- The trademarks relating to brand “Super Shakti” which are currently being used by our Company are not registered in its own name. Our Company is currently using certain trademarks which belong to our Group Company, Super Smelters Limited. There is no assurance that our Company will be able to continue to use the trademarks relating to brand “Super Shakti” in future to sell its products. Any failure to protect the Company’s interest in the intellectual property may adversely affect its reputation, goodwill and business operations.***

Our Group Company, Super Smelters Limited (“SSL”) has applied for and obtained registrations of certain trademarks relating to brand “Super Shakti” under classes 6 and 14. Please refer to the chapter “**Government and Other Key Approvals**” on page 182 of this Draft Prospectus for more details. In terms of Scheme of Arrangement for demerger of “Durgapur Unit” of Super Smelters Limited to and in Supershakti Metaliks Private Limited and de-merger of “Koderma Unit” of Super Smelters Limited to and in Sai Electrocasting Private Limited (“Scheme”), as approved by Hon’ble High Court of Calcutta through by and under an Order dated June 14, 2016 *inter-alia* all trademarks and other intellectual property rights, registrations and no objection certificates obtained by SSL for the operation of Durgapur Unit and/or to which SSL is entitled to in relation to the Durgapur Unit shall be available to vest in the Company post demerger and accordingly the Company shall also be entitled to enjoy the benefits of all such entitlements licences, permissions, approvals, clearances, authorisations, consents, intellectual property rights, registrations and no-objection certificates obtained by SSL for the operations of Durgapur Unit. Also pursuant to the Scheme, all trademarks and other intellectual property rights, registrations and no objection

certificates obtained by SSL for the operation of Koderma Unit and/or to which SSL is entitled to in relation to the Koderma Unit shall be available to vest in Sai Electrocasting Private Limited (“SEPL”) post demerger and accordingly SEPL shall also be entitled to enjoy the benefits of all such entitlements licences, permissions, approvals, clearances, authorisations, consents, intellectual property rights, registrations and no-objection certificates obtained by SSL for the operations of Koderma Unit. Subsequently, vide a Memorandum of Understanding dated November 1, 2017 (“MOU”) executed between SSL, the Company (erstwhile as Supershakti Metaliks Private Limited) and SEPL, the parties thereto have *inter-alia* agreed that SSL, the Company and SEPL are entitled to use brand ‘Super Shakti’ for selling their Products.

The Company has not been registered as “Registered User” under the Trademarks Act, 1999, with respect to the trademarks relating to brand “Super Shakti” which has been registered in the name of our Group Company, SSL. In the event, SSL repudiates the aforementioned MOU; there is no assurance that the Company will be able to continue to make use of trademarks relating to brand “Super Shakti” in future to sell its products. This may lead to litigations and any such litigations could be time consuming and costly and their outcome cannot be guaranteed. In such a case protection of the trademark may be difficult and we may be a party to litigation for infringement. Further, there is no assurance that third parties would not infringe upon our intellectual property or any order restraining or prohibiting us from using the trademark, shall adversely affect our business prospects, reputation and goodwill. The Company cannot prohibit the use of such trademark by third parties by means of statutory protection. In addition, we may not be able to detect any unauthorized use or take appropriate and timely steps to protect our intellectual property rights. Our inability to protect the same could adversely affect our business. We cannot provide any assurance that third parties will not infringe upon our trademark, trade names, logos or brand names and thereby cause damage to our business prospects, reputation or goodwill.

Further as part of our arrangements we are also sharing the advertisements or branding expenses with these two group companies for the “Super Shakti” brand. Our inability if any to ensure arms length relationship w.r.t these arrangements could affect our results of operations.

3. *The steel industry is highly cyclical and volatility in steel prices may have an adverse effect on the Company’s results of operations and financial condition.*

The industry in which we operate is highly cyclical. Steel prices fluctuate based on macroeconomic factors, including, amongst others, consumer confidence, employment rates, interest rates and inflation rates, general levels of infrastructure activities in the region of sale etc. We aim to grow our business in a sustainable manner with a vision to create quality conscious customers and give them value for their money accompanied by technological drive. However, due to the nature of our industry we cannot ascertain the consistency of our profitability and heavy volatility in steel prices may have an adverse effect on the Company’s results of operations and financial condition.

4. *We do not own any of our properties which are used by us currently.*

We do not own any of the premises from where we operate. We have our Registered Office at 39, Shakespeare Sarani, 3rd Floor, Kolkata – 700017, West Bengal. We have taken the said office on rent from Sai Highrise Private Limited on a monthly rental basis. This premise is being shared by certain other entities, including our Group Companies. Any material adverse development with respect to such companies or firms could materially affect our goodwill and financial condition in the future. Further, our manufacturing facility at Kanjilal Avenue, Opp: DPL Zone, “B” Substation, Durgapur-713210 is taken on lease from Government of West Bengal. The said lease agreement is from August 28, 1997 to August 27, 2057.

Further, the rental agreement is renewable based on the terms of the agreement. Periodic renewals of short-term rental agreement may increase our costs, since they are subject to rent escalation. Further, if we are required to relocate our registered office as a result of any termination or non-renewal of our rental, we may incur additional cost as a result of such relocation. If we are unable to renew the agreements pursuant to

which we occupy the premises on terms and conditions acceptable to us, or at all, we may have to relocate to other places.

Any failure or difficulty faced by us in renewing the rental agreement may affect our business and its prospects. For further details of our Properties, please refer to section titled “Our Business” beginning on Page No. 88 of this Draft Prospectus.

5. ***We require certain approvals and licenses in the ordinary course of business and are required to comply with certain rules and regulations to operate our business, and the failure to obtain, retain and renew such approvals and licenses or comply with such rules and regulations, and the failure to obtain or retain them in a timely manner or at all may adversely affect our operations.***

We require several statutory and regulatory permits, licenses and approvals to operate our business, some of which our Company has either received or applied for fresh registration or renewal. Many of these approvals are granted for fixed periods of time and need renewal from time to time. Non-renewal of the said permits and licenses would adversely affect our Company’s operations, thereby having a material adverse effect on our business, results of operations and financial condition. There can be no assurance that the relevant authorities will issue any of such permits or approvals in the time-frame anticipated by us or at all. Our Company has made applications to obtain the below mentioned approvals and the same are currently pending approval: (i) Registration under the West Bengal Shops and Establishment Rules, 1964 for its Registered Office 39, Shakespeare Sarani, 3rd Floor, Kolkata – 700017, West Bengal; (ii) Renewal of Certificate of Enlistment for the period April 1, 2018 to March 31, 2019 for the premises situated at Kanjilal Avenue, opp. DPL Zone “B” Substation, Durgapur – 713210; and (iii) Certificate of Enlistment under Kolkata Municipal Corporation Act, 1980 for its Registered Office 39, Shakespeare Sarani, 3rd Floor, Kolkata – 700017, West Bengal for the year 2018-19. Further, some of our permits, licenses and approvals are subject to several conditions and we cannot provide any assurance that we will be able to continuously meet such conditions or be able to prove compliance with such conditions to the statutory authorities, which may lead to the cancellation, revocation or suspension of relevant permits, licenses or approvals. Any failure by us to apply in time, to renew, maintain or obtain the required permits, licenses or approvals, or the cancellation, suspension or revocation of any of the permits, licenses or approvals may result in the interruption of our operations and may have a material adverse effect on the business. If we fail to comply with all applicable regulations or if the regulations governing our business or their implementation change, we may incur increased costs, be subject to penalties or suffer a disruption in our business activities, any of which could adversely affect our results of operations. For further details, please see chapters titled “Key Industry Regulations and Policies” and “Government and Other Statutory Approvals” at pages 101 and 182 respectively of this Draft Prospectus.

6. ***Any disruption in our manufacturing facility located at Kanjilal Avenue, Opp. DPL Zone, “B” Substation, Durgapur - 713210 could hamper or delay our ability to continue production and servicing.***

We manufacture our products from our manufacturing facility situated at Kanjilal Avenue, Opp. DPL Zone, “B” Substation, Durgapur - 713210. Any disruption in the operations due to supply of power, fire outages or industrial accidents at this unit could hamper or delay our ability to continue production. Any disruption or suspension in the production process in this facility can significantly impact our ability to service customer needs and relation with our customers and have a material adverse effect on our business, revenues, reputation, results of operation and financial condition.

7. ***Substantial portion of our revenues has been dependent upon our few clients. The loss of any one or more of our major clients would have a material effect on our business operations and profitability.***

For the year ending March 31, 2018, our top ten clients accounted for approximately 49.42% of our revenue from operations. The loss of any significant client would have a material effect on our financial results. We cannot assure you that we can maintain the historical levels of business from these clients/distributors or that we will be able to replace these clients/distributors in case we lose any of them. Furthermore, major events affecting our clients, such as changes in government policies and bankruptcy, change of management, mergers and acquisitions in other cases could impact our business. If any of our major clients becomes bankrupt or insolvent, we may lose some or all of our business from that client and our receivable from that client would increase and may have to be written off, impacting our income and financial condition.

8. Our Company may have potential Conflicts of interest with our Group Companies as they have been authorized and engaged in similar line of business.

Our company is a primarily the result of a demerger process executed by our flagship group company – Super Smelters Ltd (“SSL”). In effect our company represents the demerged Durgapur Unit of SSL and our second group company Sai Electrocoating Private Limited (“SEPL”) is the Koderma Unit.

Our group companies – SSL and SEPL also manufacture steel products which may create a potential conflict of interest and which in turn, may have an implication on our operations and profits. Currently our core end products are different wherein we are focused on manufacturing Wire Rods and HB Wires which none of these two companies currently manufacture. However there is no legal “non-compete” agreement between us and our group companies and hence there does exist a potential conflict of interest between our company and its group companies in the future.

Further, our company undertakes business activities with our group companies (wherein we purchase one of our key raw material sponge iron from SSL and also sale certain minor quantity of basic billets to SSL from time to time). We try to ensure that all these transactions are carried out at an arms-length. However, we cannot be assured that we shall be able to adopt necessary measures for mitigating any conflicts arising out the above arrangements in the future.

For further details, please refer to the chapters titled ‘Our Business’, ‘Our Group Companies’, beginning on page nos. 88, 135 respectively and ‘Annexure XXIX - Statement of Related Party Transactions’ on page no. 161 of this Draft Prospectus.

9. Our Promoters and Non Executive Directors Mr. Dilipp Agarwal and Mr. Deepak Agarwal control our Group Companies and our Promoter Group Entities and any default made by the Promoter Group Entities will also impact our Company.

Our Promoters Mr. Dilipp Agarwal and Mr. Deepak Agarwal are also Directors / Promoters of entities forming part of our Promoter Group there may be situations in which they are unable to allocate sufficient time to our Company or effectively participate in the management of our Company, which could have a material adverse effect on our business.

Further, any defaults or negative incident involving these Companies may impact the Goodwill or fund raising capabilities of our Company which could have a material adverse effect on our business operations and financial conditions.

10. Our Company has reported certain negative cash flows in the past, details of which are given below. Sustained negative cash flow could impact our growth and business in the future.

Our Company had reported certain negative cash flows in the previous years as per the restated financial statements and the same are summarized as under:

(₹ in lakhs)

Particulars	For the year ended March 31,				
	2018	2017	2016	2015	2014
Cash flow from Operating Activities	4,331.62	(279.06)	2,320.91	(0.12)	(0.12)
Cash flow from Investing Activities	(7.17)	(292.88)	(1095.59)	-	-
Cash flow from Financing Activities	(3,427.85)	508.69	(1,651.11)	-	-

For details, please refer “Management’s Discussion and Analysis of Financial Conditions and Results of Operations” on page no. 164 of this Draft Prospectus.

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. If our Company is not able to generate sufficient cash flows, it may adversely affect our business and financial operations.

11. *Our success depends heavily upon our Promoters and Senior Management for their continuing services, strategic guidance and financial support.*

Our promoters have been the main guiding force behind the growth and business strategy of our Company. They have vast experience of steel industry and have been instrumental in the consistent growth of our Company's performance. They are actively involved in day to day business administration and marketing of the Company. Our success depends heavily upon our Promoters and Senior Management for their continuing services, strategic guidance and financial support.

12. *Our Company's manufacturing activities are labour intensive and depend on availability of skilled and unskilled labourers in large numbers. In case of unavailability of such labourers and / or inability to retain such personnel, our business operations could be affected.*

Our Company has employed 376 employees as on March 31, 2018 on our payroll. The above includes employees in the Top and middle management (including Executive Director), and also employees who are part of manufacturing unit and office staff. We also engage contract labourers to facilitate our processing operations. Our operations and performance are labour intensive and depends on our ability to identify, attract and retain both skilled and unskilled labour. In case such labour is unavailable or we are unable to identify and retain such labourers, our business could be adversely affected.

Further, there might be instances where we will need to hire additional contract labour, either for specialized jobs or during periods of high customer orders. We have not entered into any agreement for hiring additional labourers and thus availability of appropriately skilled labour cannot be guaranteed. Any failure to hire the appropriate labour may impact the operations and impair our client relations.

13. *The funds proposed to be utilised for general corporate purposes may constitute [•] of the Fresh Issue Proceeds*

The Company intends to use the Fresh Issue Proceeds for the purposes described in the section titled "Objects of the Issue" on the page no. 66 of this Draft Prospectus. Our Company upon finalisation of the price may utilise an amount constituting [•] of the Fresh Issue Proceeds towards general corporate purposes. The Objects for which we will be using this amount shall include capital expenditure for the various operations of our Company, strategic initiatives, meeting exigencies and approved penalties, brand building exercises or any other purposes as approved by our Board. As of date, our Board has not yet authorized any specific commitments or acts, with respect to utilisation of the portion of the Fresh Issue Proceeds which will be used for the general corporate purposes.

14. *Orders placed by customers may be delayed, modified, cancelled or not fully paid for by our customers, which may have an adverse effect on our business, financial condition and results of operations*

We may encounter problems in executing the orders in relation to our products, or executing it on a timely basis. Moreover, factors beyond our control or the control of our customers, including delays or failure to obtain necessary permits, authorizations, permissions and other types of difficulties or obstructions, may result in the postponement of the delivery of products or cause its cancellation. Further, since we do not execute contracts with our customers, the order could be cancelled or there could be changes in scope and / or scheduled delivery of the products. Accordingly, it is difficult to predict with certainty if, when, and to what extent we may be able to deliver the orders placed. Failure to deliver products on time could lead to customers delaying or refusing to pay the amount, in part or full, which may adversely affect our business

In addition, even where a delivery proceeds as scheduled, it is possible that the contracting parties may default or otherwise fail to pay amounts owed. While we have not yet experienced any material delay, reduction in scope, cancellation, execution difficulty, delay or default in payment with regard to the orders placed with us, or any material disputes with customers in respect of any of the foregoing, any such adverse event in the future could materially harm our cash flow position and income. Any delay, modification, cancellation of order by our large customers may have material adverse effect on our financial condition and results of operations.

15. *Our funding requirements and deployment of the issue proceeds are based on management estimates and actual cost may vary compared with the estimated amount.*

Our funding requirement and deployment of the proceeds of the issue are based on management estimates and our current business plan. The fund requirements and intended use of proceeds have not been appraised by banks or financial institutions and are based on our estimates. In view of the highly competitive nature of the industry in which we operate, we may have to revise our management estimates from time to time and, consequently, our funding requirements may also change as a result of various factors which may not be within the control of our management. This may entail rescheduling, revising or cancelling the planned expenditure and fund requirement and increasing or decreasing the working capital limits maintained from time to time at the discretion of our board. In addition, schedule of implementation as described herein are based on management's current expectations and our subject to change due to various factors some of which may not be in our control. The deployment of the funds towards the objects of the issue is entirely at the discretion of the Board of Directors and is not subject to monitoring by external independent agency. However, the deployment of funds is subject to monitoring by our Audit Committee.

16. *The deployment of the Net Proceeds from the Fresh Issue are based on management estimates and have not been independently appraised by any bank or financial institution and is not subject to any monitoring by any independent agency and our Company's management will have flexibility in utilizing the Net Proceeds from the Fresh Issue.*

Our Company intends to primarily use the Net Proceeds from the Fresh Issue towards working capital as described in "Objects of the Issue" on page no. 66 of this Draft Prospectus. In terms of Regulation 16 of the SEBI (ICDR) Regulations, we are not required to appoint a monitoring agency since the Fresh Issue size is not in excess of ₹100 crores. The management of our Company will have discretion to use the Net Proceeds from the Fresh Issue, and investors will be relying on the judgment of our Company's management regarding the application of the Net Proceeds from the Fresh Issue. Our Company may have to revise its management estimates from time to time and consequently its requirements may change. Additionally, various risks and uncertainties, including those set forth in this section "Risk Factors", may limit or delay our Company's efforts to use the Net Proceeds from the Fresh Issue to achieve profitable growth in its business.

Further, pursuant to Section 27 of the Companies Act 2013, any variation in the objects would require a special resolution of the Shareholders and would be required to provide an exit opportunity to the shareholders who do not agree with our proposal to change the objects of the Issue, at a price and manner as specified in Chapter VI-A of the SEBI ICDR Regulations pursuant to the SEBI ICDR (Second Amendment) Regulations, 2016 dated February 17, 2016. Additionally, the requirement on Promoters or controlling shareholders to provide an exit opportunity to such dissenting shareholders may deter the Promoters or controlling shareholders from agreeing to the variation of the proposed utilization of our Net Proceeds, even if such variation is in our interest. Further, we cannot assure you that our Promoters or the controlling shareholders will have adequate resources at their disposal at all times to enable them to provide an exit opportunity at the price which may be prescribed by SEBI.

Accordingly, prospective investors in the Issue will need to rely upon our management's judgment with respect to the use of Net Proceeds. If we are unable to enter into arrangements for utilization of Net proceeds as expected and assumed by us in a timely manner or at all, we may not be able to derive the expected benefits from the proceeds of the Issue and our business and financial results may suffer.

17. *Our insurance coverage may not adequately protect us against all material hazards, which may adversely affect our business, results of operations and financial condition.*

Our business and assets could suffer damage from fire, natural calamities, misappropriation or other causes, resulting in losses, which may not be fully compensated by insurance. There can be no assurance that the terms of our insurance policies will be adequate to cover any damage or loss suffered by our Company or that such coverage will continue to be available on reasonable terms or will be available in sufficient amounts to cover one or more large claims, or that the insurer will not disclaim coverage as to any future claim.

Further, our Company is required to renew these insurance policies from time to time and in the event, we fail to renew the insurance policies within the time period prescribed in the respective insurance policies or not obtain at all, our Company may face significant uninsured losses. If our Company suffers a large uninsured loss or if any insured loss suffered, significantly exceeds our insurance coverage, our business, financial condition and results of operations may be adversely affected.

18. We face competition in our business from organized and unorganized players, which may adversely affect our business operation and financial condition.

We may have to confront pressures in respect of pricing; product quality etc. from the clients and such pressures may put strain on our profit margins which may consequently affect the financial position of our Company. Competition emerges not only from the organized sector but also from the unorganized sector and from both small and big players. Our Competitiveness is also measured by the technology we adopt as our industry is rapidly growing in India. Our inability to compete with this intense competition; will have material adverse impact on our Company's financial position.

19. Contingent liabilities could adversely affect our financial condition. Crystallization of any of these contingent liabilities may adversely affect our financial condition.

As of March 31, 2018, our contingent liabilities as indicated in our Restated Financial Statements and also certified by our statutory auditors were as follows:

(₹. In Lakhs)

Particulars	As at March 31,				
	2018	2017	2016	2015	2014
Bank Guarantees	126.75	-	-	-	-
Outstanding letter of credit	997.17	673.00	828.31	-	-

- Others	91.51	-	-	-	-
Total	1,604.00	677.43	854.30	-	-

Any default in payment under such arrangement may have an adverse effect and may result into difficulty in arranging of funds for re-payment and may also adversely affect our operations and financials.

In the event that any of our contingent liabilities materialize, our business, financial condition and results of operations may be adversely affected. Furthermore, there can be no assurance that we will not incur similar or increased levels of contingent liabilities in the current fiscal year or in the future. For further information, please refer "Annexure XXV – Schedule of Contingent Liabilities, As Restated" under Restated Financial Statement Report starting on page no. 141 of this Draft Prospectus.

20. Our Company generally does business with our customers on purchase order basis and we have not entered into long term contracts with any of them.

Our business is dependent on our continuing relationships with our customers. Our Company neither has any long-term contract with any of customers or distributors. Any change in the buying pattern of our customers or distributors from us can adversely affect the business of our Company. Further, our inability to add new buyers to our sales portfolio may hamper growth of our business and profitability. The loss of or interruption of work by, a significant customer or a number of significant customers or the inability to procure new orders on a regular basis or at all may have an adverse effect on our revenues, cash flows and operations.

21. Our Company has entered into certain related party transactions in the past and may continue to do so in the future, which may potentially involve conflicts of interest with the equity shareholders.

Our Company has entered into certain transactions with our related parties including our Promoter, Promoter Group, Directors and their relatives. While we believe that all such transactions have been

conducted on the arm's length basis, we cannot assure you that we might have obtained more favorable terms had such transactions been entered into with unrelated parties.

Furthermore, it is likely that we may enter into related party transactions in the future. We cannot assure you that such transactions, individually or in the aggregate, will always be in the best interests of our minority shareholders and will not have an adverse effect on our business, results of operations, cash flows and financial condition. For details, please refer "*Financial Statements – Related Party Transactions*" on page no. 161 of this Draft Prospectus.

- 22. *We are dependent on third party transportation providers for the delivery of our raw material and products. Accordingly, continuing increases in transportation costs or unavailability of transportation services for them, as well the extent and reliability of Indian infrastructure may have an adverse effect on our business, financial condition, results of operations and prospects***

We use third party transportation providers for the delivery of our raw material and products. Transportation strikes could have an adverse effect on our receipt of raw materials and our ability to deliver our products to our customers. In addition, transportation costs in India have been steadily increasing over the past several years. Continuing increases in transportation costs or unavailability of transportation services for our products may have an adverse effect on our business, financial condition, results of operations and prospects.

In addition, India's physical infrastructure is less developed than that of many developed nations, and problems with its road networks, electricity grid, communication systems or any other public facility could disrupt our normal business activity, including our supply of raw materials and the delivery of our products to customers by third-party transportation providers. Any deterioration of India's physical infrastructure would harm the national economy, disrupt the transportation of goods and supplies, and add costs to doing business in India. These problems could interrupt our business operations, which could have a material adverse effect on our results of operations and financial condition.

- 23. *Our success largely depends on our ability to attract and retain our Key Managerial Personnel. Any loss of our Key Managerial Personnel could adversely affect our business, operations and financial condition.***

Our Company is depending significantly on the expertise, experience, and continued efforts of our Key Managerial Personnel. If one or more members of our Key Managerial Personnel are unable or unwilling to continue in his/her present position, it may be difficult to find a replacement, and business might thereby be adversely affected. Our industry requires personnel with specific technical knowledge and experience.

Competition for Key Managerial Personnel in our industry is intense and it is possible that our Company may not be able to retain existing Key Managerial Personnel or may fail to attract/ retain new employees at equivalent positions in the future. As such, loss of Key Managerial Personnel could adversely affect our business, results of operations and financial condition. For further details on the key managerial personnel of our Company, please refer to the chapter titled "*Our Management*" beginning on page no. 115 of this Draft Prospectus.

- 24. *Our Group Companies, Super Smelters Limited and Sai Electrocasting Private Limited has incurred losses in previous financial years.***

Our Group Companies have incurred losses during some of the previous financial years preceding the current financial year. Our Group Company, Super Smelters Limited has recorded a loss of ₹ 2,825.92 lakhs in the financial year 2016-17 and our Group Company Sai Electrocasting Private Limited has recorded a loss of ₹ 0.15 lakhs in the financial year 2014-15.

- 25. *Our Company, if not able to manage our growth or to successfully implement our business plan, could have an effect on our business, results of operations and financial condition.***

The success of our business will depend greatly on our ability to effectively implement our business and growth strategy. Our growth strategy involves focusing on Optimal Utilization of Resources and to develop relationships with customer and suppliers. For further details, see the section titled "*Our Business – Our*

Strategies” on page no. 90 of this Draft Prospectus. Our success in implementing our growth strategies may be affected by:

- Our ability to identify new markets to expand;
- Our ability to maintain the quality of our products;
- Changes in the Indian regulatory environment in field

If our Company is not able to execute our strategy on time and within our estimated budget, or that our expansion and development plans will increase our profitability. Any of these factors could impact our results of operations. Further, we expect our growth strategy to place significant demands on our management, financial and other resources and require us to continue developing and improving our operational, financial and other internal controls. Our inability to manage our business and implement our growth strategy could have an effect on our business, financial condition and profitability.

26. *Our operations are prone to fire and could expose us to the risk of liabilities, lost revenues and increased expenses.*

Our operations are subject to fire hazards associated with the large scale processing of steel in high temperature and other processes. This hazard can cause personal injury and loss of life, severe damage to and destruction of property and equipment, and environmental damage, and may result in the suspension of operations and the imposition of civil and criminal liabilities.

There may be additional claims of injury by employees or members of the public due to fire, or alleged exposure to the fire in the future. Liabilities incurred as a result of these events may materially impact our financial position. We maintain Fire insurance against these liabilities, but the insurance proceeds may not be adequate to fully cover the substantial liabilities, lost revenues or increased expenses that we might incur.

27. *Our Company might be unable to meet certain delivery obligations including timelines of delivery, due to which, it could become liable to claims by customers, suffer adverse publicity and incur substantial costs, which in turn could adversely affect our results of operations.*

Many of our orders involve providing services that are critical to the operations of our customers business. Any failure or defect in services could result in a claim against us for substantial damages, regardless of our responsibility for such a failure or defect. Our Company has commitments for safe and timely delivery of the cargo. Any failure to meet the scheduled timelines set by our customers or loss or damage to cargo may lead to our customers raising claims against us.

Although Our Company is attempting to limit its contractual liability for all the damages, including consequential damages, while rendering the services, our Company cannot be assured that the limitations on liability it provides for, in the service contracts will be enforceable in all cases.

28. *Our Promoters and Promoter Group has extended personal guarantees in connection with certain of our debt facilities. There can be no assurance that such personal guarantees will be continued to be provided by our Promoters in the future or can be called at any time, affecting the financial.*

Our Promoters have provided personal guarantees for our borrowings to secure our loans. If any of these guarantees are revoked, our lenders may require alternative guarantees or collateral or cancellation of such facilities, entailing repayment of amounts outstanding under such facilities. If we are unable to procure alternative guarantees satisfactory to our lenders, we may need to seek alternative sources of capital, which may not be available to us at commercially reasonable terms or at all, or to agree to more onerous terms under our financing agreements, which may limit our operational flexibility. Accordingly, our business, financial condition, results of operations, cash flows and prospects may be adversely affected by the revocation of all or any of the personal guarantees provided by our Promoters in connection with our Company’s borrowings.

29. *Our Promoters and Promoter Group will continue to retain majority shareholding in us after the Issue, which will allow them to exercise significant influence over us and potentially create conflicts of interest.*

Our Promoter and Promoter Group may beneficially own approximately 72.23% of our post-Issue equity share capital. As a result, the Promoter Group may have the ability to control our business including matters relating to any sale of all or substantially all of our assets, the timing and distribution of dividends and the election or termination of appointment of our officers and directors. This control could delay, defer or prevent a change in control of the Company, impede a merger, consolidation, takeover or other business combination involving the Company, or discourage a potential acquirer from making a tender offer or otherwise attempting to obtain control of the Company even if it is in the Company's best interest. In addition, for so long as the Promoter Group continues to exercise significant control over the Company, they may influence the material policies of the Company in a manner that could conflict with the interests of our other shareholders. The Promoter Group may have interests that are adverse to the interests of our other shareholders and may take positions with which our other shareholders do not agree.

30. *Employee misconduct, errors or fraud could expose us to business risks or losses that could adversely affect our business prospects, results of operations and financial condition.*

Employee misconduct, errors or frauds could expose us to business risks or losses, including regulatory sanctions, penalties and serious harm to our reputation. Such employee misconduct includes breach in security requirements, misappropriation of funds, hiding unauthorized activities, failure to observe our stringent operational standards and processes, and improper use of confidential information. It is not always possible to detect or deter such misconduct, and the precautions we take to prevent and detect such misconduct may not be effective. In addition, losses caused on account of employee misconduct or misappropriation of petty cash expenses and advances may not be recoverable, which we may result in write-off of such amounts and thereby adversely affecting our results of operations. Our employees may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions in which case, our reputation, business prospects, results of operations and financial condition could be adversely affected.

31. *We may not be able to sustain effective implementation of our business and growth strategies.*

The success of our business will depend greatly on our ability to effectively implement our business and growth strategies. We may not be able to execute our strategies in the future. Further, our growth strategies could place significant demand on our management team and other resources and would require us to continuously develop and improve our operational, financial and other controls, none of which can be assured. Any failure on our part to scale up our infrastructure and management could cause disruptions to our business and could be detrimental to our long term business outlook. Further, we operate in a highly dynamic industry, and on account of changes in market conditions, industry dynamics, technological improvements or changes and any other relevant factors, our growth strategy and plans may undergo changes or modifications, and such changes or modifications may be substantial, and may even include limiting or foregoing growth opportunities if the situation so demands. Our inability to implement our business strategies and sustain our growth may impair our financial growth and thus result in an adverse impact on our Company's share price.

32. *Any disproportionate increase in labour costs including increase in wage/salary demand, labour unrest or labour claims arising from accidents may adversely affect our business operations and financial conditions.*

Our increasing business operations may require our employee strength to increase in future. In the past our Company has not experienced any labour unrest, but there is no assurance that it will not experience the same at any time in the future. Also, there is a possibility that the labour costs increase disproportionately due to increase in wage/salary demand. In this event, if our Company is unable to pass on the increased costs to our customers, our business operations and financial conditions may be adversely affected.

33. *The rate of interest for the loans obtained by us from the banks is variable and any increase in interest rates may adversely affect our results of operations and financial condition.*

Our Company is susceptible to changes in interest rates and the risks arising there from. Our sanction letters provide for interest at variable rates with a provision for the periodic resetting of interest rates. Further the lenders are entitled to change the applicable rate of interest, which is a combination of a base rate that depends upon the policies of the RBI and a contractually agreed spread, and in the event of an adverse change in our Company's credit risk rating. For further details of interest payable on our borrowings, please refer to the chapter titled "*Financial Indebtedness*" on page no. 171 of this Draft Prospectus Further, in recent years, the Government of India have taken measures to control inflation, which have included tightening the monetary policy by raising interest rates. As such, any increase in interest rates may have an adverse effect on our business, results of operations, cash flows and financial condition.

34. *The requirements of being a public listed company may strain our resources and impose additional requirements.*

With the increased scrutiny of the affairs of a public listed company by shareholders, regulators and the public at large, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur in the past. We will also be subject to the provisions of the listing agreements signed with the Stock Exchanges which require us to file unaudited financial results on a quarterly basis. In order to meet our financial control and disclosure obligations, significant resources and management supervision will be required. As a result, management's attention may be diverted from other business concerns, which could have an adverse effect on our business and operations. There can be no assurance that we will be able to satisfy our reporting obligations and/or readily determine and report any changes to our results of operations in a timely manner as other listed companies. In addition, we will need to increase the strength of our management team and hire additional legal and accounting staff with appropriate public company experience and accounting knowledge and we cannot assure that we will be able to do so in a timely manner.

RISK FACTORS RELATED TO EQUITY SHARES

35. *Any further issuance of Equity Shares by Our Company or sales of Equity Shares by any significant shareholders may adversely affect the trading price of the Equity Shares.*

Any future issuance of Equity Shares by our Company could dilute the investors' shareholding. Any such future issuance of Equity Shares or sales of Equity Shares by any of our significant shareholders may also adversely affect the trading price of the Equity Shares, and could impact our ability to raise capital through an offering of securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares.

36. *There is no existing market for our Equity Shares, and we do not know if one will develop. Our stock price may be highly volatile after the Issue and, as a result, you could lose a significant portion or all of your investment.*

There is no guarantee that our Equity Shares will be listed on the Stock Exchanges in a timely manner or at all and any trading closures at the Stock Exchanges may adversely affect the trading price of our Equity Shares. Prior to the Issue, there has not been a public market for the Equity Shares. Further, we cannot predict the extent to which investor interest will lead to the development of an active trading market on the Stock Exchanges or how liquid that market will become. If an active market does not develop, you may experience difficulty selling the Equity Shares that you purchased. The Issue Price is not indicative of prices that will prevail in the open market following the Issue. Consequently, you may not be able to sell your Equity Shares at prices equal to or greater than the Issue Price. The market price of the Equity Shares on the Stock Exchanges may fluctuate after listing as a result of several factors, including the following:

- Volatility in the Indian and other Global Securities Markets;
- The performance of the Indian and Global Economy;
- Risks relating to our business and industry, including those discussed in this Draft Prospectus;
- Strategic actions by us or our competitors;

- Investor perception of the investment opportunity associated with the Equity Shares and our future performance;
- Adverse media reports about us, our shareholders or Group Companies;
- Future sales of the Equity Shares;
- Variations in our quarterly results of operations;
- Differences between our actual financial and operating results and those expected by investors and analysts;
- Our future expansion plans;
- Perceptions about our future performance or the performance of transport sector companies generally;
- Performance of our competitors in the our industry and the perception in the market about investments in the our sector;
- Significant developments in the regulation of the industry in our key locations;
- Changes in the estimates of our performance or recommendations by financial analysts;
- Significant developments in India's economic liberalization and deregulation policies; and
- Significant developments in India's fiscal and environmental regulations. There has been significant volatility in the Indian stock markets in the recent past, and our Equity Share

Price could fluctuate significantly as a result of market volatility. A decrease in the market price of the Equity Shares could cause you to lose some or all of your investment.

37. *There are restrictions on daily movements in the price of the Equity Shares, which may adversely affect a shareholder's ability to sell, or the price at which it can sell, the Equity Shares at a particular point in time.*

The price of the Equity Shares will be subject to a daily circuit breaker imposed by all stock exchanges in India which does not allow transactions beyond a certain level of volatility in the price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by the SEBI on Indian stock exchanges. The percentage limit on our circuit breaker is set by the stock exchanges based on the historical volatility in the price and trading volume of the Equity Shares. The stock exchanges do not inform us of the percentage limit of the circuit breaker from time to time, and may change it without our knowledge. This circuit breaker effectively limits upward and downward movements in the price of the Equity Shares. As a result, shareholders' ability to sell the Equity Shares, or the price at which they can sell the Equity Shares, may be adversely affected at a particular point in time.

38. *Our ability to pay dividends in the future may be affected by any material adverse effect on our future earnings, financial condition or cash flows.*

Our ability to pay dividends in future will depend on our earnings, financial condition and capital requirements, and that of our Subsidiary and the dividends they distribute to us. In the past, we have not made dividend payments to the Shareholders of our Company. The Company may decide to retain all future earnings, if any, for use in the operations and expansion of the business. In such situation, the Company may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board and will depend on factors that our Board deems relevant, including among others, our future earnings, financial condition, cash requirements, business prospects and any other financing arrangements. We cannot state with any certainty whether we will be able to pay dividends in the future. Accordingly, realization of a gain on Shareholders' investments will depend on the appreciation of the price of the Equity Shares. There is no guarantee that our Equity Shares will appreciate in value.

39. *Investors would be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares. The Finance Act, 2018 levies taxes on long term capital gains exceeding ₹100,000 arising from sale of equity shares on or after April 1, 2018, while continuing to exempt unrealised capital gains earned up to January 31, 2018 on equity shares.*

Under current Indian tax laws, capital gains arising from the sale of Equity Shares in an Indian company are generally taxable in India. However, any gain realized on the sale of listed equity shares on or before March 31, 2018 on a stock exchange held for more than 12 months will not be subject to long term capital gains tax in India if Securities Transaction Tax ("STT") is paid on the sale transaction and additionally, as

stipulated by the Finance Act, 2017, STT had been paid at the time of acquisition of such equity shares on or after October 1, 2004, except in the case of such acquisitions of equity shares which are not subject to STT, as notified by the Central Government under notification no. 43/2017/F. No. 370142/09/2017- TPL on June 5, 2017. However, the Finance Act, 2018, has now levied taxes on such long term capital gains exceeding ₹ 100,000 arising from sale of Equity Shares on or after April 1, 2018, while continuing to exempt the unrealised capital gains earned up to January 31, 2018 on such Equity Shares subject to specific conditions. Accordingly, you may be subject to payment of long term capital gains tax in India, in addition to payment of STT, on the sale of any Equity Shares held for more than 12 months. STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold.

Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short term capital gains tax in India. Capital gains arising from the sale of the Equity Shares will be exempt from taxation in India in cases where the exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the Equity Shares.

EXTERNAL RISK FACTORS

40. The Companies Act, 2013 has effected significant changes to the existing Indian company law framework, which may subject us to higher compliance requirements and increase our compliance costs.

A majority of the provisions and rules under the Companies Act, 2013 have recently been notified and have come into effect from the date of their respective notification, resulting in the corresponding provisions of the Companies Act, 1956 ceasing to have effect. The Companies Act, 2013 has brought into effect significant changes to the Indian company law framework, such as in the provisions related to issue of capital, disclosures in prospectus, corporate governance norms, audit matters, related party transactions, introduction of a provision allowing the initiation of class action suits in India against companies by shareholders or depositors, a restriction on investment by an Indian company through more than two layers of subsidiary investment companies (subject to certain permitted exceptions), prohibitions on loans to directors and insider trading and restrictions on directors and key managerial personnel from engaging in forward dealing. Further, companies meeting certain financial thresholds are also required to constitute a committee of the board of directors for corporate social responsibility activities and ensure that at least 2% of the average net profits of the company during three immediately preceding financial years are utilized for corporate social responsibility activities. Penalties for instances of non-compliance have been prescribed under the Companies Act, 2013, which may result in inter alia, our Company, Directors and key managerial employees being subject to such penalties and formal actions as prescribed under the Companies Act, 2013, should we not be able to comply with the provisions of the New Companies Act within the prescribed timelines, and this could also affect our reputation.

To ensure compliance with the requirements of the Companies Act, 2013 within the prescribed timelines, we may need to allocate additional resources, which may increase our regulatory compliance costs and divert management attention. While we shall endeavour to comply with the prescribed framework and procedures, we may not be in a position to do so in a timely manner.

The Companies Act, 2013 introduced certain additional requirements which do not have corresponding equivalents under the Companies Act, 1956. Accordingly, we may face challenges in interpreting and complying with such provisions due to limited jurisprudence on them. In the event, our interpretation of such provisions of the Companies Act, 2013 differs from, or contradicts with, any judicial pronouncements or clarifications issued by the Government in the future, we may face regulatory actions or we may be required to undertake remedial steps. Additionally, some of the provisions of the Companies Act, 2013 overlap with other existing laws and regulations (such as the corporate governance norms and insider trading regulations). We may face difficulties in complying with any such overlapping requirements. Further, we cannot currently determine the impact of provisions of the Companies Act, 2013, which are yet to come in force. Any increase in our compliance requirements or in our compliance costs may have an adverse effect on our business and results of operations.

41. Any changes in the regulatory framework could adversely affect our operations and growth prospects.

Our Company is subject to various regulations and policies. For details see section titled “Key Industry Regulations and Policies” beginning on page no. 101 of this Draft Prospectus. Our business and prospects could be materially adversely affected by changes in any of these regulations and policies, including the introduction of new laws, policies or regulations or changes in the interpretation or application of existing laws, policies and regulations. There can be no assurance that our Company will succeed in obtaining all requisite regulatory approvals in the future for our operations or that compliance issues will not be raised in respect of our operations, either of which could have a material adverse affect on our business, financial condition and results of operations.

42. Changing laws, rules and regulations and legal uncertainties, including adverse application of corporate and tax laws, may adversely affect our business, results of operations, financial condition and prospects.

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes, including the instances mentioned below, may adversely affect our business, results of operations, financial condition and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy.

43. Civil disturbances, extremities of weather, regional conflicts and other political instability may have adverse affects on our operations and financial performance.

Certain events that are beyond our control such as earthquake, fire, floods and similar natural calamities may cause interruption in the business undertaken by us. Our operations and financial results and the market price and liquidity of our equity shares may be affected by changes in Indian Government policy or taxation or social, ethnic, political, economic or other adverse developments in or affecting India.

44. Terrorist attacks, civil unrest and other acts of violence or war involving India and other countries could adversely affect the financial markets and our business.

Terrorist attacks and other acts of violence or war may negatively affect the Indian markets on which our Equity Shares will trade and also adversely affect the worldwide financial markets. These acts may also result in a loss of business confidence, impede travel and other services and ultimately adversely affect our business. In addition, any deterioration in relations between India and Pakistan might result in investor concern about stability in the region, which could adversely affect the price of our Equity Shares.

India has also witnessed civil disturbances in recent years and it is possible that future civil unrest as well as other adverse social, economic and political events in India could have a negative impact on the value of share prices generally as well as the price of our Equity Shares. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse impact on our business and the price of our Equity Shares.

45. Instability in financial markets could materially and adversely affect our results of operations and financial condition.

The Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, especially in the United States of America or Europe, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors’ reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets.

The global financial turmoil, an outcome of the sub-prime mortgage crisis which originated in the United States of America, led to a loss of investor confidence in worldwide financial markets. Indian financial markets have also experienced the contagion effect of the global financial turmoil, evident from the sharp decline in SENSEX, BSE’s benchmark index. Any prolonged financial crisis may have an adverse impact on the Indian economy and us, thereby resulting in a material and adverse effect on our business, operations, financial condition, profitability and price of our Equity Shares.

46. Any downgrading of India's debt rating by a domestic or international rating agency could adversely affect our Company's business.

Any adverse revisions to India's credit ratings for domestic and international debt by domestic or international rating agencies may adversely affect our Company's ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing is available. This could harm our Company's business and financial performance and ability to obtain financing for capital expenditures.

47. Conditions in the Indian securities market and stock exchanges may affect the price and liquidity of our Equity Shares.

Indian stock exchanges, which are smaller and more volatile than stock markets in developed economies, have in the past, experienced problems which have affected the prices and liquidity of listed securities of Indian companies. These problems include temporary exchange closures to manage extreme market volatility, broker defaults, settlement delays and strikes by brokers. In addition, the governing bodies of the Indian stock exchanges have from time to time restricted securities from trading, limited price movements and restricted margin requirements. Further, disputes have occurred on occasion between listed companies and the Indian stock exchanges and other regulatory bodies that, in some cases, have had a negative effect on market sentiment. If similar problems occur in the future, the market price and liquidity of the Equity Shares could be adversely affected. Further, a closure of, or trading stoppage on, either of the Stock Exchanges could adversely affect the trading price of our Equity Shares.

48. We may prepare our financial statements from April 1, 2018 onwards under the Indian Accounting Standards ("Ind AS"). As Ind AS is different in many respects from Indian GAAP, our financial statements from April 1, 2018 may not be comparable to our historical financial statements and our financial statements for the year ending March 31, 2017 prepared under Indian GAAP may not be comparable to our financial statements for the year ending March 31, 2017 prepared under Ind AS for comparison purposes. In addition, our transition to Ind AS reporting could have an adverse effect on our business and results of operations.

We currently prepare our financial statements under Indian GAAP. The Companies (Indian Accounting Standards) Rules, 2015 ("IAS Rules"), as amended by the Companies (Indian Accounting Standards) (Amendment) Rules, 2016, enacted changes to Indian GAAP that are intended to align Indian GAAP further with IFRS. The IAS Rules provide that the financial statements of the companies to which they apply shall be prepared and audited in accordance with Ind AS. Ind AS is different in many respects from Indian GAAP. All NBFCs and HFCs having a net worth of more than ₹ 5,000.00 million are required to mandatorily adopt Ind AS for the accounting period beginning from April 1, 2018, with comparatives for the period ending on March 31, 2017. Although any company may voluntarily implement Ind AS for the accounting period beginning from April 1, 2015, we intend to implement Ind AS for the accounting period beginning from April 1, 2018. As there is not yet a significant body of established practice, such as interpretations of Ind AS, on which to draw in forming judgments regarding the Ind AS implementation and application, we have not determined with any degree of certainty the impact the adoption of Ind AS will have on our financial statements. However, we know that the Ind AS will change our methodology for estimating allowances for doubtful debt losses. Ind AS will require us to value our NPAs by reference to their market value (if a ready market for such loans exists) or to calculate the present value of the expected future cash flows realisable from our loans, including the possible liquidation of collateral (discounted at the loan's effective interest rate) in estimating allowances for doubtful debt losses. This may result in us recognising higher allowances for doubtful debt losses in the future, which will adversely affect our results of our operations. Accordingly, our financial statements for the period commencing from April 1, 2018 may not be comparable to our historical financial statements and our financial statements for the year ending March 31, 2017 prepared under Indian GAAP may not be comparable to our financial statements for the year ending March 31, 2017 prepared under Ind AS for comparison purposes.

In our transition to Ind AS reporting, we may encounter difficulties in the on-going process of implementing and enhancing our management information systems. Our management may also have to divert significant time and additional resources in order to implement Ind AS on a timely and successful basis. Moreover, there is increasing competition for the small number of Ind AS experienced accounting

personnel available as more Indian companies begin to prepare Ind AS financial statements. Therefore, our transition to Ind AS reporting could have an adverse effect on our business and results of operations.

OVERVIEW OF GLOBAL STEEL INDUSTRY

Steel is one of the world's most essential materials. It is fundamental to every aspect of our lives, from infrastructure and transport to the tinned steel can that preserves food. It is one of the most important products of the modern world and is of strategic importance to any industrial nation. From construction, industrial machinery and transportation to consumer products, steel finds a wide variety of applications. It is also an industry with diverse technologies based on the nature and extent of use of raw materials.

Steel consumption also shows strong link with the economic growth. It is understandable since the economic growth will drive the infrastructure spend and housing. With respect to retail consumers, economic growth will drive the consumption leading to increased spending on automobiles, white goods, etc. All drivers of steel demand. However, over the long run, growth in steel consumption will also depend on the structure of economy and not just growth. For instance, countries with significant proportion of service industry will see steel demand plateauing (e.g. US) whereas manufacturing focused economies will see steel demand growing with economic growth (e.g. South Korea, China).

(Source: <http://ficci.in/spdocument/20888/Steel-Report-2017.pdf>)

The global steel market is expected to reach USD 1.01 trillion by 2025, according to a new report by Grand View Research, Inc. Growing inclination of contractors towards sustainable, low cost and durable building materials is driving steel demand in upcoming residential projects & industrial infrastructure.

Technological advancements have made pre-engineered metal buildings with high structural integrity a reality, where steel plays an essential function in lending stability, aesthetic appeal and design flexibility. Stringent regulations promoting green & energy-efficient buildings is also contributing to steel demand, especially in industrial structures.

The Asia Pacific market is relatively subdued, but displays high growth owing to exponential growth in the Indian market as of 2017 on account of protectionist measures & rising demand. About 1/3rd of Chinese exports

are shipped to countries in Southeast Asia owing to anti-dumping policies by western countries, which has contributed to economic growth and infrastructure development in these countries.

Hot rolled products dominated the steel industry with over 75% of the volume share in 2016. These products are widely utilized in automobile structures such as frames, wheel and other parts as well as welding and construction trades among others.

Supply Forecast

Steel supply tightened across late 2017, although it is not in deficit. Disruptions hit production in Europe, while buyers in the United States faced higher prices for imports that necessitated redrawing some supply chains and then further disruption from the Section 232 tariffs. The Chinese narrative says that supply is tight because of pollution-related capacity closures.

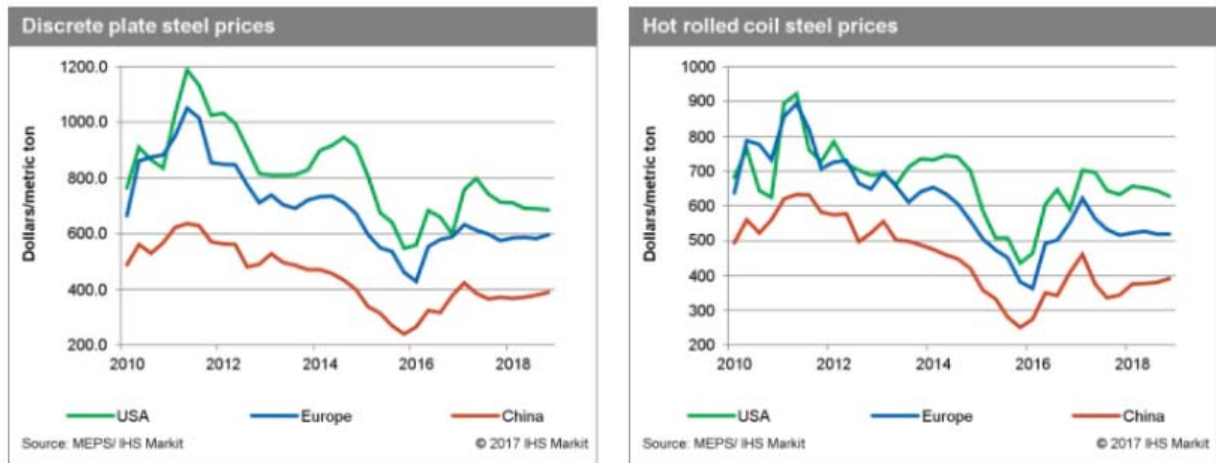

Service centers have decent inventory, and lead times are normal to slightly extended. The change will come from falling import tonnage. High prices in Europe and Asia are already causing imports to decline.

European supply is genuinely tight late in 2017, but should improve in coming quarters. Surprising demand growth in Europe outpaced mill production. A shortage of graphite electrodes is disrupting European production, although the impact is much greater on bar steel than on sheet.

Demand Forecast

- Steel demand is up globally, but is certainly not booming. Automotive, construction and energy investment are growing but at a modest pace.
- No demand sector is growing so fast as to truly pressure steel availability. If there are shortages, they would generally be from a supply disruption, not from a boom in demand (with the exception of higher-quality bar for drilling activity, mostly in the United States).
- The second quarter of each year is typically the strongest for steel demand. Construction in all major regions is kicking off, feeding straight into steel demand. With US president Donald Trump's pledges of infrastructure building, construction steel demand should be strong.

OVERVIEW OF INDIAN STEEL INDUSTRY

Introduction

India was the world's third-largest steel producer in 2017. The growth in the Indian steel sector has been driven by domestic availability of raw materials such as iron ore and cost-effective labour. Consequently, the steel sector has been a major contributor to India's manufacturing output.

The Indian steel industry is very modern with state-of-the-art steel mills. It has always strived for continuous modernization and up-gradation of older plants and higher energy efficiency levels.

Indian steel industries are classified into three categories such as major producers, main producers and secondary producers.

Market Size

Steel production in India has been growing at a fast pace

- In FY17, crude steel production in India was 97.42 MT, with the total crude steel production growing at a CAGR of 5.49 per cent over the last 6 years.
- The steel sector contributes over 2 per cent to the GDP of the nation and provides 20 lakh jobs in the country.
- During April-October 2017, crude steel and finished steel production in India stood at 58.42 MT and 67.34 MT respectively.
- As of March 2017, the capacity utilisation of steel producers is set to increase with strong export demand and signs of revival in domestic sales. Companies like JSW and Essar Steel have experienced a sharp increase in steel manufacturing in the last 2 months
- Steel manufacturing output of India is expected to increase to 128.6 MT by 2021, accelerating the country's share of global steel production from 5.4 per cent in 2017 to 7.7 per cent by 2021.

(Source: <https://www.ibef.org/download/Steel-November-20171.pdf>)

(Source: <https://www.ibef.org/download/Steel-November-20171.pdf>)

India's crude steel output grew 5.87 per cent year-on-year to 101,227 million tonnes (MT) in CY 2017. Crude steel production reached 93,183 MT during April-February 2017-18.

India's finished steel exports rose 102.1 per cent to 8.24 MT, while imports fell by 36.6 per cent to 7.42 MT in 2016-17. Exports and Imports of iron and steel stood at 14.6 MT and 13.1 MT during April-February 2017-18, respectively.

Total consumption of finished steel stood at 81,943 MT during April-February 2017-18.

Growth Drivers

Opportunities for growth of Iron and Steel in Private Sector

The New Industrial Policy Regime

The New Industrial policy opened up the Indian iron and steel industry for private investment by (a) removing it from the list of industries reserved for public sector and (b) exempting it from compulsory licensing. Imports of foreign technology as well as foreign direct investment are now freely permitted up to certain limits under an automatic route. Ministry of Steel plays the role of a facilitator, providing broad directions and assistance to new and existing steel plants, in the liberalized scenario.

The Growth Profile

(i) Steel : The liberalization of industrial policy and other initiatives taken by the Government have given a definite impetus for entry, participation and growth of the private sector in the steel industry. While the existing units are being modernized /expanded, a large number of new steel plants have also come up in different parts of the country based on modern, cost effective, state-of-the-art technologies. In the last few years, the rapid and

stable growth of the demand side has also prompted domestic entrepreneurs to set up fresh Greenfield projects in different states of the country. Crude steel capacity was 126.33 mt in 2016-17 (prov.), up by 3.6% over 2015-16 and India, which emerged as the 3rd largest producer of crude steel in the world in 2016 as per provisional ranking released by the World Steel Association, has to its credit, the capability to produce a variety of grades and that too, of international quality standards. The country is expected to become the 2nd largest producer of crude steel in the world soon.

(ii) Pig Iron: India is also an important producer of pig iron. Post-liberalization, with setting up several units in the private sector, not only imports have drastically reduced but also India has turned out to be a net exporter of pig iron. The private sector accounted for 92% of total production for sale of pig iron in the country in 2016-17 (prov.). The production for sale of pig iron has increased from 1.6 mt in 1991-92 to 9.39 mt in 2016-17 (prov.). JPC: updated in July 2017.

(iii) Sponge Iron: India, world's 2nd largest producer of sponge iron (2016, prov.), has a host of coal based units located in the mineral-rich states of the country. Over the years, the coal based route has emerged as a key contributor and accounted for 79% of total sponge iron production in the country. Capacity in sponge iron making too has increased over the years and stood at around 43 mt (2015-16).

Steel Prices

- Price regulation of iron & steel was abolished on 16.1.1992. Since then steel prices are determined by the interplay of market forces.
- Domestic steel prices are influenced by trends in raw material prices, demand – supply conditions in the market, international price trends among others.
- An Inter-Ministerial Group (IMG) is functioning in the Ministry of Steel, under the Chairmanship of Secretary (Steel) to monitor and coordinate major steel investments in the country.
- As a facilitator, the Government monitors the steel market conditions and adopts fiscal and other policy measures based on its assessment. Currently, GST of 18% is applicable on steel and there is no export duty on steel items. The government has also imposed export duty of 30% on all forms of iron ore except low grade (below Fe 58%) iron ore lump & fines and iron ore pellets both of which have nil export duty.
- In view of rising imports, the Government had earlier raised import duty on most steel items twice, each time by 2.5% and imposed a gamut of measures including anti-dumping and safeguard duties on a host of applicable iron and steel items. In a further move to curb steel imports, the Indian government banned the production and sale of steel products that does not meet Bureau of Indian Standard (BIS) approval and to check the sale of defective and sub-standard stainless steel products used for making utensils and various kitchen appliances, it issued the Stainless Steel (Quality Control) Order, 2016 for products used in making utensils and kitchen appliances, that will help filter imports of the metal. Again, in February 2016, the Indian Government had imposed the Minimum Import Price (MIP) condition on 173 steel products. The MIP was extended thrice and ceased to be effective in February 2017. Currently, a mix of anti-dumping /safeguard and other measures are in place on a range of steel items to control the inflow of cheap steel. Further, a Steel Price Monitoring Committee has been constituted by the Government with the aim to monitor price rationalization, analyze price fluctuations and advise all concerned regarding any irrational price behavior of steel commodity.

Investments

Steel industry and its associated mining and metallurgy sectors have seen a number of major investments and developments in the recent past.

According to the data released by Department of Industrial Policy and Promotion (DIPP), the Indian metallurgical industries attracted Foreign Direct Investments (FDI) to the tune of US\$ 10.56 billion in the period April 2000–December 2017.

Government Initiatives

Some of the other recent government initiatives in this sector are as follows:

- Government of India's focus on infrastructure and restarting road projects is aiding the boost in demand for steel. Also, further likely acceleration in rural economy and infrastructure is expected to lead to growth in demand for steel.
- The Union Cabinet, Government of India has approved the National Steel Policy (NSP) 2017, as it seeks to create a globally competitive steel industry in India. NSP 2017 targets 300 million tonnes (MT) steel-making capacity and 160 kgs per capita steel consumption by 2030.
- Metal Scrap Trade Corporation (MSTC) Limited and the Ministry of Steel have jointly launched an e-platform called 'MSTC Metal Mandi' under the 'Digital India' initiative, which will facilitate sale of finished and semi-finished steel products.
- The Ministry of Steel is facilitating setting up of an industry driven Steel Research and Technology Mission of India (SRTMI) in association with the public and private sector steel companies to spearhead research and development activities in the iron and steel industry at an initial corpus of Rs 200 crore (US\$ 30 million).

Road ahead

India is expected to overtake Japan to become the world's second largest steel producer soon, and aims to achieve 300 million tonnes of annual steel production by 2025-30.

India is expected to become the second largest steel producer in the world by 2018, based on increased capacity addition in anticipation of upcoming demand, and the new steel policy, that has been approved by the Union Cabinet in May 2017, is expected to boost India's steel production. Huge scope for growth is offered by India's comparatively low per capita steel consumption and the expected rise in consumption due to increased infrastructure construction and the thriving automobile and railways sectors.

Exchange Rate Used: INR 1 = US\$ 0.015 as of March 01, 2018.

STRENGTHS

1. Complimentary product mix & high operating efficiency

As a steel manufacturer, we believe that our operations shall be sufficiently flexible to enable us to alter our product mix and position in order to minimize any adverse effect on our business in the highly cyclical steel industry, as prices and gross margins for each product in our production line vary and fluctuate. For e.g. Our Induction Furnace plant output i.e. Billets can be segregated and may be sold or may be provided as input for the Rolling Mills; and the output of rolling mill i.e. Wire rod can also be sold as well as used as input for the production of HB wire & Binding wire. We believe that our ability to change the product mix as and when required will give us the flexibility to serve a wide spectrum of clients, across various sectors.

The major raw material used in our manufacturing process i.e. sponge iron procured locally and also produced by our group company namely Super Smelters Limited. Further, every units finished product acts as a raw material for the next unit. Due to total integration, the company as a whole can reduce its cost of production and achieve better profitability. The company can sustain/absorb adverse market situation during cyclical recession.

2. Experienced & Qualified Team:

Our senior management team is experienced in this industry and in the application of marketing and distribution initiatives in this sector. The Promoter and the senior management team of our Company have significant industry experience and have been instrumental in the consistent growth of our Company's performance.

We believe that our management team's experience and their understanding of the Steel business will enable us to continue to take advantage of both current and future opportunities. It is also expected to help us on addressing and mitigating various risks inherent in our business, including significant competition. - Well-developed industrial area having basic infrastructure facilities like power & water available locally;
- Availability of cheap labour from nearby villages and surrounding areas;
- Availability of skilled personnel from the nearby cities such as Kolkata;
- Proximity to Kolkata, which is one of the major market hubs in India.

4. Product diversification & Wide Product Offering

Our Company enjoys a wide product range with diverse applications across downstream sectors. It possesses multiple manufacturing processes within the Plant with the ability to address customer orders with shrinking turnaround time. The Company has widest range of products enabling it to cater to wide spectrum of applications across the industries and balancing it out from market volatilities.

STRATEGIES

The key elements of our strategy are as follows:

1. Expand Our Geographical network

Our company has a prominent presence in Kolkata and nearby markets. Our historically developed distribution in domestic market has been critical to our growth. We intend to continue developing and nurturing existing market, and create new distribution channels in under and non-penetrated geographies. We aim to further develop our domestic sales networks in those territories where there are lower transportation costs and those which have a significant demand of our products, where we can sell at price-points that can effectively offset higher transportation costs. Such expansion plans are intended to be effected by in-house examination of the market potential of various territories and our available distribution network in such geographies.

2. Make optimal utilization of resources

Our Company constantly endeavors to improve its productivity levels by optimum resource utilization, improvement in manufacturing process, skill up-gradation of our workers, modernization of machineries to achieve better asset turnover. We will continue to further improve our manufacturing processes to identify the areas of bottlenecks and correct them. This would help us in improving efficiency and putting resources to optimal use.

3. Increasing Operational efficiency

We continue to invest in increasing our operational efficiency throughout the organization. We are addressing the increase in operational output through continuous process improvement, QC / QA activities, customer service, consistent quality and technology development. Alignment of our people to 'process improvement' through change management and upgrading of skills as required for customer satisfaction is a continuous activity. Awareness of this quality commitment is wide spread among all the employees

4. Competitive Pricing

Price is an important aspect of a business' marketing mix and changing the price can drastically affect the marketing tactics necessary for success. To remain aggressive and capitalize a good market share, we believe in offering competitive prices to our customers. This helps us to sustain the cut-throat competition and withhold a strong position in the market. Further it helps us to prevent loss in company's market share.

2016, according to a report by NASSCOM. India's labour force is expected to touch 160-170 million by 2020, based on rate of population growth, increased labour force participation, and higher education enrolment, among other factors, according to a study by ASSOCHAM and Thought Arbitrage Research Institute.

India's foreign exchange reserves stood at US\$ 366.781 billion as on March 17, 2017 as compared to US\$ 360 billion by end of March 2016, according to data from the RBI.

According to The World Bank, the Indian economy will likely grow at 7 per cent in 2016-17, followed by further acceleration to 7.6 per cent in 2017-18 and 7.8 per cent in 2018-19. Demonetisation is expected to have a positive impact on the Indian economy, which will help foster a clean and digitised economy in the long run, according to Ms. Kristalina Georgieva, Chief Executive Officer, the World Bank.

India is expected to be the third largest consumer economy as its consumption may triple to US\$ 4 trillion by 2025, owing to shift in consumer behaviour and expenditure pattern, according to a Boston Consulting Group (BCG) report; and is estimated to surpass USA to become the second largest economy in terms of purchasing power parity (PPP) by the year 2040, according to a report by PricewaterhouseCoopers. OVERVIEW OF GLOBAL STEEL INDUSTRY

Steel is one of the world's most essential materials. It is fundamental to every aspect of our lives, from infrastructure and transport to the tinned steel can that preserves food. It is one of the most important products of the modern world and is of strategic importance to any industrial nation. From construction, industrial machinery and transportation to consumer products, steel finds a wide variety of applications. It is also an industry with diverse technologies based on the nature and extent of use of raw materials.

Steel consumption also shows strong link with the economic growth. It is understandable since the economic growth will drive the infrastructure spend and housing. With respect to retail consumers, economic growth will drive the consumption leading to increased spending on automobiles, white goods, etc. All drivers of steel demand. However, over the long run, growth in steel consumption will also depend on the structure of economy and not just growth. For instance, countries with significant proportion of service industry will see steel demand plateauing (e.g. US) whereas manufacturing focused economies will see steel demand growing with economic growth (e.g. South Korea, China).

(Source: <http://ficci.in/spdocument/20888/Steel-Report-2017.pdf>)

The global steel market is expected to reach USD 1.01 trillion by 2025, according to a new report by Grand View Research, Inc. Growing inclination of contractors towards sustainable, low cost and durable building materials is driving steel demand in upcoming residential projects & industrial infrastructure.

Technological advancements have made pre-engineered metal buildings with high structural integrity a reality, where steel plays an essential function in lending stability, aesthetic appeal and design flexibility. Stringent

regulations promoting green & energy-efficient buildings is also contributing to steel demand, especially in industrial structures.

The Asia Pacific market is relatively subdued, but displays high growth owing to exponential growth in the Indian market as of 2017 on account of protectionist measures & rising demand. About 1/3rd of Chinese exports are shipped to countries in Southeast Asia owing to anti-dumping policies by western countries, which has contributed to economic growth and infrastructure development in these countries.

Hot rolled products dominated the steel industry with over 75% of the volume share in 2016. These products are widely utilized in automobile structures such as frames, wheel and other parts as well as welding and construction trades among others.

Supply Forecast

Steel supply tightened across late 2017, although it is not in deficit. Disruptions hit production in Europe, while buyers in the United States faced higher prices for imports that necessitated redrawing some supply chains and then further disruption from the Section 232 tariffs. The Chinese narrative says that supply is tight because of pollution-related capacity closures.

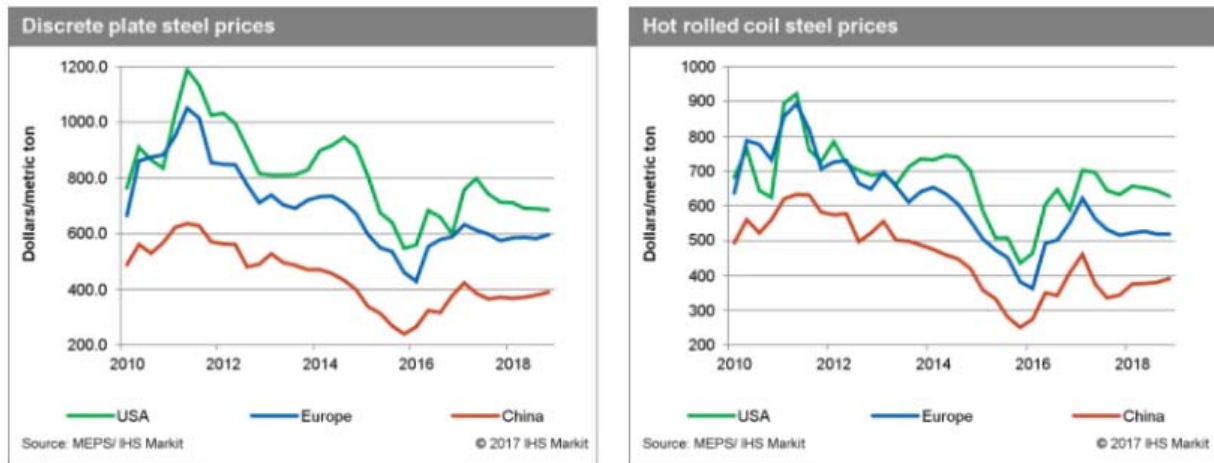

Service centers have decent inventory, and lead times are normal to slightly extended. The change will come from falling import tonnage. High prices in Europe and Asia are already causing imports to decline.

European supply is genuinely tight late in 2017, but should improve in coming quarters. Surprising demand growth in Europe outpaced mill production. A shortage of graphite electrodes is disrupting European production, although the impact is much greater on bar steel than on sheet.

Demand Forecast

- Steel demand is up globally, but is certainly not booming. Automotive, construction and energy investment are growing but at a modest pace.
- No demand sector is growing so fast as to truly pressure steel availability. If there are shortages, they would generally be from a supply disruption, not from a boom in demand (with the exception of higher-quality bar for drilling activity, mostly in the United States).
- The second quarter of each year is typically the strongest for steel demand. Construction in all major regions is kicking off, feeding straight into steel demand. With US president Donald Trump's pledges of infrastructure building, construction steel demand should be strong.

OVERVIEW OF INDIAN STEEL INDUSTRY

Introduction

India was the world's third-largest steel producer in 2017. The growth in the Indian steel sector has been driven by domestic availability of raw materials such as iron ore and cost-effective labour. Consequently, the steel sector has been a major contributor to India's manufacturing output.

The Indian steel industry is very modern with state-of-the-art steel mills. It has always strived for continuous modernization and up-gradation of older plants and higher energy efficiency levels.

Indian steel industries are classified into three categories such as major producers, main producers and secondary producers.

Market Size

Steel production in India has been growing at a fast pace

- In FY17, crude steel production in India was 97.42 MT, with the total crude steel production growing at a CAGR of 5.49 per cent over the last 6 years.
- The steel sector contributes over 2 per cent to the GDP of the nation and provides 20 lakh jobs in the country.
- During April-October 2017, crude steel and finished steel production in India stood at 58.42 MT and 67.34 MT respectively.
- As of March 2017, the capacity utilisation of steel producers is set to increase with strong export demand and signs of revival in domestic sales. Companies like JSW and Essar Steel have experienced a sharp increase in steel manufacturing in the last 2 months
- Steel manufacturing output of India is expected to increase to 128.6 MT by 2021, accelerating the country's share of global steel production from 5.4 per cent in 2017 to 7.7 per cent by 2021.

Opportunities for growth of Iron and Steel in Private Sector

The New Industrial Policy Regime

The New Industrial policy opened up the Indian iron and steel industry for private investment by (a) removing it from the list of industries reserved for public sector and (b) exempting it from compulsory licensing. Imports of foreign technology as well as foreign direct investment are now freely permitted up to certain limits under an automatic route. Ministry of Steel plays the role of a facilitator, providing broad directions and assistance to new and existing steel plants, in the liberalized scenario.

The Growth Profile

(i) Steel: The liberalization of industrial policy and other initiatives taken by the Government have given a definite impetus for entry, participation and growth of the private sector in the steel industry. While the existing units are being modernized /expanded, a large number of new steel plants have also come up in different parts of the country based on modern, cost effective, state of-the-art technologies. In the last few years, the rapid and stable growth of the demand side has also prompted domestic entrepreneurs to set up fresh Greenfield projects in different states of the country. Crude steel capacity was 126.33 mt in 2016-17 (prov.), up by 3.6% over 2015-16 and India, which emerged as the 3rd largest producer of crude steel in the world in 2016 as per provisional ranking released by the World Steel Association, has to its credit, the capability to produce a variety of grades and that too, of international quality standards. The country is expected to become the 2nd largest producer of crude steel in the world soon.

(ii) Pig Iron: India is also an important producer of pig iron. Post-liberalization, with setting up several units in the private sector, not only imports have drastically reduced but also India has turned out to be a net exporter of pig iron. The private sector accounted for 92% of total production for sale of pig iron in the country in 2016-17 (prov.). The production for sale of pig iron has increased from 1.6 mt in 1991-92 to 9.39 mt in 2016-17 (prov.). JPC: updated in July 2017.

(iii) Sponge Iron: India, world's 2nd largest producer of sponge iron (2016, prov.), has a host of coal based units located in the mineral-rich states of the country. Over the years, the coal based route has emerged as a key

contributor and accounted for 79% of total sponge iron production in the country. Capacity in sponge iron making too has increased over the years and stood at around 43 mt (2015-16).

Steel Prices

- Price regulation of iron & steel was abolished on 16.1.1992. Since then steel prices are determined by the interplay of market forces.
- Domestic steel prices are influenced by trends in raw material prices, demand – supply conditions in the market, international price trends among others.
- An Inter-Ministerial Group (IMG) is functioning in the Ministry of Steel, under the Chairmanship of Secretary (Steel) to monitor and coordinate major steel investments in the country.
- As a facilitator, the Government monitors the steel market conditions and adopts fiscal and other policy measures based on its assessment. Currently, GST of 18% is applicable on steel and there is no export duty on steel items. The government has also imposed export duty of 30% on all forms of iron ore except low grade (below Fe 58%) iron ore lump & fines and iron ore pellets both of which have nil export duty.
- In view of rising imports, the Government had earlier raised import duty on most steel items twice, each time by 2.5% and imposed a gamut of measures including anti-dumping and safeguard duties on a host of applicable iron and steel items. In a further move to curb steel imports, the Indian government banned the production and sale of steel products that does not meet Bureau of Indian Standard (BIS) approval and to check the sale of defective and sub-standard stainless steel products used for making utensils and various kitchen appliances, it issued the Stainless Steel (Quality Control) Order, 2016 for products used in making utensils and kitchen appliances, that will help filter imports of the metal. Again, in February 2016, the Indian Government had imposed the Minimum Import Price (MIP) condition on 173 steel products. The MIP was extended thrice and ceased to be effective in February 2017. Currently, a mix of anti-dumping /safeguard and other measures are in place on a range of steel items to control the inflow of cheap steel. Further, a Steel Price Monitoring Committee has been constituted by the Government with the aim to monitor price rationalization, analyze price fluctuations and advise all concerned regarding any irrational price behavior of steel commodity.

Investments

Steel industry and its associated mining and metallurgy sectors have seen a number of major investments and developments in the recent past.

According to the data released by Department of Industrial Policy and Promotion (DIPP), the Indian metallurgical industries attracted Foreign Direct Investments (FDI) to the tune of US\$ 10.56 billion in the period April 2000–December 2017.

Government Initiatives

Some of the other recent government initiatives in this sector are as follows:

- Government of India's focus on infrastructure and restarting road projects is aiding the boost in demand for steel. Also, further likely acceleration in rural economy and infrastructure is expected to lead to growth in demand for steel.
- The Union Cabinet, Government of India has approved the National Steel Policy (NSP) 2017, as it seeks to create a globally competitive steel industry in India. NSP 2017 targets 300 million tonnes (MT) steel-making capacity and 160 kgs per capita steel consumption by 2030.
- Metal Scrap Trade Corporation (MSTC) Limited and the Ministry of Steel have jointly launched an e-platform called 'MSTC Metal Mandi' under the 'Digital India' initiative, which will facilitate sale of finished and semi-finished steel products.
- The Ministry of Steel is facilitating setting up of an industry driven Steel Research and Technology Mission of India (SRTMI) in association with the public and private sector steel companies to spearhead research

and development activities in the iron and steel industry at an initial corpus of Rs 200 crore (US\$ 30 million).

Challenges

Among the Globe India is a 4th largest position of crude steel producer and is expected to attain 2nd position in next 3 to 4 years and contribution of the secondary steel sector in total steel production of India is quite important, basically in the long steel products. But the cost of the steel produced by SRRM sector is very high. It has been noted that major cost involved is cost of the energy, which is approx. 30% of the overall production cost. The direct energy consumed in the re-rolling mill sector is through the heating fuels (Oil, Gas or Coal) as well as in mill and the auxiliaries. However, this sector is unorganized sector and many problems are encountered by this industry. The major challenges / problems facing the re-rolling sector are given below:

Raw Material issue:

This industry mostly uses pencil ingots, re-rollable scrap and billets as raw material. As these ingots/billets are mainly produced through induction furnaces, they face severe quality problems. Often there occur surface defects like deep ripple marks, cracks etc, internal defects like piping, network of localized porosity along with high gas contents and composition problems like high percentage of sulphur, phosphorous, lead, copper and tin. The aforesaid shortcomings in raw materials / feedstock cause quality problems in rolled product, increase rejection rate and decrease the overall yield. Because of shortage of skilled manpower pre-inspection of feedstock cannot always be carried out successfully, thus the problems are carried up to product stage causing rejection and increase in overall cost.

Reheating furnace:

The most important cost centres in re-rolling mill industry are reheating furnace. The reheating furnaces have normally been observed by lower productivity, higher range of temperature variation both in product & hearth resulting in energy consumption. There is a lot of gap between the theoretical energy (180 Kcal/Kg) required and practical energy input levels (400 Kcal/Kg). A part from energy efficiency, second major problem is of high burning/scale losses to the tune of 2-3%. The scale losses not only cause appreciable financial losses but also sometime cause surface quality problems in the product. It is also a national loss. The emission levels in term of SPM, SO₂ & GHG are also very high. The main reasons behind poor performances of the furnaces are. Unscientific designs-mainly designed by furnace manufactures. No automation & control systems. Non availability of skilled manpower for operation of furnace The above problems need to be addressed for better results and cost control in reheating furnaces.

Rolling Mill:

The rolling mill industry is the main section where the material is rolled. The rolling mills of rerolling sector range from very small size of 6" to 18". The rolling mills of rerolling sector are known for their higher energy consumption, low mill utilization, unscientifically designed mill equipments, unscientific mill layouts, inefficient power transmission systems, lower productivities, lower bearing life, lower roll lives and higher breakdowns. There is an urgent need to attend to these problems. Most of the mills do not follow standard operating and maintenance practices. Many of the mills do not follow appropriate rolling process parameters viz no. of passes / average reduction per pass, temperature of material, soaking, de scaling, Roll diameter and roll speed. Due to the absence of appropriate rolling and predictive maintenances, the formation of cobbles/misrolls is high and thus yield is lower. Most of the mills have manual operation and mechanization /automations is very less. The motors used by the mills are of low efficiency and their capacity resulting in poor performance. The motors used by the mills are of low efficiency and their maintenance practices are also not appropriate. Most of these mills are operated by uneducated but experienced foremen. There is acute dearth of educated / trained manpower to run the mills.

Laboratories for testing:

In the many rolling mills there are no laboratories for testing of material. Though some TMT / alloy steel manufacturing units have small laboratories, these are either not properly equipped or suitable trained manpower is not available to operate the testing equipments.

Energy Consumption:

The consumption levels of Energy of the rerolling mills are very high as compared to bigger plants the main reason behind this are inefficient reheating furnaces, severe design problems in reheating furnaces as well as rolling mills. Non adoption of SOP and SMP inappropriate rolling process parameters. Low efficiency of transmission equipments, inappropriate roll pass design. Low level of mill mechanization / automation, inappropriate rolling mill layout and use of low efficiency motors.

Pollution Problems:

Basically the rerolling industry is considered as polluting industry. The major reason is use of high amount of fossil fuels for heating steel in reheating furnaces. Because of cost consideration this sector is now mainly using coal as fuel. Because of lower efficiency of burning of solid fuels and high ash contents, high SPM and GHG levels are generated. The pollution control devices installed in the mills are not properly designed. Because of this the mills are facing continuous pressure from PCBs for pollution abatement.

Manpower restraints:

Generally the rerolling mills are mainly run by undereducated but experienced foremen and completely illiterate/unskilled firemen. The availability of adequately educated / trained manpower is very less. Due to this, efficiency of operation is deteriorated. There is an urgent need to improve the situation by conducting specific training programs / courses for the sector.

Management problems:

The rerolling mills are mainly managed by entrepreneurs themselves and presence of professionals is almost nil. Because of this many a times the unit suffers due to differently focused it is felt that decision making. It is felt there is a need the existing entrepreneurs through EDP programs in professional management practices.

Road ahead

India is expected to overtake Japan to become the world's second largest steel producer soon, and aims to achieve 300 million tonnes of annual steel production by 2025-30.

India is expected to become the second largest steel producer in the world by 2018, based on increased capacity addition in anticipation of upcoming demand, and the new steel policy, that has been approved by the Union Cabinet in May 2017, is expected to boost India's steel production. Huge scope for growth is offered by India's comparatively low per capita steel consumption and the expected rise in consumption due to increased infrastructure construction and the thriving automobile and railways sectors.

STRENGTHS

1. Complimentary product mix & high operating efficiency

As a steel manufacturer, we believe that our operations shall be sufficiently flexible to enable us to alter our product mix and position in order to minimize any adverse effect on our business in the highly cyclical steel industry, as prices and gross margins for each product in our production line vary and fluctuate. For e.g. Our Induction Furnace plant output i.e. Billets can be segregated and may be sold or may be provided as input for the Rolling Mills; and the output of rolling mill i.e. Wire rod can also be used as well as used as input for the production of HB wire & Binding wire. We believe that our ability to change the product mix as and when required will give us the flexibility to serve a wide spectrum of clients, across various sectors.

The major raw material used in our manufacturing process i.e. sponge iron procured locally and also produced by our group company namely Super Smelters Limited. Further, every units finished product acts as a raw material for the next unit. Due to total integration, the company as a whole can reduce its cost of production and achieve better profitability. The company can sustain/absorb adverse market situation during cyclical recession.

DETAILS OF OUR BUSINESS

Location

Registered Office:

Our Registered office is located at 39, Shakespeare Sarani, 3rd Floor, Kolkata – 700017, West Bengal

Manufacturing unit:

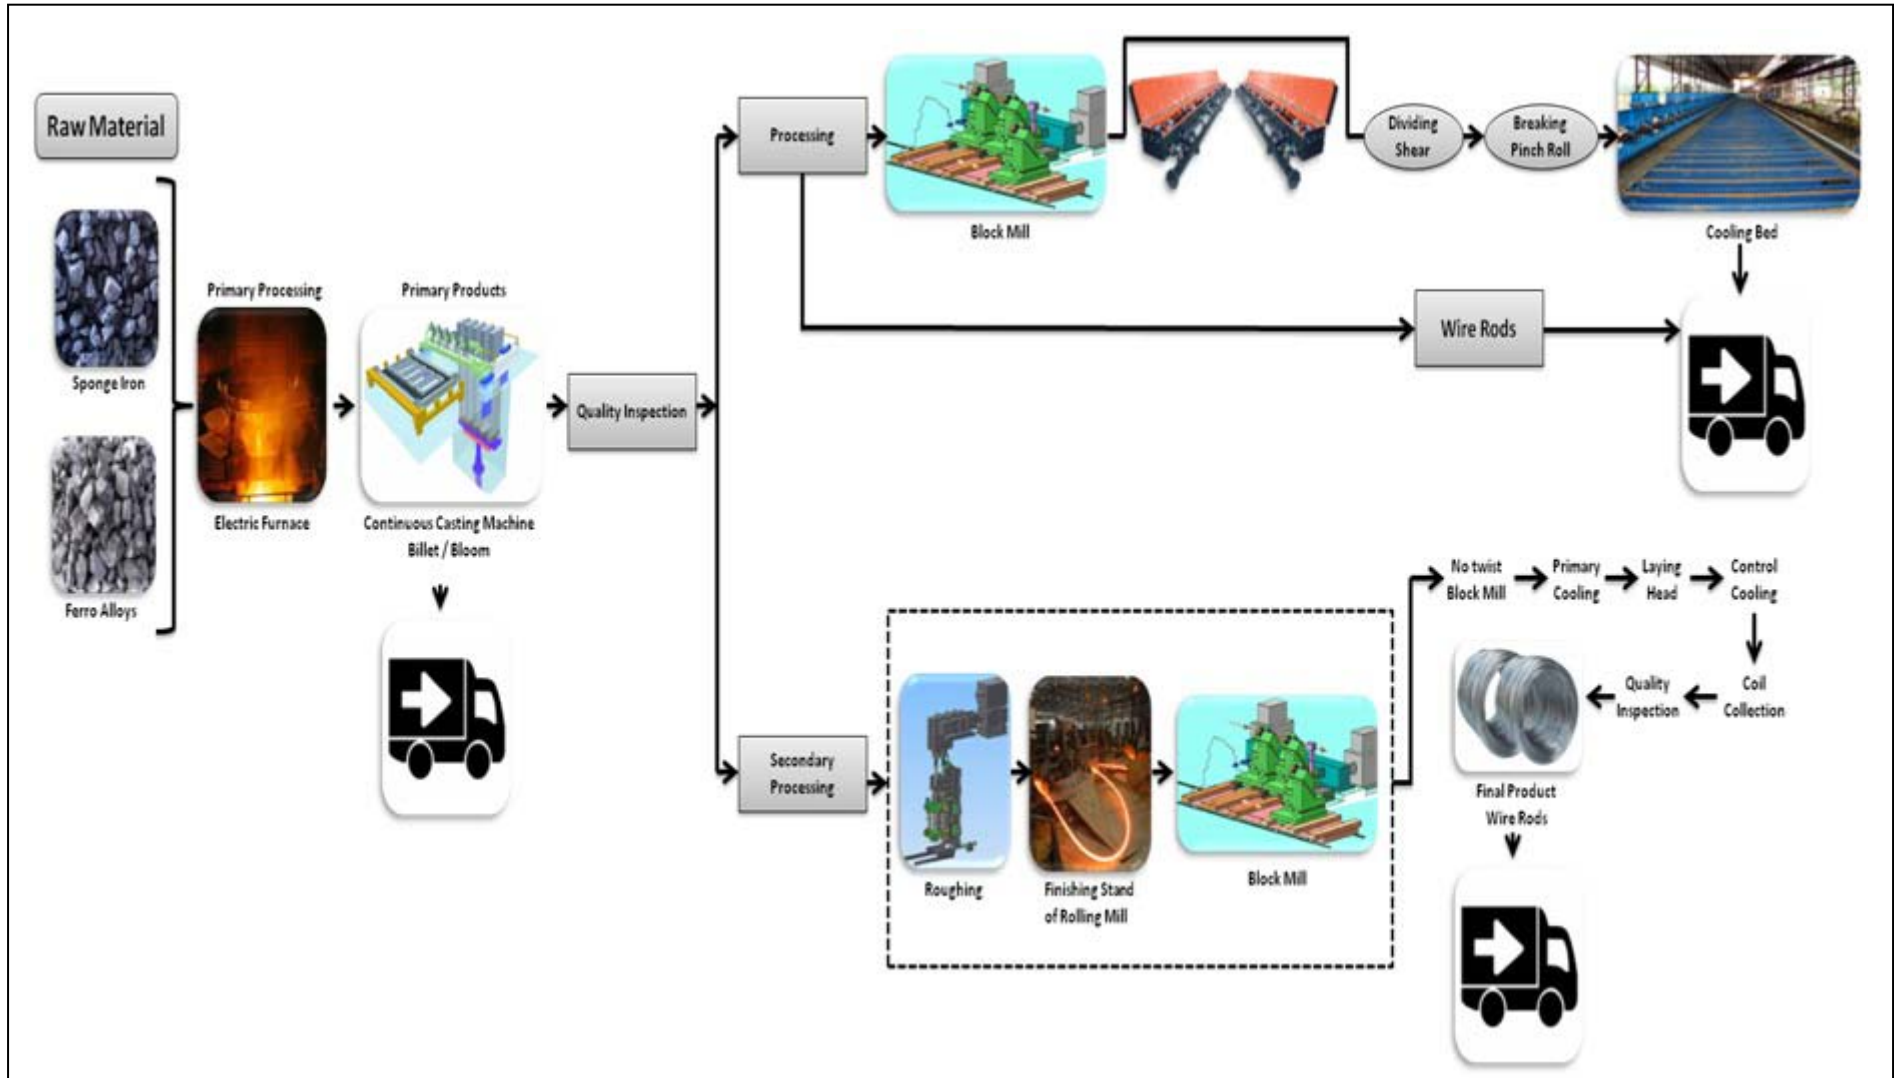

Our manufacturing unit is located at Kanjilal Avenue, Opp: DPL Zone, "B" Substation, Durgapur-713210.

Business Processes

This process starts can be divided broadly into the following phases:

- Procurement of raw materials
- Melting in an induction furnace
- Continuous Casting
- QC - Chemical testing and matching to industrial standards
- Processing in Rolling Mill

Our Business Process is depicted as below:

Procurement of Raw Materials:

Our major raw material for this process comprises of MS scrap, sponge iron and pig iron. All the required raw materials are locally available. In addition to that we import Scrap as per requirement. After purchasing of the required raw materials it is kept in the respective raw materials yard and unloaded with the help of magnet crane after quality and chemical composition checking.

Melting in an induction furnace:

These raw materials are charged in the furnace through charging magnet cranes in the required ratio so that the composition is to be maintained. Time to time bath samples from each heat is taken for confirming the composition. After achieving the required temperature of heat recorded through thermo couple temperature recorder by dipping the tips, furnace is tilted at angle & the molten metal is poured in to the Ladle.

Continuous Casting:

Ladle goes to Continuous Casting Machine (CCM) where temperature is confirmed and piercing with nitrogen is carried to get the material homogeneous. Then nozzle of ladle is opened through a remote control of hydraulic power pack and metal goes in tundish. Then nozzles of tundish are opened so that metal goes in to the Mould Tube, metal catches the dummy bar and DC oscillator works to level the molten metal. After primary cooling the Billet goes in to secondary cooling zone in apron and reaches to straighten and through roller table it reaches to Cooling Bed to both strands. The required length Billet is cutted with the help of hot gas cutter on roller table while continuous casting. Billet is shifted to the billet yard from cooling bed with the help of crane.

Rolling Mill:

Raw materials for rolling mill is billet and these are being produced in our Induction Furnace (SMS). Hot Billets are being transferred through transfer table and conveyor table to rolling mill of RMS. In addition to direct charging, we have back up plan for reheating furnace where Cold billets can also being transferred through transfer table and EOT crane to reheating furnace of RMS. Cold billets are pushed inside reheating furnace with the help of hydraulic pusher. There are three zones in reheating furnace such as a) Ore Heating Zone (b) Heating zone and (c) Socking zone.

There are two systems through which we are feeding billets to roughing mill such as (1) Hot billet directly from CCM and (2) Reheating furnace. There are seventeen rolling stand through which the finished products produced. As per the requirement of finished products we are rolling the billets through different stands. There is block mill of six rolling stand and the final products are made to the required sizes with the help of Toungston Carbide Roll. Finished products are passed through controlled cooling and being passed through laying head. The final finished product is again cooled down and being collected at the coil collector and finally the coil is being sent to stock yard. Product is being tested by quality control department and after cooling is ready to dispatch for the sale.

Wire Drawing Section:

After processing of DC Continuous materials moved towards Wire Rod Block Mill for producing of wire rod. It has six stands Block and maintained the size as per size standard. After Block Mill material passed through the Cooling bed to maintain the cooling parameters. It enters Laying Head. On the laying head materials transformed in coil shape and sent to Mandrel by conveyor table. Then through Compactor coil done bundle and sent at Finish Yard for dispatches.

Utilities**Raw Material****1. Induction Furnace:**

Induction furnace is using steel melting scrap, Sponge Iron & Pig Irons. Sponge iron is an iron source relatively uniform in composition, and virtually free from tramp elements. It is used increasingly in Electric Arc and Induction furnaces to dilute the contaminants present in the scrap used in these processes. It has an associated energy value in the form of combined carbon, which has a tendency to increase furnace efficiency.

Pig Iron is a semi-finished metal produced from iron ore in blast furnace, containing 92 percent iron, high amounts of carbon (typically up to 3.5 percent), and balance largely manganese and silicone plus small amounts of phosphorus, sulfur, and other impurities. Pig iron is further refined in a furnace for conversion into steel.

On an average the ratio of these items are 30% Scrap Iron and Pig Iron + 70% Sponge Iron. The technology of melting these input materials varies according to the availability of raw material and location of the plants and inputs of the sponge iron is consumed is as high as 85% as charge mix on bigger furnaces. All the raw material is available in the open market.

2. Rolling Mill & Wire Rod

The best raw material to produce high quality steel bars is Billets. High Quality of billets depends on chemical composition of billets which we check in our testing lab. Availability of Raw Material and Rate variable are not affected in production as raw material required by rolling mill is Billets and requirement of the same is fulfilled by us internally through our existing capacity.

We have inbuilt process to make Wire Rod as alternative. Billets are used as raw material for production of Wire Rod & the requirement of raw material is fulfilled by us internally. In case additional requirement, it is available from nearby manufacturers.

Billets:

3. Hard Black Wire & Binding Wire

Wire Rod is used as input materials for making of HB Wire and Binding Wire.

Water

Water is required both for manufacturing process and domestic purposes, which is met from Durgapur Projects Limited.

Power

We have entered into an agreement for the supply of electrical energy at extra high/high voltage with the Durgapur Projects Limited for supply of power upto 22,000 KVA. Our manufacturing plant and registered office have adequate power supply position from the public supply utilities.

Effluent treatment

The company is having effluent treatment plant. The company is having requisite approvals from Government bodies.

Collaboration

We have not entered into any collaboration agreement with a third party.

Our Products & Services

1. Billets

Billets have a specific grain structure, which enables the metal to be processed more intricately. Steel billets are also known for their malleability and ductility, especially when exposed to varying temperatures during shaping and molding. Billets are the product of a melting shop which later goes through a rolling mill production line. They are the softest, highly ductile & most malleable form.

Sponge iron & Steel scrap and Pig Iron charged in the ratio of 70:30 into the induction furnace in batches. After the complete melting of charge, the hot liquid metal samples are taken to analyze the chemical ingredients present, i.e. carbon, manganese, silicon, phosphorous, sulphur etc. In order to balance chemistry of the metal as per required grade silico manganese and Ferro silicon is added. The temperature of liquid metal is raised to 1600 degree centigrade for casting. Billets are produced in a square cross-section of the area. They fall under the category of semi-finished casting products. Their final products involve bars, rods, wires & wire products.

2. Wire Rods

These wires have longer service life standards and are known for their tensile strength. Wire rod is a hot rolled steel product classified its shape. It is a rolled alloy or plain carbon steel product, produced from a semi mainly billet. It has a round, rectangular or other cross-section. Wire rod is wound into coils and transported in this form. In case the diameter is higher the product is called 'Bar in coil'. Fig 1 shows wire rod coil. Our company offers an assorted range of Wire Rod. This product is manufactured using advanced technology and premium quality grade wire rods which are being produced at our plants under the supervision of skilled professionals.

Wire rod coil is held in a unit with at least four steel straps in the transverse direction and transported and stored without further packaging. Before the steel strapping is applied, the wire rod must be sufficiently compressed. The strapping is fixed in the transverse direction with a single circumferential strap so that the strapping does not slip and cause the coil to come apart. Wire rods are used in the following industry: Nails, nuts, electrodes, Wire, Power Industry etc.

3. HB Wire & Binding Wire

We are a specialized manufacturer of a quality approved range of Quality HB Wires. Use of quality tested raw material and advanced manufacturing techniques, improve the applicability of our product and also ensure longer service life. Our products are available in varied dimensions and sizes, which can also be customized as per the preferences of the clients.

HB wire is raw material for in numbers of industries and products; some of them are namely, for manufacturing of Nails, cycle spokes, G.I. wire, Binding wire, Weld mesh, welding electrodes etc., and for other uses such as cement pole, cement pipe, bridges, handicrafts etc.

Binding Wire is used for the purpose of tying applications in the field of construction. It is used extensively in the construction sector for tying the rebars at the joints so as to keep the structure intact.

Binding wire is also called annealed wire and is made of mild steel. Annealing endows it with the properties like flexibility and softness, required for its main use.

(a) Basis for preparation of financial statement

The financial statements of the Company have been prepared in accordance with generally accepted accounting principles in India (Indian GAAP). The Company has prepared these financial statements to comply in all material respects with the accounting standards notified under section 133 of the Companies Act 2013 for the Financial Years Ending 2014-15, 2015-16, 2016-17, 2017-18, read together with paragraph 7 of the Companies (Accounts) Rules 2014, and as per Companies Act, 1956 for the Financial Year Ended 2013-14. The financial statements have been prepared on an accrual basis and under the historical cost convention.

(b) Use of Estimates

The preparation of financial statements requires estimates and assumptions to be made that affect the reported amount of assets and liabilities on the date of the financial statements and the reported amount of revenues and expenses during the reporting period. Difference between the actual results and estimates are recognized in the period in which the results are known/ materialized.

(c) Property, Plant & Equipment

- i) Tangible Fixed Assets are stated at cost of acquisition or construction (net of excise duty, VAT and GST) less accumulated depreciation and impairment losses. The cost of assets comprises of its purchase price and any directly attributable cost of bringing the assets to their location and working condition upto the date of its intended use.
- ii) Intangible assets are stated at cost less accumulated amortization. Cost includes directly attributable expenditure for making the assets for its intended use.
- iii) Capital Work-in-progress is stated at cost which includes expenses incurred during construction period, interest on amount borrowed for acquisition / construction of qualifying assets and other expenses incurred in connection with project implementation in so far as such expenses relate to the period prior to the commencement of commercial production.

(d) Component Accounting

The company has adopted component accounting as required under Schedule II to the Companies Act, 2013, from 1 April 2015. The company was previously not identifying components of fixed assets separately for depreciation purposes; rather, a single useful life/ depreciation rate was used to depreciate each item of property, plant and equipment.

Due to application of Schedule II to the Companies Act, 2013, the company has changed the manner of depreciation for its fixed assets. Now, the company identifies and determines cost of each component/ part of the asset separately, if the component/ part have a cost which is significant to the total cost of the asset and has useful life that is materially different from that of the remaining asset. These components are depreciated separately over their useful lives; the remaining components are depreciated over the life of the principal asset.

(e) Depreciation and Amortization

Depreciation on Tangible Fixed Assets is provided on prorata basis for the period of use, on straight-line method at the rates determined based on useful lives of respective assets as prescribed in the Schedule II of the Companies Act, 2013. Certain plant & machinery have been considered Continuous process plant on the basis of technical assessment. Leasehold land is amortized on straight line method over the period of the lease.

(f) Impairment

The carrying amounts of Tangible Fixed Assets are reviewed at each balance sheet date to determine, if there is any indication of impairment based on external/internal factors. An impairment loss is recognized wherever the carrying amount of Tangible Fixed Assets exceeds its recoverable amount which represents greater of the “net selling price” and “value in use” of the respective assets. The impairment loss recognized in prior accounting period is reversed if there has been an improvement in recoverable amount.

(g) Leases

Lease payments under an operating lease are recognized as expense in the Statement of Profit and Loss as per terms of lease agreement.

Leases which effectively transfer to the lessee substantially all the risks and benefits incidental to ownership of the leased item are classified and accounted for as finance lease. Lease rental receipts are apportioned between the finance income and capital repayment based on the implicit rate of return. Contingent rents are recognized as revenue in the period in which they are earned.

(h) Investments

- i) Investments which are readily realizable and intended to be held for not more than one year from the date on which such investments are made, are classified as current investments. All other investments are classified as long-term investments. The portion of long term investments expected to be realized within twelve months after the reporting date are disclosed under current investments.
- ii) On initial recognition, all investments are measured at cost. The cost comprises purchase price and directly attributable acquisition charges such as brokerage, fees & duties.
- iii) Long-Term Investments are stated at cost. Provision for diminution is made if the decline in value, in the opinion of the management, is other than temporary in nature.

(i) Inventories

Inventories of stores and spare parts are valued at or below cost after providing for cost of obsolescence and other anticipated losses wherever considered necessary.

Inventories of items other than those stated above are valued at cost or net realizable value whichever is lower. Cost in respect of:

- i) Raw Materials, Consumables, Stores & Spares are computed under weighted average basis;
- ii) Work-in-Progress and Finished Goods are computed under weighted average basis.
- iii) By- Products are valued at net realizable value.

Net Realizable Value is the estimated selling price in the ordinary course less the estimated cost of completion and the estimated costs necessary to make the sale. Materials and other supplies held for use in the production of

inventories are not written down below cost if the finished productions in which they will be incorporated are expected to be sold at or above cost.

(j) Employees Benefit

Retirement benefit in the form of provident fund and superannuation fund are defined contribution schemes. The contributions to the provident fund and superannuation fund are charged to the statement of profit and loss for the year when an employee renders the related service. The company has no obligation, other than the contribution payable to the Provident Fund and superannuation fund.

The company operates a defined benefit plan in the form of gratuity for its employees. The cost of providing benefits under the plan is determined on the basis of actuarial valuation at each year-end. Actuarial valuation is carried out using the projected unit credit method.

Actuarial gains and losses for the defined benefit plan are recognized in full in the period in which they occur in the statement of profit and loss.

Accumulated leave, which is expected to be utilized within the next 12 months, is treated as short-term employee benefit. The company measures the expected cost of such absences as the additional amount that it expects to pay as a result of the unused entitlement that has accumulated at the reporting date.

(k) Revenue Recognition

Revenue is recognized to the extent it is probable that the economic benefits will flow to the company and that the revenue can be reliably measured. The following specific recognition criteria must also be met before revenue is recognized:

Sale of Goods:

Revenue from sale of goods is recognized when all the significant risks and rewards of ownership of the goods have been passed to the buyer. The company collects sales taxes and value added taxes (VAT) and GST on behalf of the government and, therefore, these are not economic benefits flowing to the company. Hence, they are excluded from revenue. Excise duty deducted from revenue (gross) is the amount that is included in the revenue (gross) and not the entire amount of liability arising during the years.

(l) Borrowing Cost

Borrowing cost directly attributable to the acquisition or construction of qualifying assets is capitalized until the time all substantial activities necessary to prepare the qualifying assets for their use are complete. A qualifying asset is the one that necessarily takes substantial period of time to get ready for its intended use. All other borrowing costs are recognized as expenses in the period in which they are incurred.

(m) Taxation

Tax expense comprises current and deferred tax. Current income-tax is measured at the amount expected to be paid to the tax authorities in accordance with the Income-tax Act, 1961 enacted in India. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date.

Deferred income taxes reflect the impact of timing differences between taxable income and accounting income originating during the current year and reversal of timing differences for the earlier years. Deferred tax is measured using the tax rates and the tax laws enacted or substantively enacted at the reporting date.

Deferred tax liabilities are recognized for all taxable timing differences. Deferred tax assets are recognized for deductible timing differences only to the extent that there is reasonable certainty that sufficient future taxable income will be available against which such deferred tax assets can be realized. In situations where the company has unabsorbed depreciation or carry forward tax losses, all deferred tax assets are recognized only if there is virtual certainty supported by convincing evidence that they can be realized against future taxable profits.

Minimum alternate tax (MAT) paid in a year is charged to the statement of profit and loss as current tax. The company recognizes MAT credit available as an asset only to the extent that there is convincing evidence that the company will pay normal income tax during the specified period, i. e. the period for which MAT credit is allowed to be carried forward. In the year in which the company recognizes MAT credit as an asset in accordance with the Guidance Note on Accounting for Credit Available in respect of MAT under the Income-tax Act, 1961, the said asset is created by way of credit to the statement of profit and loss and shown as "MAT Credit Entitlement." The company reviews the "MAT credit entitlement" asset at each reporting date and writes down the asset to the extent the company does not have convincing evidence that it will pay normal tax during the specified period.

(n) Foreign currency transactions and Derivatives

(i) Initial recognition

Foreign Currency transactions are recorded in the reporting currency, by applying to the foreign currency amount the exchange rate between the reporting currency and the foreign currency at the date of the transaction.

(ii) Conversion

Foreign currency monetary items are retranslated using the exchange rate prevailing at the reporting date.

(iii) Exchange differences

The company accounts for exchange differences arising on translation/ settlement of foreign currency monetary items as below:

a) Exchange differences arising on long-term foreign currency monetary items related to acquisition of a fixed asset are capitalized and depreciated over the remaining useful life of the asset.

b) All other exchange differences are recognized as income or as expenses in the period in which they arise.

(iv) Forward exchange contracts entered into to hedge foreign currency risk of an existing asset/ liability. The premium or discount arising at the inception of forward exchange contract is amortized and recognized as an expense/ income over the life of the contract. Exchange differences on such contracts, are recognized in the statement of profit and loss in the period in which the exchange rates change. Any profit or loss arising on cancellation or renewal of such forward exchange contract is also recognized as income or as expense for the period. None of the foreign exchange contracts are taken for trading or speculation purpose.

(o) Government Grants

Government grants are recognized when there is a reasonable assurance that the same will be received. Capital Grants relating to specific fixed assets are reduced from the gross value of the respective fixed assets. Other capital grants are credited to Capital Reserve. Revenue grants are recognized in the Statement of Profit & Loss.

(p) Contingent Liabilities

A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the company or a present obligation that is not recognized because it is not probable that an outflow of resources will be required to settle the obligation. A contingent liability also arises in extremely rare cases where there is a liability that cannot be recognized because it cannot be measured reliably. The company does not recognize a contingent liability but discloses its existence in the financial statements.

(q) Provisions

A provision is recognized when the company has a present obligation as a result of past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. Provisions are not discounted to their present value and

are determined based on the best estimate required to settle the obligation at the reporting date. These estimates are reviewed at each reporting date and adjusted to reflect the current best estimates. The expense relating to any provision is presented in the statement of profit and loss, net of any reimbursement.

(r) Earning Per Share

Basic Earning Per Share (EPS) is computed by dividing the net profit or loss for the year attributable to Equity Shareholders by the weighted average number of equity shares outstanding during the year. Diluted EPS is computed by dividing the net profit or loss for the year attributable to Equity Shareholders by the weighted average number of equity shares outstanding during the year as adjusted for the effects of all dilutive potential equity shares, except where the result are anti-dilutive.

(s) Cash Flow Statement

Cash Flow Statement presents the Cash Flows by operating, investing and financing activities of the Company. Cash and Cash equivalents presented in the Cash Flow Statement consist of cash on hand, cash at bank, and short - term investments with an original maturity of twelve months or less.

5.6 BASIS OF ALLOCATION

- a) The SEBI ICDR Regulations, 2009 specify the allocation or Allotment that may be made to various categories of Bidders/Applicants in an Issue depending on compliance with the eligibility conditions. Certain details pertaining to the percentage of Issue size available for allocation to each category is disclosed overleaf of the Bid cum Application Form and in the RHP/Prospectus. For details in relation to allocation, the Bidder/Applicant may refer to the RHP/Prospectus.
- b) Under-subscription in any category (except QIB Category) is allowed to be met with spill over from any other category or combination of categories at the discretion of the Issuer and in consultation with the BRLMs and the Designated Stock Exchange and in accordance with the SEBI ICDR Regulations, 2009. Unsubscribed portion in QIB Category is not available for subscription to other categories.
- c) In case of under subscription in the Issue, spill-over to the extent of such under-subscription may be permitted from the Reserved Portion to the Issue. For allocation in the event of an under-subscription applicable to the Issuer, Bidders/Applicants may refer to the RHP/ Prospectus.
- d) Illustration of the Book Building and Price Discovery Process Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue; it also excludes Bidding by Anchor Investors.

Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹ [•] to ₹[•] per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Issuer and the Selling Shareholders, in consultation with the BRLMs, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

e) Alternate Method of Book Building

In case of FPOs, Issuers may opt for an alternate method of Book Building in which only the Floor Price is specified for the purposes of Bidding (“**Alternate Book Building Process**”).

The Issuer may specify the Floor Price in the RHP/ Prospectus or advertise the Floor Price at least one Working Day prior to the Bid/Issue Opening Date. QIBs may Bid at a price higher than the Floor Price and the Allotment to the QIBs is made on a price priority basis. The Bidder with the highest Bid Amount is allotted the number of Equity Shares Bid for and then the second highest Bidder is Allotted Equity Shares and this process continues until all the Equity Shares have been allotted. RIIs, NIIs and Employees are Allotted Equity Shares at the Floor Price and Allotment to these categories of Bidders is made proportionately. If the number of Equity Shares Bid for at a price is more than available quantity then the Allotment may be done on a proportionate basis. Further, the Issuer may place a cap either in terms of number of specified securities or percentage of issued capital of the Issuer that may be Allotted to a single

Bidder, decide whether a Bidder be allowed to revise the bid upwards or downwards in terms of price and/or quantity and also decide whether a Bidder be allowed single or multiple bids.

SECTION 6: ISSUE PROCEDURE IN FIXED PRICE ISSUE

Applicants may note that there is no Bid cum Application Form in a Fixed Price Issue. As the Issue Price is mentioned in the Fixed Price Issue therefore on filing of the Prospectus with the RoC, the Application so submitted is considered as the Application Form.

Applicants may only use the specified Application Form for the purpose of making an Application in terms of the Prospectus which may be submitted through the Designated Intermediary.

Applicants may submit an Application Form either in physical form to the any of the Designated Intermediaries or in the electronic form to the SCSB or the Designated Branches of the SCSBs authorising blocking of funds that are available in the bank account specified in the Application Form only (“ASBA Account”). The Application Form is also made available on the websites of the Stock Exchanges at least one day prior to the Bid/Issue Opening Date.

In a fixed price Issue, allocation in the net Issue to the public category is made as follows: minimum fifty per cent to Retail Individual Investors; and remaining to (i) individual investors other than Retail Individual Investors; and (ii) other Applicants including corporate bodies or institutions, irrespective of the number of specified securities applied for. The unsubscribed portion in either of the categories specified above may be allocated to the Applicants in the other category.

For details of instructions in relation to the Application Form, Bidders/Applicants may refer to the relevant section of the GID.

SECTION 7: ALLOTMENT PROCEDURE AND BASIS OF ALLOTMENT

The Allotment of Equity Shares to Bidders/Applicants other than Retail Individual Investors and Anchor Investors may be on proportionate basis. For Basis of Allotment to Anchor Investors, Bidders/Applicants may refer to RHP/Prospectus. No Retail Individual Investor will be Allotted less than the minimum Bid Lot subject to availability of shares in Retail Individual Investor Category and the remaining available shares, if any will be Allotted on a proportionate basis. The Issuer is required to receive a minimum subscription of 90% of the Issue (excluding any Issue for Sale of specified securities). However, in case the Issue is in the nature of Offer for Sale only, then minimum subscription may not be applicable.

7.1 ALLOTMENT TO RIIs

Bids received from the RIIs at or above the Issue Price may be grouped together to determine the total demand under this category. If the aggregate demand in this category is less than or equal to the Retail Category at or above the Issue Price, full Allotment may be made to the RIIs to the extent of the valid Bids. If the aggregate demand in this category is greater than the allocation to in the Retail Category at or above the Issue Price, then the maximum number of RIIs who can be Allotted the minimum Bid Lot will be computed by dividing the total number of Equity Shares available for Allotment to RIIs by the minimum Bid Lot (“**Maximum RII Allottees**”). The Allotment to the RIIs will then be made in the following manner:

- a) In the event the number of RIIs who have submitted valid Bids in the Issue is equal to or less than Maximum RII Allottees, (i) all such RIIs shall be Allotted the minimum Bid Lot; and (ii) the balance available Equity Shares, if any, remaining in the Retail Category shall be Allotted on a proportionate basis to the RIIs who have received Allotment as per (i) above for the balance demand of the Equity Shares Bid by them (i.e. who have Bid for more than the minimum Bid Lot).
- b) In the event the number of RIIs who have submitted valid Bids in the Issue is more than Maximum RII Allottees, the RIIs (in that category) who will then be Allotted minimum Bid Lot shall be determined on the basis of draw of lots.

7.2 ALLOTMENT TO NIIs

Bids received from NIIs at or above the Issue Price may be grouped together to determine the total demand under this category. The Allotment to all successful NIIs may be made at or above the Issue Price. If the aggregate demand in this category is less than or equal to the Non-Institutional Category at or above the Issue Price, full Allotment may be made to NIIs to the extent of their demand. In case the aggregate demand in this category is greater than the Non-Institutional Category at or above the Issue Price, Allotment may be made on a proportionate basis up to a minimum of the Non-Institutional Category.

7.3 ALLOTMENT TO QIBs

For the Basis of Allotment to Anchor Investors, Bidders/Applicants may refer to the SEBI ICDR Regulations, 2009 or RHP/Prospectus. Bids received from QIBs Bidding in the QIB Category (net of Anchor Portion) at or above the Issue Price may be grouped together to determine the total demand under this category. The QIB Category may be available for Allotment to QIBs who have Bid at a price that is equal to or greater than the Issue Price. Allotment may be undertaken in the following manner:

- a) In the first instance allocation to Mutual Funds for up to 5% of the QIB Category may be determined as follows: (i) In the event that Bids by Mutual Fund exceeds 5% of the QIB Category, allocation to Mutual Funds may be done on a proportionate basis for up to 5% of the QIB Category; (ii) In the event that the aggregate demand from Mutual Funds is less than 5% of the QIB Category then all Mutual Funds may get full Allotment to the extent of valid Bids received above the Issue Price; and (iii) Equity Shares remaining unsubscribed, if any and not allocated to Mutual Funds may be available for Allotment to all QIBs as set out at paragraph 7.4(b) below;
- b) In the second instance, Allotment to all QIBs may be determined as follows: (i) In the event of oversubscription in the QIB Category, all QIBs who have submitted Bids above the Issue Price may be Allotted Equity Shares on a proportionate basis for up to 95% of the QIB Category; (ii) Mutual Funds, who have received allocation as per (a) above, for less than the number of Equity Shares Bid for by them, are eligible to receive Equity Shares on a proportionate basis along with other QIBs; and (iii) Under-subscription below 5% of the QIB Category, if any, from Mutual Funds, may be included for allocation to the remaining QIBs on a proportionate basis.

7.4 ALLOTMENT TO ANCHOR INVESTOR (IF APPLICABLE)

- a) Allocation of Equity Shares to Anchor Investors at the Anchor Investor Issue Price will be at the discretion of the issuer in consultation with the Investor Selling Shareholder and the BRLMs, subject to compliance with the following requirements:
 - 1) not more than 60% of the QIB Category will be allocated to Anchor Investors;
 - 2) one-third of the Anchor Investor Portion shall be reserved for domestic Mutual Funds, subject to valid Bids being received from domestic Mutual Funds at or above the price at which allocation is being done to other Anchor Investors; and

Based on the physical book and at the discretion of the issuer in consultation with the BRLMs, selected Anchor Investors will be sent a CAN and if required, a revised CAN.
- c) **In the event that the Issue Price is higher than the Anchor Investor Issue Price:** Anchor Investors will be sent a revised CAN within one day of the Pricing Date indicating the number of Equity Shares allocated to such Anchor Investor and the pay-in date for payment of the balance amount. Anchor Investors are then required to pay any additional amounts, being the difference between the Issue Price and the Anchor Investor Issue Price, as indicated in the revised CAN within the pay-in date referred to in the revised CAN. Thereafter, the Allotment Advice will be issued to such Anchor Investors.
- d) **In the event the Issue Price is lower than the Anchor Investor Issue Price:** Anchor Investors who have been Allotted Equity Shares will directly receive Allotment Advice.

7.5 BASIS OF ALLOTMENT FOR QIBs (OTHER THAN ANCHOR INVESTORS), NIIs AND RESERVED CATEGORY IN CASE OF OVER-SUBSCRIBED ISSUE

In the event of the Issue being over-subscribed, the Issuer may finalise the Basis of Allotment in consultation with the Designated Stock Exchange in accordance with the SEBI ICDR Regulations, 2009.

The allocation may be made in marketable lots, on a proportionate basis as explained below:

- a) Bidders may be categorized according to the number of Equity Shares applied for;
- b) The total number of Equity Shares to be Allotted to each category as a whole may be arrived at on a proportionate basis, which is the total number of Equity Shares applied for in that category (number of Bidders in the category multiplied by the number of Equity Shares applied for) multiplied by the inverse of the over-subscription ratio;
- c) The number of Equity Shares to be Allotted to the successful Bidders may be arrived at on a proportionate basis, which is total number of Equity Shares applied for by each Bidder in that category multiplied by the inverse of the over-subscription ratio;
- d) In all Bids where the proportionate Allotment is less than the minimum Bid Lot decided per Bidder, the Allotment may be made as follows: the successful Bidders out of the total Bidders for a category may be determined by a draw of lots in a manner such that the total number of Equity Shares Allotted in that category is equal to the number of Equity Shares calculated in accordance with (b) above; and each successful Bidder may be Allotted a minimum of such Equity Shares equal to the minimum Bid Lot finalised by the Issuer;
- e) If the proportionate Allotment to a Bidder is a number that is more than the minimum Bid lot but is not a multiple of one (which is the marketable lot), the decimal may be rounded off to the higher whole number if that decimal is 0.5 or higher. If that number is lower than 0.5 it may be rounded off to the lower whole number. Allotment to all Bidders in such categories may be arrived at after such rounding off; and
- f) If the Equity Shares allocated on a proportionate basis to any category are more than the Equity Shares Allotted to the Bidders in that category, the remaining Equity Shares available for Allotment may be first adjusted against any other category, where the Allotted Equity Shares are not sufficient for proportionate Allotment to the successful Bidders in that category. The balance Equity Shares, if any, remaining after such adjustment may be added to the category comprising Bidders applying for minimum number of Equity Shares.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are FIPB and the RBI.

The Government has from time to time made policy pronouncements on FDI through press notes and press releases. The Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India ("DIPP"), issued consolidated FDI Policy, which with effect from August 28, 2017 consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DIPP that were in force and effect as on August 28, 2017. The Government proposes to update the consolidated circular on FDI Policy once every year and therefore, the Consolidation FDI Policy will be valid until the DIPP issues an updated circular.

The transfer of shares by an Indian resident to a Non-Resident does not require the prior approval of the FIPB or the RBI, provided that (i) the activities of the investee company are under the automatic route under the Consolidated FDI Policy and transfer does not attract the provisions of the SEBI (Substantial Acquisition of Shares and Takeovers) Regulations, 2011; (ii) the non-resident shareholding is within the sectoral limits under the Consolidated FDI Policy; and (iii) the pricing is in accordance with the guidelines prescribed by SEBI/RBI.

As per the existing policy of the Government of India, OCBs cannot participate in this Issue.

The Equity Shares offered in the Issue have not been and will not be registered under the Securities Act, and may not be offered or sold within the United States, except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the Securities Act and applicable U.S. state securities laws. Accordingly, the Equity Shares are being offered and sold (i) within the United States to persons reasonably believed to be "qualified institutional investors" (as defined in Rule 144A under the Securities Act) pursuant to Rule 144A under the Securities Act or other applicable exemption under the Securities Act and (ii) outside the United States in offshore transactions in reliance on Regulation S under the Securities Act and the applicable laws of the jurisdictions where such offers and sales occur.

The above information is given for the benefit of the Applicants. Our Company, the Selling Shareholders and the LM are not liable for any amendments or modification or changes in applicable laws or regulations, which may occur after the date of this Prospectus. Applicants are advised to make their independent investigations and ensure that the Applications are not in violation of laws or regulations applicable to them.
