INTERNAL RISK FACTORS

- 1. We require certain approvals and licenses in the ordinary course of business and are required to comply with certain rules and regulations to operate our business, and the failure to obtain, retain and renew such approvals and licences or comply with such rules and regulations, and the failure to obtain or retain them in a timely manner or at all may adversely affect our operations.***

We require several statutory and regulatory permits, licenses and approvals to operate our business, some of which our Company has either received, applied for or is in the process of application. Many of these approvals are granted for fixed periods of time and need renewal from time to time. Non-renewal of the said permits and licenses would adversely affect our Company’s operations, thereby having a material adverse effect on our business, results of operations and financial condition. There can be no assurance that the relevant authorities will issue any of such permits or approvals in the time-frame anticipated by us or at all.

Our Company is required to obtain the following approvals for our business but the same have not been obtained by us, as on date of this Draft Prospectus: (i) Certificate of Registration under the Employees

Provident Fund and Miscellaneous Provisions Act, 1952; and (ii) Certificate of Registration under the Employee State Insurance Act, 1948. We may be penalized for non-compliance with the aforementioned laws for which we have not obtained the requisite Licenses/approvals.

Our Company has applied for the following approvals and the receipt of the same are pending as on date of this Draft Prospectus: (i) Application with the Maharashtra Pollution Control Board in order to obtain the Consent to Operate in respect of the factory situated at Unit 3, APL House, Tungareshwar Industrial Estate, S. No. 1, Missa No. 8, Sativali, Vasai- 401208, (ii) Application for Factory License is made to the Chief Inspector of Factories in respect of the factory situated at Unit 3, APL House, Tungareshwar Industrial Estate, S. No. 1, Missa No. 8, Sativali, Vasai- 401208, (iii) Application for Registration under Section 7 of the Contract Labour (Regulation and Abolition) Act, 1970 on December 15, 2017 and (iv) Certificate of Enrolment under the Maharashtra State Tax on Professions, Trades, Callings and Employments Act, 1975.

Further, some of our permits, licenses and approvals are subject to several conditions and we cannot provide any assurance that we will be able to continuously meet such conditions or be able to prove compliance with such conditions to the statutory authorities, which may lead to the cancellation, revocation or suspension of relevant permits, licenses or approvals. Any failure by us to apply in time, to renew, maintain or obtain the required permits, licenses or approvals, or the cancellation, suspension or revocation of any of the permits, licenses or approvals may result in the interruption of our operations and may have a material adverse effect on the business. If we fail to comply with all applicable regulations or if the regulations governing our business or their implementation change, we may incur increased costs, be subject to penalties or suffer a disruption in our business activities, any of which could adversely affect our results of operations. For further details, please see chapters titled “Key Industry Regulations and Policies” and “Government and Other Statutory Approvals” at page nos. 115 and 199 respectively of this Draft Prospectus.

- 2. We are highly dependent on our suppliers for uninterrupted supply of raw-materials. We have not entered into any long term supply agreement for the major raw materials required for manufacturing of our products. Also volatility in the prices and non availability of these raw materials may have an adverse impact in our business prospects, results of operations and financial condition.***

We are highly dependent on M.S. Strips, M.S. Rods, Alloy steel, stainless steel and other hardware items and metal articles which are the prime raw material for our products. We procure our supply of raw materials from various vendors in the market. We have not entered into any long term supply agreement for supply of major raw materials.

Currently, we have been able to secure timely supply of required raw material for our existing activity. Raw material is easily available in the domestic market and no difficulty is envisaged in sourcing of the raw material. In case of any disruption in supply of raw materials from these suppliers or our procurement of raw materials in terms are not favourable to us; it will adversely affect our operations and financial cost. Further in case our Company is unable to procure the requisite quantities of raw materials well in time and at competitive prices, the performance of our company may be affected, thus adversely affecting our business, prospects, results of operations and financial condition.

- 3. We rely significantly on our agent networking in open market for local and export sale of our products.***

We sell our products in open market through our network of distributors and agents as well as through Direct Marketing. Our products are marketed through a wide network of distribution channel within Middle East countries and USA, UK etc. The Company is dependent on them for marketing and distribution. Accordingly, any shortcomings in the performance would impact the revenues and profitability of the Company. Further, as a means of direct marketing, we also conduct exhibition of our products in foreign countries. However, significant proportion of the sale is done through our agents in foreign countries.

Furthermore, our business growth depends on our ability to attract additional distributorships to our network. While, we believe that we have good relations with our distributors and agents but there is no assurance that our

current distributors will continue to do business with us. If we do not succeed in maintaining the stability of our distributorship network, our market share may decline materially affecting our results of operations and financial condition.

4. *Our Company has substantial requirement of working capital and failure to manage our working capital could have an adverse effect on our net sales, profitability, cash flow and liquidity.*

We are engaged in manufacturing and fabrication of various steel products which are meant for its application in Pipe Support Systems, HVAC Systems, Anti-vibration System and Equipments for Industrial, Commercial, Utility and OEM Installations. We manufacture various engineering products, metal and base metal products like G. I. nuts, various types of bolts, clamps, hangers etc. Further our Product Portfolio includes all types of bathroom pipes, fittings, bathroom accessories and sanitary wares. Moreover, we are also engaged in trading of Textile Products. Our company business needs substantial working capital and financing in the form of fund and non-fund based working capital facilities to meet its requirements. A liquidity crunch may also result in increased working capital borrowings and, consequently, higher finance cost which will adversely impact our profitability.

Generally, payments from clients are linked to completion of milestones. Payments are spread out over the execution period of the contracts. Consequently, there could be situation where the total funds available may not be sufficient to fulfil the commitments in which case additional funding can be raised through commercial borrowings, vendor financing or issue of fresh capital, in such event the interest obligation would increase and the company may be subject to additional covenants. Working capital is partially met through internal accruals. However, failure to manage our working capital requirements in the future could have an adverse effect on our net sales, profitability, cash flow and liquidity.

5. *Our Company is subject to inspections under the Maharashtra Pollution Control Board and various other regulatory authorities, which may result in imposition of penalty on us.*

Inspection proceedings are undertaken by various authorities for verifying the compliance of manufacturing and quality standards as per UL and FM approvals for meeting the worldwide recognition standards, and at various local levels like Maharashtra Pollution Control Board (MPCB) at regular intervals of our products that are fabricated and manufactured by us. Our Company is also subject to testing and audits by the respective authorities, for maintaining the quality parameters of the final product and also maintaining the hygienic conditions of the factory. Consequently, we may fail to adhere to the directions of the authorities in a timely manner which may attract penal sanctions affecting our operations and financial condition.

6. *Our Company had availed ₹ 320.35 lakhs as unsecured loans from Promoters and Group Companies which are repayable on demand. Any demand from the lenders for repayment of such unsecured loan may affect our cash flow and financial condition. Also, such unsecured loans may be recalled at any time which may have an adverse effect on our business, prospects, financial condition and results of operations.*

Our Company as per the restated audited financial statement as on September 30, 2017 had availed total sum of ₹ 320.35 lakhs as unsecured loan from Promoters and Group Companies as ICD which may be recalled at any time. Sudden recall for the repayment may disrupt our operations and also may force us to opt for funding at higher interest rates, resulting in higher financial burden.

Further, our Company will not be able to raise funds at short notice and thus result in shortage of working capital fund. For further details, please refer to the section “Unsecured Loans” under “Restated Financial Statements” beginning on page no. 151 of this Draft Prospectus. Any demand for the repayment of such unsecured loan, may adversely affect our cash flow and financial condition.

Our Company may obtain in future, unsecured loans, some of which may be recalled at any time at the option of the lender. If the unsecured loans so obtained by our Company are recalled at any time, the financial condition

of our Company may be adversely affected having an effect on our business, prospects and results of operations also.

7. *Our Company has incurred substantial indebtedness which exposes us to various risks which may have an adverse effect on our business and results of operations.*

As on September 30, 2017, we had ₹ 1,552.34 lakhs of outstanding debt on our balance sheet (including current maturities but excluding non-fund based) from various banks and financial institutions. In the event that we fail to meet our debt servicing obligations under our financing documents, the relevant lenders could declare us to be in default, accelerate the maturity of our obligations or takeover our project or even sell our Company's movable and immovable assets. We cannot assure investors that in the event of any such acceleration we will have sufficient resources to repay these borrowings. Failure to meet obligations under debt financing agreements may have an adverse effect on our cash flows, business and results of operations. Our ability to meet our debt service obligations and to repay our outstanding borrowings will depend primarily upon the cash flows generated by our business. We cannot assure you that we will generate sufficient cash to enable us to service existing or proposed borrowings. Incurring significant indebtedness may limit our flexibility in planning for or reacting to changes in our business & industry and limit our ability to borrow additional funds. Further, our level of indebtedness has important consequences to our Company, such as:

- Increasing our vulnerability to general adverse economic, industry and competitive conditions;
- Limiting our flexibility in planning for, or reacting to, changes in our business and the industry; affecting our credit rating;
- Limiting our ability to borrow more money both now and in the future; and
- Increasing our interest expenditure and adversely affecting our profitability, since almost all of our debt bears interest at floating rates.

If any of these risks were to materialise, our business and results of operations may be adversely affected.

8. *Any infringement of our registered corporate logos “” and “TEMBO” or failure to protect it may adversely affect our business. Further, any kind of negative publicity or misuse of our brand name and our logo could hamper our brand building efforts and our future growth strategy could be adversely affected.*

Our corporate logos “” and “TEMBO” are registered with the Registrar of Trademarks bearing Nos.2268470 and 2102325. As on the date of this Draft Prospectus, we have not yet obtained registration for

our logo “” and hence we do not enjoy the statutory protection accorded to a registered trademark.

Additionally, we have made an application for the registration of our logo “” before the Trade Marks Registry, India which is currently pending registration. However, there can be no assurance that our application will succeed. Grounds for refusal of registration may include the validity or scope of the application. If we are unable to obtain a registration, we may still continue to use the logo but remain vulnerable to infringement and passing-off by third parties and will not be able to enforce any rights against them. We may also need to change our logo which may adversely affect our reputation and business and could require us to incur additional costs.

We believe that our future growth and competitiveness would depend on our ability to establish and strengthen our brand. While 46.26% and 41.73% of our revenue from the manufacturing activities was attributed to our brand – “Tembo Seven Star” and “iETALiA” respectively, during the six months period ended September 30, 2017 and Fiscal 2017; we expect this share to increase in future.

Although, we believe that that our present systems are adequate to protect our confidential information and intellectual property, there can be no assurance that our intellectual property data, trade secrets or proprietary

technology will not be copied, infringed or obtained by third parties. Further, our efforts to protect our intellectual property may not be adequate and may lead to erosion of our business value and our operations could be adversely affected. This may lead to litigations and any such litigations could be time consuming and costly and their outcome cannot be guaranteed. Our Company may not be able to detect any unauthorized use or take appropriate and timely steps to enforce or protect our intellectual property, which may adversely affect our business, financial condition and results of operations. For further details pertaining to our intellectual property, please refer to the chapter titled “Our Business” beginning on page [] of this Draft Prospectus.

9. Our Company has entered into certain related party transactions in the past and may continue to do so in the future, which may potentially involve conflicts of interest with the equity shareholders.

Our Company has entered into certain transactions with our related parties including our Promoters, Promoter Group, Directors and their relatives. While we believe that all such transactions have been conducted on the arm’s length basis, we cannot assure you that we might have obtained more favourable terms had such transactions been entered into with unrelated parties.

Furthermore, it is likely that we may enter into related party transactions in the future. We cannot assure you that such transactions, individually or in the aggregate, will always be in the best interests of our minority shareholders and will not have an adverse effect on our business, results of operations, cash flows and financial condition. For details, please refer "Annexure XXV – Related Party Transactions" on page no. 170 of this Draft Prospectus.

10. Our Company might be unable to meet certain delivery obligations including timelines of delivery due to various reasons, due to which, it could become liable to claims by customers, suffer adverse publicity and incur substantial costs, which in turn could adversely affect our results of operations.

Many of our orders involve manufacturing and fabricating the products on timely basis and delivering to the customers located outside India. These containers are loaded into trucks which are unloaded at the point of mode of transportation based on the location of the customer. The goods are transported by mode of Road, water and Air. We have entered into an arrangement for delivery of these products at the point of mode of transportation adopted by the customer based on their location. Further, any failure or defect in the products or services could result in a claim against us for substantial damages, regardless of our responsibility for such a failure or defect. Any failure to meet the scheduled timelines set by our customers may lead to our customers raising claims against us.

We are dependent on few logistical service providers for supply of textile products from the place of the supplier to the destination of the ultimate buyer. Accordingly, continuing increases in transportation costs or unavailability of transportation services for delivery of our Textile products, as well the extent and reliability of Indian infrastructure may have an adverse effect on our business, financial condition, results of operations and prospects

Moreover, Our Company is attempting to limit its contractual liability for all the damages, including consequential damages, while manufacturing the products, our Company cannot be assured that the limitations on liability it provides for, in the contracts will be enforceable in all cases.

11. Improper handling of machineries could result in accidents and may lead to loss of life and may have an impact on the image of our business which could have an adverse effect on our net sales, profitability and results of our operations.

Improper handling of machines used in the business line of the Company can result into accidents at times and may lead to loss of life of the employees and the Company could face liabilities that may adversely affect its profits.

Our Company has been executing the variety of projects using modern techniques and state-of-the-art plant & equipment. Our Company has insured policies cover and has undertaken adequate safety measures, which have minimized the loss of three crucial M's viz. men, material and machines. Also, our company employs skilled manpower to handle materials and machines and provide requisite in-house training for the same. In spite of the same, in future due to improper handling of machineries which could result in accidents, it could have an adverse effect on our net sales, profitability and results of our operations.

12. Our Promoters play key role in our functioning and we heavily rely on their knowledge and experience in operating our business and therefore, it is critical for our business that our Promoters remain associated with us. Our success also depends upon the continued services of our promoters and our ability to attract, train and retain them.

Our Company is promoted by a group of individuals and is led by Mr. Sanjay Patel who has approximate 36 years of experience. The success of our business operations is attributable to our Promoters, Directors and key management personnel. We believe that our relation with our Promoters, who have rich experience in setting up business, developing markets, managing customers and handling overall businesses, has enabled us to experience growth and profitability. We benefit from our relationship with our Promoters and Key Managerial Persons and our success depends upon their continuing services, who have been responsible for the growth of our business and are closely involved in the overall strategy, direction and management of our business. Our Promoter, Mr. Sanjay Patel, has been actively involved in the day to day operations and management since the incorporation of the Company.

Our Promoters, along with the group key managerial personnel, have over the years built relations with clients, government agencies and other persons who are connected with us. The loss of their services could impair our ability to implement our strategy, and our business, financial condition, results of operations and prospects may be materially and adversely affected.

Further, our Promoters have also promoted other companies and may continue to do so. If they divert their attention to the other companies, we may not be able to function as efficiently and profitably as before. We may have to incur additional costs to replace the services of our promoters or we may not be able to do so at all, which could adversely affect our business operations and affect our ability to continue to manage and expand our business. Any inability to attract and retain talented employees or the resignation or loss of key management personnel, may have an adverse impact on our business, future financial performance and the price of our Equity Shares.

- 13. We constantly face a credit risk which may in turn affect our complete cycle adversely. Also, any customer dispute regarding our performance or workmanship may amount in delay or withholding of payment to us.**

Our Company is involved in manufacturing and fabrication of various steel products which are meant for its application in Pipe Support Systems, HVAC Systems, Anti-vibration System and Equipments for Industrial, Commercial, Utility and OEM Installations. We manufacture various engineering products, metal and base metal products like G. I. nuts, various types of bolts, clamps, hangers etc. Further our Product Portfolio includes all types of bathroom pipes, fittings, bathroom accessories and sanitary wares. Moreover, we are also engaged in trading of Fabric and Textile related Products.

Our primary competence is the ability to provide timely deliveries and best quality products, further being able to exploit the benefits of economies of scale and credit shortage in the industry. Our business cycle is heavily dependent on timely payments being received from our customers. In case that our products are not delivered on timely basis and/or the quality of the products does not fulfill the requirements of our customer, it may lead to dissatisfaction. Further it may lead to consequence of customer dispute regarding our performance or workmanship and the customer may delay or withhold payment to us, which may result in materially affecting our business.

In case of such default in payment/ unforeseeable delay in payment from any of our customers our working capital cycle will be adversely affected. This may lead to lack of competitive advantage against various other transporters leading to an adverse effect on our business operations and profitability.

- 14. Our funding requirements and deployment of the issue proceeds are based on management estimates and have not been independently appraised by any bank or financial institution. Any variation in the utilization of our Net Proceeds as disclosed in this Draft Prospectus would be subject to certain compliance requirements, including prior shareholders' approval.**

The deployment of the funds towards the objects of the Issue is entirely at the discretion of the Board and our Board will monitor the utilisation of Net Proceeds through its Audit Committee. Further, our Promoter or controlling shareholders would be required to provide an exit opportunity to the shareholders who do not agree with our proposal to change the objects of the Issue, at a price and manner as specified in Chapter VI-A of the SEBI ICDR Regulations pursuant to the SEBI ICDR (Second Amendment) Regulations, 2016 dated February 17, 2016. Additionally, the requirement on Promoters or controlling shareholders to provide an exit opportunity to such dissenting shareholders may deter the Promoters or controlling shareholders from agreeing to the variation of the proposed utilisation of our Net Proceeds, even if such variation is in our interest. Further, we cannot assure you that our Promoter or the controlling shareholders will have adequate resources at their disposal at all times to enable them to provide an exit opportunity at the price which may be prescribed by SEBI.

Our Company will disclose the utilisation of the Net Proceeds under a separate head along with details in its balance sheet until the Net Proceeds remain unutilised, clearly specifying the purpose for which the Net Proceeds have been utilised. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our operational and financial performance.

- 15. We face foreign exchange risks that could adversely affect our results of operations, further having an impact on our cash flows and our financial results may fluctuate.**

We face foreign exchange rate risk as major portion of our revenues are denominated in a currency other than the Indian Rupee. Because of our foreign currency exposure, exchange rate fluctuations between the Indian Rupee and foreign currencies can have a material impact on our results of operations, cash flows and financial condition. The exchange rate between the Indian Rupee and U.S. dollar has been volatile in recent periods and may continue to fluctuate in the future. We generally received a part payment from the customers in advance, while others make the payment over a period of time. This gap results in increased risk towards foreign exchange fluctuation.

As we intend to expand our product base and also our geographical markets, we will have greater exposure to such exchange rate fluctuations. We may, therefore, suffer losses on account of foreign currency fluctuations for sale of our products since we may not be able to pass on all losses on account of foreign currency fluctuations to our customers. While we currently hedge some of our foreign currency exchange risks by entering into forward exchange contracts and seek to hedge some of our future transaction by entering into similar transactions, any amount that we spend or invest in order to hedge the risks to our business due to fluctuations in currencies may not adequately hedge against any losses that we may incur due to such fluctuations.

Moreover, the hedges may not cover all such exposures and are in any event subject to their own risks, including counterparty credit risk. Adverse moves in exchange rates may adversely impact our profitability and financial condition.

16. Our Company is dependent on the continuing operation of our manufacturing facilities. Any significant interruption in manufacturing at our facilities could have a material adverse effect on our business, results of operations and financial condition.

Our Company manufactures substantially all of the products at our manufacturing facilities located at Vasai, which are subject to the normal risks of industrial production, including equipment breakdowns, labour stoppages, natural disasters, industrial accidents, power interruptions our inability to respond to technological advances and emerging industry standards and practices in the industry and the need to comply with the directives of relevant government authorities. In case of any disruption at such facilities, it may adversely affect the manufacturing cycle, and may lead to time over-run in the execution of the project.

All of these manufacturing facilities require a significant amount and continuous supply of electricity and any shortage or non-availability of electricity may adversely affect our operations. The manufacturing process of our products requires significant electricity. Our Company depends on MSEDCL for supply of our energy requirements. For further information, see “Government and Other Approvals” on page no. 199 of the Draft Prospectus.

17. Our Company has reported certain negative cash flows from its operating, investing and financing activities, details of which are given below. Sustained negative cash flow could impact our growth and business in the future.

Our Company had reported certain negative cash flows from its operating, investing and financing activities in the previous years as per the restated financial statements and the same are summarized as under:

For details, please refer “Management’s Discussion and Analysis of Financial Conditions and Results of Operations of our Company” on page no. 175 of this Draft Prospectus.

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. If our Company is not able to generate sufficient cash flows, it may adversely affect our business and financial operations.

18. *There exists certain conflict of interest between our Company and our Group Company*

Our Promoters are Directors in Tembo Exim Pvt. Ltd. which is our Group Company and has similar business activities in the segment of trading of fabric and textile related products as per its past history. Given current scenario, there is no material conflict of interest in case of products manufactured by us; which are majorly exported. Our Group Company does not specifically compete with our existing lines of business in case of manufactured products exported by us

Further, our Company does not have any non-compete or such other agreement / arrangement with our Group Company For further details, please refer to the chapters titled ‘*Our Business*’, ‘*Our Group Companies*’, beginning on page nos. 96 and 146, respectively and *Financial Statements- Related Party Transactions*” beginning on page no. 170 of this Draft Prospectus.

19. *The prices we are able to obtain for the textile products that we trade depend largely on prevailing market prices.*

The price of the products traded by us has a significant impact on our profits. Textiles has been subject to price fluctuations resulting from weather, domestic and foreign trade policies, shifts in supply and demand and other factors beyond our control. As a result, any fluctuation in prices could have a material adverse effect on our Company and our results of operations.

20. *Our Company does not own some of our key properties which are used by us currently for manufacturing purpose and further in case of unavailability of these properties, it would impact our operations, results and financial condition adversely.*

Our Registered Office situated at Plot No- PAP D-146/147, TTC MIDC, Turbhe, Navi Mumbai - 400705, has been obtained on long lease from MIDC. Though the long lease signifies a lease for a period ranging from 50 – 99 years, as per the terms of MIDC, our Company is required to follow the terms and conditions of the deed for each of our properties. Any lapse in following the terms and conditions may result in MIDC withdrawing the lease or reducing the lease period.

Our Company operates from 3 manufacturing units situated at Vasai, are not owned by the Company and have been obtained on lease. In case of any cancellation of lease due to any factors, we may not able find suitable locations to shift our manufacturing units or do it without incurring substantial additional expense. This may result in additional cost, disruption of day-to-day activities and increased rent burden which would adversely affect our financial condition. For details regarding such tenancy properties and leasehold properties, please refer to “*Our Business –Properties*” on page no. 112 of this Draft Prospectus.

21. *Our manufacturing activities are dependent upon availability of skilled and unskilled labour.*

We have entered into an agreement with contract labourer for provision of skilled and unskilled labour. Our manufacturing activities are dependent on availability of skilled and unskilled labour. Non-availability of labour at any time or any disputes with them may affect our production schedule and timely delivery of our products to customers which may adversely affect our business and result of operations.

22. *We face competition in our business from both domestic and international competitors. Such competition may have a negative impact on our business prospects, future performance and financial condition.*

The industry, in which we are operating, is increasingly competitive and our results of operations and financial condition are sensitive to, and may be materially adversely affected by, competitive pricing and other factors.

Competition may result in pricing pressures, reduced profit margins or lost market share or a failure to grow our market share, any of which could substantially harm our business and results of operations.

There are various factors that could impair our ability to maintain our current levels of revenues and profitability in our goods transportation business, including the following:

- competition with other companies offering better pricing for the goods manufactured, some of which may have a wider range of product portfolio, and may have greater capital resources than we do;
- solicitation by customers of bids from multiple manufacturers and the resulting depression of the bidding prices or loss of business to competitors;
- development of an operational model similar to ours by a competitor with sufficient financial resources and comparable experience in the pipe support hanger & related metal products industry as well as textile industry;
- establishment of better relationships by our competitors with their customers; and
- the small unorganized players at a regional level may not comply with applicable statutory and regulatory requirements and due to which they may be able to operate at lower cost and consequently offer lower prices than us

There can be no assurance that we can effectively compete with our competitors in the future, and any such failure to compete effectively may have a material adverse effect on our business prospects, future performance, financial condition and results of operations.

Our Company's competitors may enjoy potential competitive advantages over us and may successfully attract our customers to their products/ services by matching or exceeding what we offer to our customers, such as:

- greater name/brand recognition, a longer operating history, wider geographical reach and wider customer base and extensive international operations;
- engage in price competition, reducing the product pricing;
- larger marketing and advertising budgets and resources;
- larger intellectual property portfolios; and
- greater financial, technical and other resources.

There can be no assurance that we will have sufficient resources to respond to competitors' investments in geographical and customer network and pricing and promotional programs.

If our Company is unable to effectively compete with other participants in the pipe support hanger & related metal products industry as well as textile industry, whether on the basis of pricing, product quality, services or otherwise, it might not be able to attract new customers or retain existing customers, and this could adversely affect our business, financial condition and results of operations.

23. Our insurance coverage may not adequately protect us against all material hazards, which may adversely affect our business, results of operations and financial condition.

Our business, manufacturing facilities, plant and machinery and other assets could suffer damage from fire, natural calamities, misappropriation or other causes, resulting in losses, which may not be fully compensated by insurance. There can be no assurance that the terms of our insurance policies will be adequate to cover any damage or loss suffered by our Company or that such coverage will continue to be available on reasonable terms or will be available in sufficient amounts to cover one or more large claims, or that the insurer will not disclaim coverage as to any future claim.

Further, our Company is required to renew these insurance policies from time to time and in the event, we fail to renew the insurance policies within the time period prescribed in the respective insurance policies or not obtain at all, our Company may face significant uninsured losses. If our Company suffers a large uninsured loss or if any insured loss suffered, significantly exceeds our insurance coverage, our business, financial condition and results of operations may be adversely affected.

24. *We generally do business with our customers on purchase order basis and do not enter into long term contracts with most of them.*

Our business is dependent on our continuing relationships with our customers. Our Company neither has any long-term contract with any of customers nor has any marketing tie up for the fabric and textile related products traded by us. Any change in the buying pattern of our customers from us can adversely affect the business of our Company. The loss of or interruption of work by, a significant customer or a number of significant customers or the inability to procure new orders on a regular basis or at all may have an adverse effect on our revenues, cash flows and operations.

25. *Changes in latest technology machinery/ requirement of machinery based on business opportunity may adversely affect our Company's results of operations and its financial condition.*

Modernisation and technology up gradation is essential to reduce costs and increase the output. Changes in technology may render our current technologies obsolete or require us to make substantial capital investments. However, our existing state-of-the-art manufacturing units have machineries with latest technology and we strive to keep our technology, equipments and machinery in line with the latest technological standards. But in future we may be required to implement new technology or upgrade the machineries and other equipment's employed by us. Further, the costs in upgrading our technology and modernizing the plant and machineries may be significant which could substantially affect our finances and operations.

Further in case of machinery requirement based on business opportunity/ latest technology machinery, we will have to incur huge expenditure which may adversely affect our Company's results of operations and its financial condition. Also up-gradation in our technology and key infrastructure on timely basis may hamper our operations and financial conditions.

26. *Non-compliance with and changes in, safety, health and environmental laws and other applicable regulations, may adversely affect Our Company's results of operations and its financial condition.*

Our Company is subject to Indian laws and government regulations, including in relation to safety, health and environmental protection. These safety, health and environmental protection laws and regulations inter alia impose controls on air and water discharge, noise levels, storage handling, employee exposure to hazardous substances and other aspects of our Company's operations and products. In addition, our products, including the process of manufacture, storage and distribution of such products, are subject to numerous laws and regulations in relation to quality, safety and health. Failure to comply with any existing or future regulations applicable to our Company may result in levy of fines, commencement of judicial proceedings and/or third party claims, and may adversely affect our results of operations and financial condition.

Further, there can be no assurance that our Company will not be involved in future litigation or other proceedings or be held responsible in any litigation or proceedings including in relation to safety, health and environmental matters, the costs of which could be material. Any accidents involving hazardous substances can cause personal injury and loss of life, substantial damage to or destruction of property and equipment and could result in a suspension of operations. The loss or shutdown of operations over an extended period at any of our Company's facilities would have a material adverse effect on our Company's business and operations.

27. *Our inability to manage growth could disrupt our business and reduce our profitability.*

A principal component of our strategy is to continue to grow by expanding the size and geographical scope of our businesses, as well as the development of our new products portfolio. This growth strategy will place significant demands on our management, financial and other resources. It will require us to continuously develop and improve our operational, financial and internal controls. Continuous expansion increases the challenges involved in financial management, maintaining good relationships with contract labour providers for retaining high quality human resources, preserving our culture, values and entrepreneurial environment, and

developing and improving our internal administrative infrastructure. Any inability on our part to manage such growth could disrupt our business prospects, impact our financial condition and adversely affect our results of operations.

28. *Employee misconduct, errors or fraud could expose us to business risks or losses that could adversely affect our business prospects, results of operations and financial condition.*

Employee misconduct, errors or frauds could expose us to business risks or losses, including regulatory sanctions, penalties and serious harm to our reputation. Such employee misconduct includes breach in security requirements, misappropriation of funds, hiding unauthorized activities, failure to observe our stringent operational standards and processes, and improper use of confidential information. It is not always possible to detect or deter such misconduct, and the precautions we take to prevent and detect such misconduct may not be effective. In addition, losses caused on account of employee misconduct or misappropriation of petty cash expenses and advances may not be recoverable, which we may result in write-off of such amounts and thereby adversely affecting our results of operations. Our employees may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions in which case, our reputation, business prospects, results of operations and financial condition could be adversely affected.

29. *Our Promoters and Promoter Group will continue to retain majority shareholding in us after the Issue, which will allow them to exercise significant influence over us and potentially create conflicts of interest.*

The current Issue includes fresh issue of Equity Shares and Offer for Sale by our Promoters and Promoter Group. Our Promoter and Promoter Group may beneficially own approximately 72.95% of our post-Issue equity share capital. As a result, the Promoter Group may have the ability to control our business including matters relating to any sale of all or substantially all of our assets, the timing and distribution of dividends and the election or termination of appointment of our officers and directors. This control could delay, defer or prevent a change in control of the Company, impede a merger, consolidation, takeover or other business combination involving the Company, or discourage a potential acquirer from making a tender offer or otherwise attempting to obtain control of the Company even if it is in the Company's best interest. In addition, for so long as the Promoter Group continues to exercise significant control over the Company, they may influence the material policies of the Company in a manner that could conflict with the interests of our other shareholders. The Promoter Group may have interests that are adverse to the interests of our other shareholders and may take positions with which our other shareholders do not agree.

30. *We have not independently verified certain data in this Draft Prospectus.*

We have not independently verified data from industry publications contained herein and although we believe these sources to be reliable, we cannot assure you that they are complete or reliable. Such data may also be produced on a different basis from comparable information compiled with regard to other countries. Therefore, discussions of matters relating to India and its economy are subject to the caveat that the statistical and other data upon which such discussions are based have not been verified by us and may be incomplete or unreliable.

These facts and statistics included in "Summary of Industry" and "Industry Overview" on pages nos. 35 and 83 respectively of this Draft Prospectus. Due to possibly flawed or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, we cannot assure you that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

31. *The rate of interest for the loans obtained by us from the banks and Financial Institutions is variable and any increase in interest rates may adversely affect our results of operations and financial condition.*

Our Company is susceptible to changes in interest rates and the risks arising there from. Our sanction letters provide for interest at variable rates with a provision for the periodic resetting of interest rates. Further the

lenders are entitled to change the applicable rate of interest, which is a combination of a base rate that depends upon the policies of the RBI and a contractually agreed spread, and in the event of an adverse change in our Company's credit risk rating. For further details of interest payable on our borrowings, please refer to the chapter titled "Financial Indebtedness" on page no. 190 of this Draft Prospectus. Further, in recent years, the Government of India has taken measures to control inflation, which have included tightening the monetary policy by raising interest rates. As such, any increase in interest rates may have an adverse effect on our business, results of operations, cash flows and financial condition.

32. *There are various negative covenants in the sanction letters issued to us by our lenders, which could put us at a competitive disadvantage and could have an adverse effect on our business, results of operations and financial condition.*

The sanction letter issued to us contains provisions that restrict our ability to do, among other things, any of the following:

- Changing or alter the Capital Structure of the Company;
- Entering into amalgamation, reconstruction, re-organisation, takeover or any other schemes of compromise or arrangement;
- Not implementing any scheme of expansion or diversification or capital expenditure except normal replacements indicate in Funds Flow Statement submitted
- Non- diversion of funds to any other purpose.
- Non-declaring of dividends/ withdrawal of any amount in any form of salary/ remuneration/ incentive/ commission by the Promoters/ Directors in case of overdue with the Bank

Further the company has created a charge on its assets in favour of their bankers against the assets of the company. In case of default by the company in repayment of the loans, bankers may exercise their rights over the security, which may be detrimental to the interest of the company. For details, please refer "Financial Indebtedness" on page no. 190 of this Draft Prospectus.

Also, we are required to obtain the required consents of the lenders before undertaking certain significant corporate actions. We cannot assure you that the lenders will grant the required approvals in a timely manner, or at all. The time required to secure consents may hinder us from taking advantage of a dynamic market environment. In addition to the restrictions listed above, we are required to maintain certain financial ratios under our financing agreements. These financial ratios and the restrictive provisions could limit our flexibility to engage in certain business transactions or activities.

Additionally, our borrowings are secured by our movable assets (whether existing or future) and by a personal guarantee of our Promoter / Promoter Group/ Directors. Such securities enable the lenders to cancel any outstanding commitments, accelerate the repayment, exercise cross default provisions and enforce their security interests on the occurrence of events of default such as a breach of financial covenants, failure to obtain the proper consents, failure to perfect security as specified and such other covenants that are not cured. It is possible that we may not have sufficient funds upon such an acceleration of our financial obligations to pay the principal amount and interest in full. Further, if we are forced to issue additional equity to the lenders, your ownership interest in our Company will be diluted. It is also possible that future financing agreements may contain similar or more onerous covenants and may also result in higher interest cost.

If any of these events were to occur, our business, results of operations and financial condition may be adversely affected.

- 33. We have availed of certain loans from Banks, pursuant to the Financing Agreements that we have entered into with them. Pursuant to the terms of such agreements, we require consents from the respective Bankers for a number of corporate actions, including for undertaking this Issue, which have not been obtained as on date (except Bank of India). Any failure to obtain such consents may result in a default under the terms of the Financing Agreements.**

Pursuant to the Financing Agreements entered into by us with the Bankers, we are required to obtain consents from the respective Bankers to undertake certain actions, including this Issue and for completion of the requirements pertaining to this Issue. Though, we have informed our bankers orally of our intention to undertake this Issue, as on date, we have not obtained consents from these bankers for undertaking this Issue, except Bank of India and the same is awaited.

While our Company intends to obtain all the necessary consents in relation to this Issue from our Bankers prior to the filing of the Prospectus with the RoC, undertaking this Issue without obtaining our Banker's consents, or in contravention of any conditions contained in such contents, may constitute a breach of the Financing Agreements. Any default under the Financing Agreements may enable our Bankers to cancel any outstanding commitments, accelerate the repayment and enforce their security interests. If our obligations under the Financing Agreements are accelerated, our financial condition and operations could materially and adversely be affected.

- 34. In addition to normal remuneration, other benefits and reimbursement of expenses our Directors (including our Promoters) and Key Management Personnel are interested in our Company to the extent of their shareholding and dividend entitlement in our Company.**

Some of our Directors (including our Promoters) and Key Management Personnel are interested in our Company to the extent of their shareholding and dividend entitlement in our Company, in addition to normal remuneration, incentives or benefits and reimbursement of expenses. We cannot assure you that our Directors or our Key Management Personnel would always exercise their rights as Shareholders to the benefit and best interest of our Company. As a result, our Directors will continue to exercise significant control over our Company, including being able to control the composition of our board of directors and determine decisions requiring simple or special majority voting, and our other Shareholders may be unable to affect the outcome of such voting. Our Directors may take or block actions with respect to our business, which may conflict with our best interests or the interests of other minority Shareholders, such as actions with respect to future capital raising or acquisitions. We cannot assure you that our Directors will always act to resolve any conflicts of interest in our favour, thereby adversely affecting our business and results of operations and prospects.

- 35. The deployment of the Net Proceeds from the Fresh Issue are based on management estimates and have not been independently appraised by any bank or financial institution and .is not subject to any monitoring by any independent agency and our Company's management will have flexibility in utilizing the Net Proceeds from the Fresh Issue.**

Our Company intends to primarily use the Net Proceeds from the Fresh Issue towards Working Capital requirement as described in "Objects of the Issue" on page no. 70 of this Draft Prospectus. In terms of Regulation 16 of the SEBI (ICDR) Regulations, we are not required to appoint a monitoring agency since the Issue size is not in excess of ₹ 10, 000 lakhs. The management of our Company will have discretion to use the Net Proceeds from the Fresh Issue, and investors will be relying on the judgment of our Company's management regarding the application of the Net Proceeds from the Fresh Issue. Our Company may have to revise its management estimates from time to time and consequently its requirements may change. Additionally, various risks and uncertainties, including those set forth in this section "Risk Factors", may limit or delay our Company's efforts to use the Net Proceeds from the Fresh Issue to achieve profitable growth in its business.

Further, pursuant to Section 27 of the Companies Act 2013, any variation in the objects would require a special resolution of the Shareholders and our Promoters or controlling Shareholders will be required to provide an exit

opportunity to the Shareholders of our Company who do not agree to such proposal to vary the objects, in such manner as may be prescribed in future by the SEBI.

Accordingly, prospective investors in the Issue will need to rely upon our management's judgment with respect to the use of Net Proceeds. If we are unable to enter into arrangements for utilization of Net proceeds as expected and assumed by us in a timely manner or at all, we may not be able to derive the expected benefits from the proceeds of the Issue and our business and financial results may suffer.

36. We have issued Equity Shares during the last year at a price that may be below the Issue Price.

We have issued certain Equity Shares in the last twelve months, at a price that may be lower than the Issue Price. Details of such issuances are given in the table below:

Date of Allotment	No. of Equity Shares	Issue Price (₹)	Nature of Allotment	Allotted Person
November 07, 2017	6,00,000	26	Right Issue	Allotted to Mrs. Fatema S Kanchwala

For Further details of equity shares issued, please refer to the section titled "Capital Structure" beginning on page no. 60 of this Draft Prospectus.

37. Our Promoters and Directors have extended personal guarantees in connection with certain of our debt facilities. There can be no assurance that such personal guarantees will be continued to be provided by our Promoters/ Directors in the future or can be called at any time, affecting the financial.

Our Promoters and Directors have provided personal guarantees for our borrowings to secure our loans. If any of these guarantees are revoked, our lenders may require alternative guarantees or collateral or cancellation of such facilities, entailing repayment of amounts outstanding under such facilities. If we are unable to procure alternative guarantees satisfactory to our lenders, we may need to seek alternative sources of capital, which may not be available to us at commercially reasonable terms or at all, or to agree to more onerous terms under our financing agreements, which may limit our operational flexibility. Accordingly, our business, financial condition, results of operations, cash flows and prospects may be adversely affected by the revocation of all or any of the personal guarantees provided by our Promoters/ Directors in connection with our Company's borrowings.

38. We have not identified any alternate source of raising the funds mentioned as our 'Objects of the Issue'. Any shortfall in raising / meeting the same could adversely affect our growth plans, operations and financial performance.

Our Company has not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds can adversely affect our growth plan and profitability. The delay/shortfall in receiving these proceeds could result in inadequacy of funds for setting up the denim processing unit or may result in us borrowing funds on unfavourable terms, both of which scenarios may affect the business operation and financial performance of the company.

39. In the event there is any delay in the completion of the Issue, there would be a corresponding delay in the completion of the objects / schedule of implementation of this Issue which would in turn affect our revenues and results of operations.

The funds that we receive would be utilized for the Objects of the Fresh Issue as has been stated in the Chapter "Objects of the Issue" on page no. 70 of the Draft Prospectus. The proposed schedule of implementation of the objects of the Offer is based on our management's estimates. If the schedule of implementation is delayed for any other reason whatsoever, including any delay in the completion of the Offer, we may have to revise our

business, development and working capital plans resulting in unprecedented financial mismatch and this may adversely affect our revenues and results of operations.

40. The requirements of being a public listed company may strain our resources and impose additional requirements.

With the increased scrutiny of the affairs of a public listed company by shareholders, regulators and the public at large, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur in the past. We will also be subject to the provisions of the listing agreements signed with the Stock Exchanges which require us to file unaudited financial results on a quarterly basis. In order to meet our financial control and disclosure obligations, significant resources and management supervision will be required. As a result, management's attention may be diverted from other business concerns, which could have an adverse effect on our business and operations. There can be no assurance that we will be able to satisfy our reporting obligations and/or readily determine and report any changes to our results of operations in a timely manner as other listed companies. In addition, we will need to increase the strength of our management team and hire additional legal and accounting staff with appropriate public company experience and accounting knowledge and we cannot assure that we will be able to do so in a timely manner.

RISK FACTORS RELATED TO EQUITY SHARES

41. Any further issuance of Equity Shares by Our Company or sales of Equity Shares by any significant shareholders may adversely affect the trading price of the Equity Shares.

Any future issuance of Equity Shares by our Company could dilute the investors' shareholding. Any such future issuance of Equity Shares or sales of Equity Shares by any of our significant shareholders may also adversely affect the trading price of the Equity Shares, and could impact our ability to raise capital through an offering of securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares.

42. There is no existing market for our Equity Shares, and we do not know if one will develop. Our stock price may be highly volatile after the Issue and, as a result, you could lose a significant portion or all of your investment.

There is no guarantee that our Equity Shares will be listed on the Stock Exchanges in a timely manner or at all and any trading closures at the Stock Exchanges may adversely affect the trading price of our Equity Shares. Prior to the Issue, there has not been a public market for the Equity Shares. Further, we cannot predict the extent to which investor interest will lead to the development of an active trading market on the Stock Exchanges or how liquid that market will become. If an active market does not develop, you may experience difficulty selling the Equity Shares that you purchased. The Issue Price is not indicative of prices that will prevail in the open market following the Issue. Consequently, you may not be able to sell your Equity Shares at prices equal to or greater than the Issue Price. The market price of the Equity Shares on the Stock Exchanges may fluctuate after listing as a result of several factors, including the following:

- Volatility in the Indian and other Global Securities Markets;
- The performance of the Indian and Global Economy;
- Risks relating to our business and industry, including those discussed in this Draft Prospectus;
- Strategic actions by us or our competitors;
- Investor perception of the investment opportunity associated with the Equity Shares and our future performance;
- Adverse media reports about us, our shareholders or Group Companies;
- Future sales of the Equity Shares;
- Variations in our half yearly results of operations;

- Differences between our actual financial and operating results and those expected by investors and analysts;
- Our future expansion plans;
- Perceptions about our future performance or the performance of Pipe Hanger Support and Steel Industry sector companies generally;
- Performance of our competitors in the Pipe Hanger Support and Steel Industry and the perception in the market about investments in the same;
- Significant developments in the regulation of the manufacturing of Pipe Hanger Support and Steel Industry in our key locations;
- Changes in the estimates of our performance or recommendations by financial analysts;
- Significant developments in India's economic liberalisation and deregulation policies; and
- Significant developments in India's fiscal and environmental regulations. There has been significant volatility in the Indian stock markets in the recent past, and our Equity Share

Price could fluctuate significantly as a result of market volatility. A decrease in the market price of the Equity Shares could cause you to lose some or all of your investment.

43. There are restrictions on daily movements in the price of the Equity Shares, which may adversely affect a shareholder's ability to sell, or the price at which it can sell, the Equity Shares at a particular point in time.

The price of the Equity Shares will be subject to a daily circuit breaker imposed by all stock exchanges in India which does not allow transactions beyond a certain level of volatility in the price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by the SEBI on Indian stock exchanges. The percentage limit on our circuit breaker is set by the stock exchanges based on the historical volatility in the price and trading volume of the Equity Shares. The stock exchanges do not inform us of the percentage limit of the circuit breaker from time to time, and may change it without our knowledge. This circuit breaker effectively limits upward and downward movements in the price of the Equity Shares. As a result, shareholders' ability to sell the Equity Shares, or the price at which they can sell the Equity Shares, may be adversely affected at a particular point in time.

44. Our ability to pay dividends in the future may be affected by any material adverse effect on our future earnings, financial condition or cash flows.

Our ability to pay dividends in future will depend on our earnings, financial condition and capital requirements, and that of our Subsidiary and the dividends they distribute to us. In the past, we have not made dividend payments to the Shareholders of our Company. The Company may decide to retain all future earnings, if any, for use in the operations and expansion of the business. In such situation, the Company may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board and will depend on factors that our Board deems relevant, including among others, our future earnings, financial condition, cash requirements, business prospects and any other financing arrangements. We cannot state with any certainty whether we will be able to pay dividends in the future. Accordingly, realization of a gain on Shareholders' investments will depend on the appreciation of the price of the Equity Shares. There is no guarantee that our Equity Shares will appreciate in value.

45. Investors may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.

Under current Indian tax laws and regulations, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India. Any gain realized on the sale of listed equity shares on a stock exchange held for more than 12 months will not be subject to capital gains tax in India if Securities Transaction Tax (STT) has been paid on the transaction. STT will be levied on and collected by a domestic stock exchange on which the equity shares are sold. Any gain realized on the sale of equity shares held for more than 12 months to an Indian resident, which are sold other than on a recognised stock exchange and on which no STT has been paid, will be subject to long term capital gains tax in India. Further, any gain realized on the sale of listed equity

shares held for a period of 12 months or less will be subject to short term capital gains tax in India. Capital gains arising from the sale of the Equity Shares will be exempt from taxation in India in cases where the exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the Equity Shares. In addition, changes in the terms of tax treaties or in their interpretation, as a result of renegotiations or otherwise, may affect the tax treatment of capital gains arising from a sale of Equity Shares.

EXTERNAL RISK FACTORS

46. The GoI has implemented a new national tax regime by imposing GST.

The GoI has implemented a comprehensive national GST regime from July 01, 2017 that will combine taxes and levies by the Central and State Governments into a unified rate structure. GST is a dual levy with state GST and central GST. Central GST will replace the current central taxes and duties such as excise duty, service tax, counter vailing duty, special additional duty of customs, central charges and cesses. The state GST will replace local state taxes like VAT, CST, octroi and others including state cesses and charges.

Any future increases or amendments may affect the overall tax efficiency of companies operating in India and may result in significant additional taxes becoming payable.

Our business being construction centric, most of the current central taxes and duties and local state taxes and duties are applicable to our business. We are in the process to understand the quantification of the impact of this development at this stage due to limited information available in the public domain. If we are taxed at a higher rate than the current tax rates, our financial condition and results of operations may be adversely affected.

Further, we may also be required to make changes in our internal process to adapt to the requirements of GST. We cannot assure you if we will be able to effectively carry out such changes. To ensure compliance with the requirements of the GST laws, we may also need to allocate additional resources, which may increase our regulatory compliance costs and divert management attention. Any increase in our compliance requirements or in our compliance costs may have an adverse effect on our business and results of operations.

47. The Companies Act, 2013 has effected significant changes to the existing Indian company law framework, which may subject us to higher compliance requirements and increase our compliance costs.

A majority of the provisions and rules under the Companies Act, 2013 have recently been notified and have come into effect from the date of their respective notification, resulting in the corresponding provisions of the Companies Act, 1956 ceasing to have effect. The Companies Act, 2013 has brought into effect significant changes to the Indian company law framework, such as in the provisions related to issue of capital, disclosures in prospectus, corporate governance norms, audit matters, related party transactions, introduction of a provision allowing the initiation of class action suits in India against companies by shareholders or depositors, a restriction on investment by an Indian company through more than two layers of subsidiary investment companies (subject to certain permitted exceptions), prohibitions on loans to directors and insider trading and restrictions on directors and key managerial personnel from engaging in forward dealing. Further, companies meeting certain financial thresholds are also required to constitute a committee of the board of directors for corporate social responsibility activities and ensure that at least 2% of the average net profits of the company during three immediately preceding financial years are utilized for corporate social responsibility activities. Penalties for instances of non-compliance have been prescribed under the Companies Act, 2013, which may result in inter alia, our Company, Directors and key managerial employees being subject to such penalties and formal actions as prescribed under the Companies Act, 2013, should we not be able to comply with the provisions of the New Companies Act within the prescribed timelines, and this could also affect our reputation.

To ensure compliance with the requirements of the Companies Act, 2013 within the prescribed timelines, we may need to allocate additional resources, which may increase our regulatory compliance costs and divert

management attention. While we shall endeavour to comply with the prescribed framework and procedures, we may not be in a position to do so in a timely manner.

The Companies Act, 2013 introduced certain additional requirements which do not have corresponding equivalents under the Companies Act, 1956. Accordingly, we may face challenges in interpreting and complying with such provisions due to limited jurisprudence on them. In the event, our interpretation of such provisions of the Companies Act, 2013 differs from, or contradicts with, any judicial pronouncements or clarifications issued by the Government in the future, we may face regulatory actions or we may be required to undertake remedial steps. Additionally, some of the provisions of the Companies Act, 2013 overlap with other existing laws and regulations (such as the corporate governance norms and insider trading regulations). We may face difficulties in complying with any such overlapping requirements. Further, we cannot currently determine the impact of provisions of the Companies Act, 2013, which are yet to come in force. Any increase in our compliance requirements or in our compliance costs may have an adverse effect on our business and results of operations.

48. *Any changes in the regulatory framework could adversely affect our operations and growth prospects.*

Our Company is subject to various regulations and policies. For details see section titled “Key Industry Regulations and Policies” beginning on page no. 115 of this Draft Prospectus. Our business and prospects could be materially adversely affected by changes in any of these regulations and policies, including the introduction of new laws, policies or regulations or changes in the interpretation or application of existing laws, policies and regulations. There can be no assurance that our Company will succeed in obtaining all requisite regulatory approvals in the future for our operations or that compliance issues will not be raised in respect of our operations, either of which could have a material adverse affect on our business, financial condition and results of operations.

49. *Changing laws, rules and regulations and legal uncertainties, including adverse application of corporate and tax laws, may adversely affect our business, results of operations, financial condition and prospects.*

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes, including the instances mentioned below, may adversely affect our business, results of operations, financial condition and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy. The GoI has proposed a comprehensive national goods and services tax ("GST") regime that will combine taxes and levies by the Central and State Governments into a unified rate structure which is proposed to be effective from July 1, 2018. While the GoI and other state governments have announced that all committed incentives will be protected following the implementation of the GST, given the limited availability of information in the public domain concerning the GST, we are unable to provide any assurance as to this or any other aspect of the tax regime following implementation of the GST. The implementation of this rationalized tax structure may be affected by any disagreement between certain state governments, which may create uncertainty. Any such future increases or amendments may affect the overall tax efficiency of companies operating in India and may result in significant additional taxes becoming payable.

Further, the General Anti Avoidance Rules ("GAAR") are proposed to be made effective from April 1, 2017. The tax consequences of the GAAR provisions being applied to an arrangement could result in denial of tax benefit amongst other consequences. In the absence of any precedents on the subject, the application of these provisions is uncertain. If the GAAR provisions are made applicable to our Company, it may have an adverse tax impact on us.

We have not determined the impact of these proposed legislations on our business. Uncertainty in the applicability, Interpretation or implementation of any amendment to, or change in, governing law, regulation or policy in the jurisdictions in which we operate, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current business or restrict our ability to grow our business in the future. Further, the GoI may introduce a waiver or incentive scheme in relation to specific population segments such as MSEs in public

interest, pursuant to which we may be required to Issue our products and services at discounted rates. This may affect our business and results of operations.

50. *Civil disturbances, extremities of weather, regional conflicts and other political instability may have adverse affects on our operations and financial performance.*

Certain events that are beyond our control such as earthquake, fire, floods and similar natural calamities may cause interruption in the business undertaken by us. Our operations and financial results and the market price and liquidity of our equity shares may be affected by changes in Indian Government policy or taxation or social, ethnic, political, economic or other adverse developments in or affecting India.

51. *Terrorist attacks, civil unrest and other acts of violence or war involving India and other countries could adversely affect the financial markets and our business.*

Terrorist attacks and other acts of violence or war may negatively affect the Indian markets on which our Equity Shares will trade and also adversely affect the worldwide financial markets. These acts may also result in a loss of business confidence, impede travel and other services and ultimately adversely affect our business. In addition, any deterioration in relations between India and Pakistan might result in investor concern about stability in the region, which could adversely affect the price of our Equity Shares.

India has also witnessed civil disturbances in recent years and it is possible that future civil unrest as well as other adverse social, economic and political events in India could have a negative impact on the value of share prices generally as well as the price of our Equity Shares. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse impact on our business and the price of our Equity Shares.

52. *Instability in financial markets could materially and adversely affect our results of operations and financial condition.*

The Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, especially in the United States of America or Europe, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors' reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets.

The global financial turmoil, an outcome of the sub-prime mortgage crisis which originated in the United States of America, led to a loss of investor confidence in worldwide financial markets. Indian financial markets have also experienced the contagion effect of the global financial turmoil, evident from the sharp decline in SENSEX, BSE's benchmark index. Any prolonged financial crisis may have an adverse impact on the Indian economy and us, thereby resulting in a material and adverse effect on our business, operations, financial condition, profitability and price of our Equity Shares.

53. *Any downgrading of India's debt rating by a domestic or international rating agency could adversely affect our Company's business.*

Any adverse revisions to India's credit ratings for domestic and international debt by domestic or international rating agencies may adversely affect our Company's ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing is available. This could harm our Company's business and financial performance and ability to obtain financing for capital expenditures.

54. *Conditions in the Indian securities market and stock exchanges may affect the price and liquidity of our Equity Shares.*

Indian stock exchanges, which are smaller and more volatile than stock markets in developed economies, have in the past, experienced problems which have affected the prices and liquidity of listed securities of Indian companies. These problems include temporary exchange closures to manage extreme market volatility, broker defaults, settlement delays and strikes by brokers. In addition, the governing bodies of the Indian stock exchanges have from time to time restricted securities from trading, limited price movements and restricted margin requirements. Further, disputes have occurred on occasion between listed companies and the Indian stock exchanges and other regulatory bodies that, in some cases, have had a negative effect on market sentiment. If similar problems occur in the future, the market price and liquidity of the Equity Shares could be adversely affected. Further, a closure of, or trading stoppage on, either of the Stock Exchanges could adversely affect the trading price of our Equity Shares.

55. *We will prepare our financial statements from April 1, 2018 onwards under the Indian Accounting Standards (“Ind AS”). As Ind AS is different in many respects from Indian GAAP, our financial statements from April 1, 2018 may not be comparable to our historical financial statements and our financial statements for the year ending March 31, 2017 prepared under Indian GAAP may not be comparable to our financial statements for the year ending March 31, 2017 prepared under Ind AS for comparison purposes. In addition, our transition to Ind AS reporting could have an adverse effect on our business and results of operations.*

We currently prepare our financial statements under Indian GAAP. The Companies (Indian Accounting Standards) Rules, 2015 (“IAS Rules”), as amended by the Companies (Indian Accounting Standards) (Amendment) Rules, 2016, enacted changes to Indian GAAP that are intended to align Indian GAAP further with IFRS. The IAS Rules provide that the financial statements of the companies to which they apply shall be prepared and audited in accordance with Ind AS. Ind AS is different in many respects from Indian GAAP. All NBFCs and HFCs having a net worth of more than ₹ 5,000.00 million are required to mandatorily adopt Ind AS for the accounting period beginning from April 1, 2018, with comparatives for the period ending on March 31, 2017. Although any company may voluntarily implement Ind AS for the accounting period beginning from April 1, 2015, we intend to implement Ind AS for the accounting period beginning from April 1, 2018. As there is not yet a significant body of established practice, such as interpretations of Ind AS, on which to draw in forming judgments regarding the Ind AS implementation and application, we have not determined with any degree of certainty the impact the adoption of Ind AS will have on our financial statements. However, we know that the Ind AS will change our methodology for estimating allowances for doubtful debt losses. Ind AS will require us to value our NPAs by reference to their market value (if a ready market for such loans exists) or to calculate the present value of the expected future cash flows realisable from our loans, including the possible liquidation of collateral (discounted at the loan’s effective interest rate) in estimating allowances for doubtful debt losses. This may result in us recognising higher allowances for doubtful debt losses in the future, which will adversely affect our results of our operations. Accordingly, our financial statements for the period commencing from April 1, 2018 may not be comparable to our historical financial statements and our financial statements for the year ending March 31, 2017 prepared under Indian GAAP may not be comparable to our financial statements for the year ending March 31, 2017 prepared under Ind AS for comparison purposes.

In our transition to Ind AS reporting, we may encounter difficulties in the on-going process of implementing and enhancing our management information systems. Our management may also have to divert significant time and additional resources in order to implement Ind AS on a timely and successful basis. Moreover, there is increasing competition for the small number of Ind AS experienced accounting personnel available as more Indian companies begin to prepare Ind AS financial statements. Therefore, our transition to Ind AS reporting could have an adverse effect on our business and results of operations.

SECTION III – INTRODUCTION

SUMMARY OF INDUSTRY

OVERVIEW OF THE INDIAN ECONOMY

India has emerged as the fastest growing major economy in the world as per the Central Statistics Organisation (CSO) and International Monetary Fund (IMF) and it is expected to be one of the top three economic powers of the world over the next 10-15 years, backed by its strong democracy and partnerships.. Indian economy is expected to grow at a rate of 6.7 per cent in the year 2017-18 and in the next financial year 2018-19 the economy is expected to grow at a rate of 7.2 per cent. The improvement in India's economic fundamentals has accelerated in the year 2015 with the combined impact of strong government reforms, Reserve Bank of India's (RBI) inflation focus supported by benign global commodity prices.

(Source: <https://www.ibef.org/economy/indian-economy-overview>)

During September 2017, eight core infrastructure industries grew by 5.2 per cent, as compared to 4.9 per cent growth in August 2017 and 5.3 per cent growth in September 2016. The growth of core industries during April-September 2017 was 3.3 per cent, as compared to 5.4 per cent growth during the same period last year.

Overall growth in the Index of Industrial Production (IIP) was 3.8 per cent in September 2017, as compared with 4.3 per cent growth in August 2017 and 5.0 per cent growth in September 2016. During April-September 2017, IIP growth was 2.5 per cent as compared to growth of 5.9 per cent during the same period last year.

Foreign exchange reserves were US\$ 398.8 billion as on October 27, 2017, as against US\$ 370 billion in March 2017.

(Source: *Indian Economic Development and Growth Monthly Economic Report- www.ibef.org*)

Economic growth is projected to remain strong and India will remain the fastest growing G20 economy. The increase in public wages and pensions will support consumption. Private investment will recover gradually as excess capacity diminishes, and the landmark Goods and Services Tax and other measures to improve the ease of doing business are being implemented. However, large non-performing loans and high leverage of some companies are holding back investment. Monetary policy is projected to remain tight as inflation expectations have still not fully adjusted down. The need to reduce the relatively high public-debt-to-GDP ratio leaves little room for fiscal stimulus.

INTRODUCTION TO PIPE SUPPORTS

Pipe Supports

Pipe is held either from above by hangers or supports of various types on which it rests. *Hangers are also referred to as supports.*

There are a number of typical pipe supports that can be installed to support dead weight loads, and restrain the pipe for thermal and dynamic loads. The designs are only limited by the imagination of the engineer and designer, as literally thousands of different designs have been used for special purposes. Pipe is rested on or secured to a support member usually of a standard structural shape (I-beam, wide flange beam, angle, channel etc.). The pipe may be secured to this member with a pipe support.

Pipe supports and hangers are devices which transfer the loads from the pipe or the structural attachment to the supporting structure or equipment. They include rod hangers, spring hangers, sway braces, turnbuckles, struts,

anchors, saddles, rollers, brackets, and sliding supports. Structural attachments are elements that are welded, bolted, or clamped to the pipe, such as clips, lugs, clamps, clevises, and stops.

The correct and economical selection of the supports for any piping system usually presents difficulties of varying degrees, some relatively minor and others of a more critical nature. Proper support selection should be the objective of all phases of design and construction.

Typical Dummy Leg Support

Typical Rod Hanger

(Source: <http://wermac.org/steel/pipesupports.html>)

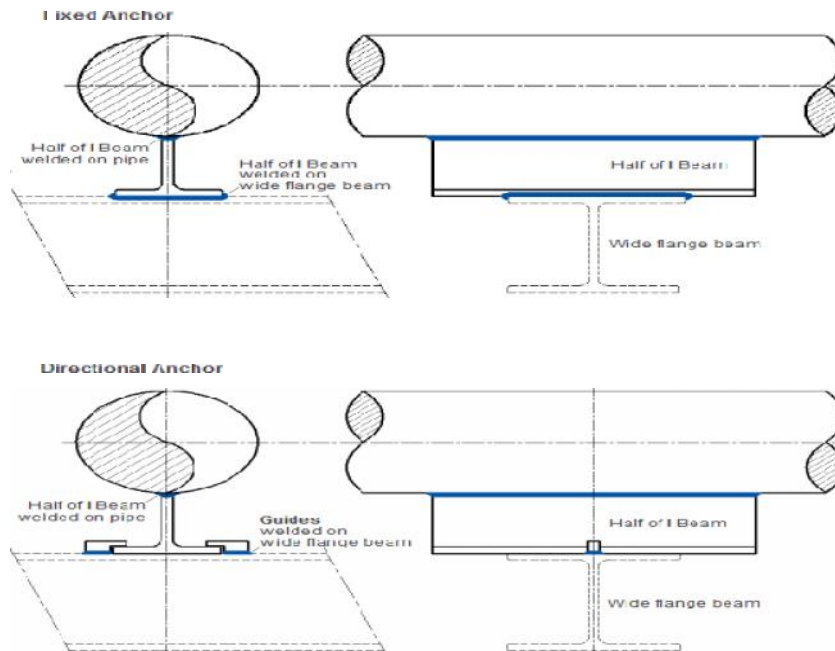

OFTEN USED PIPE SUPPORTS

Anchors

A rigid support that restricts movement in all three orthogonal directions and all three rotational directions. This usually is a welded stanchion that is welded or bolted to steel or concrete.

Two types of anchors exist: fixed and directional. Fixed anchors are used in locations where all movement of a line must be prevented. In piping terms this is called a fixed point. The most common way to anchor a pipe is to weld the pipe directly to a support or structural member. If the pipe to be anchored is insulated, first a pipe shoe is welded to the pipe and then the shoe is welded to the steel structure.

Directional anchors are used to force movement to occur in one direction while preventing it from occurring in the opposite direction. Directional anchors are used to direct a pipe's movement away from buildings, structures, equipment etc.

DUMMY LEG SUPPORTS

A dummy leg is an extension piece welded to an elbow in order to support a pipe line, and rests or anchors on some steel member.

Pipe size, length and wall thickness of the pipe-extension depends on several factors such as the total load, the parent pipe line size etc. *See typical dummy leg image on the right of this page.*

HANGER RODS

A vertical pipe support that incorporates a rod. It may be a rigid, variable spring or constant support hanger. Hanger is a term that often means quite different things to different people.

Rod hangers or pipe hangers attaches to the pipe by a U bolt, a clevis, a pipe clamp etc. to structural steel above. The rod hanger provides support in the vertical direction and allows limited motion in the horizontal direction. Adjustment in the vertical direction can be accomplished by threads or a turnbuckle. *See hanger rod image on the right of this page.*

GUIDES

When total restriction of pipe movement is not required, pipe guides are used.

Pipe guides confine movement along the pipe's lineal axis. In piping terms this is called a sliding point. They are used primarily to maintain proper line spacing in a pipe rack and they prevent lateral or sideway movement.

Unlike the pipe anchor which is welded to the pipe and steel structure, the guide allows pipe to slide lengthwise between two angle shapes. When the pipe is supported on shoes, the angle shapes are positioned on either side of the shoe. *For an image of guides see directional anchor above.*

CONSTANT LOAD HANGER

A specially engineered hanger that is designed to travel through many inches of vertical travel with a minimal change in support load. There are different styles and types depending on the manufacturers. Per MSS SP-58 a constant support hanger can be within specification and still have a load variation of plus minus 6% through the travel range.

Some suppliers claim a tighter tolerance on the load variation. Constant hangers and constant supports are used for piping and related components where higher levels of vertical travel occur. Their job is to transfer the working load over the whole travel area while maintaining constancy, i.e., without any considerable deviations. The functional precision of the constant hanger is decisive for the favorable long term behaviour of the components concerned.

Constant hangers compensate for vertical movement caused by thermal expansion. Via constant hangers, the respective piping loads are constantly absorbed and transferred with no significant deviation over the whole range of movement. *Significant deviations would act as harmful and uncontrolled extra loads in the system.*

Horizontal constant with top attachment which is bolted directly to the bottom of the steel as shown above.

VARIABLE SPRING HANGERS AND SUPPORTS

A helical coil that supports dead weight load. The support load changes as the spring moves through its range at a specified spring rate. This support can be a hanger above the pipe, or a floor support below the pipe.

To prevent constraints in the system, thermal expansion in the piping and other piping components must not be hindered. The piping must therefore be supported in a correspondingly elastic manner.

To compensate for slight vertical displacements in the piping, spring components are used as supports. The functioning of these components is based on preset helical coil springs which exert a variable supporting load over the whole range of movement corresponding to the given spring characteristics.

Load variations resulting from this are limited through corresponding specifications based on stress calculations for the piping - this depends on the sensitivity of the system.

HYDRAULIC SHOCK ABSORBERS

The use of shock absorbers (snubbers) is preferred in thermally operating piping systems. In a dynamic event, shock absorbers instantaneously form a practically rigid restraint between the protected component and the structure. Resulting dynamic energy can at once be absorbed and harmlessly transferred.

Through the special function of the shock absorbers, thermal displacements during normal operation remain unhindered.

OVERVIEW OF STEEL INDUSTRY

India is currently the world's fourth largest producer of crude steel (knocking to be the third largest by the year end) and is expected to become the second largest producer by 2020. Steel production in India has increased from 81 million tonnes (mt) in 2013-14 to 88 mt in 2014-15 with the capacity being increased from 100 mt in 2013-14 to 110 mt in 2014-15. The steel sector contributes nearly 2% of the country's GDP and employs over 6 lakh people. The per capita consumption of total finished steel in the country has risen from 51 kg in 2009-10 to about 60 kg in 2014-15.

Steel industry derives its demand from other important sectors like infrastructure, aviation, engineering, construction, automobile, pipes and tubes etc. With the Indian economy poised for its next wave of growth under the reforms being unleashed in the last one year, there lies tremendous opportunity for the Indian steel industry to prosper and grow exponentially.

The Indian steel industry is largely iron-based through the blast furnace (BF) or the direct reduced iron (DRI) route. Indian steel industry is highly consolidated. About 50% of the crude steel capacity is resident with integrated steel producers (ISP). But the changing ratio of hot metal to crude steel production indicates toward the increasing presence of secondary steel producers in the eco-system.

(Source: http://www.indiasteelexpo.in/industry_overview.php)

Steel Production in India Has Been Growing At a Fast Pace

- In FY17, crude steel production in India was 97.42 MT, with the total crude steel production growing at a CAGR of 5.49 per cent over the last 6 years.
- The steel sector contributes over 2 per cent to the GDP of the nation and provides 20 lakh jobs in the country.
- During April-November 2017, crude steel and finished steel production in India stood at 66.70 MT and 76.356 MT respectively.
- As of March 2017, the capacity utilisation of steel producers is set to increase with strong export demand and signs of revival in domestic sales. Companies like JSW and Essar Steel have experienced a sharp increase in steel manufacturing in the last 2 months
- Steel manufacturing output of India is expected to increase to 128.6 MT by 2021, accelerating the country's share of global steel production from 5.4 per cent in 2017 to 7.7 per cent by 2021.
- India's steel output is expected to grow at a CAGR of 8.9 per cent during 2017-21 and India is expected to become top global steel producer^.

Government Initiatives

Some of the other recent government initiatives in this sector are as follows:

- Steel demand is set to rise in the coming period owing to increased public sector spending by the Government of India.
- The Union Cabinet, Government of India has approved the National Steel Policy (NSP) 2017, as it seeks to create a globally competitive steel industry in India. NSP 2017 targets 300 million tonnes (MT) steel-making capacity and 160 kgs per capita steel consumption by 2030.
- Metal Scrap Trade Corporation (MSTC) Limited and the Ministry of Steel have jointly launched an e-platform called 'MSTC Metal Mandi' under the 'Digital India' initiative, which will facilitate sale of finished and semi-finished steel products.
- The Ministry of Steel is facilitating setting up of an industry driven Steel Research and Technology Mission of India (SRTMI) in association with the public and private sector steel companies to spearhead research and development activities in the iron and steel industry at an initial corpus of Rs 200 crore (US\$ 30 million).

Road ahead

India is expected to overtake Japan to become the world's second largest steel producer soon, and aims to achieve 300 million tonnes of annual steel production by 2025-30.

India is expected to become the second largest steel producer in the world by 2018, based on increased capacity addition in anticipation of upcoming demand, and the new steel policy, that has been approved by the Union Cabinet in May 2017, is expected to boost India's steel production.* Huge scope for growth is offered by India's comparatively low per capita steel consumption and the expected rise in consumption due to increased infrastructure construction and the thriving automobile and railways sectors.

FABRIC AND TEXTILE INDUSTRY OVERVIEW

Indian Scenario

India's textiles sector is one of the oldest industries in Indian economy dating back several centuries. Even today, textiles sector is one of the largest contributors to India's exports with approximately 13 per cent of total exports. The textiles industry is also labour intensive and is one of the largest employers. The textile industry has two broad segments. First, the unorganised sector consists of handloom, handicrafts and sericulture, which are operated on a small scale and through traditional tools and methods. The second is the organised sector consisting of spinning, apparel and garments segment which apply modern machinery and techniques such as economies of scale.

The textile industry employs about 45 million people directly and 20 million people indirectly. India's overall textile exports during FY 2015-16 stood at US\$ 40 billion.

Market Size

The Indian textiles industry, currently estimated at around US\$ 120 billion, is expected to reach US\$ 230 billion by 2020. The Indian Textile Industry contributes approximately 2 per cent to India's Gross Domestic Product (GDP), 10 per cent of manufacturing production and 14 per cent to overall Index of Industrial Production (IIP).

Indian khadi products sales increased by 33 per cent year-on-year to Rs 2,005 crore (US\$ 311.31 million) in 2016-17 and is expected to exceed Rs 5,000 crore (US\$ 776.33 million) sales target for 2018-19, as per the Khadi and Village Industries Commission (KVIC).

The total area under cultivation of cotton in India is expected to increase by 7 per cent to 11.3 million hectares in 2017-18, on account of expectations of better returns from rising prices and improved crop yields during the year 2016-17.

Government Initiatives

The Indian government has come up with a number of export promotion policies for the textiles sector. It has also allowed 100 per cent FDI in the Indian textiles sector under the automatic route.

Initiative will be taken into consideration by Government of India.

- The Government has planned to connect as many as 5 crore (50 million) village women to charkha (spinning wheel) in next 5 years with a view to provide them employment and promote khadi and also, they inaugurated 60 khadi outlets which were renovated and re-launched during the completion of KVIC's 60th anniversary and a khadi outlet.
- The Textiles Ministry will organise 'Hastkala Sahyog Shivirs' in 421 handloom-handicrafts clusters across the country which will benefit over 1.2 lakh weavers and artisans.
- The Gujarat government's decision to extend its textile policy by a year is set. It is believed to attract Rs 5,000 crore (US\$ 50 billion) of more investment in sectors across the value chain. The government estimates addition till now of a million units of spindle capacity in the spinning sector and setting up of over 1,000 units in technical textiles.

The key initiatives announced in the Union Budget 2017-18 to boost the textiles sector are listed below:

- Encourage new entrepreneurs to invest in sectors such as knitwear by increasing allocation of funds to Mudra Bank from Rs 1,36,000 crore (US\$ 20.4 billion) to Rs 2,44,000 crore (US\$ 36.6 billion).
- Upgrade labour skills by allocating Rs 2,200 crore (US\$ 330 million)

Our products adhere to quality standards and our manufacturing units are ISO 9001:2008 and ISO 9001:2015 certified, which confirms that our products conform to the Quality Management System Standard.

UL and FM Approved Product range meeting with International Standards

Our Company is certified by Underwriter’s Laboratory Inc. (U.S.A) and FM Global Approved (U.S.A), wherein we have received UL and FM Approvals from Directors of North American Certification Programs and from AVP, Manager-Fire Protection of FM Approvals respectively. These certifications provide a worldwide recognition for the Products approved by the Authorities.

The products manufactured by us should meet the industry standard set for their design and quality. We follow stringent measures to ensure the compliance of these standards for meeting the International norms. Regular audits are conducted at our premises to ensure the compliance of the parameters set.

Customized Product Development

Our Company offers customization facilities to all the customers as per their particular requirements and specifications. Our manufacturing teams focus on the precise demand of the customer and design the products accordingly. This provides complete satisfaction to our customers and enables us to expand our business from existing customers and also address a larger base of potential new customers

Strong Customer Base

Our Company exports its products to various geographies such as USA and various countries in Middle east serving to various companies of several industries. We have a good customer base in India as well as internationally which includes international Companies like Technopro Middle East FZCO, Hamat Alezz Trading Est., Bin Dasmal General Trading Co LLC., Al Sayed Center A/C & Refrigeration Materials etc. These customers have been a part of the growth story of our Company which we believe is essentially due to the product quality and customer centric approach of our Company. We also have a good customer base in India for the products manufactured by us.

Scalable Business Model

Our Business model is customer centric and order driven, and requires optimum utilisation of our existing facilities, assuring quality supply of raw materials and achieving consequent economies of scale. The business scale generation is basically due to development of new markets both domestic and international by exploring marketing expertise and by maintaining the consistent quality output. We believe that this business model has proved successful and scalable for our Company.

OUR STRATEGIES

Increase in Order-taking Appetite by augmenting our working capital base

Our business operations are working capital intensive. In order to effectively expand our products portfolio, Business arenas and also increase in number of verticals and explore various geographical locations, along with the existing facilities we need to have access to a larger amount of liquid funds and sufficient working capital.

We believe there is growing trend towards steel industry considering electrical and mechanicals installations. Alongwith the increasing demand, we expect to increase our order taking appetite thus increasing our volumes, revenues and scale of operations and we will require substantial working capital for the same. It is hence our strategy to raise funds from this issue and augment our fund based working capital capabilities. We believe that companies with high liquidity on their balance sheet would be able to better exploit market opportunities.

Hence, in order to effectively operate the aforementioned additional facilities along with the existing facilities we need to have access to a larger amount of liquid funds and sufficient working capital. For further details of the proposed working capital requirements of the company, kindly refer to the Chapter titled “Objects of the Issue” beginning on page no. 70 of this Draft Prospectus.

Expansion of product range

We intend to continue to diversify our existing products by manufacturing various other products which are used in the application of Fire Fighting, plumbing and other mechanical installations. Presently, our Company is manufacturing and fabricating various steel products for Industrial, Commercial, Utility and OEM Installations. We manufacture various engineering products, metal and base metal products like G. I. nuts, various types of bolts, clamps, hangers etc.

Going forward, we intend to expand our current product portfolio and we intend to manufacture screws, nuts, bolts and washers in-house. This expansion in the Product portfolio will serve as a one-stop solution provider for engineering products meant to be used in Pipe Support Systems, HVAC Systems, Anti-vibration System and Equipments etc.

Expand our distribution network and exports

Our existing reach in international countries has been critical to our export sales. We also have a market in India for the goods manufactured by us. We aim to further develop our domestic sales networks in two ways: firstly nurturing existing relationships with clients and secondly by creating new distribution channels in non-penetrated geographies considering various cities.

Currently about 45.40% of total business comes from export sales of manufactured products, 0.86% from local sales of manufactured goods and balance comes from trading of textile products. Our company is focusing on increasing growth in the export markets. Exports brings in better realization of margins, prompt delivery due to faster and planned pace of projects, better payment terms and access to larger markets. This also reduces the risk of dependence on a single market and ensures that any slowdown in the market would not affect overall growth and performance of our Company.

Optimal Utilization of Resources:

Our Company constantly endeavours to improve our manufacturing and fabrication process by using latest technology in machineries to optimize the utilization of resources. We regularly analyze our existing raw material procurement and manufacturing/ fabrication processes to identify the areas of bottlenecks and correct the same. This helps us in improving efficiency and putting resources to optimal use.

Strengthening our Brand

Our strategic objective is to increase the presence of our brand in the existing markets and positioning our brand in the future markets that we intend to capture. We intend to consequently improve our economic of scale whereby we can develop a brand expansion strategy that will help us to increase our market share of exports, business growth and profitability. Further, we shall also use the appropriate pricing strategy to persuade our existing and newer consumers to buy our branded products.

We intend to invest in developing and enhancing our brand image, through brand building efforts, communication and promotional initiatives such as advertisements in print media, participation in industry events, exhibitions etc. This is a continuous exercise, which would increase the brand image resulting in an increase of sales and profitability.

Diversifying and increasing penetration in markets

Our Company's products are sold in domestic market and global market. The domestic market also offers opportunities in term of sub-geographic penetration and product/market diversification. Our Company will seek to grow its marketing reach domestically to explore hither to untapped markets and segments as part of its strategy to mitigate market risk and widen growth prospects. Our Company will continue to explore opportunities in various countries where it can supply value added products to enhance its geographical reach.

Enhancing production and product quality

We believe quality is an important factor when it comes to any product or service. With the high market competition, quality product at an affordable price has become the market differentiator for almost all products and services. We constantly work to enhance the existing quality of our products by optimizing the existing production processes and introducing new processes. We train our employees to consistently design and deliver client focused solutions.

OVERVIEW OF THE GLOBAL AND INDIAN ECONOMY

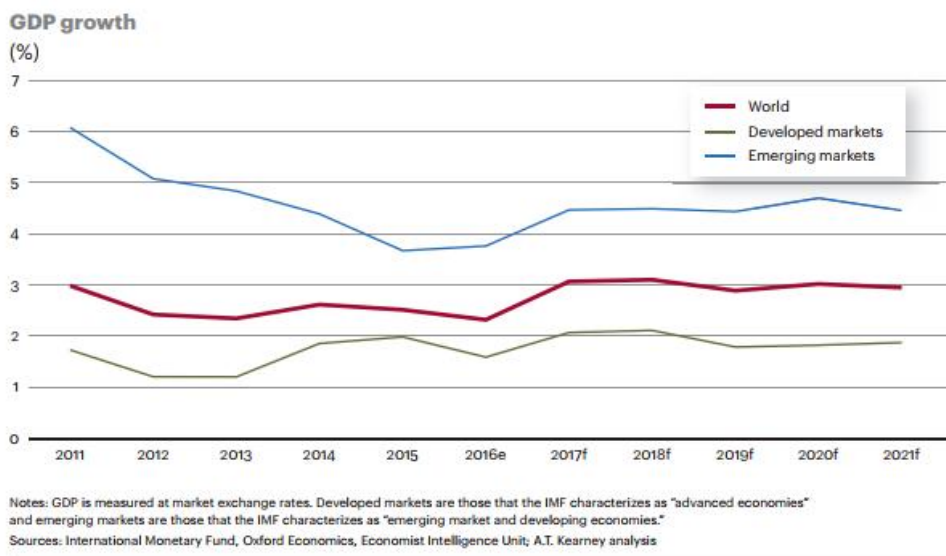

Global Scenario

The global economy remains sluggish heading into 2018, but the growth outlook is nevertheless somewhat stronger than in recent years. On the positive side, we anticipate a few bright spots in the global economy, such as the US and Indian economies, and the marginal recovery of the Brazilian and Russian economies in 2017. Much of this boost will only be short term, however, so the base case forecast is flat over the next five years, with average annual growth rate of 3% projected through 2021. This very modest recovery will be uneven. South Asia, Sub-Saharan Africa and East Asia will see the highest level of dynamism over the next five years. On the negative side, growth in the developed market regions will continue to be weak, and Latin America will underperform relative to other emerging market regions.

The pickup in growth projected in the April 2017 World Economic Outlook (WEO) is strengthening. The global growth forecast for 2017 and 2018—3.6 percent and 3.7 percent, respectively—is 0.1 percentage point higher in both years than in the April and July forecasts. Notable pickups in investment, trade, and industrial production, coupled with strengthening business and consumer confidence, are supporting the recovery. With growth outcomes in the first half of 2017 generally stronger than expected, upward revisions to growth are broad based, including for the euro area, Japan, China, emerging Europe, and Russia. These more than offset downward revisions for the United States, the United Kingdom, and India.

Growth prospects for emerging and developing economies are marked up by 0.1 percentage point for both 2017 and 2018 relative to April, primarily owing to a stronger growth projection for China. The country's 2017 forecast (6.8 percent, against 6.6 percent in April) reflects stronger growth outcomes in the first half of 2017 as well as more buoyant external demand. For 2018, the revision mainly reflects an expectation that the authorities will maintain a sufficiently expansionary policy mix to meet their target of doubling real GDP between 2010 and 2020. Growth forecasts have also been marked up for emerging Europe for 2017, reflecting stronger growth in Turkey and other countries in the region, for Russia for 2017 and 2018, and Brazil in 2017.

The US economy is projected to expand at 2.2 percent in 2017 and 2.3 percent in 2018. The projection of a continuation of near-term growth that is moderately above potential reflects very supportive financial conditions and strong business and consumer confidence. The downward revision relative to the April WEO forecasts (of 2.3 and 2.5 percent for 2017 and 2018, respectively) reflects a major correction in US fiscal policy assumptions. Given the significant policy uncertainty, IMF staff's macroeconomic forecast now uses a baseline assumption of unchanged policies, whereas the April 2017 WEO built in a fiscal stimulus from anticipated tax cuts. Over a longer horizon, US growth is expected to moderate. Potential growth is estimated at 1.8 percent, reflecting the assumption of continued sluggish growth in total factor productivity and diminished growth of the workforce due to population aging.

Indian Scenario

India has emerged as the fastest growing major economy in the world as per the Central Statistics Organisation (CSO) and International Monetary Fund (IMF) and it is expected to be one of the top three economic powers of the world over the next 10-15 years, backed by its strong democracy and partnerships.. Indian economy is expected to grow at a rate of 6.7 per cent in the year 2017-18 and in the next financial year 2018-19 the economy is expected to grow at a rate of 7.2 per cent. The improvement in India's economic fundamentals has accelerated in the year 2015 with the combined impact of strong government reforms, Reserve Bank of India's (RBI) inflation focus supported by benign global commodity prices.

(Source: <https://www.ibef.org/economy/indian-economy-overview>)

During September 2017, eight core infrastructure industries grew by 5.2 per cent, as compared to 4.9 per cent growth in August 2017 and 5.3 per cent growth in September 2016. The growth of core industries during April-September 2017 was 3.3 per cent, as compared to 5.4 per cent growth during the same period last year.

Overall growth in the Index of Industrial Production (IIP) was 3.8 per cent in September 2017, as compared with 4.3 per cent growth in August 2017 and 5.0 per cent growth in September 2016. During April-September 2017, IIP growth was 2.5 per cent as compared to growth of 5.9 per cent during the same period last year.

Foreign exchange reserves were US\$ 398.8 billion as on October 27, 2017, as against US\$ 370 billion in March 2017. *(Source: Indian Economic Development and Growth Monthly Economic Report- www.ibef.org)*

Economic growth is projected to remain strong and India will remain the fastest growing G20 economy. The increase in public wages and pensions will support consumption. Private investment will recover gradually as excess capacity diminishes, and the landmark Goods and Services Tax and other measures to improve the ease of doing business are being implemented. However, large non-performing loans and high leverage of some companies are holding back investment. Monetary policy is projected to remain tight as inflation expectations have still not fully adjusted down. The need to reduce the relatively high public-debt-to-GDP ratio leaves little room for fiscal stimulus.

INTRODUCTION TO PIPE SUPPORTS

Pipe Supports

Pipe is held either from above by hangers or supports of various types on which it rests. *Hangers are also referred to as supports.*

There are a number of typical pipe supports that can be installed to support dead weight loads, and restrain the pipe for thermal and dynamic loads. The designs are only limited by the imagination of the engineer and designer, as literally thousands of different designs have been used for special purposes. Pipe is rested on or secured to a support member usually of a standard structural shape (I-beam, wide flange beam, angle, channel etc.). The pipe may be secured to this member with a pipe support.

Pipe supports and hangers are devices which transfer the loads from the pipe or the structural attachment to the supporting structure or equipment. They include rod hangers, spring hangers, sway braces, turnbuckles, struts, anchors, saddles, rollers, brackets, and sliding supports. Structural attachments are elements that are welded, bolted, or clamped to the pipe, such as clips, lugs, clamps, clevises, and stops.

The correct and economical selection of the supports for any piping system usually presents difficulties of varying degrees, some relatively minor and others of a more critical nature. Proper support selection should be the objective of all phases of design and construction.

Pipe Supports standards

There code ASME B 31.3 specifies under clause 321.1.1 the layout and design of piping and its supporting elements shall be directed toward preventing the following:

- Piping stresses in excess of those permitted in the Code
- Leakage at joints
- Excessive thrusts and moments on connected equipment (such as pumps and turbines)
- Excessive stresses in the supporting (or restraining) elements
- Resonance with imposed or fluid-induced vibrations
- Excessive interference with thermal expansion and contraction in piping which is otherwise adequately flexible
- Unintentional disengagement of piping from its supports
- Excessive piping sag in piping requiring drainage slope
- Excessive distortion or sag of piping (e.g., thermoplastics) subject to creep under conditions of repeated thermal cycling
- Excessive heat flow, exposing supporting elements to temperature extremes outside their design limits

Determination of Support locations

Support locations are dependent on many considerations, such as pipe size, piping configuration, the location of heavy Valves and fittings, and the structure that is available for support. Following rules of thumb will help when doing the flexibility analysis and operation and maintenance:

- As much as possible, attach supports to straight pipe rather than elbows, other fittings, Valves, flanges or instruments, but provide supports near instruments, and other devices that are likely to be removed for maintenance.
- Provide space for adding loops to piping near load sensitive equipment, e.g. in pump suction lines.
- Consider the need to add friction reducing slides between the piping and support steel.
- Support piping such that spools to be removed for equipment maintenace can be removed without adding temporary supports.
- Minimize the use of spring hangers.

Determination of Loads and Movements

The anticipated movement at each support point dictates the basic type of support required. Each type of support selected must be capable of accommodating movements.

It is a good practice to select first the most simple or basic rigid support type and to add to the complexity only as conditions warrant. No advantage will be realized in upgrading a support when a simpler, more economical type can be shown to satisfy all the design requirements.

Both vertical and horizontal movement must be evaluated. When piping vertical movement is small, the use of simple rod hangers should be adequate. With small vertical movement and significant horizontal movement, the simple rod hanger will still suffice, provided the overall length is sufficient to keep the angular swing of the rod within reasonable limits-normally accepted as being 4° from the vertical.

When one is calculating the total movement experienced by the support, both horizontal displacements and the vertical displacement must be combined and normalized to the axis of the support. Consideration should be given to relocating the upper connection some percentage (usually two-thirds) of the total movement as a means for reducing the angularity in the hot position.

For piping supported from below, some form of slide must be incorporated to provide for the horizontal movement; or, in the case of ensured longitudinal movement, a pipe roll may be used. Rollers are usually only used on long runs of piping supported on racks such as found in refinery piping.

Suspended hangers with considerable horizontal movement and low headroom will require either single- or double direction trolleys or rollers. Where both longitudinal and lateral movements are large, consideration may be given to the use of a single-direction trolley oriented on the resultant movement vector.

OFTEN USED PIPE SUPPORTS

Anchors

A rigid support that restricts movement in all three orthogonal directions and all three rotational directions. This usually is a welded stanchion that is welded or bolted to steel or concrete.

Two types of anchors exist: fixed and directional. Fixed anchors are used in locations where all movement of a line must be prevented. In piping terms this is called a fixed point. The most common way to anchor a pipe is to weld the pipe directly to a support or structural member. If the pipe to be anchored is insulated, first a pipe shoe is welded to the pipe and then the shoe is welded to the steel structure.

Directional anchors are used to force movement to occur in one direction while preventing it from occurring in the opposite direction. Directional anchors are used to direct a pipe's movement away from buildings, structures, equipment etc.

Fixed Anchor

Directional Anchor

DUMMY LEG SUPPORTS

A dummy leg is an extension piece welded to an elbow in order to support a pipe line, and rests or anchors on some steel member.

Pipe size, length and wall thickness of the pipe-extension depends on several factors such as the total load, the parent pipe line size etc. *See typical dummy leg image on the right of this page.*

HANGER RODS

A vertical pipe support that incorporates a rod. It may be a rigid, variable spring or constant support hanger. Hanger is a term that often means quite different things to different people.

Rod hangers or pipe hangers attaches to the pipe by a U bolt, a clevis, a pipe clamp etc. to structural steel above. The rod hanger provides support in the vertical direction and allows limited motion in the horizontal direction. Adjustment in the vertical direction can be accomplished by threads or a turnbuckle. *See hanger rod image on the right of this page.*

GUIDES

When total restriction of pipe movement is not required, pipe guides are used.

Pipe guides confine movement along the pipe's lineal axis. In piping terms this is called a sliding point. They are used primarily to maintain proper line spacing in a pipe rack and they prevent lateral or sideways movement.

Unlike the pipe anchor which is welded to the pipe and steel structure, the guide allows pipe to slide lengthwise between two angle shapes. When the pipe is supported on shoes, the angle shapes are positioned on either side of the shoe. *For an image of guides see directional anchor above.*

CONSTANT LOAD HANGER

A specially engineered hanger that is designed to travel through many inches of vertical travel with a minimal change in support load. There are different styles and types depending on the manufacturers. Per MSS SP-58 a constant support hanger can be within specification and still have a load variation of plus minus 6% through the travel range.

Some suppliers claim a tighter tolerance on the load variation. Constant hangers and constant supports are used for piping and related components where higher levels of vertical travel occur. Their job is to transfer the working load over the whole travel area while maintaining constancy, i.e., without any considerable deviations. The functional precision of the constant hanger is decisive for the favorable long term behaviour of the components concerned.

Constant hangers compensate for vertical movement caused by thermal expansion. Via constant hangers, the respective piping loads are constantly absorbed and transferred with no significant deviation over the whole range of movement. *Significant deviations would act as harmful and uncontrolled extra loads in the system.*

Horizontal constant with top attachment which is bolted directly to the bottom of the steel as shown above.

VARIABLE SPRING HANGERS AND SUPPORTS

A helical coil that supports dead weight load. The support load changes as the spring moves through its range at a specified spring rate. This support can be a hanger above the pipe, or a floor support below the pipe.

To prevent constraints in the system, thermal expansion in the piping and other piping components must not be hindered. The piping must therefore be supported in a correspondingly elastic manner.

To compensate for slight vertical displacements in the piping, spring components are used as supports. The functioning of these components is based on preset helical coil springs which exert a variable supporting load over the whole range of movement corresponding to the given spring characteristics.

Load variations resulting from this are limited through corresponding specifications based on stress calculations for the piping - this depends on the sensitivity of the system.

HYDRAULIC SHOCK ABSORBERS

The use of shock absorbers (snubbers) is preferred in thermally operating piping systems. In a dynamic event, shock absorbers instantaneously form a practically rigid restraint between the protected component and the structure. Resulting dynamic energy can at once be absorbed and harmlessly transferred.

Through the special function of the shock absorbers, thermal displacements during normal operation remain unhindered.

OVERVIEW OF STEEL INDUSTRY

Steel is crucial to the development of any modern economy and is considered to be the backbone of human civilization. The level of per capita consumption of steel is treated as an important index of the level of socio-economic development and living standards of the people in any country. It is a product of a large and technologically complex industry having strong forward and backward linkages in terms of material flows and income generation. All major industrial economies are characterized by the existence of a strong steel industry and the growth of many of these economies has been largely shaped by the strength of their steel industries in their initial stages of development.

India's economic growth is contingent upon the growth of the Indian steel industry. Consumption of steel is taken to be an indicator of economic development. While steel continues to have a stronghold in traditional sectors such as construction, housing and ground transportation, special steels are increasingly being used in engineering industries such as power generation, petrochemicals and fertilizers. India occupies a central position on the global steel map, with the establishment of new state-of-the-art steel mills, acquisition of global scale capacities by players, continuous modernization and up gradation of older plants, improving energy efficiency and backward integration into global raw material sources.

India is currently the world's fourth largest producer of crude steel (knocking to be the third largest by the year end) and is expected to become the second largest producer by 2020. Steel production in India has increased from 81 million tonnes (mt) in 2013-14 to 88 mt in 2014-15 with the capacity being increased from 100 mt in 2013-14 to 110 mt in 2014-15. The steel sector contributes nearly 2% of the country's GDP and employs over 6 lakh people. The per capita consumption of total finished steel in the country has risen from 51 kg in 2009-10 to about 60 kg in 2014-15.

Steel industry derives its demand from other important sectors like infrastructure, aviation, engineering, construction, automobile, pipes and tubes etc. With the Indian economy poised for its next wave of growth under the reforms being unleashed in the last one year, there lies tremendous opportunity for the Indian steel industry to prosper and grow exponentially.

The Indian steel industry is largely iron-based through the blast furnace (BF) or the direct reduced iron (DRI) route. Indian steel industry is highly consolidated. About 50% of the crude steel capacity is resident with integrated steel producers (ISP). But the changing ratio of hot metal to crude steel production indicates toward the increasing presence of secondary steel producers in the eco-system.

Steel Production in India Has Been Growing at a Fast Pace

- In FY17, crude steel production in India was 97.42 MT, with the total crude steel production growing at a CAGR of 5.49 per cent over the last 6 years.

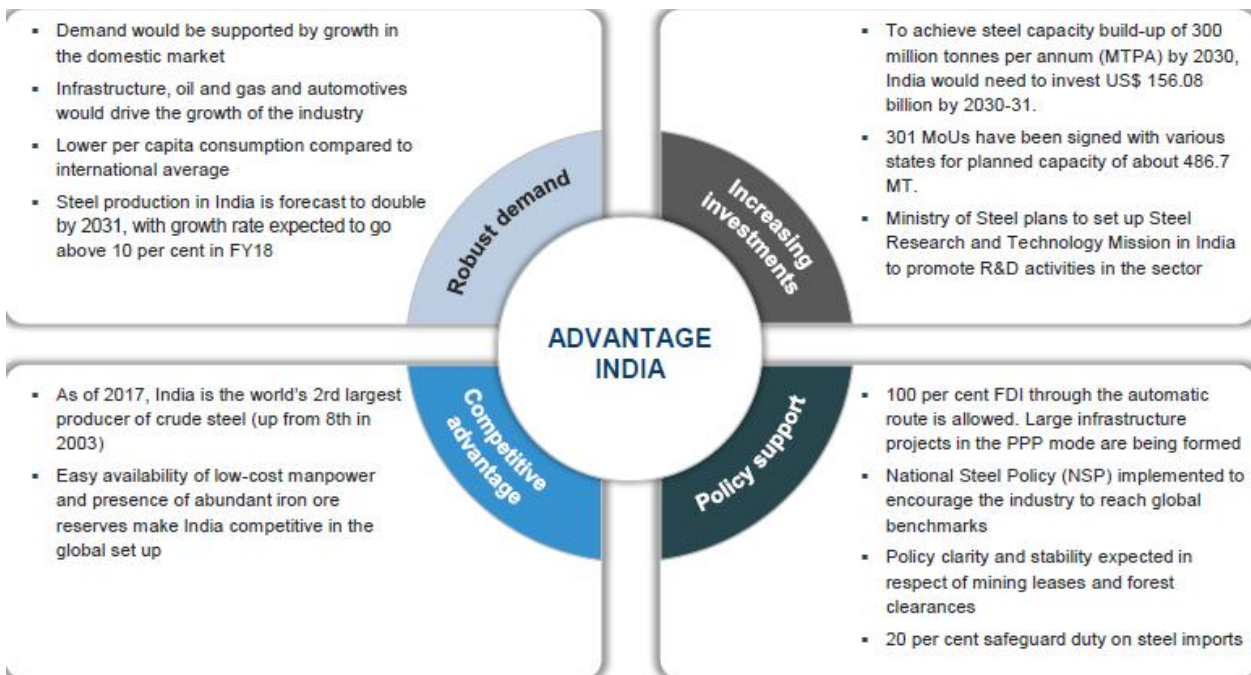

- The steel sector contributes over 2 per cent to the GDP of the nation and provides 20 lakh jobs in the country.
- During April-November 2017, crude steel and finished steel production in India stood at 66.70 MT and 76.356 MT respectively.
- As of March 2017, the capacity utilisation of steel producers is set to increase with strong export demand and signs of revival in domestic sales. Companies like JSW and Essar Steel have experienced a sharp increase in steel manufacturing in the last 2 months
- Steel manufacturing output of India is expected to increase to 128.6 MT by 2021, accelerating the country's share of global steel production from 5.4 per cent in 2017 to 7.7 per cent by 2021.
- India's steel output is expected to grow at a CAGR of 8.9 per cent during 2017-21 and India is expected to become top global steel producer^.

Indian Scenario

India's textiles sector is one of the oldest industries in Indian economy dating back several centuries. Even today, textiles sector is one of the largest contributors to India's exports with approximately 13 per cent of total exports. The textiles industry is also labour intensive and is one of the largest employers. The textile industry has two broad segments. First, the unorganised sector consists of handloom, handicrafts and sericulture, which are operated on a small scale and through traditional tools and methods. The second is the organised sector consisting of spinning, apparel and garments segment which apply modern machinery and techniques such as economies of scale.

The textile industry employs about 45 million people directly and 20 million people indirectly. India's overall textile exports during FY 2015-16 stood at US\$ 40 billion.

The Indian textiles industry is extremely varied, with the hand-spun and hand-woven textiles sectors at one end of the spectrum, while the capital intensive sophisticated mills sector at the other end of the spectrum. The decentralised power looms/ hosiery and knitting sector form the largest component of the textiles sector. The close linkage of the textile industry to agriculture (for raw materials such as cotton) and the ancient culture and traditions of the country in terms of textiles make the Indian textiles sector unique in comparison to the industries of other countries. The Indian textile industry has the capacity to produce a wide variety of products suitable to different market segments, both within India and across the world.

Market Size

The Indian textiles industry, currently estimated at around US\$ 120 billion, is expected to reach US\$ 230 billion by 2020. The Indian Textile Industry contributes approximately 2 per cent to India's Gross Domestic Product (GDP), 10 per cent of manufacturing production and 14 per cent to overall Index of Industrial Production (IIP).

Indian khadi products sales increased by 33 per cent year-on-year to Rs 2,005 crore (US\$ 311.31 million) in 2016-17 and is expected to exceed Rs 5,000 crore (US\$ 776.33 million) sales target for 2018-19, as per the Khadi and Village Industries Commission (KVIC).

The total area under cultivation of cotton in India is expected to increase by 7 per cent to 11.3 million hectares in 2017-18, on account of expectations of better returns from rising prices and improved crop yields during the year 2016-17.

Indian exports of locally made retail and lifestyle products grew at a compound annual growth rate (CAGR) of 10 per cent from 2013 to 2016, mainly led by bedding bath and home decor products and textiles#. The Government of India targets textile and garment sector exports at US\$ 45 billion for 2017-18.

Investment

The textiles sector has witnessed a spurt in investment during the last five years. The industry (including dyed and printed) attracted Foreign Direct Investment (FDI) worth US\$ 2.55 billion during April 2000 to June 2017.

Some of the major investments in the Indian textiles industry are as follows:

- Future Group is planning to open 80 new stores under its affordable fashion format, Fashion at Big Bazaar (FBB), and is targeting sales of 230 million units of garments by March 2018, which is expected to grow to 800 million units by 2021.
- Raymond has partnered with Khadi and Village Industries Commission (KVIC) to sell Khadi-marked readymade garments and fabric in KVIC and Raymond outlets across India.
- Max Fashion, a part of Dubai based Landmark Group, plans to expand its sales network to 400 stores in 120 cities by investing Rs 400 crore (US\$ 60 million) in the next 4 years.

Government Initiatives

The Indian government has come up with a number of export promotion policies for the textiles sector. It has also allowed 100 per cent FDI in the Indian textiles sector under the automatic route.

Initiative will be taken into consideration by Government of India.

- The Government has planned to connect as many as 5 crore (50 million) village women to charkha (spinning wheel) in next 5 years with a view to provide them employment and promote khadi and also, they inaugurated 60 khadi outlets which were renovated and re-launched during the completion of KVIC s 60th anniversary and a khadi outlet.
- The Textiles Ministry will organise 'Hastkala Sahyog Shivirs' in 421 handloom-handicrafts clusters across the country which will benefit over 1.2 lakh weavers and artisans.
- The Gujarat government's decision to extend its textile policy by a year is set. It is believes to attract Rs 5,000 crore (US\$ 50 billion) of more investment in sectors across the value chain. The government estimates addition till now of a million units of spindle capacity in the spinning sector and setting up of over 1,000 units in technical textiles.

The key initiatives announced in the Union Budget 2017-18 to boost the textiles sector are listed below:

- Encourage new entrepreneurs to invest in sectors such as knitwear by increasing allocation of funds to Mudra Bank from Rs 1,36,000 crore (US\$ 20.4 billion) to Rs 2,44,000 crore (US\$ 36.6 billion).
- Upgrade labour skills by allocating Rs 2,200 crore (US\$ 330 million)

Road Ahead

The future for the Indian textile industry looks promising, buoyed by both strong domestic consumption as well as export demand. With consumerism and disposable income on the rise, [the retail sector has experienced a rapid growth](#) in the past decade with the entry of several international players like Marks & Spencer, Guess and Next into the Indian market. The apparel market in India is estimated to grow at a Compound Annual Growth Rate (CAGR) of 11.8 per cent to reach US\$ 180 billion by 2025.

High economic growth has resulted in higher disposable income. This has led to rise in demand for products creating a huge domestic market. The domestic market for apparel and lifestyle products, currently estimated at US\$ 85 billion, is expected to reach US\$ 160 billion by 2025.

The Indian cotton textile industry is expected to showcase a stable growth in FY2017-18, supported by stable input prices, healthy capacity utilisation and steady domestic demand.

Business Process of Manufacturing of Steel Products

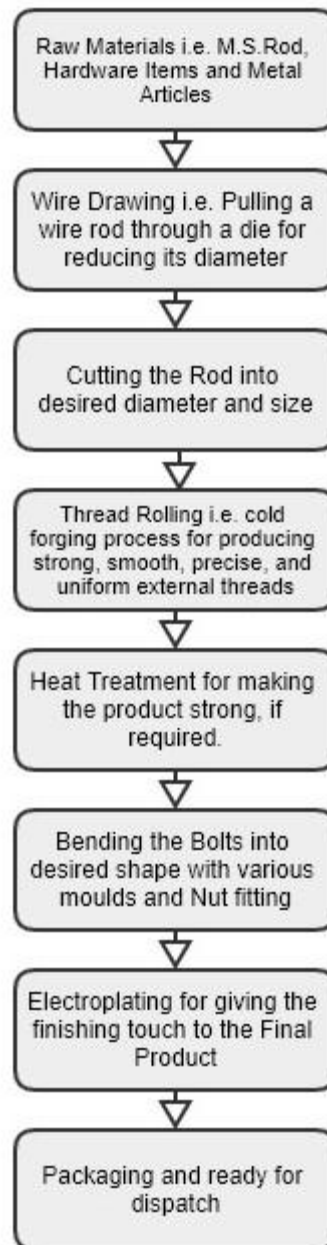

Manufacturing Process of certain Major Products

- **Manufacturing Process of Hangers**

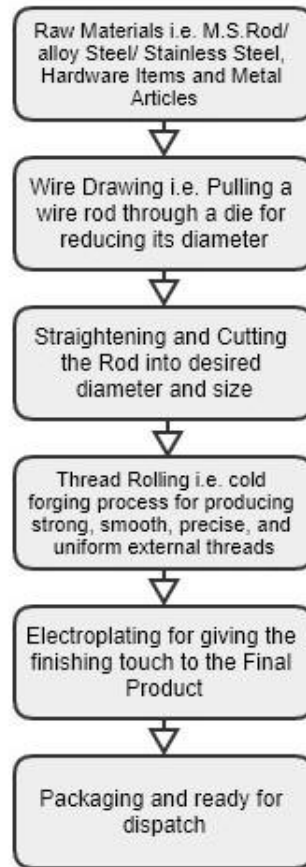

- **Manufacturing Process of U Bolts**

- **Manufacturing Process of Threaded Rod**

Raw Material Procurement:

Our raw materials consist of steel products primarily M.S. Strips, M.S. Rods, Alloy steel, stainless steel and other hardware items and metal articles. We have been able to secure timely supply of required raw material for our existing activity. Raw material is easily available in the domestic market and no difficulty is envisaged in sourcing of the raw material.

Processing activity

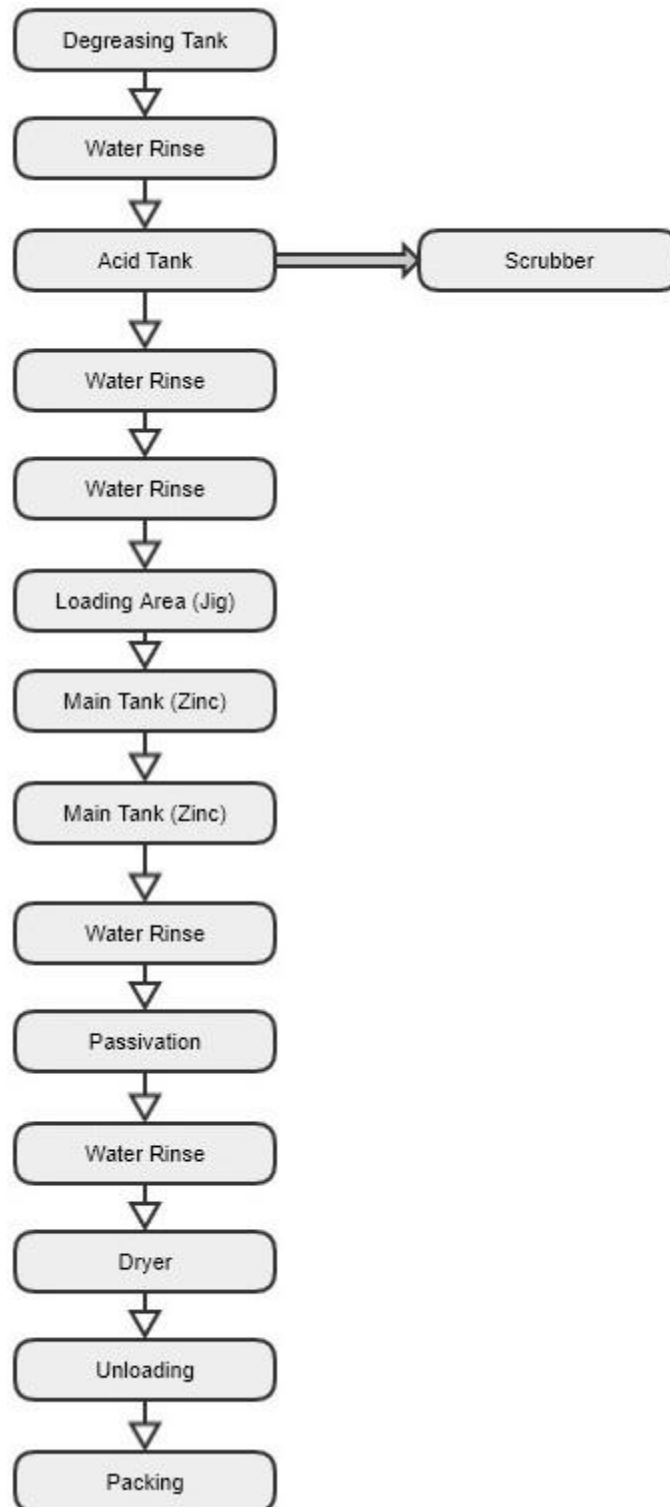

The processing activity starts once the raw materials are procured from the market. The processing activity consists of Wire drawing which is passed through automated machines, wherein the wires are cut into desired size. The operator checks the first few pieces to confirm that the output is as per specification. After the necessary quality check is complete then the mass production cutting takes places.

Once the wires are cut into the desired size, the operator inputs the strips which are bent with the help of various moulds. Thus strips are moulded into various shapes as desired by the customer. These individual strips are further marked and stamped. Further these strips are tapped i.e. holes are made for fitting the screws and welding process is carried out.

Once the final product is ready, they undergo a process called “Electroplating”, wherein the final product is processed by a coating of a thin layer of another metal which gives the final product a better appearance and further protects it from corrosion, wear or rust.

Electroplating Process:

Electroplating Process is carried out because the abrasion or excessive heat caused by welding and other processes of fabrication destroys the protective layer of the product and exposes it to corrosion.

The manufactured products are passed through a process of electroplating, wherein they are passed through a Degreasing Tank for removal of oil and other greases which are settled on the product during the fabrication process. Thus this help in cleaning the product. After basic cleaning, it is passed through another tank which is filled with water for rinsing it. Further the rinsed product is passed through Acid Tank which consists of Hydrochloric Acid for removal of rust or further removal of dust particles and other substance. This Acid Tank is connected with scrubber, wherein this Acid is neutralized and after neutralizing the same, it is released in the environment in form of fumes.

In order to make the manufactured product usable, it is further passed through water tanks twice after the rust removal process. These products are hanged in rods by means of jig, which are passed through main tanks containing Zinc, wherein the electrolysis process takes place, causing zinc to deposit on the rods forming a layer on the product. After this electrolysis process, the product is passed through water for rinsing and further passed through passivation process wherein Slowly and naturally a passive layer develops on the surface of the product as the chromium at the surface reacts with oxygen in the air to produce chromium oxide. This layer is invisible and only a few molecules thick but it provides a barrier to prevent corrosion of the final product. The final product is further passed through water tank for rinsing and later passed through dryer, making it ready for packing.

Quality Control

The finished products are checked internally for quality with respect to size, shape and quantity, before it is finally approved and sent for packing. Further the Finished products are sent to external labs for quality checking purpose.

Finished and Packing

Once the above electroplating process and quality checking process is completed the finished products are sent for packing. While packing the products are checked manually.

Dispatch

The products are packed into boxes and further into containers for dispatch. These containers are loaded into trucks which are unloaded at the point of mode of transportation based on the location of the customer. The goods are transported by mode of Road, water and Air.

Trading Business

Our Company is even engaged in trading of textile products. We trade into fabrics, fancy shirting's and finish fabrics based on the requirement of the customer. Environment Protection Act, 1986 and Environment (Protection) Rules, 1986

The Environmental Protection Act, 1986 is an "umbrella" legislation designed to provide a framework for co-ordination of the activities of various central and state authorities established under various laws. The potential scope of the Act is broad, with "environment" defined to include water, air and land and the interrelationships which exist among water, air and land, and human beings and other living creatures, plants, micro-organisms and property.

Water

Legislations to control water pollution are listed below:

The ***Water (Prevention and Control of Pollution) Act, 1974*** prohibits the discharge of pollutants into water bodies beyond a given standard, and lays down penalties for non-compliance. The Water Act also provides that the consent of the State Pollution Control Board must be obtained prior to opening of any new outlets or discharges, which is likely to discharge sewage or effluent.

The ***Water (Prevention and Control of Pollution) Cess Act, 1977*** provides for the levy and collection of a cess on water consumed by persons carrying on certain industries and by local authorities, with a view to augment the resources of the Central Board and the State Boards for the prevention and control of water pollution constituted under the Water (Prevention and Control of Pollution) Act, 1974.

Air

Legislations to control air pollution are listed below:

The ***Air (Prevention and Control of Pollution) Act, 1981*** requires that any individual or institution responsible for emitting smoke or gases by way of use as fuel or chemical reactions must apply in a prescribed form and obtain consent from the state pollution control board prior to commencing any activity. National Ambient Air Quality Standards (NAAQS) for major pollutants were notified by the Central Pollution Control Board in April 1994.

Hazardous Wastes

There are several legislations that directly or indirectly deal with hazardous wastes. The relevant legislations are:

- The Hazardous Wastes (Management, Handling and Trans boundary Movement) Rules, 2008
- The Public Liability Insurance Act, 1991
- The Manufacture, Storage and Import of Hazardous Chemicals Rules, 1989.

Hazardous Wastes (Management, Handling and Trans boundary Movement) Rules, 2008

These rules require that the occupier and the operator of the facility, that treats hazardous wastes, must properly collect, treat, store or dispose the hazardous wastes without adverse effects on the environment. Schedule I of the said Rules lists out the primary and secondary production of aluminum as a process that generates hazardous waste and therefore requires compliance under these Rules.

D. OTHER REGULATIONS

Transfer of Property Act, 1882

The transfer of property, including immovable property, between living persons, as opposed to the transfer property by operation of law, is governed by the Transfer of Property Act, 1882 (“**T.P. Act.**”). The T.P. Act establishes the general principles relating to the transfer of property, including among other things, identifying the categories of property that are capable of being transferred, the persons competent to transfer property, the validity of restrictions and conditions imposed on the transfer and the creation of contingent and vested interest in the property. Transfer of property is subject to stamping and registration under the specific statutes enacted for the purposes which have been dealt with hereinafter.

The T.P. Act recognizes, among others, the following forms in which an interest in an immovable property may be transferred:

- Sale: The transfer of ownership in property for a price paid or promised to be paid.
- Mortgage: The transfer of an interest in property for the purpose of securing the payment of a loan, existing or future debt, or performance of an engagement which gives rise to a pecuniary liability. The T.P. Act recognises several forms of mortgages over a property.

- **Charges:** Transactions including the creation of security over property for payment of money to another which are not classifiable as a mortgage. Charges can be created either by operation of law, e.g. decree of the court attaching to specified immovable property, or by an act of the parties.
- **Leases:** The transfer of a right to enjoy property for consideration paid or rendered periodically or on specified occasions.
- **Leave and License:** The transfer of a right to do something upon immovable property without creating interest in the property.

Further, it may be noted that with regards to the transfer of any interest in a property, the transferor transfers such interest, including any incidents, in the property which he is capable of passing and under the law, he cannot transfer a better title than he himself possesses.

The Registration Act, 1908

The Registration Act, 1908 (“**Registration Act**”) was passed to consolidate the enactments relating to the registration of documents. The main purpose for which the Registration Act was designed was to ensure information about all deals concerning land so that correct land records could be maintained. The Registration Act is used for proper recording of transactions relating to other immovable property also. The Registration Act provides for registration of other documents also, which can give these documents more authenticity. Registering authorities have been provided in all the districts for this purpose.

The Indian Stamp Act, 1899

Stamp duty in relation to certain specified categories of instruments as specified under Entry 91 of the list, is governed by the provisions of the Indian Stamp Act, 1899 (“**Stamp Act**”) which is enacted by the Central Government. All other instruments are required to be stamped, as per the rates prescribed by the respective State Governments. Stamp duty is required to be paid on all the documents that are registered and as stated above the percentage of stamp duty payable varies from one state to another. Certain states in India have enacted their own legislation in relation to stamp duty while the other states have adopted and amended the Stamp Act, as per the rates applicable in the state. On such instruments stamp duty is payable at the rates specified in Schedule I of the Stamp Act.

Instruments chargeable to duty under the Stamp Act which are not duly stamped are incapable of being admitted in court as evidence of the transaction contained therein. The Stamp Act also provides for impounding of instruments which are not sufficiently stamped or not stamped at all. Unstamped and deficiently stamped instruments can be impounded by the authority and validated by payment of penalty. The amount of penalty payable on such instruments may vary from state to state. The Gujarat Stamp Act, 1958 is applicable to the Company.

The Indian Contract Act, 1872

The Indian Contract Act, 1872 (“**Contract Act**”) codifies the way in which a contract may be entered into, executed, implementation of the provisions of a contract and effects of breach of a contract. A person is free to contract on any terms he chooses. The Contract Act consists of limiting factors subject to which contract may be entered into, executed and the breach enforced. It provides a framework of rules and regulations that govern formation and performance of contract. The contracting parties themselves decide the rights and duties of parties and terms of agreement.

The Specific Relief Act, 1963

The Specific Relief Act, 1963 (“**Specific Relief Act**”) is complimentary to the provisions of the Contract Act and the Transfer of Property Act, as the Act applies both to movable property and immovable property. The Specific Relief Act applies in cases where the Court can order specific performance of a contract. Specific relief can be granted only for purpose of enforcing individual civil rights and not for the mere purpose of enforcing a civil law. ‘Specific performance’ means Court will order the party to perform his part of agreement, instead of imposing on him any monetary liability to pay damages to other party.

Consumer Protection Act, 1986

The Consumer Protection Act, 1986 seeks to provide better protection of interests of the consumers and for that purpose to make provision for establishment of consumer councils and other authorities for the settlement of consumer's disputes and for matters connected therewith. It seeks to promote and protect the rights of consumers.

To provide steady and simple redressal to consumers' disputes, a quasi-judicial machinery is sought to be set up at the district, state and central levels. The quasi-judicial bodies will observe the principles of natural justices and have been empowered to give relieves of a specific nature and to award wherever appropriate compensation to consumers. Penalties for non-compliance of the orders given by the quasi-judicial bodies have also been provided.

Competition Act, 2002

The Competition Act, 2002 ("**Competition Act**") aims to prevent anti-competitive practices that cause or are likely to cause an appreciable adverse effect on competition in the relevant market in India. The Competition Act regulates anti-competitive agreements, abuse of dominant position and combinations. The Competition Commission of India ("**Competition Commission**") which became operational from May 20, 2009 has been established under the Competition Act to deal with inquiries relating to anti-competitive agreements and abuse of dominant position and regulate combinations. The Competition Act also provides that the Competition Commission has the jurisdiction to inquire into and pass orders in relation to an anti-competitive agreement, abuse of dominant position or a combination, which even though entered into, arising or taking place outside India or signed between one or more non-Indian parties, but causes an appreciable adverse effect in the relevant market in India.

The Companies Act, 1956

The Companies Act, 1956 deals with laws relating to companies and certain other associations. It was enacted by the parliament in 1956. The Act primarily regulates the formation, financing, functioning and winding up of companies. The Companies Act, 1956 prescribes regulatory mechanism regarding all relevant aspects, including organizational, financial and managerial aspects of companies. It deals with issue, allotment and transfer of securities and various aspects relating to company management. It provides for standard of disclosure in public issues of capital, particularly in the fields of company management and projects, information about other listed companies under the same management, and management perception of risk factors. In the functioning of the corporate sector, although freedom of companies is important, protection of the investors and shareholders, on whose funds they flourish, is equally important. The Companies Act, 1956 plays the balancing role between these two competing factors, namely, management autonomy and investor protection.

The Companies Act, 2013

The Companies Act, 2013, has been introduced to replace the existing Companies Act, 1956 in a phased manner. The Ministry of Corporate Affairs has vide its notification dated September 12, 2013 has notified 98 Sections of the Companies Act, 2013 and the same are applicable from the date of the aforesaid notification. Further, vide the Companies (Amendment) Act, 2015, Section 11 of the Companies Act, 2013 has been omitted and Section 76A has been inserted in the Companies Act, 2013. As on date, till date, total 427 sections are notified by Ministry of Corporate Affairs. The Ministry of Corporate Affairs, has also issued rules complementary to the Companies Act, 2013 establishing the procedure to be followed by companies in order to comply with the substantive provisions of the Companies Act, 2013.

The Trademarks Act, 1999

Under the Trademarks Act, 1999 ("**Trademarks Act**"), a trademark is a mark capable of being represented graphically and which is capable of distinguishing the goods or services of one person from those of others used in relation to goods and services to indicate a connection in the course of trade between the goods and some person having the right as proprietor to use the mark. A 'mark' may consist of a device, brand, heading, label, ticket, name signature, word, letter, numeral, shape

of goods, packaging or combination of colors or any combination thereof. Section 18 of the Trademarks Act requires that any person claiming to be the proprietor of a trade mark used or proposed to be used by him, must apply for registration in writing to the registrar of trademarks. The trademark, once applied for and which is accepted by the Registrar of Trademarks (“**the Registrar**”), is to be advertised in the trademarks journal by the Registrar. Oppositions, if any, are invited and, after satisfactory adjudications of the same, a certificate of registration is issued by the Registrar. The right to use the mark can be exercised either by the registered proprietor or a registered user. The present term of registration of a trademark is 10 (ten) years, which may be renewed for similar periods on payment of a prescribed renewal fee.

E. REGULATIONS REGARDING FOREIGN INVESTMENT

Foreign Investment

Foreign Exchange Management Act, 1999 (“the FEMA”)

Foreign investment in companies in the pharmaceutical sector is governed by the provisions of the Foreign Exchange Management Act, 1999 (“**FEMA**”) read with the applicable regulations. The Department of Industrial Policy and Promotion (“**DIPP**”), Ministry of Commerce and Industry has issued the Consolidated FDI Policy which consolidates the policy framework on Foreign Direct Investment (“**FDI Policy**”), with effect from August 28, 2017. The FDI Policy consolidates and subsumes all the press notes, press releases, and clarifications on FDI issued by DIPP till August 27, 2017. All the press notes, press releases, clarifications on FDI issued by DIPP till August 27, 2017 stand rescinded as on August 28, 2017.

In terms of the FDI Policy, Foreign investment is permitted (except in the prohibited sectors) in Indian companies either through the automatic route or the Government route, depending upon the sector in which foreign investment is sought to be made. In terms of the FDI Policy, the work of granting government approval for foreign investment under the FDI Policy and FEMA Regulations has now been entrusted to the concerned Administrative Ministries/Departments.

FDI for the items or activities that cannot be brought in under the automatic route may be brought in through the approval route. Where FDI is allowed on an automatic basis without the approval of the Government, the RBI would continue to be the primary agency for the purposes of monitoring and regulating Foreign Investment. In cases where Government approval is obtained, no approval of the RBI is required except with respect to fixing the issuance price, although a declaration in the prescribed form, detailing the foreign investment, must be filed with the RBI once the foreign investment is made in the Indian company.

The RBI, in exercise of its power under the FEMA, has also notified the Foreign Exchange Management (Transfer or Issue of Security by a Person Resident outside India) Regulations, 2000 to prohibit, restrict or regulate, transfer by or issue security to a person resident outside India. The FDI Policy issued by the DIPP does not prescribe any cap on the foreign investments in the sector in which the Company operates. Therefore, foreign investment up to 100% is permitted in the Company under the automatic route. No approvals of the FIPB or the RBI are required for such allotment of equity Shares under this Issue. The Company will be required to make certain filings with the RBI after the completion of the Issue. RBI has also issued the Master Circular on Foreign Investment in India dated July 01, 2015. The aforesaid Master Circular on Foreign Investment will continue to remain valid until Master Directions are issued in that behalf. In terms of the Master Circular, an Indian company may issue fresh shares to persons resident outside India (who are eligible to make investments in India, for which eligibility criteria are as prescribed). Such Issue of shares shall be subject to inter-alia, the pricing guidelines prescribed under the Master Circular. As mentioned above, the Indian company making such Issue of shares would be subject to the reporting requirements, inter-alia with respect to consideration for issue of shares and also subject to making certain filings including filing of Form FC-GPR.

Certain details pertaining to the percentage of Issue size available for allocation to each category is disclosed overleaf of the Bid cum Application Form and in the Prospectus. For details in relation to allocation, the Applicant may refer to the Prospectus.
- b) Under-subscription in any category (except QIB Category) is allowed to be met with spillover from any other category or combination of categories at the discretion of the Issuer and in consultation with the BRLMs and the Designated Stock Exchange and in accordance with the SEBI ICDR Regulations, 2009. Unsubscribed portion in QIB Category is not available for subscription to other categories.
- c) In case of under subscription in the Issue, spill-over to the extent of such under-subscription may be permitted from the Reserved Portion to the Issue. For allocation in the event of an under-subscription applicable to the Issuer, Applicants may refer to the Prospectus.
- d) Illustration of the Book Building and Price Discovery Process Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue; it also excludes Bidding by Anchor Investors.

Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹ 20 to ₹ 24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Issuer in consultation with the BRLMs, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

e) **Alternate Method of Book Building**

In case of FPOs, Issuers may opt for an alternate method of Book Building in which only the Floor Price is specified for the purposes of Bidding (“**Alternate Book Building Process**”).

The Issuer may specify the Floor Price in the Prospectus or advertise the Floor Price at least one Working Day prior to the Bid/ Issue Opening Date. QIBs may Bid at a price higher than the Floor Price and the Allotment to the QIBs is made on a price priority basis. The Bidder with the highest Bid Amount is allotted the number of Equity Shares Bid for and then the second highest Bidder is Allotted Equity Shares and this process continues until all the Equity Shares have been allotted. RIIs, NIIs and Employees are Allotted Equity Shares at the Floor Price and Allotment to these categories of Bidders is made proportionately. If the number of Equity Shares Bid for at a price is more than available quantity then the Allotment may be done on a proportionate basis. Further, the Issuer may place a cap either in terms of number of specified securities or percentage of issued capital of the Issuer that may be Allotted to a single Bidder, decide whether a Bidder be allowed to revise the bid upwards or downwards in terms of price and/or quantity and also decide whether a Bidder be allowed single or multiple bids.

SECTION 6: ISSUE PROCEDURE IN FIXED PRICE ISSUE

Applicants may note that there is no Bid cum Application Form in a Fixed Price Issue. As the Issue Price is mentioned in the Fixed Price Issue therefore on filing of the Prospectus with the RoC, the Application so submitted is considered as the Application Form.

The Application Form is also made available on the websites of the Stock Exchanges at least one day prior to the Bid/ Issue Opening Date.

In a fixed price Issue, allocation in the net Issue to the public category is made as follows: minimum fifty per cent to Retail Individual Investors; and remaining to (i) individual investors other than Retail Individual Investors; and (ii) other Applicants including corporate bodies or institutions, irrespective of the number of specified securities applied for. The unsubscribed portion in either of the categories specified above may be allocated to the Applicants in the other category. For details of instructions in relation to the Application Form, Applicants may refer to the relevant section of the GID.

The Issuer is required to receive a minimum subscription of 90% of the Issue (excluding any Issue for Sale of specified securities). However, in case the Issue is in the nature of Offer for Sale only, then minimum subscription may not be applicable.

7.1 ALLOTMENT TO RIIs

Bids received from the RIIs at or above the Issue Price may be grouped together to determine the total demand under this category. If the aggregate demand in this category is less than or equal to the Retail Category at or above the Issue Price, full Allotment may be made to the RIIs to the extent of the valid Bids. If the aggregate demand in this category is greater than the allocation to in the Retail Category at or above the Issue Price, then the maximum number of RIIs who can be Allotted the minimum Bid Lot will be computed by dividing the total number of Equity Shares available for Allotment to RIIs by the minimum Bid Lot (“**Maximum RII Allottees**”). The Allotment to the RIIs will then be made in the following manner:

- a) In the event the number of RIIs who have submitted valid Bids in the Issue is equal to or less than Maximum RII Allottees, (i) all such RIIs shall be Allotted the minimum Bid Lot; and (ii) the balance available Equity Shares, if any, remaining in the Retail Category shall be Allotted on a proportionate basis to the RIIs who have received Allotment as per (i) above for the balance demand of the Equity Shares Bid by them (i.e. who have Bid for more than the minimum Bid Lot).
- b) In the event the number of RIIs who have submitted valid Bids in the Issue is more than Maximum RII Allottees, the RIIs (in that category) who will then be Allotted minimum Bid Lot shall be determined on the basis of draw of lots.

7.2 ALLOTMENT TO NIIs

Bids received from NIIs at or above the Issue Price may be grouped together to determine the total demand under this category. The Allotment to all successful NIIs may be made at or above the Issue Price. If the aggregate demand in this category is less than or equal to the Non-Institutional Category at or above the Issue Price, full Allotment may be made to NIIs to the extent of their demand. In case the aggregate demand in this category is greater than the Non-Institutional Category at or above the Issue Price, Allotment may be made on a proportionate basis up to a minimum of the Non-Institutional Category.

7.3 ALLOTMENT TO QIBs

For the Basis of Allotment to Anchor Investors, Applicants may refer to the SEBI ICDR Regulations, 2009 or Prospectus. Bids received from QIBs Bidding in the QIB Category (net of Anchor Portion) at or above the Issue Price may be grouped together to determine the total demand under this category. The QIB Category may be available for Allotment to QIBs who have Bid at a price that is equal to or greater than the Issue Price. Allotment may be undertaken in the following manner:

- a) In the first instance allocation to Mutual Funds for up to 5% of the QIB Category may be determined as follows: (i) In the event that Bids by Mutual Fund exceeds 5% of the QIB Category, allocation to Mutual Funds may be done on a proportionate basis for up to 5% of the QIB Category; (ii) In the event that the aggregate demand from Mutual Funds is less than 5% of the QIB Category then all Mutual Funds may get full Allotment to the extent of valid Bids received above the Issue Price; and (iii) Equity Shares remaining unsubscribed, if any and not allocated to Mutual Funds may be available for Allotment to all QIBs as set out at paragraph 7.4(b) below;
- b) In the second instance, Allotment to all QIBs may be determined as follows: (i) In the event of oversubscription in the QIB Category, all QIBs who have submitted Bids above the Issue Price may be Allotted Equity Shares on a proportionate basis for up to 95% of the QIB Category; (ii) Mutual Funds, who have received allocation as per (a) above, for less than the number of Equity Shares Bid for by them, are eligible to receive Equity Shares on a proportionate basis along with other QIBs; and (iii) Under-subscription below 5% of the QIB Category, if any, from Mutual Funds, may be included for allocation to the remaining QIBs on a proportionate basis.

7.4 ALLOTMENT TO ANCHOR INVESTOR (IF APPLICABLE)

- c) **In the event that the Issue Price is higher than the Anchor Investor Issue Price:** Anchor Investors will be sent a revised CAN within one day of the Pricing Date indicating the number of Equity Shares allocated to such Anchor Investor and the pay-in date for payment of the balance amount. Anchor Investors are then required to pay any additional amounts, being the difference between the Issue Price and the Anchor Investor Issue Price, as indicated in the revised CAN within the pay-in date referred to in the revised CAN. Thereafter, the Allotment Advice will be issued to such Anchor Investors.
- d) **In the event the Issue Price is lower than the Anchor Investor Issue Price:** Anchor Investors who have been Allotted Equity Shares will directly receive Allotment Advice.

7.5 BASIS OF ALLOTMENT FOR QIBs (OTHER THAN ANCHOR INVESTORS), NIIs AND RESERVED CATEGORY IN CASE OF OVER-SUBSCRIBED ISSUE

In the event of the Issue being over-subscribed, the Issuer may finalise the Basis of Allotment in consultation with the Designated Stock Exchange in accordance with the SEBI ICDR Regulations, 2009.

The allocation may be made in marketable lots, on a proportionate basis as explained below:

- a) Bidders may be categorized according to the number of Equity Shares applied for;
- b) The total number of Equity Shares to be Allotted to each category as a whole may be arrived at on a proportionate basis, which is the total number of Equity Shares applied for in that category (number of Bidders in the category multiplied by the number of Equity Shares applied for) multiplied by the inverse of the over-subscription ratio;
- c) The number of Equity Shares to be Allotted to the successful Bidders may be arrived at on a proportionate basis, which is total number of Equity Shares applied for by each Bidder in that category multiplied by the inverse of the over-subscription ratio;
- d) In all Bids where the proportionate Allotment is less than the minimum Bid Lot decided per Bidder, the Allotment may be made as follows: the successful Bidders out of the total Bidders for a category may be determined by a draw of lots

in a manner such that the total number of Equity Shares Allotted in that category is equal to the number of Equity Shares calculated in accordance with (b) above; and each successful Bidder may be Allotted a minimum of such Equity Shares equal to the minimum Bid Lot finalised by the Issuer;

- e) If the proportionate Allotment to a Bidder is a number that is more than the minimum Bid lot but is not a multiple of one (which is the marketable lot), the decimal may be rounded off to the higher whole number if that decimal is 0.5 or higher. If that number is lower than 0.5 it may be rounded off to the lower whole number. Allotment to all Bidders in such categories may be arrived at after such rounding off; and
- f) If the Equity Shares allocated on a proportionate basis to any category are more than the Equity Shares Allotted to the Bidders in that category, the remaining Equity Shares available for Allotment may be first adjusted against any other category, where the Allotted Equity Shares are not sufficient for proportionate Allotment to the successful Bidders in that category. RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are FIPB and the RBI.

The Government has from time to time made policy pronouncements on FDI through press notes and press releases. The Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (“DIPP”), issued consolidated FDI Policy, which with effect from August 28, 2017 consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DIPP that were in force and effect as on August 27, 2017. The Government proposes to update the consolidated circular on FDI Policy once every year and therefore, the Consolidation FDI Policy will be valid until the DIPP issues an updated circular.

The transfer of shares by an Indian resident to a Non-Resident does not require the prior approval of the FIPB or the RBI, provided that (i) the activities of the investee company are under the automatic route under the Consolidated FDI Policy and transfer does not attract the provisions of the SEBI (Substantial Acquisition of Shares and Takeovers) Regulations, 2011; (ii) the non-resident shareholding is within the sectoral limits under the Consolidated FDI Policy; and (iii) the pricing is in accordance with the guidelines prescribed by SEBI/RBI.

As per the existing policy of the Government of India, OCBs cannot participate in this Issue. The Equity Shares offered in the Issue have not been and will not be registered under the Securities Act, and may not be offered or sold within the United States, except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the Securities Act and applicable U.S. state securities laws. Accordingly, the Equity Shares are being offered and sold (i) within the United States to persons reasonably believed to be “qualified institutional investors” (as defined in Rule 144A under the Securities Act) pursuant to Rule 144A under the Securities Act or other applicable exemption under the Securities Act and (ii) outside the United States in offshore transactions in reliance on Regulation S under the Securities Act and the applicable laws of the jurisdictions where such offers and sales occur.

The above information is given for the benefit of the Applicants. Our Company and the LM are not liable for any amendments or modification or changes in applicable laws or regulations, which may occur after the date of this Prospectus.
