4. *We require certain approvals and licenses in the ordinary course of business and are required to comply with certain rules and regulations to operate our business, and the failure to obtain, retain and renew such approvals and licences or comply with such rules and regulations, and the failure to obtain or retain them in a timely manner or at all may adversely affect our operations.*

We require several statutory and regulatory permits, licenses and approvals to operate our business, some of which our Company has either received, applied for or is in the process of application. Many of these approvals are granted for fixed periods of time and need renewal from time to time. Non-renewal of the said permits and licenses would adversely affect our Company’s operations, thereby having a material adverse effect on our business, results of operations and financial condition. There can be no assurance that the relevant authorities will issue any of such permits or approvals in the time-frame anticipated by us or at all. Further, some of our permits, licenses and approvals are subject to several conditions and we cannot provide any assurance that we will be able to continuously meet such conditions or be able to prove compliance with such conditions to the statutory authorities, which may lead to the cancellation, revocation or suspension of relevant permits, licenses or approvals. Any failure by us to apply in time, to renew, maintain or obtain the required permits, licenses or approvals, or the cancellation, suspension or revocation of any of the permits, licenses or approvals may result in the interruption of our operations and may have a material adverse effect on the business. If we fail to comply with all applicable regulations or if the regulations governing our business or their implementation change, we may incur increased costs, be subject to penalties or suffer a disruption in our business activities, any of which could adversely affect our results of operations. For further details, please see chapters titled “*Key Industry Regulations and Policies*” and “*Government and Other Statutory Approvals*” at pages 110 and 206 respectively of this Draft Prospectus.

5. *Penalty for time overrun in execution of the projects may adversely affect our business, prospects, results of operations and financial condition.*

The Company’s activities comprise of fabrication, erection, testing and commissioning of Boiler Pressure Parts (such as water wall panels, economiser coils, Super heater coils, Re-heater coils, headers, Bends), Heaters, Technological structures (such as steel columns, girders, beams, piping, ducts) and vessels (such as Steel Tanks with or without pressure) for Power and Engineering Industries. The Company typically enters into high value contracts for the aforesaid activities, which may provide for levy of penalty for time-overrun cases. In case the Company is unable to meet the performance criteria as prescribed by the respective client and if penalties are levied, it may adversely affect our business, prospects, results of operations and financial condition.

6. *We face intense competition, since our Company operates in a highly competitive industry and competition may have a negative impact on our business prospects, future performance and financial condition.*

Our Company operates in a very fragmented and competitive industry, dominated by a large number of players. Increased competition may lead to revenue reductions, reduced profit margins, or a loss of market share, any of which could adversely affect our business and results of operations.

There are various factors that could impair our ability to maintain our current levels of revenues and profitability in our business, including the following:

- competition with other companies offering turnkey contracting projects and related services, some of which may develop better contacts in the industry and have an advantage of broader network, a wider range of services, and may have greater capital resources than we do;
- reduction by our competitors prices to gain business, especially during times of declining growth rates in the economy, which may limit our ability to maintain or increase our product prices, maintain our operating margins, or maintain significant growth in our business;
- solicitation by customers of bids from multiple turnkey contractors for their structural and components of structural product needs and the resulting loss of business to competitors;

- development of an operational model similar to ours by a competitor with sufficient financial resources and comparable experience in the turnkey contracting project industry;
- establishment of better relationships by our competitors with their customers

Our Company competes with other turnkey contracting projects and related service providers based on reliability, delivery time, security, and customer service. Our reputation is based on the level of customer service that we provide. If the quality of our fabricated products and level of service deteriorates, or if we are prevented from delivering our products in a timely, reliable, safe, and secure manner, our reputation and business may suffer. Our success also depends on our ability to understand the preferences of our existing and prospective customers.

Our Company's competitors may enjoy potential competitive advantages over us and may successfully attract our customers by matching or exceeding what we offer to our customers, such as:

- greater name/brand recognition, a longer operating history, wider customer base and extensive international operations;
- engage in price competition, reducing their pricing;
- larger marketing and advertising budgets and resources;
- larger intellectual property portfolios; and
- greater financial, technical and other resources.

There can be no assurance that we will have sufficient resources to respond to competitors' investments in product portfolio and pricing and promotional programs.

If our Company is unable to effectively compete with other participants, whether on the basis of pricing, services or otherwise, it might not be able to attract new customers or retain existing customers and this could adversely affect our business, financial condition and results of operations.

7. *Our Company had availed ₹972.04 lakhs as unsecured loans from Corporate Promoters and other corporates which are repayable on demand. Any demand from the lenders for repayment of such unsecured loan may affect our cash flow and financial condition.*

Our Company as per the restated audited financial statement as on March 31, 2017 had availed total sum of ₹ 972.04 lakhs as unsecured loan from Corporate Promoters and other corporates which may be recalled at any time. Sudden recall may disrupt our operations and also may force us to opt for funding at higher interest rates, resulting in higher financial burden. Further, our Company will not be able to raise funds at short notice and thus result in shortage of working capital fund. For further details, please refer to the section "Unsecured Loans" under "Financial Statements" beginning on page 155 of this Draft Prospectus. Any demand for the repayment of such unsecured loan, may adversely affect our cash flow and financial condition thereby having an adverse effect on our business, prospects and results of operations also.

8. *Our Company is dependent on the continuing operation of our manufacturing facilities. Any significant interruption in manufacturing at our facilities could have a material adverse effect on our business, results of operations and financial condition.*

Our Company manufactures substantially all of the products at our manufacturing facilities at Nagpur, which are subject to the normal risks of industrial production, including equipment breakdowns, labour stoppages, and natural disasters, directives from government, MIDC rules and power interruptions. In case of any disruption at such facilities, it may adversely affect the manufacturing cycle, and may lead to time over-run in the execution of the project.

All of these manufacturing facilities require a significant amount and continuous supply of electricity and any shortage or non-availability of electricity may adversely affect our operations. The manufacturing process of our products requires significant electricity. Our Company depends on MSEDCL for supply of our energy requirements. For further information, see "Government and Other Approvals" on page 206 of the Draft Prospectus.

Further our Company has maintained a Diesel Generator ("DG Set") to meet exigencies at our manufacturing facility located at Plot No. K-55, Five Star Industrial Zone, MIDC, Butibori, Hingna, Nagpur, Maharashtra - 441122. However, the Company has not used the DG set since its installation and also not obtained the permissions related to utilisation of DG Sets. We have not faced any power failures during the course of our

business activities, but in case of any power failure at our manufacturing Unit located at Plot No. K-43, Five Star Industrial Zone, MIDC, Butibori, Hingna, Nagpur, Maharashtra- 441122 it may cause adverse effect in the manufacturing activities carried out there as the Company has not maintained any diesel generators at Plot No. K-43, Five Star Industrial Zone, MIDC, Butibori, Hingna, Nagpur, Maharashtra - 441122.

9. *The capacity of the plants of our two manufacturing units is not fully utilized. Further, information relating to the estimated manufacturing capacities of our production facilities included in this Draft Prospectus is based on various assumptions and estimates. Actual production rate may vary from such estimated manufacturing capacity information and historical capacity utilization rates, which in turn could affect our ability to fully absorb fixed costs and thus may adversely impact our financial performance*

The capacities at our manufacturing units have not been fully utilized, the details of which are as follows:

The information relating to the estimated manufacturing capacities of our manufacturing facilities included in this Draft Prospectus are based on various assumptions and estimates of our management, including proposed operations, assumptions relating to availability and quality of raw materials and assumptions relating to potential facility capacity, facility operating shifts, and potential operational efficiencies. Actual production levels and future capacity utilization rates may vary significantly from the estimated manufacturing capacities of our manufacturing facilities and historical capacity utilization rates.

We may manufacture varied products based on the market demand and also enter into more geographical areas based on our estimates of market demand and profitability. In the event of non-materialization of our estimates and expected order flow for our existing and / or future products and/or failure of optimum utilization of our capacities, due to factors including adverse economic scenario, change in demand or for any other reason, our capacities may not be fully utilized thereby impairing our ability to fully absorb our fixed cost and may adversely impact our consolidated financial performance.

10. *Our operations could be adversely affected by strikes, work stoppages or increased wage demands by our employees or any other kind of disputes with our employees.*

As of July 31, 2017, we employed 98 employees consisting of technicians, trainee and other staff. Additionally we employ casual labourers and temporary labourers at times according to our requirements. Although our relations with our employees are good and we have not experienced any major work stoppages due to labour disputes or cessation of work in the recent past, we cannot assure you that we will not experience disruptions in work due to disputes or other problems with our work force, which may adversely affect our ability to continue our business operations. Any labour unrest directed against us, could directly or indirectly prevent or hinder our normal operating activities, and, if not resolved in a timely manner, could lead to disruptions in our operations. These actions are improbable for us to forecast or control and any such event could adversely affect our business, results of operations and financial condition.

11. *Our Company has substantial requirement of working capital and failure to manage our working capital could have an adverse effect on our net sales, profitability, cash flow and liquidity.*

We are engaged in manufacturing, supplying, installation, commissioning of Boiler Pressure Parts, Heaters, Technological structures and vessels for Power and Engineering Industries. Our Company mainly caters to the needs of undertaking fabrication and erection related works required majorly for Power Plant Construction. Our company business needs substantial working capital and financing in the form of fund and non-fund based working capital facilities to meet its requirements. A liquidity crunch may also result in increased working capital borrowings and, consequently, higher finance cost which will adversely impact our profitability.

Generally, payments from clients are linked to completion of milestones. Payments are spread out over the execution period of the contracts. Consequently, there could be situation where the total funds available may not be sufficient to fulfill the commitments in which case additional funding can be raised through commercial borrowings, vendor financing or issue of fresh capital, in such event the interest obligation would increase and the company may be subject to additional covenants. Working capital is partially met through internal accruals. However, failure to manage our working capital requirements in the future could have an adverse effect on our net sales, profitability, cash flow and liquidity.

12. *We constantly face a credit risk which may in turn affect our complete cycle adversely. Also, any customer dispute regarding our performance or workmanship may amount in delay or withholding of payment to us.*

Our Company is involved in manufacturing, supplying, installation, commissioning of Boiler Pressure Parts, Heaters, Technological structures and vessels for Power and Engineering Industries along with ancillary services to our customer according to their requirement. Our primary competence is the ability to provide timely deliveries and services, further being able to exploit the benefits of economies of scale and credit shortage in the industry. Our business cycle is heavily dependent on timely payments being received from our customers. In case that our service of transportation and other services does not fulfill the requirements of our customer which may leads to dissatisfaction and further consequence including customer dispute regarding our performance or workmanship and the customer may delay or withhold payment to us, which may result in materially affecting our business.

In case of such default in payment/ unforeseeable delay in payment from any of our customers our working capital cycle will be adversely affected. This may lead to lack of competitive advantage against various other transporters leading to an adverse effect on our business operations and profitability.

13. *Non-compliance with and changes in, safety, health and environmental laws and other applicable regulations, may adversely affect Our Company's results of operations and its financial condition.*

Our Company is subject to Indian laws and government regulations, including in relation to safety, health and environmental protection. These safety, health and environmental protection laws and regulations inter alia impose controls on air and water discharge, noise levels, storage handling, employee exposure to hazardous substances and other aspects of our Company's operations and products. In addition, our products, including the process of manufacture, storage and distribution of such products, are subject to numerous laws and regulations in relation to quality, safety and health. Failure to comply with any existing or future regulations applicable to our Company may result in levy of fines, commencement of judicial proceedings and/or third party claims, and may adversely affect our results of operations and financial condition.

Further, there can be no assurance that our Company will not be involved in future litigation or other proceedings or be held responsible in any litigation or proceedings including in relation to safety, health and environmental matters, the costs of which could be material. Any accidents involving hazardous substances can cause personal injury and loss of life, substantial damage to or destruction of property and equipment and could result in a suspension of operations. The loss or shutdown of operations over an extended period at any of our Company's facilities would have a material adverse effect on our Company's business and operations.

14. An interruption in the supply or significant increase in the price of raw materials may adversely affect our business, prospects, results of operations and financial condition.

Our Company's fabrication, testing and commissioning contracts are primarily dependent on adequate and timely supply of raw materials such as structural steel in different shapes, Carbon & alloy steel pipes and tubes, Stainless steel tubes and plates, Fasteners, Pipe fittings and flanges and consumables at competitive prices. These raw materials are purchased from the authorized vendors from the market.

Our Company faces stiff competition from larger and well-established players for procuring these raw materials. In case our Company is unable to procure the requisite quantities of raw materials well in time and at competitive prices, the performance of our company may be affected, thus adversely affecting our business, prospects, results of operations and financial condition.

15. Our Company might be unable to meet certain delivery obligations including timelines of delivery, due to which, it could become liable to claims by customers, suffer adverse publicity and incur substantial costs, which in turn could adversely affect our results of operations.

Many of our orders involve fabricating the products on timely basis and providing services of erection and commissioning that are critical to the operations of our customers business. Improper handling of machines used in the business line of the Company can result into accidents at times and may lead to loss of life of the employees and the Company could face liabilities that may adversely affect its profits.

Our Company has been executing the variety of projects using modern techniques and state-of-the-art plant & equipment. Our Company has insured policies cover and has undertaken adequate safety measures, which have minimized the loss of three crucial M's viz. men, material and machines. Also, our company employs skilled manpower to handle materials and machines and provide requisite in-house training for the same. In spite of the same, in future due to improper handling of machineries which could result in accidents, it could have an adverse effect on our net sales, profitability and results of our operations.

24. *Project dependence on sub-contractor's performance could have an adverse effect on our net sales, profitability and results of our operations.*

The Projects sub-contracted by the company could get delayed on account of the sub-contractors performance resulting in delayed payments. In some cases, we outsource part of the work to sub-contractors to ensure timely completion of the project and further maintaining the quality of the products. In the event of any delay on the part of a sub-contractor work, the company would receive delayed payments from the client as also the company may be required to pay penalty for such delay. Thus incurring these penalties on non-performance of the sub-contractors due to delay in the projects could have an adverse effect on our net sales, profitability and results of our operations.

We cannot assure investors that in the event of any such acceleration we will have sufficient resources to repay these borrowings. Failure to meet obligations under debt financing agreements may have an adverse effect on our cash flows, business and results of operations. Our ability to meet our debt service obligations and to repay our outstanding borrowings will depend primarily upon the cash flows generated by our business. We cannot assure you that we will generate sufficient cash to enable us to service existing or proposed borrowings. Incurring significant indebtedness may limit our flexibility in planning for or reacting to changes in our business & industry and limit our ability to borrow additional funds. Further, our level of indebtedness has important consequences to our Company, such as:

- Increasing our vulnerability to general adverse economic, industry and competitive conditions;
- Limiting our flexibility in planning for, or reacting to, changes in our business and the industry; affecting our credit rating;
- Limiting our ability to borrow more money both now and in the future; and
- Increasing our interest expenditure and adversely affecting our profitability, since almost all of our debt bears interest at floating rates.

If any of these risks were to materialize, our business and results of operations may be adversely affected.

26. *We are dependent on third party transportation providers for the delivery of our fabricated products and structures from our manufacturing facilities to various customers in case of provision of transportation service by us. Accordingly, continuing increases in transportation costs or unavailability of transportation services for our products, as well the extent and reliability of Indian infrastructure may have an adverse effect on our business, financial condition, results of operations and prospects*

Our Company is engaged in activities comprising of fabrication, erection, testing and commissioning of Boiler Pressure Parts (such as water wall panels, economiser coils, Super heater coils, Re-heater coils, headers, Bends), Heaters, Technological structures (such as steel columns, girders, beams, piping, ducts) and vessels (such as Steel

Tanks with or without pressure). Our Company mainly caters to Power and Engineering Industry. Further our company has a diversified customer portfolio and we operate on Pan- India basis.

Further, our Company is required to renew these insurance policies from time to time and in the event, we fail to renew the insurance policies within the time period prescribed in the respective insurance policies or not obtain at all, our Company may face significant uninsured losses. If our Company suffers a large uninsured loss or if any insured loss suffered, significantly exceeds our insurance coverage, our business, financial condition and results of operations may be adversely affected.

Modernization and technology up gradation is essential to reduce costs and increase the output. Changes in technology may render our current technologies obsolete or require us to make substantial capital investments. However, our existing state-of-the-art manufacturing units have machineries with latest technology and we strive to keep our technology, equipment's and machinery in line with the latest technological standards. But in future we may be required to implement new technology or upgrade the machineries and other equipment's employed by us. Further, the costs in upgrading our technology and modernizing the plant and machineries may be significant which could substantially affect our finances and operations.

Further in case of machinery requirement based on business opportunity/ latest technology machinery, we will have to incur huge expenditure which may adversely affect our Company's results of operations and its financial condition. For details, please refer "Annexure XXV – Related Party Transactions" on page no. 173 of this Draft Prospectus.

The sanction letter issued to us contains provisions that restrict our ability to do, among other things, any of the following:

- Payment of any consideration by way of commission, brokerage and fees or provide any personal guarantee;
- Create or allow to exist any encumbrance or security over assets specifically charged with the bank;
- Undertake or permit any re-organization, amalgamation, reconstruction, takeover or any other schemes of compromise or arrangement;
- Declare dividends/ withdraw any amount in any form of salary/ remuneration/ incentive/ commission by the Promoters/ Directors in case of overdue with the Bank;
- Change directors/ ownership/ promoters/ major shareholders

Further the company has created a charge on its assets in favour of their bankers against the assets of the company. In case of default by the company in repayment of the loans, bankers may exercise their rights over the security, which may be detrimental to the interest of the company. For details, please refer "*Financial Indebtedness*" on page no.188 of this Draft Prospectus.

Also, we are required to obtain the required consents of the lenders before undertaking certain significant corporate actions. We cannot assure you that the lenders will grant the required approvals in a timely manner, or at all. The time required to secure consents may hinder us from taking advantage of a dynamic market environment. In addition to the restrictions listed above, we are required to maintain certain financial ratios under our financing agreements. These financial ratios and the restrictive provisions could limit our flexibility to engage in certain business transactions or activities.

Additionally, our borrowings are secured by our movable, immovable or tangible assets (whether existing or future) and by a personal guarantee of our Promoter / Promoter Group. Such securities enable the lenders to cancel any outstanding commitments, accelerate the repayment, exercise cross default provisions and enforce their security interests on the occurrence of events of default such as a breach of financial covenants, failure to obtain the proper consents, failure to perfect security as specified and such other covenants that are not cured. It is possible that we may not have sufficient funds upon such an acceleration of our financial obligations to pay the principal amount and interest in full. Further, if we are forced to issue additional equity to the lenders, your ownership interest in our Company will be diluted. It is also possible that future financing agreements may contain similar or more onerous covenants and may also result in higher interest cost.

If any of these events were to occur, our business, results of operations and financial condition may be adversely affected.

31. *Our Company is subject to inspections under the Maharashtra Pollution Control Board and various other regulatory authorities, which may result in imposition of penalty on us.*

Consequently, we may fail to adhere to the directions of the authorities in a timely manner which may attract penal sanctions affecting our operations and financial condition.

32. *Our inability to manage growth could disrupt our business and reduce profitability.*

A principal component of our strategy is to continuously grow by expanding the size and scope of our businesses by utilizing the installed capacity at our manufacturing units. This growth strategy will place significant demands on our management, financial and other resources. It will require us to continuously develop and improve our operational, financial and internal controls. Continuous expansion increases the challenges involved in financial management, recruitment, training and retaining high quality human resources, preserving our culture, values and entrepreneurial environment, and developing and improving our internal administrative infrastructure. Any inability on our part to manage such growth could disrupt our business prospects, impact our financial condition and adversely affect our results of operations.

- 33. *We have availed of certain loans from Banks, pursuant to the Financing Agreements that we have entered into with them. Pursuant to the terms of such agreements, we require consents from the respective Bankers for a number of corporate actions, including for undertaking this Offer, which have not been obtained as on date. Any failure to obtain such consents may result in a default under the terms of the Financing Agreements.***

Pursuant to the Financing Agreements entered into by us with the Bankers, we are required to obtain consents from the respective Bankers to undertake certain actions, including this Offer and for completion of the requirements pertaining to this Offer. Though, we have informed our bankers orally of our intention to undertake this Offer, as on date, we have not obtained consents from these bankers for undertaking this Offer, and the same is awaited.

While our Company intends to obtain all the necessary consents in relation to this Offer from our Bankers prior to the filing of the Prospectus with the RoC, undertaking this Offer without obtaining our Banker's consents, or in contravention of any conditions contained in such contents, may constitute a breach of the Financing Agreements. Any default under the Financing Agreements may enable our Bankers to cancel any outstanding commitments, accelerate the repayment and enforce their security interests. If our obligations under the Financing Agreements are accelerated, our financial condition and operations could materially and adversely be affected.

- 34. *If we are unable to establish and maintain an effective system of internal controls and compliances our business and reputation could be adversely affected.***

However, there can be no assurance that deficiencies in our internal controls and compliances will not arise, or that we will be able to implement, and continue to maintain, adequate measures to rectify or mitigate any such deficiencies in our internal controls, in a timely manner or at all.

For instance, there have been instances of delays and inadvertent submission of wrong data in filing of prescribed forms with the RoC pertaining to secretarial matters *inter-alia* change in designation of the directors of our Company. Further, our Company is required to make timely filings of forms with RoC pertaining to various secretarial matters; however we cannot assure you that the filings were made in a timely manner and that we shall not be subject to penalties on this account.

As we continue to grow, there can be no assurance that there will be no other instances of such inadvertent non-compliances with statutory requirements, which may subject us to regulatory action, including monetary penalties, which may adversely affect our business and reputation.

There have been instances of non-compliance in relation to these aspects in the past. Presently, our Company has constituted its Board according to Companies Act, 2013 and also constituted committees. Our Company has also appointed a Company Secretary recently. However, we cannot assure you that our Company will not be subject to any penalty imposed by the competent regulatory authorities in this respect in future.

- 36. *In addition to normal remuneration, other benefits and reimbursement of expenses our Directors (including our Promoters) and Key Management Personnel are interested in our Company to the extent of their shareholding and dividend entitlement in our Company.***

Some of our Directors (including our Promoters) and Key Management Personnel are interested in our Company to the extent of their shareholding and dividend entitlement in our Company, in addition to normal remuneration, incentives or benefits and reimbursement of expenses. We cannot assure you that our Directors or our Key Management Personnel would always exercise their rights as Shareholders to the benefit and best interest of our Company. As a result, our Directors will continue to exercise significant control over our Company, including

being able to control the composition of our board of directors and determine decisions requiring simple or special majority voting, and our other Shareholders may be unable to affect the outcome of such voting. Our Directors may take or block actions with respect to our business, which may conflict with our best interests or the interests of other minority Shareholders, such as actions with respect to future capital raising or acquisitions. We cannot assure you that our Directors will always act to resolve any conflicts of interest in our favour, thereby adversely affecting our business and results of operations and prospects.

37. *Our Promoter and key managerial persons play key role in our functioning and we heavily rely on their knowledge and experience in operating our business and therefore, it is critical for our business that our Promoters remain associated with us. Our success also depends upon the continued services of our Key Managerial Personnel and Promoters and our ability to attract train and retain them.*

Our Company is operated by a group of individuals who have approximate 20 years of experience. The success of our business operations is attributable to our Promoter, Directors and key management personnel. We believe that our relation with our Promoter, who have rich experience in setting up business, developing markets, managing customers and handling overall businesses, has enabled us to experience growth and profitability. We benefit from our relationship with our Promoter and key managerial persons and our success depends upon the continuing services of our Promoter and key managerial persons who have been responsible for the growth of our business and are closely involved in the overall strategy, direction and management of our business. Our Managing Director, Mr. M T Devarajan, has been actively involved in the day to day operations and management since the incorporation of the Company.

Our Promoter, along with the group key managerial personnel, have over the years built relations with clients, government agencies and other persons who are connected with us. The loss of their services could impair our ability to implement our strategy, and our business, financial condition, results of operations and prospects may be materially and adversely affected.

Further, our Promoter have also promoted other companies / firms / ventures and may continue to do so. If they divert their attention to the other companies, we may not be able to function as efficiently and profitably as before. We may have to incur additional costs to replace the services of our promoters or we may not be able to do so at all, which could adversely affect our business operations and affect our ability to continue to manage and expand our business. Any inability to attract and retain talented employees or the resignation or loss of key management personnel, may have an adverse impact on our business, future financial performance and the price of our Equity Shares.

38. *We have not made any provisions for decline in value of our Investments*

As on March 31, 2017, we hold investments in Unquoted Equity Instruments aggregating to ₹ 16.00 lakhs as per Restated Financial Statements. We have not made any provision for the decline in value of these investments and hence as and when these investments are liquidated, we may book losses based on the actual value we can recover for these investments and if lower than the cost, the same could adversely affect our results of operations.

39. *We have issued Equity Shares during the last year at a price that may be below the Issue Price.*

We have issued certain Equity Shares in the last twelve months, at a price that may be lower than the Issue Price. Details of such issuances are given in the table below:

Our Company intends to primarily use the Net Proceeds from the Fresh Issue towards Working Capital requirement and GCP as described in “*Objects of the Issue*” on page no. 63 of this Draft Prospectus. In terms of Regulation 16 of the SEBI (ICDR) Regulations, we are not required to appoint a monitoring agency since the Fresh Issue is not in excess of ₹ 10,000 lakhs. The management of our Company will have discretion to use the Net Proceeds from the Fresh Issue, and investors will be relying on the judgment of our Company's management regarding the application of the Net Proceeds from the Fresh Issue. Our Company may have to revise its management estimates from time to time and consequently its requirements may change. Additionally, various risks and uncertainties, including those set forth in this section “*Risk Factors*”, may limit or delay our Company's efforts to use the Net Proceeds from the Fresh Issue to achieve profitable growth in its business.

Further, pursuant to Section 27 of the Companies Act 2013, any variation in the objects would require a special resolution of the Shareholders and our Promoters or controlling Shareholders will be required to provide an exit opportunity to the Shareholders of our Company who do not agree to such proposal to vary the objects, in such manner as may be prescribed in future by the SEBI.

Accordingly, prospective investors in the Issue will need to rely upon our management's judgment with respect to the use of Net Proceeds. If we are unable to enter into arrangements for utilization of Net proceeds as expected and assumed by us in a timely manner or at all, we may not be able to derive the expected benefits from the proceeds of the Issue and our business and financial results may suffer.

- 41. *Our Promoters have extended personal guarantees in connection with certain of our debt facilities. There can be no assurance that such personal guarantees will be continued to be provided by our Promoters in the future or can be called at any time, affecting the financial.***

Our Promoters have provided personal guarantees for our borrowings to secure our loans. If any of these guarantees are revoked, our lenders may require alternative guarantees or collateral or cancellation of such facilities, entailing repayment of amounts outstanding under such facilities. If we are unable to procure alternative guarantees satisfactory to our lenders, we may need to seek alternative sources of capital, which may not be available to us at commercially reasonable terms or at all, or to agree to more onerous terms under our financing agreements, which may limit our operational flexibility. Accordingly, our business, financial condition, results of operations, cash flows and prospects may be adversely affected by the revocation of all or any of the personal guarantees provided by our Promoters in connection with our Company's borrowings.

- 42. *We have not identified any alternate source of raising the funds mentioned as our ‘Objects of the Issue’. Any shortfall in raising / meeting the same could adversely affect our growth plans, operations and financial performance.***

Our Company has not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds can adversely affect our growth plan and profitability. The delay/shortfall in receiving these proceeds could result in inadequacy of funds for setting up the denim processing unit or may result in us borrowing funds on unfavourable terms, both of which scenarios may affect the business operation and financial performance of the company.

- 43. *Our Promoters will continue to retain majority shareholding in us after the Issue, which will allow them to exercise significant influence over us and potentially create conflicts of interest.***

The current Issue includes fresh issue of Equity Shares and Offer for Sale by our Promoters and Promoter Group. Our Promoter and Promoter Group own approximately 73.65% of our post-Issue equity share capital. As a result, the Promoters may have the ability to control our business including matters relating to any sale of all or substantially all of our assets, the timing and distribution of dividends and the election or termination of appointment of our officers and directors. This control could delay, defer or prevent a change in control of the Company, impede a merger, consolidation, takeover or other business combination involving the Company, or discourage a potential acquirer from making a tender offer or otherwise attempting to obtain control of the Company even if it is in the Company's best interest. In addition, for so long as the Promoters continue to exercise significant control over the Company; they may influence the material policies of the Company in a manner that

could conflict with the interests of our other shareholders. The Promoters may have interests that are adverse to the interests of our other shareholders and may take positions with which our other shareholders do not agree.

44. *Employee misconduct, errors or fraud could expose us to business risks or losses that could adversely affect our business prospects, results of operations and financial condition.*

Employee misconduct, errors or frauds could expose us to business risks or losses, including regulatory sanctions, penalties and serious harm to our reputation. Such employee misconduct includes breach in security requirements, misappropriation of funds, hiding unauthorized activities, failure to observe our stringent operational standards and processes, and improper use of confidential information. It is not always possible to detect or deter such misconduct, and the precautions we take to prevent and detect such misconduct may not be effective. In addition, losses caused on account of employee misconduct or misappropriation of petty cash expenses and advances may not be recoverable, which we may result in write-off of such amounts and thereby adversely affecting our results of operations. Our employees may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions in which case, our reputation, business prospects, results of operations and financial condition could be adversely affected.

45. *We may not be able to sustain effective implementation of our business and growth strategies.*

The success of our business will depend greatly on our ability to effectively implement our business and growth strategies. We may not be able to execute our strategies in the future. Further, our growth strategies could place significant demand on our management team and other resources and would require us to continuously develop and improve our operational, financial and other controls, none of which can be assured.

Any failure on our part to scale up our infrastructure and management could cause disruptions to our business and could be detrimental to our long term business outlook. Further, we operate in a highly dynamic industry, and on account of changes in market conditions, industry dynamics, technological improvements or changes and any other relevant factors, our growth strategy and plans may undergo changes or modifications, and such changes or modifications may be substantial, and may even include limiting or foregoing growth opportunities if the situation so demands. Our inability to implement our business strategies and sustain our growth may impair our financial growth and thus result in an adverse impact on our Company's share price.

46. *In the event there is any delay in the completion of the Issue, there would be a corresponding delay in the completion of the objects / schedule of implementation of this Issue which would in turn affect our revenues and results of operations.*

The funds that we receive would be utilized for the Objects of the Fresh Issue as has been stated in the Chapter "Objects of the Offer" on page no. 63 of the Draft Prospectus. The proposed schedule of implementation of the objects of the Offer is based on our management's estimates. If the schedule of implementation is delayed for any other reason whatsoever, including any delay in the completion of the Offer, we may have to revise our business, development and working capital plans resulting in unprecedented financial mismatch and this may adversely affect our revenues and results of operations.

47. *Any disproportionate increase in labour costs including increase in wage/salary demand, labour unrest or labour claims arising from accidents may adversely affect our business operations and financial conditions.*

Our increasing business operations may require our employee strength to increase in future. In the past our Company has not experienced any labour unrest, but there is no assurance that it will not experience the same at any time in the future. Also, there is a possibility that the labour costs increase disproportionately due to increase in wage/salary demand. In this event, if our Company is unable to pass on the increased costs to our customers, our business operations and financial conditions may be adversely affected.

48. *The rate of interest for the loans obtained by us from the banks is variable and any increase in interest rates may adversely affect our results of operations and financial condition.*

Our Company is susceptible to changes in interest rates and the risks arising there from. Our sanction letters provide for interest at variable rates with a provision for the periodic resetting of interest rates. Further the lenders are entitled to change the applicable rate of interest, which is a combination of a base rate that depends upon the policies of the RBI and a contractually agreed spread, and in the event of an adverse change in our Company's credit risk rating. For further details of interest payable on our borrowings, please refer to the chapter titled

“Financial Indebtedness” on page no. 188 of this Draft Prospectus. Further, in recent years, the Government of India has taken measures to control inflation, which have included tightening the monetary policy by raising interest rates. As such, any increase in interest rates may have an adverse effect on our business, results of operations, cash flows and financial condition.

49. *The requirements of being a public listed company may strain our resources and impose additional requirements.*

With the increased scrutiny of the affairs of a public listed company by shareholders, regulators and the public at large, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur in the past. We will also be subject to the provisions of the listing agreements signed with the Stock Exchanges which require us to file unaudited financial results on half yearly basis. In order to meet our financial control and disclosure obligations, significant resources and management supervision will be required. As a result, management’s attention may be diverted from other business concerns, which could have an adverse effect on our business and operations. There can be no assurance that we will be able to satisfy our reporting obligations and/or readily determine and report any changes to our results of operations in a timely manner as other listed companies. In addition, we will need to increase the strength of our management team and hire additional legal and accounting staff with appropriate public company experience and accounting knowledge and we cannot assure that we will be able to do so in a timely manner.

RISK FACTORS RELATED TO EQUITY SHARES

50. *Any further issuance of Equity Shares by Our Company or sales of Equity Shares by any significant shareholders may adversely affect the trading price of the Equity Shares.*

Any future issuance of Equity Shares by our Company could dilute the investors’ shareholding. Any such future issuance of Equity Shares or sales of Equity Shares by any of our significant shareholders may also adversely affect the trading price of the Equity Shares, and could impact our ability to raise capital through an offering of securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares.

51. *Our ability to pay dividends in the future may be affected by any material adverse effect on our future earnings, financial condition or cash flows.*

Our ability to pay dividends in future will depend on our earnings, financial condition and capital requirements, and that of our Subsidiary and the dividends they distribute to us. In the past, we have not made dividend payments to the Shareholders of our Company. The Company may decide to retain all future earnings, if any, for use in the operations and expansion of the business. In such situation, the Company may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board and will depend on factors that our Board deems relevant, including among others, our future earnings, financial condition, cash requirements, business prospects and any other financing arrangements. We cannot state with any certainty whether we will be able to pay dividends in the future. Accordingly, realization of a gain on Shareholders’ investments will depend on the appreciation of the price of the Equity Shares. There is no guarantee that our Equity Shares will appreciate in value.

52. *Investors may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.*

Under current Indian tax laws and regulations, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India. Any gain realized on the sale of listed equity shares on a stock exchange held for more than 12 months will not be subject to capital gains tax in India if Securities Transaction Tax (STT) has been paid on the transaction. STT will be levied on and collected by a domestic stock exchange on which the equity shares are sold. Any gain realized on the sale of equity shares held for more than 12 months to an Indian resident, which are sold other than on a recognised stock exchange and on which no STT has been paid, will be subject to long term capital gains tax in India. Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short term capital gains tax in India. Capital gains arising from the sale of the Equity Shares will be exempt from taxation in India in cases where the exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India’s ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the Equity Shares. In addition,

changes in the terms of tax treaties or in their interpretation, as a result of renegotiations or otherwise, may affect the tax treatment of capital gains arising from a sale of Equity Shares.

EXTERNAL RISK FACTORS

53. *The Companies Act, 2013 and SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015 have effected significant changes to the existing Indian company law/ listing framework, which may subject us to higher compliance requirements and increase our compliance costs.*

A majority of the provisions and rules under the Companies Act, 2013 have come into effect. The Companies Act, 2013 has brought into effect significant changes to the Indian company law framework, such as in the provisions related to issue of capital (including provisions in relation to issue of securities on a private placement basis), disclosures in Issuing documents, corporate governance norms, accounting policies and audit matters, related party transactions, introduction of a provision allowing the initiation of class action suits in India against companies by shareholders or depositors, a restriction on investment by an Indian company through more than two layers of subsidiary investment companies (subject to certain permitted exceptions), prohibitions on loans to directors and insider trading and restrictions on directors and key managerial personnel from engaging in futures trading. Further, the Companies Act, 2013 imposes greater monetary and other liability on us and our directors for any non-compliance.

To ensure compliance with the requirements of the Companies Act, 2013 and SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, we may need to allocate additional resources, which may increase our regulatory compliance costs and divert management attention. The Companies Act, 2013 introduced certain additional requirements which do not have corresponding equivalents under the Companies Act, 1956. Accordingly, we may face challenges in interpreting and complying with such provisions due to the limited jurisprudence on them. In the event our interpretation of such provisions of the Companies Act, 2013 differs from, or contradicts with, any judicial pronouncements or clarifications issued by the Government in the future, we may face regulatory actions or we may be required to undertake remedial steps. Further, we cannot currently determine the impact of provisions of the Companies Act, 2013 which are yet to be notified. Any increase in our compliance requirements or in our compliance costs may have an adverse effect on our business and results of operations.

54. *Any changes in the regulatory framework could adversely affect our operations and growth prospects.*

Our Company is subject to various regulations and policies. For details see section titled “*Key Regulations and Policies*” beginning on page no. 110 of this Draft Prospectus. Our business and prospects could be materially adversely affected by changes in any of these regulations and policies, including the introduction of new laws, policies or regulations or changes in the interpretation or application of existing laws, policies and regulations. There can be no assurance that our Company will succeed in obtaining all requisite regulatory approvals in the future for our operations or that compliance issues will not be raised in respect of our operations, either of which could have a material adverse effect on our business, financial condition and results of operations.

55. *Changing laws, rules and regulations and legal uncertainties, including adverse application of corporate and tax laws, may adversely affect our business, results of operations, financial condition and prospects.*

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes, including the instances mentioned below, may adversely affect our business, results of operations, financial condition and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy.

- The GoI has proposed a comprehensive national goods and services tax ("GST") regime that will combine taxes and levies by the Central and State Governments into a unified rate structure which is effective from July 01, 2017. While the GoI and other state governments have announced that all committed incentives will be protected following the implementation of the GST, given the limited availability of information in the public domain concerning the GST, we are unable to provide any assurance as to this or any other aspect of the tax regime following implementation of the GST. The implementation of this rationalized tax structure may be affected by any disagreement between certain state governments, which may create uncertainty. Any such future increases or amendments may affect the overall tax efficiency of companies operating in India and may result in significant additional taxes becoming payable.

- Further, the General Anti Avoidance Rules ("GAAR") are proposed to be made effective from April 1, 2017. The tax consequences of the GAAR provisions being applied to an arrangement could result in denial of tax benefit amongst other consequences. In the absence of any precedents on the subject, the application of these provisions is uncertain. If the GAAR provisions are made applicable to our Company, it may have an adverse tax impact on us.

We have not determined the impact of these proposed legislations on our business. Uncertainty in the applicability, Interpretation or implementation of any amendment to, or change in, governing law, regulation or policy in the jurisdictions in which we operate, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current business or restrict our ability to grow our business in the future. Further, the GoI may introduce a waiver or incentive scheme in relation to specific population segments such as MSEs in public interest, pursuant to which we may be required to Issue our products and services at discounted rates. This may affect our business and results of operations.

56. Civil disturbances, extremities of weather, regional conflicts and other political instability may have adverse effects on our operations and financial performance.

Certain events that are beyond our control such as earthquake, fire, floods and similar natural calamities may cause interruption in the business undertaken by us. Our operations and financial results and the market price and liquidity of our equity shares may be affected by changes in Indian Government policy or taxation or social, ethnic, political, economic or other adverse developments in or affecting India.

57. Terrorist attacks, civil unrest and other acts of violence or war involving India and other countries could adversely affect the financial markets and our business.

Terrorist attacks and other acts of violence or war may negatively affect the Indian markets on which our Equity Shares will trade and also adversely affect the worldwide financial markets. These acts may also result in a loss of business confidence, impede travel and other services and ultimately adversely affect our business. In addition, any deterioration in relations between India and Pakistan might result in investor concern about stability in the region, which could adversely affect the price of our Equity Shares.

India has also witnessed civil disturbances in recent years and it is possible that future civil unrest as well as other adverse social, economic and political events in India could have a negative impact on the value of share prices generally as well as the price of our Equity Shares. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse impact on our business and the price of our Equity Shares.

58. Instability in financial markets could materially and adversely affect our results of operations and financial condition.

The Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, especially in the United States of America or Europe, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors' reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets.

The global financial turmoil, an outcome of the sub-prime mortgage crisis which originated in the United States of America, led to a loss of investor confidence in worldwide financial markets. Indian financial markets have also experienced the contagion effect of the global financial turmoil, evident from the sharp decline in Nifty, NSE's benchmark index. Any prolonged financial crisis may have an adverse impact on the Indian economy and us, thereby resulting in a material and adverse effect on our business, operations, financial condition, profitability and price of our Equity Shares.

59. Conditions in the Indian securities market and stock exchanges may affect the price and liquidity of our Equity Shares.

Indian stock exchanges, which are smaller and more volatile than stock markets in developed economies, have in the past, experienced problems which have affected the prices and liquidity of listed securities of Indian

companies. These problems include temporary exchange closures to manage extreme market volatility, broker defaults, settlement delays and strikes by brokers. In addition, the governing bodies of the Indian stock exchanges have from time to time restricted securities from trading, limited price movements and restricted margin requirements. Further, disputes have occurred on occasion between listed companies and the Indian stock exchanges and other regulatory bodies that, in some cases, have had a negative effect on market sentiment. If similar problems occur in the future, the market price and liquidity of the Equity Shares could be adversely affected. Further, a closure of, or trading stoppage on, either of the Stock Exchanges could adversely affect the trading price of our Equity Shares.

- 60. *We will prepare our financial statements from April 1, 2018 onwards under the Indian Accounting Standards (“Ind AS”). As Ind AS is different in many respects from Indian GAAP, our financial statements from April 1, 2018 may not be comparable to our historical financial statements and our financial statements for the year ending March 31, 2017 prepared under Indian GAAP may not be comparable to our financial statements for the year ending March 31, 2017 prepared under Ind AS for comparison purposes. In addition, our transition to Ind AS reporting could have an adverse effect on our business and results of operations.***

We currently prepare our financial statements under Indian GAAP. The Companies (Indian Accounting Standards) Rules, 2015 (“IAS Rules”), as amended by the Companies (Indian Accounting Standards) (Amendment) Rules, 2016, enacted changes to Indian GAAP that are intended to align Indian GAAP further with IFRS. The IAS Rules provide that the financial statements of the companies to which they apply shall be prepared and audited in accordance with Ind AS. Ind AS is different in many respects from Indian GAAP. All NBFCs and HFCs having a net worth of more than ₹ 5,000.00 million are required to mandatorily adopt Ind AS for the accounting period beginning from April 1, 2018, with comparatives for the period ending on March 31, 2017. Although any company may voluntarily implement Ind AS for the accounting period beginning from April 1, 2015, we intend to implement Ind AS for the accounting period beginning from April 1, 2018. As there is not yet a significant body of established practice, such as interpretations of Ind AS, on which to draw in forming judgments regarding the Ind AS implementation and application, we have not determined with any degree of certainty the impact the adoption of Ind AS will have on our financial statements. However, we know that the Ind AS will change our methodology for estimating allowances for doubtful debt losses. Ind AS will require us to value our NPAs by reference to their market value (if a ready market for such loans exists) or to calculate the present value of the expected future cash flows realizable from our loans, including the possible liquidation of collateral (discounted at the loan’s effective interest rate) in estimating allowances for doubtful debt losses. This may result in us recognizing higher allowances for doubtful debt losses in the future, which will adversely affect our results of our operations. Accordingly, our financial statements for the period commencing from April 1, 2018 may not be comparable to our historical financial statements and our financial statements for the year ending March 31, 2017 prepared under Indian GAAP may not be comparable to our financial statements for the year ending March 31, 2017 prepared under Ind AS for comparison purposes.

In our transition to Ind AS reporting, we may encounter difficulties in the on-going process of implementing and enhancing our management information systems. Our management may also have to divert significant time and additional resources in order to implement Ind AS on a timely and successful basis. Moreover, there is increasing competition for the small number of Ind AS experienced accounting personnel available as more Indian companies begin to prepare Ind AS financial statements. Therefore, our transition to Ind AS reporting could have an adverse effect on our business and results of operations.

SECTION III – INTRODUCTION

SUMMARY OF OUR INDUSTRY

OVERVIEW OF THE INDIAN ECONOMY

India has emerged as the fastest growing major economy in the world as per the Central Statistics Organisation (CSO) and International Monetary Fund (IMF). The Government of India has forecasted that the Indian economy will grow by 7.1 per cent in FY 2016-17. As per the Economic Survey 2016-17, the Indian economy should grow between 6.75 and 7.5 per cent in FY 2017-18. The improvement in India's economic fundamentals has accelerated in the year 2015 with the combined impact of strong government reforms, Reserve Bank of India's (RBI) inflation focus supported by benign global commodity prices.

India's gross domestic product (GDP) grew by 7 per cent year-on-year in October-December 2016 quarter, which is the strongest among G-20 countries, as per Organisation for Economic Co-operation and Development (OECD) Economic Survey of India, 2017. According to IMF World Economic Outlook Update (January 2017), Indian economy is expected to grow at 7.2 per cent during FY 2016-17 and further accelerate to 7.7 per cent during FY 2017-18.

The Union Budget, 2017-18 deferred the target for the gross fiscal deficit (GFD) to GDP ratio of 3.0 per cent to 2018-19 from 2017-18. Nevertheless, the government remained committed to the spirit of fiscal consolidation as the Centre's GFD is budgeted to decline by 0.3 percentage point to 3.2 per cent in 2017-18 through an increase in non-debt receipts, particularly tax revenues and disinvestment proceeds. This makes room for enhanced budgetary allocation for the farm and rural sectors, social and physical infrastructure, and employment generation. Future fiscal consolidation is contingent upon efficient revenue mobilisation - broadening the tax base; and incentivising digital payments.

Exports of iron & steel products accounted for a market share of around 19.8 per cent, while industrial machinery including electrical machinery accounted for 24.8 per cent.

Cumulative FDI inflows increased to US\$ 28.22 billion in FY16 from US\$ 8.9 billion in FY 10. The government's increasing focus on attracting foreign investors in manufacturing and infrastructure is likely to boost FDI in the sector.

INDUSTRY STRUCTURE

HEAVY ELECTRICAL

(Source: *Engineering and Capital Goods – July 2017- IBEF*)

India Plans to add 75,785 MW in 12th with thermal power capacity addition of about 63,781 MW. During 13th plan a capacity addition of 93,000 MW is planned of which 63,400 MW is due to thermal power, thermal power share is suppressed due to increased share of nuclear and hydro power share. BHEL is the major Indian market leader in boiler manufacturing industry in India with over 60% share in Indian boiler market and installed base of 120,000 MW. Other emerging players are L&T, Siemens, ABB, Doosan Heavy Industries and Crompton Greaves.

THE INDIAN POWER SECTOR OVERVIEW

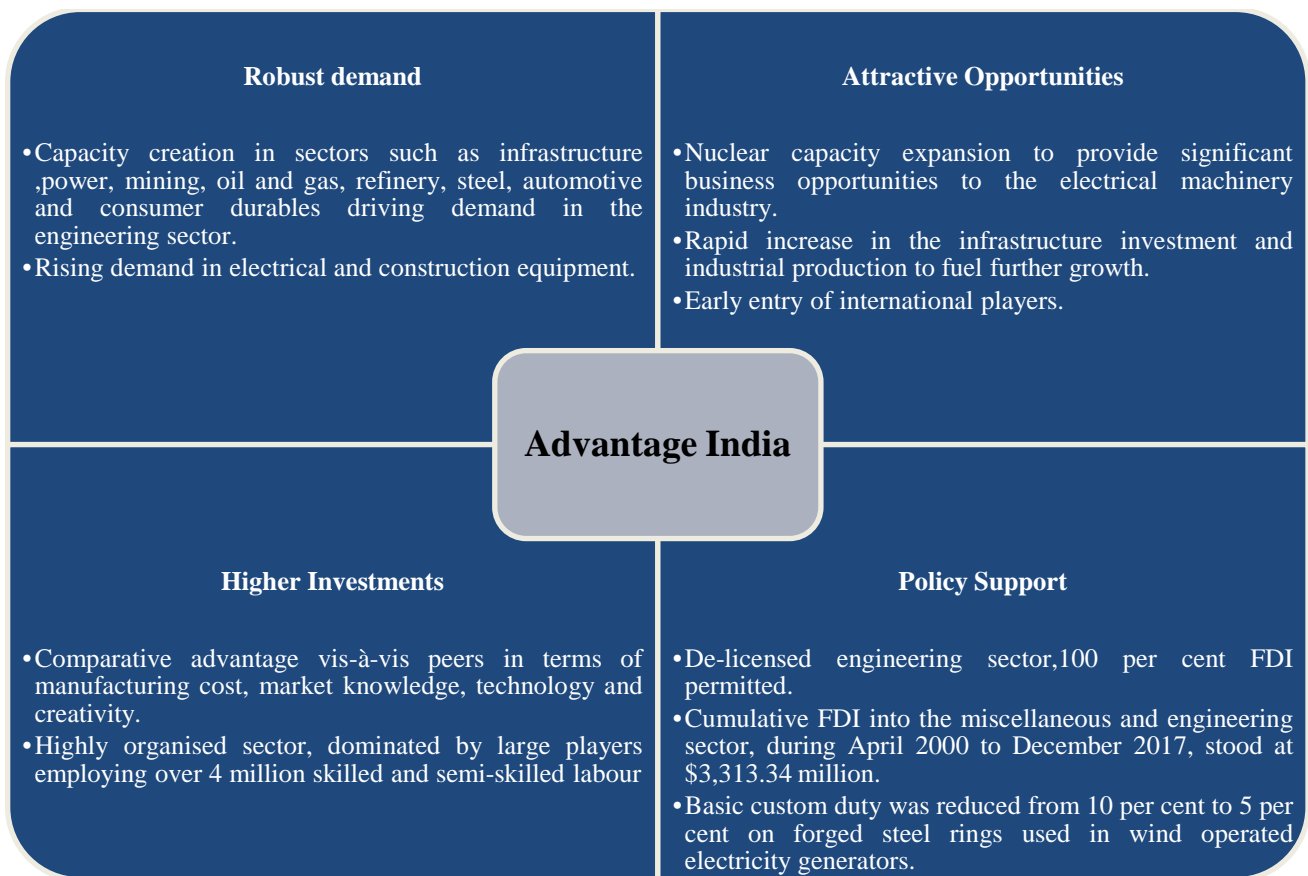

India is the third largest producer and fourth largest consumer of electricity in the world, with the installed power capacity reaching 330.3 GW by June 2017. The country also has the fifth largest installed capacity in the world. As of June 2017, total thermal installed capacity in the country stood at 220.58 GW, while hydro and renewable energy installed capacity totalled to 44.61 GW and 58.3 GW, respectively.

(Source: *Power Report – July 2017 ibef.org*)

Indian power sector is undergoing a significant change that has redefined the industry outlook. Sustained economic growth continues to drive electricity demand in India. The Government of India's focus on attaining 'Power for all' has accelerated capacity addition in the country. At the same time, the competitive intensity is increasing at both the market and supply sides (fuel, logistics, finances, and manpower). Total installed capacity of power stations in India stood at 3,30,260.53 Megawatt (MW) as on May, 2017.

Advantages in Engineering Industry

Government Initiatives

- The Indian engineering sector is of strategic importance to the economy owing to its intense integration with other industry segments. The sector has been de-licensed and enjoys 100 per cent FDI. With the aim to boost the manufacturing sector, the government has relaxed the excise duties on factory gate tax, capital goods, consumer durables and vehicles.
- The Government of India is planning to merge 6 engineering consulting Public Sector Units (PSUs) to create a mega consultancy firm that can take up projects across sectors and compete with the likes of Bechtel of the US and domestic majors like Larsen & Toubro (L&T).
- The Government of India has identified power sector as a key sector of focus so as to promote sustained industrial growth. Some initiatives by the Government of India to boost the Indian power sector:
- The Ministry of Power, Government of India, has taken various measures to achieve its aim of providing 24X7 affordable and environment friendly 'Power for All' by 2019, which includes preparation of state specific action plans, and implementation of Green Energy Corridor for transmission of renewable energy, among other measures.

The Road Ahead

- The engineering sector is a growing market. Spending on engineering services is projected to increase to US\$ 1.1 trillion by 2020.
- The Indian power sector has an investment potential of L 15 trillion (US\$ 225 billion) in the next 4–5 years, thereby providing immense opportunities in power generation, distribution, transmission, and equipment, according to Union Minister Mr. Piyush Goyal.
- The government's immediate goal is to generate two trillion units (kilowatt hours) of energy by 2019. This means doubling the current production capacity to provide 24x7 electricity for residential, industrial, commercial and agriculture use.
- The government has electrified 13,000 villages so far out of the total 18,452 villages and is targeting electrification of all villages by 2019, within the targeted 1,000 days.

-
- The Government of India is taking a number of steps and initiatives like 10-year tax exemption for solar energy projects, etc., in order to achieve India's ambitious renewable energy targets of adding 175 GW of renewable energy, including addition of 100 GW of solar power, by the year 2022. The government has also sought to restart the stalled hydro power projects and increase the wind energy production target to 60 GW by 2022 from the current 20 GW.

Also, the listing of our Equity Shares on the SME Exchange, we believe, would provide liquidity to our shareholders, enhance our visibility and better our brand name.

The Main Objects clause as set out in the Memorandum of Association enables our Company to undertake its existing activities and the activities for which funds are being raised by the Company through the Present Fresh Issue. Further, we confirm that the activities that we have been conducting until now are in accordance with the objects clause of our Memorandum of Association.

Fresh Issue Proceeds & Net Proceeds

The details of the proceeds of the Fresh Issue are set forth in the table below:

(₹ in lakhs)

Particulars	Amount

⁽²⁾ The Issue expenses are estimated expenses and subject to change.

Requirements of Funds and Means of Finance

The fund requirements described below are based on internal management estimates and our Company's current business plan and have not been appraised by any bank, financial institution.

The net proceeds of the Fresh Issue are to be utilized as shown below:

(₹ in lakhs)

Sr. No.	Particulars	Amount
1.	Funding Long Term Working Capital Requirement	1140.41
2.	Expenditure for General Corporate Purposes	[•]
Total		[•]

The entire fund requirements are to be financed from the Net Fresh Issue Proceeds, and there is no requirement to make firm arrangements of finance under Regulation 4(2)(g) of the SEBI Regulations through verifiable means towards at least 75% of the stated means of finance, excluding the amounts to be raised through the Fresh Issue.

The fund requirement and deployment is based on internal management estimates and have not been appraised by any bank or financial institution. Our management, in response to the competitive and dynamic nature of the industry, will have the discretion to revise its business plan from time to time and consequently our funding requirement and deployment of funds may also change. This may, subject to compliance with applicable laws and regulations, also include rescheduling the proposed utilization of Fresh Issue Proceeds and increasing or decreasing expenditure for a particular object *vis-à-vis* the utilization of Fresh Issue Proceeds.

In case of variations in the actual utilization of funds earmarked for the purposes set forth above, increased fund requirements for a particular purpose may be financed by surplus funds, if any, available in respect of the other purposes for which funds are being raised in this Issue. If surplus funds are unavailable or in case of cost overruns, we expect that the shortfall will be met from internal accruals and/or entering into funding arrangements as required. Any variation in the objects of the Fresh Issue shall be undertaken in accordance with the terms of the Companies Act and the rules framed there under.

However, we confirm that except as mentioned below no unsecured / bridge financing has been availed as on date for the above mentioned objects, which is subject to being repaid from the Net Fresh Issue Proceeds.

For further details on the risks involved in our proposed fund utilization as well as executing our business strategies, please see the section titled “*Risk Factors*” beginning on page no. 12 of this Draft Prospectus.

DETAILS OF THE FUND REQUIREMENTS

1. *Funding Long Term Working Capital Requirements:*

Our Company is known for Turnkey contracting projects and providing varied services of installation, commissioning and erection of such structures as per the requirements of the customers. Our Company has a varied product portfolio and a wide scope including manufacturing, supplying, installation, commissioning of Boiler Pressure Parts (such as water wall panels, economiser coils, Super heater coils, Re-heater coils, headers, Bends), Heaters, Technological structures (such as steel columns, girders, beams, piping, ducts) and vessels (such as Steel Tanks with or without pressure) for Power and Engineering Industries. Our Company mainly caters to the needs of undertaking fabrication and erection related works required majorly for Power Plant Construction.

Due to competition in this industry, we cannot always dictate the payment terms with our customers and suppliers. Our current credit period is very considerably high and not uniform for different customers. Further, recent volatility in the global economy and the subsequent volatility of economic activity in India, the market are facing liquidity pressures and if the same were to continue we may not be able to reduce the credit period to our customers substantially in order to reduce our working capital gap. This is one of the major reasons for increase in our working capital requirements.

OVERVIEW OF THE GLOBAL AND INDIAN ECONOMY

Global Scenario

The US economy bounced back strongly in Q3:2016, underpinned by robust consumer spending and continuing improvement in the labour market. GDP growth decelerated sharply in Q4:2016 due to a large slippage in net exports, even though retail sales, consumer confidence and the purchasing manufacturers' index (PMI) suggested sustained momentum. Domestic demand grew (q-o-q) at the fastest pace in almost two years. Consumer confidence reached a 16-year high in March, though retail sales had slowed down in February. The Institute for Supply Management's (ISM) index suggested manufacturing expanded at its fastest pace in three years in February.

In the Euro area, GDP growth accelerated in H2:2016. Relatively low oil prices and sustained employment gains have provided support to household incomes. Improving consumer confidence and the PMI, which rose to a six-year high in March, indicate that activity continued to expand in Q1:2017. Nonetheless, the region remains vulnerable to a number of headwinds such as the formal beginning of the Brexit process, upcoming elections in several constituent countries and tightening of financial conditions.

The Japanese economy continued to recover at a modest pace even as the momentum weakened in H2:2016. Increases in private consumption and fixed investment were moderate, although there was some uptick in exports and industrial production towards end-2016. The manufacturing PMI improved during January and February but moderated again in March 2017.

In the UK, economic growth gained momentum in H2: 2016, notwithstanding the uncertainties surrounding the negotiations relating to Brexit, as exports rose substantially following the weakening of the pound. However, manufacturing growth weakened for two consecutive months in February, indicating the possibility of a slowdown in 2017. (Source: Monetary Policy Report, issued by RBI in April, 2017)

(Source: Monetary Policy Report, issued by RBI in April, 2017)

Global activity is firming broadly as expected. Manufacturing and trade are picking up, confidence is improving, and international financing conditions remain benign. Global growth is projected to strengthen to 2.7 percent in 2017 and 2.9 percent in 2018-19, in line with January forecasts. In emerging market and developing economies (EMDEs), growth is predicted to recover to 4.1 percent in 2017 and reach an average of 4.6 percent in 2018-19, as obstacles to growth in commodity exporters diminish, while activity in commodity importers continues to be robust. Risks to the global outlook remain tilted to the downside. These include increased trade protectionism, elevated economic policy uncertainty, the possibility of financial market disruptions, and, over the longer term, weaker potential growth. A policy priority for EMDEs is to rebuild monetary and fiscal space that could be drawn on were such risks to materialize. Over the longer term, structural policies that support investment and trade are critical to boost productivity and potential growth.

Indian Scenario

India has emerged as the fastest growing major economy in the world as per the Central Statistics Organisation (CSO) and International Monetary Fund (IMF). The Government of India has forecasted that the Indian economy will grow by 7.1 per cent in FY 2016-17. As per the Economic Survey 2016-17, the Indian economy should grow between 6.75 and 7.5 per cent in FY 2017-18. The improvement in India's economic fundamentals has accelerated in the year 2015 with the combined impact of strong government reforms, Reserve Bank of India's (RBI) inflation focus supported by benign global commodity prices.

India's consumer confidence index stood at 136 in the fourth quarter of 2016, topping the global list of countries on the same parameter, as a result of strong consumer sentiment, according to market research agency, Nielsen.

(Source: <https://www.ibef.org/economy/indian-economy-overview>)

India's gross domestic product (GDP) grew by 7 per cent year-on-year in October-December 2016 quarter, which is the strongest among G-20 countries, as per Organisation for Economic Co-operation and Development (OECD) Economic Survey of India, 2017. According to IMF World Economic Outlook Update (January 2017), Indian economy is expected to grow at 7.2 per cent during FY 2016-17 and further accelerate to 7.7 per cent during FY 2017-18.

The Union Budget, 2017-18 deferred the target for the gross fiscal deficit (GFD) to GDP ratio of 3.0 per cent to 2018-19 from 2017-18. Nevertheless, the government remained committed to the spirit of fiscal consolidation as the Centre's GFD is budgeted to decline by 0.3 percentage point to 3.2 per cent in 2017-18 through an increase in non-debt receipts, particularly tax revenues and disinvestment proceeds. This makes room for enhanced budgetary allocation for the farm and rural sectors, social and physical infrastructure, and employment generation. Future fiscal consolidation is contingent upon efficient revenue mobilisation - broadening the tax base; and incentivising digital payments.

GLOBAL OVERVIEW OF ENGINEERING INDUSTRY

The Global Engineering Services industry provides surveys; feasibility and technical studies; geotechnical investigation; and environmental impact studies for transportation, building, energy, industrial, mining and water and sewage industries. Industry revenue increased over the five years to 2017, due to strong investments in infrastructure, building and industrial construction in developing economies across the globe. Over the five years to 2022, stronger global economic growth and construction activity are forecast to help increase industry revenue. However, industry profit is expected to stagnate, as trends in consolidation among the industry's largest players will abate pricing pressures for large-scale construction and development projects.

The Global Engineering Services industry is in the mature phase of its life cycle. IBIS World forecasts that industry value added (IVA), which measures the industry's contribution to GDP, will rise at an annualized rate of 3.4% over the 10 years to 2022. Over the period, global GDP is forecast to rise at an annualized rate of 2.9%. While the industry's growth is marginally ahead of the overall economy, the industry's services are widely accepted by downstream markets.

Furthermore, the industry services a diverse mix, including the public and private sector, construction and maintenance, mining and energy and industrial and transport markets.

INDIAN SCENARIO

The Indian engineering sector is divided into two major segments - heavy engineering and light engineering. The capital goods and engineering turnover in India is expected to reach US\$ 125.4 billion by FY 2016-17. Likewise, Electrical equipment market size is forecast to reach US\$ 100 billion by FY 2021-22. Comparative advantage vis-à-vis peers in terms of manufacturing costs, market knowledge, technology and creativity has been a driving force for engineering exports from India.

During January - May 2016, the industry recorded sales of 21,869 units, which represents a growth of 47.6 per cent over the same period of the previous year. The capital goods & engineering turnover in India is expected to reach US\$ 125.4 billion by FY17.

Exports of iron & steel products accounted for a market share of around 19.8 per cent, while industrial machinery including electrical machinery accounted for 24.8 per cent of the total engineering exports. Exports of iron & steel products accounted for a market share of around 19.8 per cent, while industrial machinery including electrical machinery accounted for 24.8 per cent.

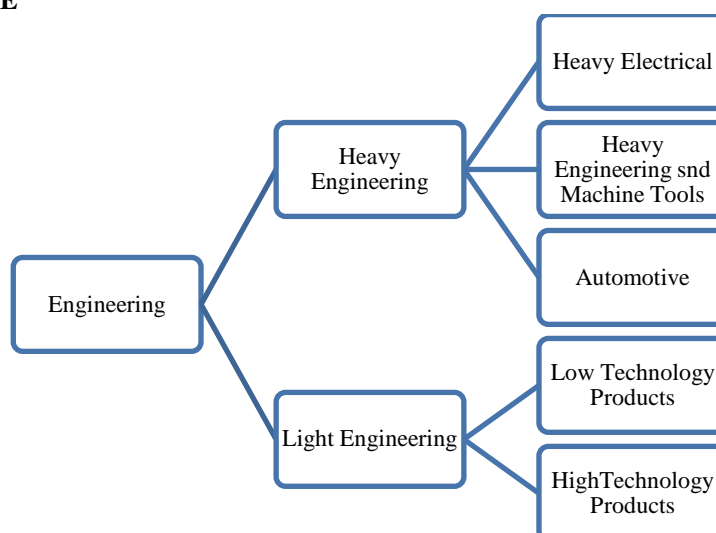

Cumulative FDI inflows increased to US\$ 28.22 billion in FY16 from US\$ 8.9 billion in FY10. The government's increasing focus on attracting foreign investors in manufacturing and infrastructure is likely to boost FDI in the sector.

- Increasing industrialisation and economic development drives growth in the capital goods and engineering market.
- Capital goods and engineering turnover expected to reach US\$ 125.4 billion by FY17 from US\$ 46.18 billion in FY15.
- Growth in the power industry is expected to drive growth in the electrical equipment industry.
- Electrical equipment market size forecasted to reach US\$ 100 billion by FY22 from US\$ 21 billion in FY17.
- Engineering research and design segment revenues to increase fourfold by 2020.
- E R&D revenues projected to reach US\$ 45 billion in FY20 from US\$ 22 billion in FY16.

INDUSTRY STRUCTURE

(Source: Engineering and Capital Goods – July 2017- IBEF)

HEAVY ELECTRICAL

Boilers

- As per the latest data available, the Indian boiler industry has the capability to manufacture boilers with super critical parameters up to 1000 MW unit size.
- The industry's market size was US\$ 2.2 billion in FY 15 and reached US\$ 5.8 billion FY 17 and expected to reach US\$ 11.7 billion in FY 22.

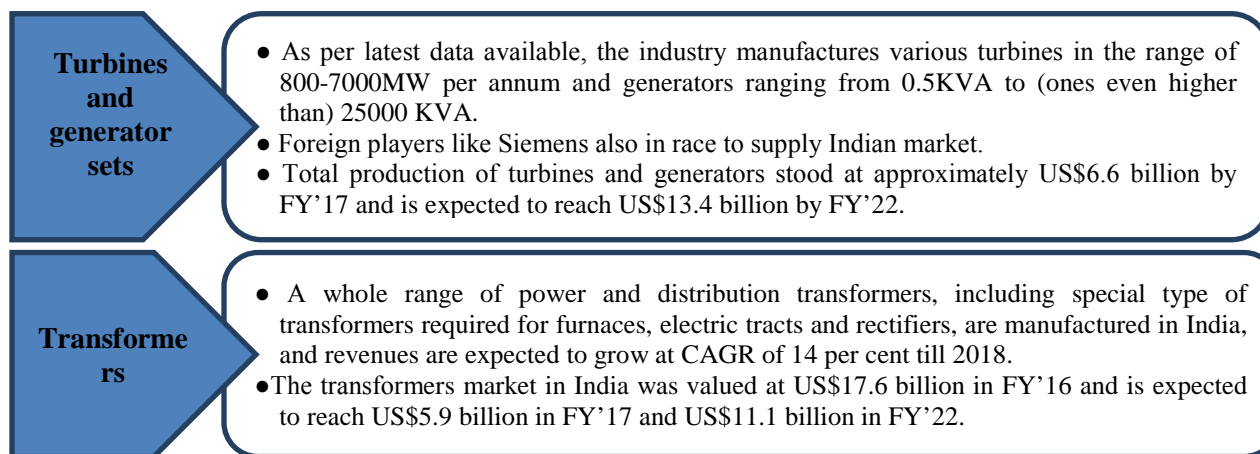

(Source: Engineering and Capital Goods – July 2017- IBEF)

Boiler markets in India have been growing continuously for past few years with a CAGR of 24.53%. While the demand outlook is favourable, the domestic BTG industry is faced with strong competition from original equipment manufacturers (OEMs) based in China, as several private sector players have preferred to import boiler-turbine-generator (BTG) sets from China on the grounds of relatively faster delivery schedule and competitive cost of sourcing.

Given the existing energy deficit and likelihood of continued growth in Energy Requirement in the country power boiler markets have a favourable future outlook. According to 17th Electric Power Survey Report:

- The electrical energy demand for 2016–17 is expected to be at least 1392 Tera Watt Hours, with a peak electric demand of 218 GW
- The electrical energy demand for 2021–22 is expected to be at least 1915 Tera Watt Hours, with a peak electric demand of 298 GW

India Plans to add 75,785 MW in 12th with thermal power capacity addition of about 63,781 MW. During 13th plan a capacity addition of 93,000 MW is planned of which 63,400 MW is due to thermal power, thermal power share is suppressed due to increased share of nuclear and hydro power share. BHEL is the major Indian market leader in boiler manufacturing industry in India with over 60% share in Indian boiler market and installed base of 120,000 MW. Other emerging players are L&T, Simens, ABB, Doosan Heavy Industries and Crompton Greaves.

(Source: Engineering and Capital Goods – July 2017- IBEF)

OPPORTUNITIES

- Planned power capacity addition of around 188,500 MW by 2022 will provide significant opportunities.
- Maximum share of Indian Boilers installed till now are 20 years old. Re- placement or brownfield expansion could provide significant opportunities.

Raw materials are procured from the trusted vendors from the market for the process of manufacturing on the basis of the structure to be manufactured. The procured raw materials go through various testing and inspection process before using it for manufacturing e.g. visual inspection, verification according to the specifications and Material test Certificates duly

approved by the relevant authority/ project specification as per the set parameters. Inspection is to be carried out at our works as per technical specifications provided by all the required authorities as per the approved quality plan. The inspected and approved raw materials are stored in the material yard at our manufacturing facilities.

Raw Material inwards consists of:

- Structural steel in shapes of angles, beams and channels.
- Plates, Steels and Flats
- Carbon and alloy steel pipes and tubes
- Stainless steel tubes and plates
- Fasteners
- Pipe fittings and flanges
- Copper brass aluminium castings, bars and rounds.

Manufacturing Process

As per the required structure, we prepare the actual manufacturing drawings on the basis of the data provided by the customer. The manufacturing drawings are then submitted for approval to the required authorities. As per the study of the drawings and the approvals received, the requirements of material traceability shall be met-out by indicating the material identification. After the approvals, the process of fabrication is commenced. The raw materials go through various processes for the final structure to be fabricated. Various processes include the process of Bending, Drilling, Swaging, Welding, edge preparation etc. These processes are carried out by the machineries installed at our manufacturing units are assisted by automated and semi-automated machineries. These processes are carried on in confirmation to the standards and regulations applicable.

All the products are checked for the specifications and given a finishing touch once the products are as per the approved drawings and specifications. The final products are painted, if required by the customer.

Quality Control

The finished products are inspected on sample basis as per the formats and procedures required. The QA documents are prepared for the purpose of documentation stating that the fabrication and further process is carried out as per approved drawings and specifications. They shall generally conform to IBR in case of IBR approved products. Various processes and subsequent runs are carried to ensure the quality of the products. These runs are done by IBR qualified welders only.

After the confirmation from the customers, approving the product, all NDT process is carried out by qualified personnel as per the required standards. Depending on the varied products, radiography process is carried out. For butt welds done using GTAW process, each complete weld shall be radio graphed from two different directions, 90 degree apart, so as to cover the total weld metal clearly. Further, these radiography records (i.e. films, repair details and evaluation reports) shall be preserved for verification purpose.

Final Inspection and Hydraulic testing is carried out as per the required standards before the products are dispatched. Documents and certificates are verified and Provisional Certificate duly approved by Inspecting Authority is provided to the customer.

Third Party Inspection Agencies (TPIA) are also arranged for checking the quality of the products assuring that the final product are as per the requirement of the customer and are fit to be used in the final structure.

Dispatch

The final products/ materials are to be dispatched only through approved transporter in order to ensure safe and timely delivery of the products. These final products are verified before dispatching it to the customers and a detailed Packing Inspection Report is made and documented in order to maintain the details of the products manufactured. Inspection is carried out at various stages before the product is finally dispatched i.e. inspection before packing, during packaging, during loading etc.

1. Transfer of Property Act, 1882

The transfer of property, including immovable property, between living persons, as opposed to the transfer property by operation of law, is governed by the Transfer of Property Act, 1882 (“**T.P. Act.**”). The T.P. Act establishes the general principles relating to the transfer of property, including among other things, identifying the categories of property that are capable of being transferred, the persons competent to transfer property, the validity of restrictions and conditions imposed on the transfer and the creation of contingent and vested interest in the property. Transfer of property is subject to stamping and registration under the specific statutes enacted for the purposes which have been dealt with hereinafter.

The T.P. Act recognizes, among others, the following forms in which an interest in an immovable property may be transferred:

- **Sale:** The transfer of ownership in property for a price, paid or promised to be paid.
- **Mortgage:** The transfer of an interest in property for the purpose of securing the payment of a loan, existing or future debt, or performance of an engagement which gives rise to a pecuniary liability. The T.P. Act recognises several forms of mortgages over a property.

11. Segment Reporting:

Provisions of Accounting Standard (AS) – 17 issued by the ICAI on 'Segment Reporting' are not been applicable to the Company.

12. Earnings per share (EPS):

The Basic EPS is computed by dividing the net / profit (loss) attributable to the equity shareholders for the year by the weighted average number of equity shares outstanding during the reporting period. Diluted EPS is computed by dividing the net profit / (loss) as adjusted for dividend, interest and other charges to expense or income (net off any attributable taxes) relating to the dilutive potential equity shares by the weighted average number of equity and dilutive equity equivalent shares outstanding during the year, except where the results would be anti-dilutive.

13. Taxation:

- (i) Provision for Current Tax is made after taking into consideration benefits admissible under the provisions of the Income Tax Act, 1961.

- (ii) Deferred tax resulting from the "timing difference" between book and taxable profits is accounted for using the tax rates and laws that have been enacted or substantively enacted as on the balance sheet date. The deferred tax asset is recognized and carried forward only to the extent that there is a reasonable certainty that the assets will be realized in the future.

14. Provisions and Contingencies:

- (i) The Company creates a provision where there is present obligation as a result of a past event that probably requires an outflow of resources and a reliable estimate can be made of the amount of the obligation.
- (ii) A disclosure for a contingent liability is made where there is a possible obligation that may, but probably will not require an outflow of resources.
- (iii) When there is a possible obligation in respect of which the likelihood of outflow of resources is remote, no provision or disclosure is made.

15. There are no Auditor's Qualifications in any of the audited Financial Statements as at and for the years ended as at March 31, 2017, 2016, 2015, 2014 and 2013.

5.6 BASIS OF ALLOCATION

- a) The SEBI ICDR Regulations, 2009 specify the allocation or Allotment that may be made to various categories of Applicants in an Issue depending on compliance with the eligibility conditions. Certain details pertaining to the percentage of Issue size available for allocation to each category is disclosed overleaf of the Bid cum Application Form and in the Prospectus. For details in relation to allocation, the Applicant may refer to the Prospectus.
- b) Under-subscription in any category (except QIB Category) is allowed to be met with spill-over from any other category or combination of categories at the discretion of the Issuer and in consultation with the BRLMs and the Designated Stock Exchange and in accordance with the SEBI ICDR Regulations, 2009. Unsubscribed portion in QIB Category is not available for subscription to other categories.
- c) In case of under subscription in the Issue, spill-over to the extent of such under-subscription may be permitted from the Reserved Portion to the Issue. For allocation in the event of an under-subscription applicable to the Issuer, Applicants may refer to the Prospectus.
- d) Illustration of the Book Building and Price Discovery Process Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue; it also excludes Bidding by Anchor Investors.

Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹ 20 to ₹ 24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Issuer, in consultation with the BRLMs, may finalise the Issue Price at or below such Cut-Off

Price, i.e., at or below ₹ 22.00. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

e) **Alternate Method of Book Building**

In case of FPOs, Issuers may opt for an alternate method of Book Building in which only the Floor Price is specified for the purposes of Bidding (“**Alternate Book Building Process**”).

The Issuer may specify the Floor Price in the Prospectus or advertise the Floor Price at least one Working Day prior to the Bid/ Issue Opening Date. QIBs may Bid at a price higher than the Floor Price and the Allotment to the QIBs is made on a price priority basis. The Bidder with the highest Bid Amount is allotted the number of Equity Shares Bid for and then the second highest Bidder is Allotted Equity Shares and this process continues until all the Equity Shares have been allotted. RIIs, NIIs and Employees are Allotted Equity Shares at the Floor Price and Allotment to these categories of Bidders is made proportionately. If the number of Equity Shares Bid for at a price is more than available quantity then the Allotment may be done on a proportionate basis. Further, the Issuer may place a cap either in terms of number of specified securities or percentage of issued capital of the Issuer that may be Allotted to a single Bidder, decide whether a Bidder be allowed to revise the bid upwards or downwards in terms of price and/or quantity and also decide whether a Bidder be allowed single or multiple bids.

SECTION 6: ISSUE PROCEDURE IN FIXED PRICE ISSUE

Applicants may note that there is no Bid cum Application Form in a Fixed Price Issue. As the Issue Price is mentioned in the Fixed Price Issue therefore on filing of the Prospectus with the RoC, the Application so submitted is considered as the Application Form.

Applicants may only use the specified Application Form for the purpose of making an Application in terms of the Prospectus which may be submitted through the Designated Intermediary.

Applicants may submit an Application Form either in physical form to the any of the Designated Intermediaries or in the electronic form to the SCSB or the Designated Branches of the SCSBs authorising blocking of funds that are available in the bank account specified in the Application Form only (“ASBA Account”). The Application Form is also made available on the websites of the Stock Exchanges at least one day prior to the Bid/Issue Opening Date.

In a fixed price Issue, allocation in the net issue to the public category is made as follows: minimum fifty per cent to Retail Individual Investors; and remaining to (i) individual investors other than Retail Individual Investors; and (ii) other Applicants including corporate bodies or institutions, irrespective of the number of specified securities applied for. The unsubscribed portion in either of the categories specified above may be allocated to the Applicants in the other category.

For details of instructions in relation to the Application Form, Applicants may refer to the relevant section of the GID.

SECTION 7: ALLOTMENT PROCEDURE AND BASIS OF ALLOTMENT

The Allotment of Equity Shares to Applicants other than Retail Individual Investors and Anchor Investors may be on proportionate basis. For Basis of Allotment to Anchor Investors, Applicants may refer to Prospectus. No Retail Individual Investor will be Allotted less than the minimum Bid Lot subject to availability of shares in Retail Individual Investor Category and the remaining available shares, if any will be Allotted on a proportionate basis. The Issuer is required to receive a minimum subscription of 90% of the Issue (excluding any Offer for Sale of specified securities). However, in case the Issue is in the nature of Offer for Sale only, then minimum subscription may not be applicable.

7.1 ALLOTMENT TO RIIs

Bids received from the RIIs at or above the Issue Price may be grouped together to determine the total demand under this category. If the aggregate demand in this category is less than or equal to the Retail Category at or above the Issue Price, full Allotment may be made to the RIIs to the extent of the valid Bids. If the aggregate demand in this category is greater than the allocation to in the Retail Category at or above the Issue Price, then the maximum number of RIIs who can be Allotted the minimum Bid Lot will be computed by dividing the total number of Equity Shares available for Allotment to RIIs by the minimum Bid Lot (“**Maximum RII Allottees**”). The Allotment to the RIIs will then be made in the following manner:

- a) In the event the number of RIIs who have submitted valid Bids in the Issue is equal to or less than Maximum RII Allottees, (i) all such RIIs shall be Allotted the minimum Bid Lot; and (ii) the balance available Equity Shares, if any, remaining in the Retail Category shall be Allotted on a proportionate basis to the RIIs who have received Allotment as per (i) above for the balance demand of the Equity Shares Bid by them (i.e. who have Bid for more than the minimum Bid Lot).
- b) In the event the number of RIIs who have submitted valid Bids in the Issue is more than Maximum RII Allottees, the RIIs (in that category) who will then be Allotted minimum Bid Lot shall be determined on the basis of draw of lots.

7.2 ALLOTMENT TO NIIs

Bids received from NIIs at or above the Issue Price may be grouped together to determine the total demand under this category. The Allotment to all successful NIIs may be made at or above the Issue Price. If the aggregate demand in this category is less than or equal to the Non-Institutional Category at or above the Issue Price, full Allotment may be made to NIIs to the extent of their demand. In case the aggregate demand in this category is greater than the Non-Institutional Category at or above the Issue Price, Allotment may be made on a proportionate basis up to a minimum of the Non-Institutional Category.

7.3 ALLOTMENT TO QIBs

For the Basis of Allotment to Anchor Investors, Applicants may refer to the SEBI ICDR Regulations, 2009 or Prospectus. Bids received from QIBs Bidding in the QIB Category (net of Anchor Portion) at or above the Issue Price may be grouped together to determine the total demand under this category. The QIB Category may be available for Allotment to QIBs who have Bid at a price that is equal to or greater than the Issue Price. Allotment may be undertaken in the following manner:

- a) In the first instance allocation to Mutual Funds for up to 5% of the QIB Category may be determined as follows: (i) In the event that Bids by Mutual Fund exceeds 5% of the QIB Category, allocation to Mutual Funds may be done on a proportionate basis for up to 5% of the QIB Category; (ii) In the event that the aggregate demand from Mutual Funds is less than 5% of the QIB Category then all Mutual Funds may get full Allotment to the extent of valid Bids received above the Issue Price; and (iii) Equity Shares remaining unsubscribed, if any and not allocated to Mutual Funds may be available for Allotment to all QIBs as set out at paragraph 7.4(b) below;
- b) In the second instance, Allotment to all QIBs may be determined as follows: (i) In the event of oversubscription in the QIB Category, all QIBs who have submitted Bids above the Issue Price may be Allotted Equity Shares on a proportionate basis for up to 95% of the QIB Category; (ii) Mutual Funds, who have received allocation as per (a) above, for less than the number of Equity Shares Bid for by them, are eligible to receive Equity Shares on a proportionate basis along with other QIBs; and (iii) Under-subscription below 5% of the QIB Category, if any, from Mutual Funds, may be included for allocation to the remaining QIBs on a proportionate basis.

7.4 ALLOTMENT TO ANCHOR INVESTOR (IF APPLICABLE)

- a) Allocation of Equity Shares to Anchor Investors at the Anchor Investor Issue Price will be at the discretion of the issuer in consultation with the Investor Selling Shareholder and the BRLMs, subject to compliance with the following requirements:
- 1) not more than 60% of the QIB Category will be allocated to Anchor Investors;
 - 2) one-third of the Anchor Investor Portion shall be reserved for domestic Mutual Funds, subject to valid Bids being received from domestic Mutual Funds at or above the price at which allocation is being done to other Anchor Investors; and
 - 3) allocation to Anchor Investors shall be on a discretionary basis and subject to:
 - a maximum number of two Anchor Investors for allocation up to ₹ 10 crores;
 - a minimum number of two Anchor Investors and maximum number of 15 Anchor Investors for allocation of more than ₹ 10 crores and up to ₹ 250 crores subject to minimum Allotment of ₹ 5 crores per such Anchor Investor; and

- b) A physical book is prepared by the Registrar on the basis of the Anchor Investor Application Forms received from Anchor Investors. Based on the physical book and at the discretion of the issuer in consultation with the BRLMs, selected Anchor Investors will be sent a CAN and if required, a revised CAN.
- c) **In the event that the Issue Price is higher than the Anchor Investor Issue Price:** Anchor Investors will be sent a revised CAN within one day of the Pricing Date indicating the number of Equity Shares allocated to such Anchor Investor and the pay-in date for payment of the balance amount. Anchor Investors are then required to pay any additional amounts, being the difference between the Issue Price and the Anchor Investor Issue Price, as indicated in the revised CAN within the pay-in date referred to in the revised CAN. Thereafter, the Allotment Advice will be issued to such Anchor Investors.
- d) **In the event the Issue Price is lower than the Anchor Investor Issue Price:** Anchor Investors who have been Allotted Equity Shares will directly receive Allotment Advice.

7.5 BASIS OF ALLOTMENT FOR QIBs (OTHER THAN ANCHOR INVESTORS), NIIs AND RESERVED CATEGORY IN CASE OF OVER-SUBSCRIBED ISSUE

In the event of the Issue being over-subscribed, the Issuer may finalise the Basis of Allotment in consultation with the Designated Stock Exchange in accordance with the SEBI ICDR Regulations, 2009.

The allocation may be made in marketable lots, on a proportionate basis as explained below:

- a) Bidders may be categorized according to the number of Equity Shares applied for;
- b) The total number of Equity Shares to be Allotted to each category as a whole may be arrived at on a proportionate basis, which is the total number of Equity Shares applied for in that category (number of Bidders in the category multiplied by the number of Equity Shares applied for) multiplied by the inverse of the over-subscription ratio;

-
- c) The number of Equity Shares to be Allotted to the successful Bidders may be arrived at on a proportionate basis, which is total number of Equity Shares applied for by each Bidder in that category multiplied by the inverse of the over-subscription ratio;
 - d) In all Bids where the proportionate Allotment is less than the minimum Bid Lot decided per Bidder, the Allotment may be made as follows: the successful Bidders out of the total Bidders for a category may be determined by a draw of lots in a manner such that the total number of Equity Shares Allotted in that category is equal to the number of Equity Shares calculated in accordance with (b) above; and each successful Bidder may be Allotted a minimum of such Equity Shares equal to the minimum Bid Lot finalised by the Issuer;
 - e) If the proportionate Allotment to a Bidder is a number that is more than the minimum Bid lot but is not a multiple of one (which is the marketable lot), the decimal may be rounded off to the higher whole number if that decimal is 0.5 or higher. If that number is lower than 0.5 it may be rounded off to the lower whole number. Allotment to all Bidders in such categories may be arrived at after such rounding off; and
 - f) If the Equity Shares allocated on a proportionate basis to any category are more than the Equity Shares Allotted to the Bidders in that category, the remaining Equity Shares available for Allotment may be first adjusted against any other category, where the Allotted Equity Shares are not sufficient for proportionate Allotment to the successful Bidders in that category. The balance Equity Shares, if any, remaining after such adjustment may be added to the category comprising Bidders applying for minimum number of Equity Shares.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are FIPB and the RBI.

The Government has from time to time made policy pronouncements on FDI through press notes and press releases. The Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (“DIPP”), issued consolidated FDI Policy, which with effect from August 28, 2017 consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DIPP that were in force and effect as on August 27, 2017. The Government proposes to update the consolidated circular on FDI Policy once every year and therefore, the Consolidation FDI Policy will be valid until the DIPP issues an updated circular.

The transfer of shares by an Indian resident to a Non-Resident does not require the prior approval of the FIPB or the RBI, provided that (i) the activities of the investee company are under the automatic route under the Consolidated FDI Policy and transfer does not attract the provisions of the SEBI (Substantial Acquisition of Shares and Takeovers) Regulations, 2011; (ii) the non-resident shareholding is within the sectorial limits under the Consolidated FDI Policy; and (iii) the pricing is in accordance with the guidelines prescribed by SEBI/RBI.

As per the existing policy of the Government of India, OCBs cannot participate in this Issue.

The Equity Shares offered in the Issue have not been and will not be registered under the Securities Act, and may not be offered or sold within the United States, except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the Securities Act and applicable U.S. state securities laws. Accordingly, the Equity Shares are being offered and sold (i) within the United States to persons reasonably believed to be “qualified institutional investors” (as defined in Rule 144A under the Securities Act) pursuant to Rule 144A under the Securities Act or other applicable exemption under the Securities Act and (ii) outside the United States in offshore transactions in reliance on Regulation S under the Securities Act and the applicable laws of the jurisdictions where such offers and sales occur.

The above information is given for the benefit of the Applicants. Our Company, the Selling Shareholders and the LM are not liable for any amendments or modification or changes in applicable laws or regulations, which may occur after the date of the Prospectus.
