
- c) In case of under subscription in the Issue, spill-over to the extent of such under-subscription may be permitted from the Reserved Portion to the Issue. For allocation in the event of an under-subscription applicable to the Issuer, Bidders/Applicants may refer to the RHP/ Prospectus.
- d) Illustration of the Book Building and Price Discovery Process Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue; it also excludes Bidding by Anchor Investors.

Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹ 20 to ₹ 24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table

below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Issuer and the Selling Shareholders, in consultation with the BRLMs, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

e) Alternate Method of Book Building

In case of FPOs, Issuers may opt for an alternate method of Book Building in which only the Floor Price is specified for the purposes of Bidding (“**Alternate Book Building Process**”).

The Issuer may specify the Floor Price in the RHP/ Prospectus or advertise the Floor Price at least one Working Day prior to the Bid/ Issue Opening Date. QIBs may Bid at a price higher than the Floor Price and the Allotment to the QIBs is made on a price priority basis. The Bidder with the highest Bid Amount is allotted the number of Equity Shares Bid for and then the second highest Bidder is Allotted Equity Shares and this process continues until all the Equity Shares have been allotted. RIIs, NIIs and Employees are Allotted Equity Shares at the Floor Price and Allotment to these categories of Bidders is made proportionately. If the number of Equity Shares Bid for at a price is more than available quantity then the Allotment may be done on a proportionate basis. Further, the Issuer may place a cap either in terms of number of specified securities or percentage of issued capital of the Issuer that may be Allotted to a single Bidder, decide whether a Bidder be allowed to revise the bid upwards or downwards in terms of price and/or quantity and also decide whether a Bidder be allowed single or multiple bids.

SECTION 6: ISSUE PROCEDURE IN FIXED PRICE ISSUE

Applicants may note that there is no Bid cum Application Form in a Fixed Price Issue. As the Issue Price is mentioned in the Fixed Price Issue therefore on filing of the Prospectus with the RoC, the Application so submitted is considered as the Application Form.

Applicants may only use the specified Application Form for the purpose of making an Application in terms of the Prospectus which may be submitted through the Designated Intermediary.

Applicants may submit an Application Form either in physical form to the any of the Designated Intermediaries or in the electronic form to the SCSB or the Designated Branches of the SCSBs authorising blocking of funds that are available in the bank account specified in the Application Form only (“ASBA Account”). The Application Form is also made available on the websites of the Stock Exchanges at least one day prior to the Bid/Issue Opening Date.

In a fixed price Issue, allocation in the net issue to the public category is made as follows: minimum fifty per cent to Retail Individual Investors; and remaining to (i) individual investors other than Retail Individual Investors; and (ii) other Applicants including corporate bodies or institutions, irrespective of the number of specified securities applied for. The unsubscribed portion in either of the categories specified above may be allocated to the Applicants in the other category.

SECTION 7: ALLOTMENT PROCEDURE AND BASIS OF ALLOTMENT

However, in case the Issue is in the nature of Offer for Sale only, then minimum subscription may not be applicable.

7.1 ALLOTMENT TO RIIs

Bids received from the RIIs at or above the Issue Price may be grouped together to determine the total demand under this category. If the aggregate demand in this category is less than or equal to the Retail Category at or above the Issue Price, full Allotment may be made to the RIIs to the extent of the valid Bids. If the aggregate demand in this category is greater than the allocation to in the Retail Category at or above the Issue Price, then the maximum number of RIIs who can be Allotted the minimum Bid Lot will be computed by dividing the total number of Equity Shares available for Allotment to RIIs by the minimum Bid Lot (“**Maximum RII Allottees**”). The Allotment to the RIIs will then be made in the following manner:

- a) In the event the number of RIIs who have submitted valid Bids in the Issue is equal to or less than Maximum RII Allottees, (i) all such RIIs shall be Allotted the minimum Bid Lot; and (ii) the balance available Equity Shares, if any, remaining in the Retail Category shall be Allotted on a proportionate basis to the RIIs who have received Allotment as per (i) above for the balance demand of the Equity Shares Bid by them (i.e. who have Bid for more than the minimum Bid Lot).
- b) In the event the number of RIIs who have submitted valid Bids in the Issue is more than Maximum RII Allottees, the RIIs (in that category) who will then be Allotted minimum Bid Lot shall be determined on the basis of draw of lots.

7.2 ALLOTMENT TO NIIs

Bids received from NIIs at or above the Issue Price may be grouped together to determine the total demand under this category. The Allotment to all successful NIIs may be made at or above the Issue Price. If the aggregate demand in this category is less than or equal to the Non-Institutional Category at or above the Issue Price, full Allotment may be made to NIIs to the extent of their demand. In case the aggregate demand in this category is greater than the Non-Institutional Category at or above the Issue Price, Allotment may be made on a proportionate basis up to a minimum of the Non-Institutional Category.

7.3 ALLOTMENT TO QIBs

For the Basis of Allotment to Anchor Investors, Bidders/Applicants may refer to the SEBI ICDR Regulations, 2009 or RHP/Prospectus. Bids received from QIBs Bidding in the QIB Category (net of Anchor Portion) at or above the Issue Price may be grouped together to determine the total demand under this category. The QIB Category may be available for Allotment to QIBs who have Bid at a price that is equal to or greater than the Issue Price. Allotment may be undertaken in the following manner:

- a) In the first instance allocation to Mutual Funds for up to 5% of the QIB Category may be determined as follows: (i) In the event that Bids by Mutual Fund exceeds 5% of the QIB Category, allocation to Mutual Funds may be done on a proportionate basis for up to 5% of the QIB Category; (ii) In the event that the aggregate demand from Mutual Funds is less than 5% of the QIB Category then all Mutual Funds may get full Allotment to the extent of valid Bids received above the Issue Price; and (iii) Equity Shares remaining unsubscribed, if any and not allocated to Mutual Funds may be available for Allotment to all QIBs as set out at paragraph 7.4(b) below;
- b) In the second instance, Allotment to all QIBs may be determined as follows: (i) In the event of oversubscription in the QIB Category, all QIBs who have submitted Bids above the Issue Price may be Allotted Equity Shares on a proportionate basis for up to 95% of the QIB Category; (ii) Mutual Funds, who have received allocation as per (a) above, for less than the number of Equity Shares Bid for by them, are eligible to receive Equity Shares on a proportionate basis along with other QIBs; and (iii) Under-subscription below 5% of the QIB Category, if any, from Mutual Funds, may be included for allocation to the remaining QIBs on a proportionate basis.

7.4 ALLOTMENT TO ANCHOR INVESTOR (IF APPLICABLE)

- c) **In the event that the Issue Price is higher than the Anchor Investor Issue Price:** Anchor Investors will be sent a revised CAN within one day of the Pricing Date indicating the number of Equity Shares allocated to such Anchor Investor and the pay-in date for payment of the balance amount. Anchor Investors are then required to pay any additional amounts, being the difference between the Issue Price and the Anchor Investor Issue Price, as indicated in the revised CAN within the pay-in date referred to in the revised CAN. Thereafter, the Allotment Advice will be issued to such Anchor Investors.
- d) **In the event the Issue Price is lower than the Anchor Investor Issue Price:** Anchor Investors who have been Allotted Equity Shares will directly receive Allotment Advice.

7.5 BASIS OF ALLOTMENT FOR QIBs (OTHER THAN ANCHOR INVESTORS), NIIs AND RESERVED CATEGORY IN CASE OF OVER-SUBSCRIBED ISSUE

In the event of the Issue being over-subscribed, the Issuer may finalise the Basis of Allotment in consultation with the Designated Stock Exchange in accordance with the SEBI ICDR Regulations, 2009.

The allocation may be made in marketable lots, on a proportionate basis as explained below:

- a) Bidders may be categorized according to the number of Equity Shares applied for;
- b) The total number of Equity Shares to be Allotted to each category as a whole may be arrived at on a proportionate basis, which is the total number of Equity Shares applied for in that category (number of Bidders in the category multiplied by the number of Equity Shares applied for) multiplied by the inverse of the over-subscription ratio;
- c) The number of Equity Shares to be Allotted to the successful Bidders may be arrived at on a proportionate basis, which is total number of Equity Shares applied for by each Bidder in that category multiplied by the inverse of the over-subscription ratio;
- d) In all Bids where the proportionate Allotment is less than the minimum Bid Lot decided per Bidder, the Allotment may be made as follows: the successful Bidders out of the total Bidders for a category may be determined by a draw of lots in a manner such that the total number of Equity Shares Allotted in that category is equal to the number of Equity Shares calculated in accordance with (b) above; and each successful Bidder may be Allotted a minimum of such Equity Shares equal to the minimum Bid Lot finalised by the Issuer;
- e) If the proportionate Allotment to a Bidder is a number that is more than the minimum Bid lot but is not a multiple of one (which is the marketable lot), the decimal may be rounded off to the higher whole number if that decimal is

0.5 or higher. If that number is lower than 0.5 it may be rounded off to the lower whole number. Allotment to all Bidders in such categories may be arrived at after such rounding off; and

- f) If the Equity Shares allocated on a proportionate basis to any category are more than the Equity Shares Allotted to the Bidders in that category, the remaining Equity Shares available for Allotment may be first adjusted against any other category, where the Allotted Equity Shares are not sufficient for proportionate Allotment to the successful Bidders in that category. RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are FIPB and the RBI.

The Government has from time to time made policy pronouncements on FDI through press notes and press releases. The Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (“DIPP”), issued consolidated FDI Policy, which with effect from June 07, 2016 consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DIPP that were in force and effect as on June 7, 2016. The Government proposes to update the consolidated circular on FDI Policy once every year and therefore, the Consolidation FDI Policy will be valid until the DIPP issues an updated circular.

The transfer of shares by an Indian resident to a Non-Resident does not require the prior approval of the FIPB or the RBI, provided that (i) the activities of the investee company are under the automatic route under the Consolidated FDI Policy and transfer does not attract the provisions of the SEBI (Substantial Acquisition of Shares and Takeovers) Regulations, 2011; (ii) the non-resident shareholding is within the sectoral limits under the Consolidated FDI Policy; and (iii) the pricing is in accordance with the guidelines prescribed by SEBI/RBI.

As per the existing policy of the Government of India, OCBs cannot participate in this Issue.

The Equity Shares offered in the Issue have not been and will not be registered under the Securities Act, and may not be offered or sold within the United States, except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the Securities Act and applicable U.S. state securities laws. Accordingly, the Equity Shares are being offered and sold (i) within the United States to persons reasonably believed to be “qualified institutional investors” (as defined in Rule 144A under the Securities Act) pursuant to Rule 144A under the Securities Act or other applicable exemption under the Securities Act and (ii) outside the United States in offshore transactions in reliance on Regulation S under the Securities Act and the applicable laws of the jurisdictions where such offers and sales occur.

The above information is given for the benefit of the Applicants. Our Company and the LM are not liable for any amendments or modification or changes in applicable laws or regulations, which may occur after the date of this Draft Prospectus. Applicants are advised to make their independent investigations and ensure that the Applications are not in violation of laws or regulations applicable to them.
